

# W. BILL LTD. WOOLLEN MERCHANTS LONDON

**NOTICE.**—Subscribers to WHITAKER'S ALMANACK will recognize the name as familiar, having occupied this position now for 44 years, well known as distributors of standard BRITISH WOOLLENS. The schedule below gives as formerly a rough description of varieties suited to every-day requirements in most households valuing quality goods at home and overseas for different climates and seasons. The change now notified has been adopted for family reasons only. The business will be carried on precisely as before by the son and grandsons of the founder, and who have consistently aimed at supplying dependable merchandize at fair rates, relying not on fugitive but regular custom and recommendation: the antithesis of the present-day craze for novelty, and so-called cheapness.

**HOMESPUNS—Scotch and Irish**, peasant-made from all districts; for country wear, sport, and travelling.

**SCOTCH CHEVIOTS**; for warm, rough suits, and overcoats.

**WELSH, IRISH, & SCOTCH TWEEDS**; for country and sports wear; light, medium and heavy weights.

**TWEEDS**; for ordinary town wear; various weights and mixtures.

**WORSTEDS & SAXONIES**; for business, & professional wear.

**SERGES**; navy, grey, and black; rough, and smooth; all seasons.

**CASHMERES**; for tropical, and semi-tropical wear.

**FLANNEL-TWEEDS**; for light summer, and semi-tropical wear.

**COSTUME TWEEDS**; for ladies' country wear.

**OVERCOATINGS**; light, medium, and heavy.

**MOTOR & TRAVELLING RUGS, 15/- to 50/-**, in great variety and at competitive rates. All pure wool.

An outstanding stock of Scotch and Irish Hand and Frame Knit **PULLOVERS, CARDIGANS, SHAWLS, SCARVES**, etc.

Also Golf, Shooting, and Fishing **STOCKINGS** and **SOCKS**—heavy, medium, and light; plain and fancy, all of rare value and worth.

Of all these goods, sound BRITISH manufacture, whether mill, or peasant made, we keep a great stock. They can be critically inspected and handled in bulk by the PUBLIC as well as by the TRADE. Quotations are of little worth without reference to the character and merits of a cloth, as of any other merchandise; that is the reason we advise any prospective customers to call at the warehouse when in London. When that is not possible, we will submit patterns if a description of what is wanted is given, not for a perfunctory request.

**Warehouse: 31, GREAT PORTLAND STREET,**

**Branch: 93, New Bond Street, LONDON.**

Telephone: Langham 2426.

## LETTERPRESS PRINTING.

**N**O other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man, William Clowes, who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London, and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £350.

From the first the business was progressively successful. The just enough of type for one day's work, which compelled him at the beginning to run off on the hand press at night what he had set during the day, so as to release the type for further service, was very speedily multiplied. His single press and one journeyman printer as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long, larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray, Longmans, and the Religious Tract Society, for which the firm still print to this day.

The printing of newspapers by steam presses was introduced into the *Times* office in 1814. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Blackfriars—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm, though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulready envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs. Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and

spent long days at the Duke Street printing works correcting his stories in proof.

When the Great Exhibition of 1851 was being organised, Messrs. Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no fewer than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to-day.

Besides the Great Exhibition, Messrs. Clowes carried out the printing in connection with all the South Kensington Exhibitions.

When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported, the lawyers formed a committee with the object of providing their own reports, and Mr. George Clowes, of William Clowes & Sons, was consulted. When the project seemed unable to be carried on through lack of capital, the firm offered to finance the publication to the extent of £10,000. The offer was accepted, and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps, however, the largest undertaking of all was the printing of the British Museum Catalogue, which took twenty-seven years to do, and was full of foreign type.

As long ago as 1873 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets), that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically-driven machinery, this now constitutes one of the largest book-printing establishments in Great Britain.

The relief of pressure on the London works was only temporary, and increasing business necessitated, in 1897, the renting of additional land at Duke Street, where another building was erected. On the expiry of the lease of the original premises in Northumberland Court, this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language, the firm has proved itself of incalculable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc., for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print-craft on its technical side; and to-day as modern printers their several establishments stand second to none.

## PREFACE TO THE 66<sup>TH</sup> ANNUAL VOLUME.

(1934.)

"WHITAKER'S ALMANACK" was founded in 1868 by the late Joseph Whitaker, F.S.A., who was previously Editor of *The Gentleman's Magazine*, in which capacity he prepared for his own use a "common-place book" of extracts from official publications and of original compilations. This note book formed the nucleus of WHITAKER'S ALMANACK for 1869, which contained 360 pages, with an Index of 1,200 references. The Complete edition of WHITAKER'S ALMANACK for 1934 contains 1,000 pages, with an Index of 25,000 references.

The development of some of the sections in "Whitaker" reflects the growth of democracy and the devolution of government in the period that has elapsed since 1868. Government and Legal Offices filled 17 pages in 1869, and 100 in 1934, while the Dominions require treble the space they formerly occupied. India is represented in 37 pages against 7. The United States require 20 in place of 2, and Foreign Countries now occupy 90 pages against 31 in 1869. Interest in domestic affairs is shown by the extension of the list of Societies and Institutions from 3 to 32 pages, and of Life Assurance from 2 to 14.

Increases have taken place in various parts of the present volume in order to include Agricultural Bureaux, the Import Duties Advisory Committee, the Imperial Communications Advisory Committee and the London Passenger Transport Board, while additional space has been allotted to statistics of Trade and Finance, and Air Transport. The Postal Information has also been re-modelled, and Parcel, Telephone and Telegraph rates are now shown in tabular form with the approximate time occupied in transit by sea or air.

The Editor-in-Chief is deeply grateful to correspondents for their valuable assistance and hopes they will continue their good offices in the coming year, but they are earnestly requested to note the *first* day of October as the *last* day for suggestions to reach the Office if they are to be effective.

# THE BURBERRY

—the one topcoat that is made to resist every kind of weather—rain, sleet, snow and bitter winds! The Burberry keeps its wearer safe, snug and warm. Proofed without rubber and self-ventilating. The Burberry is the most healthful topcoat it is possible to buy—a lifelong investment in comfort and security.

1 1 1

*Send for the Burberry Book, which tells the story of The Burberry and why it is the best overcoat that money can buy. Please mention this publication.*

*The World's  
Best Weatherproof*

General Information can be obtained from:—

**THE SUPERINTENDENT, SPITALFIELDS MARKET & LONDON FRUIT EXCHANGE,**  
**LONDON, E. 1.**

Telephone No. : **Bishopsgate 7331-2.**

# ★ WHY NOT FACE THE FACTS?

## Your Life Foretold by Astrology

**PROFESSOR ELROY**, the astrologer, whose work is known and appreciated in practically every country on the face of the globe, invites interested readers to obtain a free Astrological study of their lives, prepared according to his original and unique method.

Whatever your present opinions of Astrology may be—whether you are favourably inclined, definitely sceptical, or of an open mind—he invites YOU to test his system, and join the legion of satisfied clients whose praise has won for him the reputation of being one of the greatest living exponents of the science. People of various nationalities testify to his powers and the uncanny accuracy of his predictions.

If you are not afraid to face the **FACTS about yourself**, and would welcome the truth, a review of your life will be sent if you are sufficiently interested to ask. This document of about 500 words will be written in plain, straightforward language, and will throw light on much which at this moment may seem dark or doubtful.

If you wish to accept this offer, write a brief note, stating the exact **DATE** and **PLACE** of your birth, enclosing 1/-

Postal Order to defray actual expenses (partial cost of this announcement, postage, clerical charges, etc.), and within a few hours of your letter reaching its destination, a candid, clearly-written statement will be sent to you

**Address: PROF. ELROY (Dept. W.A. 2), 37, ALBEMARLE STREET, LONDON, W. 1**

**CHURCH MUSIC. PLAYS. JUVENILE BOOKS.**

**Society for Promoting Christian Knowledge, Northumberland Av., London, W.C. 2.**

*And of all Booksellers.*

*Lists gratis and post free.*

## SETTLEMENT IN SOUTH AFRICA

The family man being pensioned off, the public school boy starting out, the farmer who is ambitious—to all these South Africa offers low taxation, cheap land, labour, living and education, scope for sport and work in a glorious climate.

The 1820 Memorial, Settlers' Association (working in co-operation with the Oversea Settlement Department of the Dominions Office) gives practical advice and assistance.

*Write to—*

# The Rationalist Press Association Ltd.

is an organization of men and women who desire to rid the world of superstition and belief in the supernatural. Members are pledged to no creed, to no set of dogmas, but they aim at making reason supreme in thought and conduct.

**The R. P. A. seeks to achieve its purpose** mainly by the publication at low prices of the best works, old and new, in Science, History, and Philosophy. Members are given the whole value of their subscriptions in books. The lowest subscription is 5s.

All interested are invited to write for full particulars, including book catalogue and specimen copy of the Rationalist monthly, *The Literary Guide*, to THE GENERAL SECRETARY, R. P. A. LTD., 4-6 JOHNSON'S COURT, FIFTH STREET, LONDON, E.C. 4.

A return made of the slaughter of cattle in the United Kingdom for twelve months up to May 30, 1932, puts the number at 1,729,000 animals, which at an average weight of say 660 lb. of meat equals some 500,000 tons home-produced. The total supply of about 1,100,000 tons Beef would thus average out about 50 lb. per head of population per annum. 856,000 calves were also slaughtered in the United Kingdom; these at say 88 lb. meat per animal give 33,500 tons Veal in addition.

## BRITISH BEET SUGAR.

The production of beet for sugar in England and Wales has varied with the inducements of the Government subsidy, and from 348,000 acres cultivated in 1930 fell to 233,000 acres in 1931 and 250,000 acres in 1932. For 1933 the area which has been sown is estimated at 340,000 acres.

The resulting yield of sugar was said to be 420,000 tons in 1930, 250,000 tons in 1931, and 350,000 tons in 1932.

The subsidy granted by the Government on sugar manufactured from home-grown beet is now 6s. 6d. per cwt., expiring on September 30, 1934, but a special advance of a further 2s. 3d. per cwt. has been temporarily allowed to the industry, repayable if prices warrant.

Austria ..	468,577
The World ..	*32,400,000

\* Estimated.

## CURIOSITIES OF THE CALENDAR.

Some Curiosities of the Calendar.—It will be seen in a Table on page 81 that there will not be a Full Moon in February of the year 1934. This is sometimes spoken of as being a very rare occurrence, but actually it happens 32 times in the 718 years between 1582 and 2299 inclusive, or on the average once in every 22 or 23 years. This is a somewhat less rare event than the occurrence of five Sundays in February, which happens when the Dominical letters of the year are D.C., 13 times in four centuries, and occurs 23 times in the period above specified. A rarer event than either of these is the occurrence of February without a Full Moon in a Leap Year, which happened in 1608 and may not again until 3096, though it is difficult to speak with certainty. A coincidence that may be considered the rarest event in the calendar seems to be the occurrence of five Sundays in February in a year when Easter falls on its latest date, April 25. In the Julian Calendar this conjunction of events occurs once in each Easter cycle of 532 years, and it did so in 1736. In the Gregorian Calendar it has not yet occurred, and will not until 3784. Between then and 5220 it will happen eight times in the 1336 years, after which there is a gap of 4168 years before 9288, when it is again due. (S. B. Gaythorpe in the *British Astronomical Association Journal*, July, 1932.)

# CURRENT LITERATURE

A MONTHLY MAGAZINE  
FOR BOOK-LOVERS

"CURRENT LITERATURE" contains each month the complete list of books published in Great Britain during the past month, classified under subjects from "Aeronautics" to "Zoology."

Reviews of the best books received by the Editor, illustrated by Batt.

Subscription 5/- per annum.

WRITE FOR SPECIMEN COPY.

J. WHITAKER & SONS, LTD.  
12, WARWICK LANE, LONDON, E.C.4

## A

A s, First class.  
 A.A., Automobile Association.

F.L.S., — of the Linnean Society.

F.R.A.L., — of Royal Anthropological Institute.

F.R.A.M., — of Royal Academy of Music.

F.R.A.S., — of the Royal Astronomical Society.

F.R.C.M., — of the Royal College of Music.

F.R.C.O., — of Royal College of Organists.

F.R.C.P., — F.R.C.P. Ed., and F.R.C.P.L., — of the Royal College of Physicians of London, of Edinburgh, and of Ireland respectively.

F.R.C.S., — of Royal College of Surgeons.

F.R.C.S. Ed., ditto of Edinburgh.

F.R.C.S.I., — of Ireland.

F.R.C.V.S., — of Royal College of Veterinary Surgeons.

F.R.F.P.S.G., — of the Royal Faculty of Physicians and Surgeons of Glasgow.

F.R.G.S., — of the Royal Geographical Society.

F.R.H.S., — of the Royal Horticultural Society.

F.R.Hist.Soc., ditto Historical.

F.R.I.B.A., — of the Royal Institute of British Architects.

F.R.M.S., ditto Microscopical.

F.R.Met.Soc., — of Royal Meteorological Society.

F.R.S., — of the Royal Society.

F.R.S. Ed., ditto of Edinburgh.

F.R.S.A., — of the Royal Society of Arts.

F.R.S.L., — Do. Literature.

F.R.San.I., — Do. Sanitary Inst.

F.S.A., — of the Society of Antiquaries.

F.S.A.A., — Do. Incorporated Accountants and Auditors.

F.S.I., — of Surveyors Institution.

F.S.S., Do. Statistical Society.

F.Z.S., — of the Zoological Society.

fcp., Foolscap.

F.D. (*Fidei Defensor*), Defender of the Faith.

Per. (*perit*), He did it.

F.H., Fine Hydrant.

F.M.S., Federated Malay States.

F.O.B., Free on board.

## G

G.B.E., Knight or Dame Grand Cross of British Empire.

G.C.B., Knight Grand Cross of the Bath.

G.C.I.E., Knight Grand Commander of Indian Empire.

G.C.M.G., Knight Grand Cross of St. Michael and St. George.

G.C.S.I., Knight Grand Commander of Star of India.

G.C.V.O., Knight Grand Cross of Royal Victorian Order.

G.H.Q., General Headquarters.

G.M.T., Greenwich Mean Time.

G.O.C., General Officer Commanding.

G.P.O., General Post Office.

G.R. (*Georgius Rex*), King George.

G.R.C.M., Graduate of the Royal College of Music.

G.R.S.M., Graduate of the Royal Schools of Music (Royal Academy and Royal College).

G.S.O., General Staff Officer; Gr., Grade (1st, and, 3rd).

## H

H.A.C., Honble. Artillery Company.

H.E., His Excellency.

H.E.H., His (Her) Exalted Highness (British India).

H.G.D.H., His (Her) Grand Ducal Highness.

H.H., His (Her) Highness.

H.I.H., His (Her) Imperial Highness.

H.I.M., His (Her) Imperial Majesty.

H.J.S. (*Hic jacet sepultus*), Here lies buried. cf. H.S.E.

H.L.L., Highland Light Infantry.

H.M., His, or Her, Majesty.

H.M.S., His Majesty's Ship.

h.p., Half pay.

hp., horse power.

H.R.H., His (Her) Royal Highness.

H.S.E. (*Hic sepultus est*), Here lies buried. cf. H.J.S.

H.S.H., His (Her) Serene Highness.

## I

I.A., Indian Army.

I.A.R.O., Indian Army Reserve of Officers.

ib. (*ibidem*), In the same place.

I.C.S., Indian Civil Service.

id. (*idem*), The same.

I.D.B., Illicit diamond buyer.

Id. (*id est*), That is.

I.F.S., Irish Free State.

I.H.S. (*Iesus Dominus Salvator*), Jesus the Saviour of Mankind; originally, these were the Greek Capital letters, IHX.

I.L.P., Independent Labour Party.

I.M.S., Indian Medical Service.

Incon. (*inconito*), Unknown.

In loc. (*in loco*), In its place.

I.N.R.I. (*Iesus Nazareus Rex Iudeorum*), Jesus of Nazareth King of the Jews.

Inst. (instant), current month.

I.O.O.F., Independent Order of Odd Fellows.

I.S.C., Indian Staff Corps (now Ind. Army).

I.S.O., Imperial Service Order.

I.W., Isle of Wight.

## J

J., Judge.

J.P., Justice of the Peace.

M.S.A. — of Society of Architects.  
M.V.O. — of Royal Victorian Order.  
M.C., Military Cross.  
M.C.C., Marylebone Cricket Club.  
M.C.S., Malayan Civil Service.  
Mdlle., Mademoiselle.  
Mem. (*memento*), Remember.  
M.F.H., Master of Fox Hounds.  
M.G. Corps, Machine Gun Corps.  
Mgr., Mounsignor.  
Mil., Military, Militia.  
Min. Plenip., Minister Plenipotentiary.  
Mme., Madame.  
M.O.H., Medical Officer of Health.  
m.p.h., Miles per hour.  
MSS., Manuscript.  
Mus. D. [B.], Doctor, [Bachelor], of Music.

M.V., Motor Vessel.  
M.W.B., Metropolitan Water Bd.

## N

N, North.  
Nal., Nationalist.  
Nav., Naval.  
N.B. (*Nota bene*), Note well.  
N.C.O., Non-commissioned Officer.  
n.d., no date.  
Nem. con. (*Nemine contradicente*), No one contradicting.  
N.I., Northern Ireland.  
N.L., National Liberal.  
No. (*Numero*), Number.  
Non seq. (*non sequitur*), It does not follow.  
N.R.A., National Recovery Administration (U.S.A.).  
N.S., Nova Scotia.  
N.S.W., New South Wales.  
N.U.R., National Union of Railwaymen.  
N.W.P.[T.], North-West Provinces [Territory].  
N.Z., New Zealand.

## O

O.B.E., Officer of British Empire Order.  
ob. or obi., died.  
O.E.D., Oxford English Dictionary.  
O.H.M.S., On His Majesty's Service.  
O.K., "All correct."  
O.M., Order of Merit.  
O.P. Opposite Prompt side (of Theatre).  
O.P. Out of Print (of books).  
O.P. Old Prices (Club).  
O.S., Old Style.  
O.S.B., Order of St. Benedict.  
O.T.C., Officers' Training Corps.  
O.U.D.S., Oxford University Dramatic Society.  
Oxon., Oxford.  
Oz., Ounce.

## P

P. (in P.R.S., &c.), *President* — see P.R.S., R.A., &c.  
P & O., Peninsular & Oriental.  
P.A.S.I. Professional Associate of the Surveyors' Institution.  
P.C., Privy Councillor.  
P.C. —, Police-constable —.  
Ph.C. — Pharmaceutical Chemist.  
Ph.D., Doctor of Philosophy.  
P.L.A., Port of London Authority.  
P.M. (*post meridiem*), After noon.  
P.M.G., Postmaster-General.  
P.M.O., Principal Medical Officer.  
P.P.C. (*Pour prendre congé*), To take leave.  
Pro tem. (*pro tempore*), For the time being.

Prox. (*proximo*), Next month.  
P.S. (*Post scriptum*), Postscript.  
P.S.A., Pleasant Sunday Afternoon.  
p.a., Graduate of Royal Air Force Staff College.  
p.s.c., Graduate of Military (or Naval) Staff College.  
P.T.O., Please turn over.  
P.W.D., Public Works Dept.

## Q

Q.A.L.A.S., Qualified Associate, Land Agents' Society.  
Q.C., Queen's Counsel.  
q. e. d. (*quod erat demonstrandum*), which was to be proved.  
Q.M.G., Quartermaster-General.  
Q.S., Quarter Sessions.  
Qmr., Quartermaster.  
q.v. (*quod vide*), "which see."  
Qy. (*quaere*), Query.

## R

R.A., Royal Artillery or Royal Academy.  
R.A.C., — Automobile Club.  
R.A.F., — Air Force.  
R.A.M., — Academy of Music.  
R.A.M.C., — Army Medical Corps.  
R.A.N., — Australian Navy.  
R.A.P.C., — Army Pay Corps.  
R.C.N., — Canadian Navy.  
R.A.O.C., — Army Ordnance Corps.  
R.A.S.C., — Army Service Corps.  
R.A.V.C., — Army Veterinary Corps.  
R.B.A., — Society of British Artists.  
R.D., — Naval Reserve Decoration, or Rural Dean.  
R.E., — Engineers.

R.F.A., Royal Field Artillery.  
R.G.A., — Garrison Artillery.  
R.H.A., — Horse Artillery, or —  
Hibernian Academy.  
R.I.A., — Irish Academy.  
R.I.M., — Indian Marine.  
R.M., — Marines.  
R.M.A., — Military Academy.  
R.M.S., — Mail Steamer.  
R.N., — Navy; R.N.R., ditto Reserve; R.N.V.R., ditto Volunteer Reserve.  
R.O.I., — Institute of Oil Painters.  
R.S.A., — Scottish Academician.  
R.U. Rif., — Ulster Rifles.  
R.W.S., — Water Colour Society.  
R.Y.S., — Yacht Squadron.  
R.C., Roman Catholic.  
R.I.P. (*Requiescat in pace*), May he rest in peace.  
R.M., Resident Magistrate.  
Ro. (*recto*), On the right hand page.  
R. of O., Reserve of Officers.  
R.B.C., Lady of Royal Red Cross.  
R.S.V.P. (*Répondez, s'il vous plaît*), Answer, if you please.  
R.T.S., Religious Tract Society.  
Rt. Hon., Right Honourable.

## S

Sc. (*scilicet*), Namely.  
Sic, So written.  
S.J. (Society of Jesus), Jesuit.  
S.O.S. ("Save Our Souls") Distress Signal.  
s.p. (*sine prole*), Without issue.  
s.p.l., Without legitimate issue.  
S.P.C.A., Society for the Prevention of Cruelty to Animals.  
S.P.C.K., Society for the Promotion of Christian Knowledge.  
S.P.G., Society for the Propagation of the Gospel.

S.P.Q.R. (*Senatus Populusque Romanus*), The Senate and People of Rome.  
S.S.C., Solicitor of the Supreme Court.  
Stet, Let it stand.

## T

T.A., Territorial Army; T.D., ditto Decoration.  
Toc H., Talbot House.

Y.W.C.A., Young Women's Christian Association.

## BOY SCOUTS. (Incorporated.)

FOUNDED in 1908, as a result of an experimental camp held by the Chief Scout the previous summer at Brownsea Island, Dorsetshire, the movement was organised by Lord Baden-Powell, G.C.M.G., G.C.V.O., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

The Movement (whose membership exceeds 2,000,000) has taken root in all parts of the British Empire, and nearly every other country in the world.—*Imperial Headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

## THE GIRL GUIDES ASSOCIATION.

A movement founded by Lord Baden-Powell, G.C.M.G., G.C.V.O., K.C.B., Chief Scout, on the lines of the Boy Scouts and incorporated by Charter in 1915, while in the year 1923 H.M. the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character, training them in habits of observation, obedience, and self-reliance; inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over 1,000,000 all over the world, that of the British Isles alone being over 586,000. *Imperial Headquarters*, 17-19 Buckingham Palace Road, London, S.W. 1.

## PERPETUAL CALENDAR

or Tables for finding the day of the week for any date A.D.

(Copyright by A. F. L. Wilkinson.)

TO USE THE CALENDAR:—Look up the Index Numbers corresponding to the Century, the Year (last two figures), and the Month, respectively, in the first three tables; add these three numbers together and add also the Day of the Month; in the fourth table, *opposite the sum obtained*, read the Day of the Week.

(1)

Table 4 ... 20 = Tuesday		Table 4 ... 27 = Friday.	

NOTE.—In England the change from the Julian System or Old Style to the Gregorian System or New Style, was made in September, 1752, when the 11 days 3rd to 13th inclusive were omitted, and Wednesday Sept. 2 was immediately followed by Thursday Sept. 14. Other countries made the change at dates varying from 1582 to 1923. (See p. 161.)

If it is desired to look up a date after 1752 in Old Style, or before 1752 in New Style, it can be done by taking a date 700 years earlier in the first case or 400 years later in the second case; e.g., 1923 in Old Style is the same as 1223, and 1582 in New Style is the same as 1982.

# NOTES FOR THE YEAR 1934.

## PHASES OF THE MOON.

☾ Last Quarter . . . . .	8d.	21h.	35 8m.
● New Moon . . . . .	15	13	37 1
☾ First Quarter . . . . .	22	11	50 3
● Full Moon . . . . .	30	16	31 4

Perigee 15d 17h. 221,970 miles.

Apogee 27d. 19h. 252,350 "

Mean Longitude of Asc. Node, January 1 321° 34'.

RAIN FELL AT GREENWICH in January, 1933.  
on 15 days; total fall 0.99 inch; below the  
average by 0.70 inch.

## MONTHLY NOTES.

Jan. 1. Holiday on Stock Exchange; Bank Holiday in Scotland. Dog and establishment licences renewable. King's taxes due.

— County Quarter Sessions to be held within the period of 21 days immediately preceding or immediately following Dec. 25 last.

5. Dividends on Consols, &c., due.

9. Christmas Fire Insurances must be paid.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks 6h 2m. Civil twilight ends 16h 55m. Night begins 18h 5m. The length of the Day from Sunrise to Sunset is 7h 55m.

The ending of Civil twilight is here defined as the time when the Sun's centre is 71' below the horizon. Day breaks and Night begins when it is 18' below.

Jan. 2. Earth at least distance from the Sun. Perihelion: 91,344,000 miles.

Jan. 3. *morn* Occultation of  $\delta$  Cancer, mag 4.2. See p. 139.

Jan. 9. *ph* Jupiter in conjunction with  $\gamma$ ,  $6^{\circ}$  N.

Jan. 13. Venus stationary.

Jan. 16, 23h. Mars in conjunction with  $\delta$ ,  $0^{\circ} 8'$  S.

Jan. 17. *oh* Saturn in conjunction with  $\eta$ ,  $0^{\circ} 7'$  S.

Jan. 17. *10h* Venus in conjunction with  $\gamma$ ,  $4^{\circ}$  N.

Jan. 17. 18h. Mars and Saturn in conjunction  $\delta$ ,  $0^{\circ} 12'$  S.

Jan. 20. Mercury in superior conjunction.

Jan. 30. Moon partially eclipsed, partly visible at Greenwich. See p. 138.

Jan. 30. 15h. Mercury and Saturn in conjunction.  $\delta$ ,  $1^{\circ} 0'$  S.

In this month the Mornings increase 25m., the Afternoons 45m.

Jan 16. Uranus rises 11h. *oh*, sets 0h. 33m. Neptune rises 20h. 25m., sets 9h. 55m.

**Notes on Time Numeration: Tables of the Moon, &c.**—According to the practice of recent years, the day as treated in this Almanack is divided into 24 hours, numbered from 0 to 23, the hour following the midnight which begins the day being called 0. This system, formerly known as G.C.T., was adopted for astronomical purposes in 1925 and is now indicated by the initials G.M.T., U.T. (*Universal Time*), or W.Z. (*Weltzeit*), according to choice, but in the Tables of *High Water* on pages 85, 89, 93, &c., the older system is followed, both midnight and noon being 0h.

The attempt has been made by astronomers to have this system used in railway time tables, but the authorities will not agree unless the 24-hour system is adopted nationally.

On page 3 of each month the position of the Moon, and other details relating thereto, are given for the midnight which ends the day specified in the first column. The second column gives the

## MORNING AND EVENING STARS.

☿ MERCURY, being in superior conjunction on the 20th, rises and sets nearly with the Sun.

♀ VENUS is a brilliant object (Mag. -4.4) in the early evening sky in the first part of the month, it becomes fainter and sets earlier towards the end.

♂ MARS, now comparatively faint, is an evening star, setting about 6 o'clock. (See Saturn below.)

♃ JUPITER is a bright object in the morning sky in Virgo. Moving from west to east it passes Spica in the evening of the 5th. Magnitude -1.5 to -1.7.

♄ SATURN (Mag. 0.9) will be several degrees lower than, and to the right of, Venus at the beginning of the month. Mars is still lower. In the early evening of the 17th the three planets will be placed nearly in a vertical line, Mars being only a few minutes below Saturn. The thin crescent moon will be above Venus on its left. (See Conjunctions on opposite page.)

time of the rising which happens during that day, and the figures in the two following columns show the time of the southing and of the setting which next follow that rising. These sometimes happen after the midnight which ends the day; and in such cases the figures are in heavy type, so that it is to be remembered in using this table that these distinctive figures always indicate a time on the morning of the day of its line. A similar system is followed in the Tables of the planets. (See pages 85, 86, 93, &c.) In the ephemerides of the planets on page 3 of each month, italic figures are occasionally used (pages 92, 100, 120, 128) to indicate the change of sign of the declination noted in the heading.

Configurations of Jupiter's Satellites at 24. 45m. See p. 120

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5h. 44m. Civil twilight ends at 17h. 36m. Night begins at 18h. 45m. The length of the Day is 9h. 6m.

Feb. 5. Venus at inferior conjunction.

Feb. 5, 18h. Jupiter in conjunction with  $\Delta$ .  $\gamma$  7° N.

Feb. 7. Jupiter Stationary.

Feb. 8. Saturn in conjunction.

Feb. 8, 23h. Mercury and Mars in conjunction.  $\gamma$  0° 19' N.

Feb. 13. Total Eclipse of the Sun. Invisible at Greenwich. See p. 138.

Feb. 13, 17h. Saturn in conjunction with  $\Delta$ .  $\delta$  1° 8' N.

Feb. 15, 12h. Mars in conjunction with  $\Delta$ .  $\delta$  3° 8' N.

Feb. 15, 6h. Mercury in conjunction with  $\Delta$ .  $\delta$  2° 8' N.

Feb. 18. Mercury at greatest elongation. 18° E.

Feb. 24. Venus Stationary.

Feb. 26. morning. Jupiter's Satellites II and III in transit. See p. 138.

In this month the Mornings increase 50m.; the Afternoons 49m.

Constellations near the S. meridian at 22h.: Arcturus, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argos, Cancer, Hydra.

Feb. 15. Sun's semidiam. in Transit, 1m 6 sec. of Mean Time.

**No Full Moon in February.**—Reference to page 86 will show that there is not a Full Moon in this calendar month, an omission which is sometimes spoken of as being rare but which actually happens on the average every 22 or 23 years, but not at regular intervals. In the 718 years, from 1582 to 2299, February has been or will be without a Full Moon on 32 occasions. It has happened twice since the foundation of this Almanack, the years having been 1885 and 1915; the next occasion will be in the year 1951, which shows the irregularity.

The more rare occurrence when February is without a Full Moon in a Leap year has happened once in the period of 718 years above defined, the year being 1638, and it cannot be said definitely when this will happen again.

The occurrence of five Sundays in February is also infrequent. It happens 23 times in the period of 718 years under review, and always after an interval of 28 or 40 years.

\* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the countries drained by the Thames may cause a higher rise of the river, and the low lying riverside districts to be flooded.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 56m. Civil twilight ends 12h. 23m. Night begins 12h. 29m. The length of the Day is 10h. 48m.

Mar. 2. Neptune in Opposition. Distance from Earth 2,712,150,000 miles.

Mar. 4. 21h. Jupiter in conjunction with D. 7° N.

Mar. 6. Mercury in Inferior conjunction.

Mar. 11. Venus at Greatest Brilliance.

Mar. 12. 10h. Venus in conjunction with D. 9° N.

Mar. 13. 8h. Saturn in conjunction with D. 7° S.

Mar. 14. 8h. Mercury in conjunction with D. 0° 7° N.

Mar. 16. 4h. Mars in conjunction with D. 5° S.

Mar. 17. 23h. Uranus in conjunction with D. 11° 6° S.

Mar. 21. 7h. The Sun enters the Sign Aries (Equinox). Beginning of the Tropical Year.

Mar. 26. 10h. Occultation of 6 Cancri, mag. 4.2. (See p. 139.)

Mar. 31. 23h. Jupiter in conjunction with D. 7° N.

The Zodiacal Light may be seen after sunset in the middle of this month.

In this month the Mornings increase 68m.; the Afternoons 55m.

Constellations near the S. meridian at 22h.: Gemini, Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

Mar. 16. Sun's semidiam. in Transit, 17m. 4.42s. of Mean Time.

**The Tides.**—The double figures for Greenock (1st col.), March 30 in the table on opposite page, indicate that there is high water at that place twice in the first half of the day. A similar case occurs in April. Other instances of two high tides within the space of 24 hours are to be occasionally found, the reason for which may be briefly indicated:—

The Astronomical forces which produce the tides may be divided into two principal classes—(1) Semi-diurnal forces which tend to produce two equal tides in the lunar day, and (2) Diurnal forces which tend to produce one tide in the day.

The effect of the diurnal on the semi-diurnal forces is twofold. They affect morning and afternoon heights in opposite directions, raising the one and lowering the other, and thus produce

British waters the

## MORNING AND EVENING STARS.

☿ MERCURY being at Inferior Conjunction on the 6th is neither a morning nor evening star.

♀ VENUS is a morning star at maximum brilliance (magnitude - 4.3) on the 12th. It will be 5° above the horizon in east-south-east shortly after 5 o'clock in the middle of the month.

♂ MARS is above the horizon for a short time after sunset but will not be seen.

♃ JUPITER rises in the mid-evening, south of the east point. It is now retrograding and passes 4' north of Spica on the night of the 12th. Magnitude - 1.9 to - 2.0.

♄ SATURN in Capricorn rises an hour before the sun at the end of the month in the east-south-east. It will then be not far from Venus, about 3° south of the bright planet. Magnitude + 1.1.

a diurnal inequality in the height of the tide; secondly they shift the times of morning and afternoon high water in opposite directions, accelerating the one and retarding the other, and so increase the interval between two consecutive high tides and diminish the interval between the two which follow.

At any particular place the magnitude of these effects depends upon the ratio of the diurnal to the semi-diurnal forces at that place. In British waters this ratio is generally small and it is seldom that the tidal interval is altered so that two high tides occur within 12 hours.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 39m. Civil twilight ends 19h. 17m. Night begins 20h. 31m. The length of the Day is 22h. 57m.

Apr. 2. Mercury at greatest elongation. 28° W.

Apr. 8. Jupiter in Opposition. Distance from the Earth (Apr. 9) 413,800,000 miles.

Apr. 9. 20h. Saturn in conjunction with ♃. 12° 8'

Apr. 10. ♄ Venus in conjunction with ♃. 9° 3' 8'.

Apr. 12. 4h. Mercury in conjunction with ♃. 8° 6' 8'.

Apr. 14. Mars in conjunction.

Apr. 14. 4h. Mars in conjunction with ♃. 2° 6' 8'

Apr. 16. Venus at Greatest Elongation. 46° W.

Apr. 18. Uranus in conjunction.

Apr. 19. 8h. Mars and Uranus in conjunction. 0° 1' N.

Apr. 28. 2h. Jupiter in conjunction with ♃. 7° 7' N.

In this month the Moonings increase 6am.; the Afternoons 4pm. Constellations near the South meridian at 22h. Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

April 15, Sun's semidiam. in Transit, 1m. 47.5v of Mean Time.

April 16. Uranus rises 5h. 12m., sets 11h. 0m. Neptune rises 14h. 23m., sets 3h. 57m.

**The Nature of Light.**—The struggle between the corpuscle and the wave, associated always with the names respectively of Newton and Huygens, is ending in a manner as unexpected as it is illuminating. There is to be a reconciliation of hypotheses which we had thought to be mutually exclusive. We still find it difficult to understand how these two theories can both be true, yet there is good evidence in support of each of them. We conclude that what at one time may be beyond our understanding may later become clear, not only through the acquisition of fresh knowledge, but also by the training of our minds to new ways of thought.

Light properly so called is only a narrowly defined part of a far greater phenomenon, that of radiation in general. The length of light waves fall between close limits, but the ruffs of the wave motion apply to the infinitesimal waves of the Röntgen rays, on the one hand, and to the long

radio waves on the other. Moreover, radiations which are obviously conspecific, such as the showers of electrons and protons and atoms that are now produced so easily in our laboratories, are found to-day to obey in some measure the laws of light. The wave and the corpuscle are different aspects rather than different entities. (From the 'Universe of Light,' by Sir William Bragg.)

**The Date of Easter.**—Easter Sunday fell on April 1 in the year 1923, the nearest previous occasion to that being in 1888. It will again fall on this date in 1945 and 1956, after which the series of intervals of eleven years will be broken, and the coincidence will not occur until the year 2018.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

**May 1.** Day breaks at 2<sup>h</sup> 49<sup>m</sup>. Civil twilight ends at 2<sup>h</sup> 12<sup>m</sup>. Night begins 2<sup>h</sup> 53<sup>m</sup>. The length of the Day is 14<sup>h</sup> 45<sup>m</sup>.

**May 1, 14<sup>h</sup>.** Mercury and Uranus in conjunction.  $\varnothing$  1° 3' S.

**May 7, 9<sup>h</sup>.** Saturn in conjunction with  $\Delta$  1° 3' S.

**May 8, 12<sup>h</sup>.** Mercury and Mars in conjunction.  $\varnothing$  0° 5' S.

**May 10, 0<sup>h</sup>.** Venus in conjunction with  $\Delta$  7° 6' S.

**May 13.** Mercury in superior conjunction.

**May 13, 2<sup>h</sup>.** Mars in conjunction with  $\Delta$  5° 5' S.

**May 13, 16<sup>h</sup>.** Mercury in conjunction with  $\Delta$  9° 5' S.

**May 25, 7<sup>h</sup>.** Jupiter in conjunction with  $\Delta$  11° 7' N.

**May 31, morn.** Occultation of  $\phi$  Sagittarii, mag. 3.3. See p. 139.

A meteor shower, believed to have relation to Halley's comet, diverging from a point in Aquarius, sometimes appears in the mornings from May 5 to 6.

In this month the Mornings increase 43<sup>m</sup>; the Afternoons 44<sup>m</sup>.

Constellations near the E. meridian at 2<sup>h</sup>: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

May 16. URANUS rises 3<sup>h</sup> 12<sup>m</sup>, sets 12<sup>h</sup> 12<sup>m</sup>. NEPTUNE rises 12<sup>h</sup> 23<sup>m</sup>, sets 1<sup>h</sup> 58<sup>m</sup>.

**The Ionosphere.**—Ionization is a process, the mechanism of which is unknown, whereby the atoms of a substance, solid, liquid or gas, receive an electric charge, and are then able to transmit and to reflect electric waves. It is believed that there are layers in the upper atmosphere, between about 60 and 120 miles above the earth, that are in this state of ionization, whose existence is made evident by projecting radio waves vertically upward, that are reflected by some layer in this ionosphere and are caught and studied in various ways on their return. The conditions of ionization of this region are constantly changing, with daylight and darkness, and in summer and in winter, and with other phenomena such as thunderstorms and magnetic disturbances. It is believed that the ionization of the lower layers is due to the solar ultra-violet light, but it is suggested that the upper layers are ionized by the action of corpuscles emitted by the Sun. If

## SATURN ♄

D.	Rises h. m.	Souths h. m.	Sets h. m.
6	2 13	7 6	11 59
13	1 46	6 40	11 33
20	1 19	6 13	11 7
27	0 52	5 46	10 40

this is the case, these corpuscles would be stopped by the Moon during a solar eclipse, and experiments are now made on such occasions to determine this.

*The Stratosphere.*—The temperature of the air generally diminishes with increasing height until a point is reached where the fall ceases abruptly. Above this point lies the stratosphere, which is a region where the temperature changes slowly in a horizontal direction and is almost uniform in the vertical. The height at which the stratosphere begins is about ten kilometres, but varies, being higher in regions nearer the equator. This is learnt by the use of *ballons sondes*, which are small balloons made of india-rubber, inflated with hydrogen, carrying self-registering instruments. They rise until they burst on account of the diminished external pressure, (Continued on p. 129)

## MORNING AND EVENING STARS.

☿ MERCURY sets after the Sun in the latter half of the month, and may be seen in its latest days. It will then be at altitude 5° in the N.W. by W. at 9 o'clock and quite bright (see June note).

♀ VENUS is a morning star and may be seen north of east in the dawn at the end of the month. Magnitude -3.8 to -3.6.

♂ MARS rises shortly before the Sun and will not be seen.

♃ JUPITER continues to be visible throughout the short night. Magnitude -1.9.

♄ SATURN is a morning star rising in the east-south-east at the times shown, but will not be conspicuous. Magnitude +1.1 to +1.0.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 22h. 8m. There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on June 1 is 16h. 14m. Its length is nearly 16h. 34m. from the 19th to the 24th.

June 1, 17h. Venus and Uranus in conjunction.  $\varphi$  17° 8'.

June 3, 13h. Saturn in conjunction with  $\gamma$ .  $\delta$  3° 8'.

June 8, 5h. Uranus in conjunction with  $\gamma$ .  $\delta$  6° 8'.

June 10, 23h. Mars in conjunction with  $\gamma$ .  $\delta$  5° 8'.

June 14. Mercury at greatest elongation 24° E.

June 14, 7h. Mercury in conjunction with  $\gamma$ .  $\delta$  8° 8'.

June 21, 16h. Jupiter in conjunction with  $\gamma$ .  $\delta$  7° 0'.

June 22, 3h. Sun enters the sign Cancer. Solstice.

June 30, 20h. Saturn in conjunction with  $\gamma$ .  $\delta$  3° 8'.

In this month the Mornings increase about 7m up to the 17th, and then decrease 4m. The Afternoons increase about 14m. up to the 25th, and then decrease slightly.

Constellations near the 8 meridian at midnight. Corona, Hercules, Ophiuchus, Serpens, Scorpions, Lyra, Aquila, Sagittarius.

June 15, Sun's semidiameter in Transit 1m. 8.68s. of Mean Time.

**June Fireballs.** The short nights of June are often marked by the appearance of fireballs, or very bright meteors. These are especially likely to be observed in the first ten days of the month, and their frequency at this time is principally due to the activity of a shower from a radiant-point near Antares in the constellation Scorpion. Since this star is low in the southern sky as seen from our northern latitudes, it follows that fireballs belonging to this Scorpion stream, when observed in this country, are always directed from the southern part of the heavens.

Sometimes these June fireballs are extremely bright, as may be shown by historical instances. A meteor which appeared at 9 o'clock in the evening of June 3, 1842, was said to be equal in brightness to the Sun, as was another that was seen on June 5, 1868. Even allowing for exaggeration in the estimates, it is clear that these two fireballs must have been of surpassing brilliancy. Neither of them, however, was from the radiant in Scorpion. On June 4, 1833, at

81. 32m. p.m., while it was yet daylight, a fireball brighter than the moon was observed from many places in the south-east part of England. It was found that it fell from a height of 75 miles to 44 miles over Normandy; the length of the luminous flight was 83 miles and the speed 22 miles per second. It diverged from a point in Libra. The radiant point of a meteor shower is the vanishing point in the perspective of parallel paths, and its position depends on the direction of the meteor's motion relative to the earth. From this and other factors the orbit of the meteor stream round the Sun can be calculated. It seems that the fireball of June 4, 1933, was moving in the same orbit as the Scorpiid meteors.

## MORNING AND EVENING STARS.

☿ MERCURY will be at greatest eastern elongation on June 14, and there will be an opportunity of seeing this planet in the evenings of the first half of the month. At 9 p.m. on June 4 it will be at altitude  $7^{\circ}$  in the north-west by west. It remains nearly in this position on the following nights, but becomes fainter. Magnitude on June 4 0.0.

♀ VENUS rises in the east-north-east at the times shown, and may perhaps be seen in the brightening sky.

♂ MARS also rises before the Sun, but is not likely to be conspicuous.

♃ JUPITER is to be seen in the west of south when the sky is sufficiently dark, perhaps about 8h. 30m. It sets at midnight at the end of the month.

♄ SATURN in Capricornus rises before midnight in the latter part of the month. Magnitude +1.0 to +0.9.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

**July 1.** Civil twilight ends 21<sup>st</sup> 23<sup>m</sup>. In this month there is no closed night in the latitude of London until after the 21<sup>st</sup>, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16<sup>h</sup> 29<sup>m</sup>.

**July 5.** Earth at greatest distance from the Sun. *Aphelion*. Distance 94,455,000 miles.

**July 5, 13<sup>h</sup>.** Uranus in conjunction with  $\gamma$ .  $\mu$  6° 8'.

**July 8, 17<sup>h</sup>.** Venus in conjunction with  $\gamma$ .  $\eta$  6° 8'.

**July 9, 19<sup>h</sup>.** Mars in conjunction with  $\gamma$ .  $\delta$  3° 8'.

**July 11.** Mercury at Inferior conjunction.

**July 19, 3<sup>h</sup>.** Jupiter in conjunction with  $\gamma$ .  $\gamma$  7° N.

**July 24.** Occultation of  $\phi$  Sagittarii Mag. 3.3. See p. 139.

**July 26.** Partial Eclipse of the Moon. Invisible at Greenwich. See p. 138.

**July 28, 3<sup>h</sup>.** Saturn in conjunction with  $\gamma$ .  $\gamma$  3° 8'.

**July 31.** Mercury at Greatest Elongation. 19° W.

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34<sup>m</sup>, and the Afternoons 29<sup>m</sup>.

**Meteorite Craters.**—In various parts of the world there are depressions or formations said to be the result of the impact of gigantic meteorites that, moving in space, have met our planet. One, very interesting, is the crater in Arizona known as *Coon Butte*, which is a basin-shaped depression approximately circular, about three quarters of a mile in diameter and 570 feet deep, that was brought to notice in 1891. Others are the Henbury group of small craters in Central Australia, found about the same time. The Wabar crater in Arabia, more than 300 feet in width and 40 feet deep, discovered in February, 1922; a shallow depression in Texas, roughly circular in outline, with an average diameter of 530 feet; and, largest of all, the *Ashtabhi* crater, which forms a lake nearly five miles across, 240 feet in depth, with its surface 600 feet below the surrounding country. This theory of origin of these craters, especially Arizona and Henbury, is based on the presence of meteoric iron in the vicinity. Silica glass is especially profuse near the Wabar crater, which indicates the development of a large amount of heat and gives credence to the theory of meteoric

## MORNING AND EVENING STARS.

♂ MERCURY is a morning star, rising more than an hour before the Sun in the north-east-by-east in the last week of the month, but the circumstances are not very favourable for its visibility.

♀ VENUS will be 10 degrees above the horizon at 3 o'clock in the morning, north of east. Magnitude - 3.4.

♂ MARS rises about two hours after midnight. Like Venus, it is moving in the region of Taurus and Gemini, and the two planets are not far apart at the end of the month. Magnitude about 2.0.

♃ JUPITER is a bright object in the south-west in the evening twilight. Magnitude - 1.6 to - 1.5.

♄ SATURN rises in the late evening and will be seen low down in the south-south-east at midnight. Magnitude + 0.7.

impact. Both these features are absent in the Ashanti lake, and it is to be remarked that silica glass is found in the Sahara and other places where there is no suggestion of meteoric origin. The so-called Siberian meteor that has been recently studied shows little in the way of crater formation. Evidence of some catastrophic event in uninhabited forest land near Irkutsk is supplied by the discovery of devastation over a huge area, where pine trees have fallen radially outwards for a distance of 57 miles from its centre. There were records on seismographs and on barographs indicating that some extraordinary event occurred near the place in Siberia on June 30, 1908, and a remarkable midnight sky-glow seen that night in England is believed to have some connexion, but no meteoric material has been found.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

**August 1.** Day breaks at 21h 29m. Civil twilight ends at 20h 43m. Night begins, 22h 42m. The length of the day is 15h 23m.

**Aug. 2, 21h.** Venus and Mars in conjunction. ♀ 1° 8'.

**Aug. 7, 16h.** Mars in conjunction with ♀. ♀ 2° 8'.

**Aug. 7, 21h.** Venus in conjunction with ♀. ♀ 2° 8'.

**Aug. 8, 19h.** Mercury in conjunction with ♀. ♀ 1° 8'.

**Aug. 10.** Annular Eclipse of the Sun. Invisible at Greenwich. See p. 138.

**Aug. 15, 16h.** Jupiter in conjunction with ♀. ♀ 7° N.

**Aug. 18.** Saturn in opposition. Distance from Earth 818,986,000 miles.

**Aug. 24, 11h.** Saturn in conjunction with ♀. ♀ 3° S.

**Aug. 25.** Mercury in superior conjunction.

**Aug. 31 morn.** The Moon will be in conjunction with the Pleiades; several stars of the group will be occulted. See p. 139.

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 10th to the 12th. The Moon will be new in the morning of the 10th, and of small hindrance to their visibility.

In this month the Mornings decrease 47m., and the Afternoons 5m.

Aug. 14. Sun's semidiam. in Transit, 1m. 5.24. of Mean Time.

**The Rotation of the Planets.**—It is reasonable to suppose that each of the other members of the Solar system rotates on an axis as does our earth, and the fact has been proved, as to some of them, by observations of spots on their surface, that return at regular intervals to the same position on the visible disk. The rotation of Mars was detected by Hooke in 1666, and almost contemporaneously by J. D. Cassini in Italy, who found that this planet rotates on its axis in 24 hours 40 minutes, which differs little from the period adopted to-day. Hooke also was the first to suspect from observation that Jupiter rotates on an axis, though Kepler had previously surmised that it did so, and that the period was less than 24 hours. He was again followed by Cassini, whose observations

## MORNING AND EVENING STARS.

♄ MERCURY, having been at greatest western elongation on July 31, is a morning star, and may be seen in the first week of the month about 5 degrees above the horizon in the east-north-east at  $\frac{1}{2}$  past 3 o'clock.

♀ VENUS will be on the right of and 5 or 6 degrees higher than Mercury. In the latter part of the month it will be at altitude 10° about 4 o'clock. Magnitude -3.3.

♃ MARS is in conjunction with Venus in the lower part of Gemini in the evening of August 2, and will be to the left of it on the following morning. It will be at altitude 10° at 3 o'clock approximately throughout the month.

♃ JUPITER now sets in mid-evening, and may be seen for an hour or two after sunset.

♄ SATURN, in opposition on the 18th, will be above the horizon from twilight to daybreak throughout the month. Magnitude at opposition +0.5.

26	18 44	23 30	4 16

showed that the spots near the equator of the planet revolved with a velocity greater than those distant from it, which has since been abundantly confirmed, average periods having been determined for the different zones and regions that show small differences. (See p. 151.) William Herschel was the first to establish the fact that Saturn rotates, by observation, and in 1793, by noting the change of position of certain markings on the dark belts, found that the ball of Saturn rotates in 10 hours 16 minutes. He had earlier deduced, from a luminous spot on the inner ring, a period of 10 hours 32 $\frac{1}{4}$  minutes. On December 7, 1876, Asaph Hall

(Continued on p. 116.)

Configurations of Jupiter's Satellites (See p. 110.)

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. Civil twilight ends at 19h. 33m. Night begins 20h. 53m. The length of the Day is 13h. 33m.

Sept. 5, 12h. Mars in conjunction with  $\gamma$ .  $\delta$  0° 5' N.

Sept. 7, 10h. Venus in conjunction with  $\gamma$ .  $\delta$  3° N.

Sept. 10, 8h. Mercury in conjunction with  $\gamma$ .  $\delta$  5° N.

Sept. 12, 7h. Jupiter in conjunction with  $\gamma$ .  $\delta$  7° N.

Sept. 17, even. Occultation of  $\sigma$  Sagittarii, mag. 2.1. See p. 139.

Sept. 20, 12h. Saturn in conjunction with  $\gamma$ .  $\delta$  3° S.

Sept. 22. Harvest Moon.

Sept. 23, 12h. Sun enters the Sign Libra (Equinox).

Sept. 29, 12h. Mercury and Jupiter in conjunction.  $\delta$  3° S.

In this month the Mornings decrease 46m.; the Afternoons, 1h. 6m.

Constellations near the S. meridian at 22h.: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

Sept. 16. Sun's semidiam. in Transit, 1m. 38s. of Mean Time.

Continued from p. 113.]  
saw a white spot on the equatorial zone of Saturn, which remained for about a month, from which a period of 10 hrs. 14 mins. 23 s. was deduced. A conspicuous white spot was seen by Barnard in June, 1903, which was followed by the appearance of others less conspicuous, that gave a rotation period of 10 hrs. 38 mins., and as these were all in a high northern latitude of the planet, it was suggested that there may be an equatorial current on Saturn, similar to, but more pronounced than, that on Jupiter. This conclusion is supported by a spot that appeared in January, 1898, but others observed in 1893 rather opposed it. These distinct markings are somewhat infrequent on Saturn, which gives interest to the detection of a white spot on the equatorial zone on August 3, 1933, that rapidly developed into a belt, but which during the first fortnight of its existence yielded a period approximating to, but greater than, that found by Asaph Hall. Markings that appear on Mercury and Venus are so indistinct that no trustworthy period can be deduced for either of these planets.

## MORNING AND EVENING STARS.

☿ MERCURY rises and sets nearly with the Sun throughout this month.

♀ VENUS is still a morning star, rising later than it did last month, and may be seen after daybreak. It is moving eastward in Leo, and passes above Regulus on the 20th. Magnitude - 3.4.

♂ MARS in the constellation Cancer is still a morning star, in the east about 4 o'clock. Magnitude + 1.9.

♃ JUPITER is above the south-west horizon in the evening twilight. Magnitude - 1.3.

♄ SATURN will be seen low down in the south during the evening. Magnitude + 0.7.

**Gravity.**—The force that acts on all masses and causes them to fall if not supported, is the attraction of the mass of the Earth, which may be supposed to be collected at its centre. It is modified by the centrifugal force due to the Earth's rotation, if this phraseology, which is convenient though not quite precise, may be used. Since the Earth is not exactly spherical, the attraction is not the same at all points on the surface, and at the Pole is greater than it is at the Equator by about a 50th part. Moreover, there is no "centrifugal force" at the Pole, but at the Equator this, which acts in the opposite sense to the attraction, is equivalent to about a 28th part of the latter. Consequently gravity is

greater at the Poles than at the Equator by the sum of these two effects, and a mass that weighs 190 pounds at the Equator will weigh 121 pounds at the Poles, a spring balance being used for the operation in both cases.

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 8m. Civil twilight ends at 12h. 22m. Night begins, 12h. 37m. The length of the Day is 12h. 37m.

Oct. 4, 10h. Mars in conjunction with D.  $\delta$  3° N.

Oct. 7, 22h. Venus in conjunction with D.  $\delta$  6° N.

Oct. 9. Meteors from a radiant point in Draco associated with the comet Giacobini-Zinner may appear.

Oct. 9, 23h. Jupiter in conjunction with D.  $\delta$  6° N.

Oct. 10. Mercury at greatest elongation as E.  $\delta$  9°

Oct. 10, 12h. Mercury in conjunction with D.  $\delta$  2° N.

Oct. 12, 0h. Saturn in conjunction with D.  $\delta$  3° S.

Oct. 23. Uranus in opposition. Distance from the Earth, 1,753,393,000 miles.

Oct. 24, even. The Moon will be in conjunction with the Pleiades:  $\eta$  Tauri, mag. 2.9, and other stars of the group will be occulted.

Oct. 27. Jupiter in conjunction.

Oct. 28, morn. Occultation of  $\epsilon$  Gemminorum, mag. 3.2, by the D. See p. 139.

In this month the Mornings decrease 5m., and the Afternoons 2h. 4m.

The Zodiacal light may be seen before dawn in the middle of this month when the Moon is absent from the early morning sky.

## APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

☿ MERCURY.				♀ VENUS.				♂ MARS.				♃ JUPITER.				♄ SATURN.

**Earthquake Recording.**—Earthquakes are believed to be a kind of fracture under a growing strain which sets up waves in the earth's substance that traverse the whole globe. It is possible to detect this wave movement at places far removed from the point of fracture even though it may be not more than a twenty-five thousandth part of an inch, by means of an instrument called a Seismograph, the essential feature of which is a boom supported in a way that may be likened to a gate hanging on a gate post out of plumb. If the supporting post alters its inclination to the vertical the boom will take up a new position. The choice of site for such an instrument is important and somewhat unexpectedly it has been found that a room in a London store 54 feet above the street is not unsuitable. The building contains 120 columns each standing on a block

1934.]

## MORNING AND EVENING STARS.

☿ MERCURY, being at greatest eastern elongation on the 10th, will set after the Sun throughout the month, but will not be visible.

♀ VENUS, approaching superior conjunction, rises about, or less than an hour before the Sun, and is not likely to be seen. Magnitude = 3.4.

♂ MARS continues to be in the morning sky, rising rather more than an hour after midnight. It passes north of Regulus on the 15th. Magnitude, +1.8, +1.7.

♃ JUPITER, in conjunction on the 27th, is neither a morning nor an evening star.

♄ SATURN continues to be seen in the first part of the night. Magnitude +0.8.

of concrete 14 ft. by 10 ft. by 6 ft., which rests on the Blue Clay, 42 ft. below ground level. In spite of the considerable traffic within and without the store, earthquakes that originated in Mexico (1932 June 3), the Balkans (1932 Sept. 26), Japan (1933 March 2), Los Angeles (1933 March 11), and others in August and September of last year that emanated from epicentres several thousand miles from England, have been recorded. There are generally waves of two distinct types on the recording slip, and the distance of the origin is deduced from the interval in time between these. The agreement with similar records at other places makes the inference certain.

See p. 126

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 0m. Civil twilight ends at 17h. 20m. Night begins 18h. 29m. The length of the Day is 9h. 39m.

Nov. 2, 2h. Venus and Jupiter in conjunction.  $\delta$  3' N.

Nov. 2, 6h. Mars in conjunction with  $\delta$  5' N.

Nov. 3. Mercury at inferior conjunction.

Nov. 4, 15h. Mercury and Venus in conjunction.  $\delta$  1' S.

Nov. 6, 17h. Mercury and Jupiter in conjunction.  $\delta$  0' 3" S.

Nov. 6, 18h. Mercury in conjunction with  $\delta$  6' N.

Nov. 6, 18h. Jupiter in conjunction with  $\delta$  1' 6" N.

Nov. 7, 3h. Venus in conjunction with  $\delta$  9' 6" N.

Nov. 14, 6h. Saturn in conjunction with  $\delta$  1' 3' S.

Nov. 18. Venus in superior conjunction.

Nov. 19. Mercury at greatest elongation. 19° W.

Nov. 20, 18h. Mercury and Jupiter in conjunction.  $\delta$  1' 4" N.

Nov. 21, morn. Stars of the Pleiades group occulted by the  $\delta$ .

See p. 129.

Nov. 30. Mars in conjunction with  $\delta$  7' N.

In this month the Mornings decrease 49m.; the Afternoons 39m.

Constellations near the S. meridian at 22h.: Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus

The Leonids.—Although it cannot be stated with certainty, in all probability the maximum of this shower has already occurred; yet, given fine weather, a rich display may be observed on the early morning of November 17, 1934. The shoal of meteors which gives rise to the great "meteor storms" extends so far along the orbit of the stream that, presupposing a maximum in 1933 (this note is written prior to November of that year), the shoal will not have passed before the earth once more crosses the Leonid orbit. It will be remembered, as bearing on the case, that the expected "storm" of 1899 failed; but four years later, on the early morning of November 16, 1903, a very rich display of Leonids was observed in England, meteors appearing at the rate of several hundreds per hour. The radiant-point, which is situated in the "Sickle" in the

## MORNING AND EVENING STARS.

☿ MERCURY being at greatest western elongation on the 19th, may be seen as a morning star in the latter part of the month, when it will be in the east-south-east at altitude 5° soon after 6 o'clock.

♀ VENUS being at Superior conjunction on the 18th rises nearly with the Sun throughout the month, and is not likely to be seen as a naked-eye object. It is in conjunction with Jupiter early on November 2, the separation being only 3 minutes of arc, and though near the Sun, a close approach of these two major planets may be seen later in the day by telescope.

♂ MARS moving eastward from Regulus towards Spica continues to be an object of the morning sky.

♃ JUPITER rises two hours before the Sun at the end of the month in the east-south-east. (See Conjunctions opposite.)

♄ SATURN now sets an hour or two before midnight.

constellation Leo, rises in Great Britain at about half-past ten p.m., a little N. of E., and wheels towards the S. as the night advances. Leonids may be seen in all parts of the sky, but their tracks, prolonged backwards, appear to intersect in the above-indicated radiant-position. Locality is naturally a factor in the matter, for if the earth is in the thickest of the stream in the early morning of Nov. 17 (G.M.T.), Leo will not then have risen at California, for example, and the display at that place may be small, inasmuch as it depends on the thickness of the stream and the time taken by the earth to pass through it. There is a suggestion based on the display of 1866 that the Leonids form three parallel streams with inter-spaces to which this line of argument applies. (See *ibid.* 1933).

## CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 42m. Civil twilight ends 5h. 45m. Night begins 7h. 57m. The length of the Day is 8h. 9m.

From Dec. 18 to 25 the length of the Day is about 7h. 45m.

Dec. 4, 13h. Jupiter in conjunction with  $\gamma$ .  $2^{\circ} 6' N$ .

Dec. 5, 19h. Mercury in conjunction with  $\delta$ .  $5^{\circ} 5' N$ .

Dec. 7, 2h. Venus in conjunction with  $\delta$ .  $9^{\circ} 3' N$ .

Dec. 11, 14h. Saturn in conjunction with  $\delta$ .  $1^{\circ} 4' S$ .

Dec. 13. Occultation of  $\alpha$  PISCIS, mag 4.6 by the  $\delta$ . See p. 139.

Dec. 16, 8h. Uranus in conjunction with  $\delta$ .  $6^{\circ} 8' S$ .

Dec. 22, 13h. The sun enters Sign Capricornus. Solstice.

Dec. 31. Mercury in superior conjunction.

In this month the Mornings decrease 24m., the decrease being continuous throughout the month. The Afternoons decrease 4m. up to the 13th, and then increase 9m.

Constellations near the S. meridian at 22 h., Andromeda, Triangulum, Aries, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion.

Dec. 15. Sun's semi-diam. in Transit. 1m. 10.90s. of Mean Time.

The Seasons.—In meteorology the seasons are taken to be as follows: *Spring*, March, April, May; *Summer*, June, July, August; *Autumn*, September, October, November; *Winter*, December, January, February. This selection of months to represent the seasons, according to the farmer's year, is guided by the consideration that each season shall comprise three months. This uniformity in length opens the way for some paradoxical cases. The warmest week of summer may be in the spring, late May, or in autumn, early September, and the coldest week of winter may be in the autumn, late November, or spring, early March. In England we have about five months of moderate winter weather between October and April, and four months of summer weather from the middle of May to the middle of September, a short spring, and a short autumn. The seasonal variations are not nearly so large as they are in continental countries, and the change from winter to summer, and vice-versa, is much less abrupt.

## MORNING AND EVENING STARS.

☿ MERCURY may perhaps be seen about 7 o'clock in the morning of the early days of the month 5 degrees above the horizon in the south-east.

♀ VENUS begins to be an evening star, and may be seen soon after sunset at the end of the month low down in the south-west. Magnitude = 3.4.

♂ MARS, moving eastward, does not yet reach Spica, which it about equals in brightness. It rises soon after midnight. Magnitude + 1.4 to + 1.0.

♃ JUPITER will be in the south-east at altitude 10° at 6 o'clock in the morning in the middle of the month. Magnitude = 1.3.

♄ SATURN will be low in the south-south-west in the late twilight, and sets in mid-evening. Magnitude + 1.0.

Between the tropics there is nothing that can properly be called summer and winter; the seasons depend upon the weather and rainfall, and not upon the position of the sun, and the periods of growth adjust themselves accordingly. In India, or the north-western part of it, the divisions of the year are the cold weather, the hot weather, and the rains. (From the Meteorological Glossary, Met. Office.)

*The Stratosphere* (continued from p. 122) when the material acts as a parachute and brings the instruments to ground safely. A height of 20 kilometres (12½ miles) or more has been reached by such apparatus. It is said that this height was nearly attained last year by observers in a passenger-carrying balloon.

BEING THE THIRD YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 25 AND 26 OF KING GEORGE V.

Jan. 2. Earth in Perihelion.  
Distance from Sun's centre  
91,345,000 miles.

In the year 1935 there will be seven eclipses, which is the greatest number that can happen in any year. There will be five of the Sun and two of the Moon. Both lunar eclipses are total, and are only partly visible at Greenwich. In the afternoon of January 19, totality will end a few minutes after the Moon has risen at Greenwich. In the morning of July 16 the Moon will have set a few minutes before totality begins. Four of the solar eclipses are partial; three of these are partly visible at Greenwich. The fifth is Annular, and visible only from a region round the South Pole.

Venus will be at Greatest Brilliancy on August 3 and on October 15. Mars will be in Opposition on April 6. Jupiter on May 10, Saturn on August 31.

## Tidal Constants.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the appropriate Time of High Water at the Standard Port (as shown on pp. 85, 89, etc.) and adding thereto the quantities annexed. The time thus found will be Greenwich Time for British, Irish, French and Belgian Ports, and Amsterdam Time for Netherlands Ports. The rise of the tide at Springs and Neaps is given in the last two columns. An\* denotes Range of Tide.

Ex. mpt. 2 — Required times of high water at Aberdeen on January 16th, 1934:—

(a) Morning Tide.

Appropriate time of high water at *Leith* ..... *ah. am.* *Aft. Jan. 15*  
Add tide interval ..... *10 53*

Sum ..... *13 15*  
Subtract *22h.* ..... *12 0*

Time of high water at *Aberdeen, January 16th* ..... *1 25* *Morn.*

(b) Afternoon Tide.

Appropriate time of high water at *Leith* ..... *ah. gm.* *Morn. Jan. 26.*  
Add tide interval ..... *10 53*

Sum ..... *13 49*  
Subtract *22h.* ..... *12 0*

Time of high water at *Aberdeen, January 16th* ..... *1 49* *Aft.*

# 134 Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found figures which added to *12h.* give the *local apparent time of sunset*. Subtracting these quantities from *12h.* will give the *local apparent time of sunrise*. To obtain from this the *local mean time*, the equation of time for the day in question which is given on the second page of each month, must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versa*.

If the figures are required for a declination or latitude falling between two arguments of the table, they may be found by proportion. The effect of refraction is included.

## THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack (and similarly of moonrise and moonset) are the times when the centre of the Sun's disc is seen on the horizon from sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34". It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge,

of the Sun is on the visible horizon is given as the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise

definition. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign -, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the same moment lie in a slightly curved line across the map, the lines for different moments being approximately parallel. The lines change their inclination to the meridian through out the year. Similarly for the setting.

# Tables for Determining the Latitude FROM THE OBSERVED ALTITUDE OF POLARIS OUT OF THE MERIDIAN.

Ex.—On April 25, at 22h. 55m. G.M.T. in long. 34. 6m. west, the altitude of Polaris, corrected for dip, refraction and instrumental error, is found to be 45° 17'. The corresponding local sidereal time is found to be 20h. 35m. Therefore Obsd. Alt. = 45 17' From I. + 0 36' Tables II. + 0 4 Latitude III. + 0 4 46 54' 9"

The corrections in this Table are always additive to the reduced altitude.

June 21	60° 4'	58° 3'	153° 52'	131° 45'	113° 36'	99° 27'	87° 18'	75° 4'	49

The times in the headline and penultimate column are *Apparent*. By applying the Equation of Time, the Mean Time is found to which the figures are appropriate.

*Alt.*—This is given to tenths of a degree, but there may be small differences between the morning and afternoon hours, and between the like days of the year. The effect of Refraction is not applied. *Azimuth* (Az.) is measured either eastward or westward from the N. Az. 45° is equivalent to N.E. or N.W. Az. 135° to S.E. or S.W. E.S.E. or W.S.W. is 112½°.

The year is divided into periods of thirty days (with exceptions). The figures for days other than those given can be found by interpolation with approximate accuracy.

Latitude 53° is chosen as an average for England. North or south of this the noon altitude is respectively less or greater by the difference of latitude, and for other times *pro rata*.

## Solar and Sidereal Time.

TO FORM EQUIVALENT INTERVALS OF SOLAR AND SIDEREAL TIME.

The length of a Sidereal day is 23h. 56m. 4.09s. of Mean Time. One hour of Sidereal Time is, therefore, equivalent to 50m. 50.17s. of Mean Time, and one hour of mean solar time is equivalent to 1h. 0m. 9.86s. of Sidereal Time. The multiples and submultiples of the differences from one hour are tabulated below under headings "acceleration" and "retardation"—for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. If it is Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Accel.	Argu.	Retar.	Accel.	Argu.	Retar.	Accel.	Argu.	Retar.	Accel.	Argu.	Retar.	Accel.	Argu.	Retar.

See p. 157.

## Celestial Phenomena for Observation in 1934.

## ECLIPSES.

In the year 1934 there will be four eclipses, two of the Sun and two of the Moon. With a small exception all are invisible at Greenwich.

I. A *Partial Eclipse of the Moon* on January 30, partly visible at Greenwich. The Moon will rise at Greenwich a few minutes before sunset with a small segment on the lower right-hand side whose greatest breadth is equal to about a tenth of the lunar diameter in the shadow. This eclipsed portion will decrease in size and the Moon will be clear of the shadow at 5h. 24m., part of the disc remaining in the penumbra, which it leaves at 7h. 17m.

II. A *Total Eclipse of the Sun* about midnight at Greenwich of February 12. Invisible at Greenwich. The path on the Earth's surface from which the Sun may be seen totally eclipsed begins its course off the western side of the island of Borneo, crosses the Pacific in a north-easterly direction, and ends in the ocean off the coast of British Columbia. It will include some islands in the Dutch East Indies and in the Caroline group, Boell,  $0^{\circ} 50' N.$ , longitude  $128^{\circ} 15' E.$  and Ternate, latitude  $0^{\circ} 45' N.$ , longitude  $127^{\circ} 20' E.$ , being considered possible as observing stations. Duration of totality on the central line in this longitude will be less than a minute whereas in longitude  $160^{\circ} E.$  it will be a few seconds less than 3 minutes.

III. A *Partial Eclipse of the Moon* on July 26.

Invisible at Greenwich. The Eclipse will happen at about Greenwich noon and will be seen generally from the Pacific Ocean and the land that borders it, the western part of America, the eastern part of Asia and Australia. At greatest phase a portion of the Moon's disc, measured by two-thirds of its diameter, will be obscured.

Moon enters umbra.....	26	10	54
Middle of the Eclipse.....	26	12	15 G.M.T.
Moon leaves umbra.....	26	13	36

IV. A *Annular eclipse of the Sun* on Aug. 10. Invisible at Greenwich. The only land from which the eclipse will be seen in any phase is on the continent of Africa, south of  $20^{\circ}$  North latitude. The path from which an Annular eclipse may be seen begins its course in the Atlantic Ocean in  $20^{\circ} 8' S.$  lat.,  $10^{\circ} W.$  long., strikes the African coast at Mossamedes, crosses the continent, including Bulawayo in its width, and arrives again at the ocean at Inhambane. The greatest duration of the Annular phase will be rather more than  $6\frac{1}{2}$  minutes, and will occur on the central line in the neighbourhood of Bulawayo. Partial eclipse will be seen from the following places. (The times are G.M.T.)

JUPITER'S SATELLITE PHENOMENA.—The above Table gives the Times of Disappearance (D.) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will happen when Jupiter is above the horizon at Greenwich and the Sun below. These phenomena are seen simultaneously from all places where the planet is above the horizon at the time. From opposition to conjunction, i.e. from April 8 to Oct. 27, the eclipses take place on the eastern side of the planet; from conjunction to opposition on the western. In the latter periods, i.e. from Jan. 1 to April 7 and in November and December, satellites I and II disappear by eclipse and reappear from occultation at the eastern edge. The times of such reappearances (Oc. R.) are given, the satellite and the time of its disappearance being in the preceding line. From April 7 to Aug. the converse happens, and the times of disappearance by occultation (Oc. D.), and of reappearance after eclipse are

OCCULTATIONS OF STARS BY THE MOON.

The above is a list of stars, chosen within certain limits as to magnitude and phase of the Moon, that will be occulted during the year, with the time of the phase of the occultation mentioned as seen from Greenwich. In general the phase is that which takes place at the dark limb, but both phases of the occultation of δ Cancri on Jan. 3, of φ Sagittarii on May 31 and July 24 and of some other stars are given. All of these occultations will not be seen from Edinburgh and other parts of the British Isles north of Greenwich, but the line of demarcation is not readily defined. The Moon is among the Pleiades on the night of August 30 when the moon is nearly at Last Quarter and on Oct. 24 when two days after Full, both of which occasions should provide opportunity for useful observations. The "angle from N. point" shows the place of disappearance or reappearance on the Moon's edge, and is measured from the point nearest the Pole of the heavens (not the highest point) towards the east.

given, the satellite being named in the second line. Near the time of opposition this pertains to satellite III as well as to I and II as appears on March 23. The eclipse of a satellite is always accompanied by its occultation which precedes the eclipse from opposition to conjunction of Jupiter, but follows it from conjunction to opposition as will be seen by the following examples to be compared with the list of eclipses. Satellite II will disappear by occultation on Jan. 24. 12h. 13m., Jan. 26d. 4h. 8m., Jan. 28d. 6h. 42m., and will re-appear from occultation on June 25d. 04. 41m., and July 19d. 21h. 9m. Satellite III will disappear on March 15d. 23h. 39m. a few minutes after eclipse, and on May 4 it will disappear by occultation at 22h. 37m. to re-appear at 5d. 04. 42m. a quarter of an hour before eclipse. Because of its greater distance from the planet Satellite IV, in some circumstances it escapes and does not enter the shadow thrown by Jupiter and is not eclipsed. This happens in alternate periods of about three years, and a period of non-eclipse is now in progress.

The position of a star is defined by its Right Ascension and Declination, which are co-ordinates analogous to longitude and latitude on the terrestrial sphere. The lines of reference on the celestial sphere depend on the position of the axis of the Earth, and since, for reasons known generally by the word Precession, this position has a continual small movement with respect to the stars, Right Ascension and Declination change annually by an amount that can be computed by formula. Observation of position of the stars shows that they do not conform precisely to this computed precessional change, and the outstanding amount for individual stars known as Proper Motion (see page 145), is shown in two columns of the adjoining table. The annual precession and Proper Motion combined, or the amount by which each element of a star's position changes in a year, known as the Variation is also shown. The angular parallax of a star is the angle that the mean radius of the Earth's orbit would, placed squarely, subtend at the star, and is therefore inversely proportional to its distance, and hence is a measure of that same. The parallaxes in the adjoining table are mainly trigonometric (see p. 144) and are taken from the General Catalogue of Parallaxes collected by Dr. Frank Schlesinger of Yale. The entry 0.00 indicates that the star is

# Fixed Stars.

especially distant, and for some few stars no value is available. The last column shows the distance from the Sun corresponding to the parallax in parsecs (see p. 145). Sirius and Procyon have faint companions, Castor,  $\zeta$  Herculis,  $\gamma$  Virginis and  $\alpha$  Centauri are binary stars,  $\epsilon$  Hydrae is a multiple system, and of these either the place of the centre of gravity or of the mean star is given.

These tables give Mean places on Jan. 1. The position on any other day differs from this because of Precession, Nutation, Aberration and Proper Motion. The Mean place with these effects added is called the Apparent place, and for the purposes of navigation and surveying it is the Apparent place that is required.

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the various classes of objects are at very different distances. The Moon, our nearest neighbour, is 240,000 miles from us; a distance which light, travelling at the rate of 186,000 miles a second, traverses in less than a second and a half. Of the bodies of the Universe whose distance is known, the farthest is so remote that its light takes over 100,000,000 years to reach us. The nearest star to the Sun is more than eight thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, their movements and their sizes. Cosmical Physics attempts to deduce their physical nature, and that of cosmical matter in general from the observations of the astronomer, combined with knowledge gained in the laboratory, for the purpose of elucidating their past and future history. The total number of stars of magnitude 6<sup>th</sup> and brighter, which is sometimes taken as the limit of naked-eye visibility, is about 4,300, of which 3,000 are visible during the year from latitude 60°, but a more generous estimate, formed by including cases when two faint stars close together are seen as one, sets the whole number at 10,000. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid, and from counts on such plates estimates have been made of the number of stars in the Universe. 2,000,000,000 was once assigned as a limit to their number, but this has been much increased by various estimates. From them 50,000 millions may be taken as the possible total number of stars in the galactic system (*v. infra*), though twice that number has been mentioned as a reasoned estimate. The number in the whole of space is incalculable.

#### THE STRUCTURE OF THE UNIVERSE.

The stars as seen are classed according to their apparent brightness and down to the 9<sup>th</sup> or 10<sup>th</sup> magnitude the number of each magnitude is known, all to this order having been catalogued. For fainter stars the numbers have been derived from counts in sample areas. If the Universe is an aggregation of stars in which the individuals of each degree of intrinsic brightness are distributed uniformly throughout an endless space, it can be shown that the number of stars brighter than the 4<sup>th</sup> magnitude would be about four times as great as the number brighter than the 3<sup>rd</sup>; the number brighter than the 5<sup>th</sup> magnitude greater than the number of those brighter than the 4<sup>th</sup> in the same ratio, and so on indefinitely. When the numbers of stars of different magnitudes obtained by counts are compared it is found that in the case of the brighter stars this star-ratio, as it is called, approaches but does not attain the theoretical value 2.5<sup>th</sup>, and that the ratio decreases continually as the stars are fainter, until at the 10<sup>th</sup> magnitude it is only about two. The explanation of this observed fact is that the universe of stars accessible to vision is limited; either there are few or no stars beyond a somewhat indefinite boundary, or we are prevented from seeing them by absorbing material distributed throughout interstellar space.

It is established from counts and measured distances that around our Sun the stars are fairly uniformly distributed at the rate of about one

per 10 cubic parsecs. It is obvious that a uniform distribution of this nature cannot go on indefinitely, for, if it did, the background of the firmament would be bright, since in whatever direction we looked we should, in time, come to a star.

To a casual glance it is clear that the stars are not uniformly distributed over the sky, but have a tendency to congregate near the great belt of cloud-like forms which encircle the heavens, known as the Milky Way or Galaxy. Applying the method of sounding by "star ratios" above outlined, it is found that the stars appear to thin out less rapidly as we go out in the plane of the Milky Way than they do in the direction of the galactic poles. The deduction is apparent; the boundaries of the stellar system are more distant in the plane of the Galaxy than they are at the poles. In other words, the stellar system is an extremely flattened organisation, whose general form is, roughly, that of a double convex lens or of a watch. Looking along the galactic plane we find the stars crowding together, as we should expect, since this is the direction of greatest extension, and the Milky Way is therefore largely a depth effect. But examination of its prominent features, the great star-clouds, the irregularities in its form, and the deep rifts in its structure, shows that its appearance is not wholly due to depth, and that the region is the home of bodies and masses other than uniformly distributed stars. This aggregation is known as the Galactic System; it has been called the Stellar Universe, or the Universe, but the name is scarcely well-chosen because, as will be seen below, there are other aggregations which make this system merely a unit in an immense number of such denizens of space.

Statistical study of the distribution of the brighter stars shows that they form a local system that appears to have the same shape in general as the larger system spoken of, but the fundamental planes are slightly inclined one to the other. It was formerly a general belief that the Milky Way surrounded this congregation of stars as a girdle, whether continuous with it or not was an open question, but a modern view supposes the existence of other local systems similar to this one of which our Sun is a member, all lying more or less in the Galactic plane that may be seen as star clouds in the Milky Way. The greatest condensation of stars as we see them occurs in the bright galactic clouds in Sagittarius, while the opposite portion of the Milky Way is a region of low concentration and brilliancy, from which it is inferred that we are not at the centre of the galactic system, but that this is about 50,000 light years from the Sun and is situated in a star cloud seen in Scorpius and Sagittarius (Shapley).

In and around the Milky Way there are irregular nebulae (*see p. 143*) of which the nebula in Orion is one of the most remarkable that are found to be comparatively near objects and are to be considered as within the Galaxy. There are masses of dark nebulae that appear as rifts obscuring the stars behind. But besides these there are nebulae of another type that are not seen about our central Galactic plane, though some, it has been suggested, may be hidden by the dark nebulae, which are thought to be very distant from our Sun and viewed with a powerful telescope are resolved into spots of light believed to be stars. Such nebulae were called by William Herschel "Island Universes." They are now more often called extra-galactic

The last columns show the light emitted compared with that by our Sun, considered to be of magnitude  $-26.75$  on the stellar scale.  $\alpha^1$  Centauri is the brighter of two bright stars seen as one by naked eye; they have a faint companion, Proxima.  $\alpha^1, \alpha^2$ , Crucis, if considered as one star (Mag. 1.2) would have been in the first of above lists.

\* Brighter component.

nebulae, and being, to some degree, of the same shape as, and bearing other resemblance to our own galactic system, are believed to be similar systems perhaps in course of making. The most distant of them has been found to be perhaps 140 million light-years from us.

To sum up modern ideas of the Cosmos we consider our Sun as one of millions, perhaps, that make up our local system. This, with other local systems and other bodies, make up the galactic system, which is merely one among millions of such systems that form the Universe.

Attempts have been made to estimate the dimensions of this Universe of stars. Four thousand light years was a former estimate of the diameter of our local system, but a more recent one is of the order of 10,000. The larger diameter of the galaxy is estimated to be more than 100,000 light years. The clouds of Magellan, the nearest of the external galaxies, is estimated to be about 100,000 light years from us, but others are at a distance varying between a million and a hundred million.

## EXPANSION OF THE UNIVERSE.

Einstein in his recondite mathematical researches amended the law of gravitation by adding a minute "cosmical term" to the ordinary attraction, the effect of which was a repulsion from an origin varying directly as the distance. He conceived a Universe in which matter is distributed with uniform density, and is in equilibrium owing to the balancing of gravitational attraction and cosmical repulsion, the nebulae and stars being presumably knots or conglomerations of this matter. Dr. de Sitter of Leyden, in 1917, made a modification of this, which led to an hypothesis predicating large velocities of recession for distant objects, because at great distances "cosmical repulsion" gets the upper hand. Another method of dealing with the mathematics left it uncertain whether the Universe was expanding or contracting, and at this stage

observational evidence bearing on the question accrued.

In the spectra of a few of the distant extragalactic nebulae (see p. 124) that have been observed there was a displacement of the absorption lines, which, according to Doppler's principle (see p. 145) indicated a velocity of recession. This observational work has been followed up at the Lowell and Mount Wilson observatories, and it appears finally from a considerable amount of evidence, after making certain allowances, that the spiral nebulae are running away from us, the speed of recession increasing with increasing distance. The speed may be taken roughly as 500 km. per sec. per megaparsec distance (see p. 145), at which rate they will double their distance from us every 1,400 million years. It may be added that the nebulae and other bodies do not change in size but only the distance between them.

These rather extraordinary conclusions that are bound up with conceptions of space, and its limitations, have not passed without philosophic and general discussion.

## STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscopic, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. This sequence is very closely correlated with the colours of the stars, and hence, doubtless with their surface temperatures. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen. Planetary nebulae, some stars known as Wolf-Rayet, in whose spectrum the chief lines are bright, and the bright stars of Orion generally are in this group. Stars whose spectra range between A and F—it is to be remarked that there is no rigorous line of division between the classes and that there are subclasses and spectra noted as "peculiar"—are white or blue stars, and in their

spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls late in the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are orange and red. Antares, Betelgeuse, and a Herculis are notable stars in sub-classes of this type. (n. supra.)

#### STELLAR EVOLUTION.

The early stellar spectroscopists believed that they were investigating the chemistry of the stars and finding the material of which they are composed. It was thought that the hydrogen shown by the spectrum of Sirius would some day change into calcium, which is a leading characteristic of the solar spectrum, and hence that Sirius is in an earlier stage of development than the Sun. The modern view, based on laboratory experiments, is that the spectrum shows the radiative power or, in other words, the surface-temperature of the star, and that the hydrogen lines in the spectrum of Sirius, for instance, do not indicate an excess of that element, but, rather, that the star is at the temperature (10,000° C.) when those lines are prominent. The Sun is at a temperature of 6,000° C., which is known from the fact that light of wave-length 4800 Angstroms is most abundant in its spectrum. This type of spectrum is characteristic of iron. Formerly the theory of stellar evolution was very simple. It was believed that stars began by being very hot and then cooled down, their spectrum changing in type until they arrived at a condition that gave a spectrum of type M and then disappeared. But about the year 1913 a hypothesis was propounded to the effect that in the beginning all stars are of Class M. That some pass through certain stages to become white hot stars of type B, and then return to Class M.

#### THE SIZE OF THE STARS.

By the help of certain physical laws the rate of emission of energy per unit area of a star's surface can be deduced from the colour of the light that is emitted most profusely as shown by its spectrum, so that as the whole luminosity is the total outpouring of energy, it is easy to understand that the area of the surface can be deduced, and hence the diameter of the star. Writing generally, the size of the majority of the stars estimated in this way is of the same order as that of our Sun, though some may be 20 times as large, others smaller in the same ratio. The bright red stars, of which there are not many, are giants having diameters 200 times or more that of our Sun. There are a few stars of peculiar quality known as White Dwarfs that are much smaller, but of an amazing density and weight.

The angular diameters of large stars can be measured with an "interferometer," the active principle of which is the interference of light waves. If the distance of the star is known it is clear that its linear diameter can be deduced, and in this way the following have been found which may be said to agree with the values derived from consideration of the surface brightness as above outlined:—

a Herculis .....	346 million miles
Betelgeuse (average) .....	216 " "
Aldebaran .....	34 " "
Arcturus .....	26 " "

#### ABSOLUTE MAGNITUDE.

This phrase implies the luminosity of a star irrespective of its distance. Actually it is the number that expresses, according to the usual system of stellar magnitude, the brightness of the star as it would be if it were at the distance of 20 parsecs (parallax  $\frac{1}{20}$ "). If the distance of a star is known, its absolute magnitude can be computed from its apparent, or, if the absolute and the apparent magnitudes are known, the distance of the star can be determined, the numerical relation between M the absolute and m the apparent magnitude being  $M = m + 5 + 5 \log \pi$ , where  $\pi$  is the decimal fraction indicating the parallax of the star.

#### DISTANCE OF THE STARS.

The distance of the stars from us is so immense that its determination is a difficult problem, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct or trigonometric method of determination of a star's parallax, as this quantity is called (see p. 140), consists in measuring the minute difference of direction of the star as seen from different points in the Earth's orbit. This is now usually done by photographing the star and its surroundings at appropriate epochs and measuring the change in relative position. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars the ratio of the intensity of certain pairs of lines is a function of the absolute magnitude of the star. In stars of great luminosity, for example, a certain Calcium line is strong, whilst a line due to Iron is weak, but in a star which emits a small amount of light the case is reversed. Applying this principle to stars whose distance has been found trigonometrically, a table correlating the above characteristic with absolute magnitude has been formed by which the actual luminosity of a star may be inferred, and hence its distance.

The distance of a group of stars may be found by the following method. If it is possible to know the mean parallactic movement (see *Stellar Motion*) of a group of stars, the mean parallax or distance of this group follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars. The parallaxes of some binary stars have been found by a computational method assuming a value for their mass (hypothetical parallax).

For some distant objects a method is adopted depending on a peculiar property of a class of stars known as "Cepheid Variables." These stars show very regular fluctuations, coming to maximum at intervals which range from a few hours to several days, and it has been found that the length of this period has a relation to the mean absolute brightness of the star. Those stars which have the longest period are the brightest, and a definite law has been evolved connecting the two elements. These Cepheid Variables are very common in globular star-clusters—the peculiarity was, in fact, first suggested by a number seen in the lesser Magellanic cloud—and by adopting this law it is clear that the great distances of such clusters may be known from a simple observation.

To express large distances a large unit is required. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros; another unit is the *parsec*, or the distance at which the mean radius of the Earth's orbit would subtend an angle of 1" (parallax = one second). This is  $3\frac{1}{3}$  times the light year and is represented roughly by a followed by 13 zeros. The kiloparsec as equivalent for 1,000 parsecs and the megaparsec for a million are words now in use. There is also a unit little used called the *Siriometer*, which is equivalent to a million times the distance of the Earth from the Sun.

Within the sphere of 10 parsecs radius about the Sun as centre, there are rather more than a hundred stars whose distance has been measured. It is probable that more than that number remain to be discovered.

#### STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. The seven bright stars of the Great Bear would on this account have formed in prehistoric times a configuration rather different from that seen to-day. Consideration of these proper motions has led to the conclusion that they are in part due to actual movement in space of the stars themselves, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, for there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral

type F and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type. By an optical principle known as Doppler's, it is possible to find from certain peculiarities of the lines in its spectrum the rate at which a star is approaching or receding from us. The "line of sight" or "radial" velocities of many stars have been found in this way, but the possibility that such spectral peculiarities may be due to causes other than motion is to be remembered.

#### THE INTERIOR OF A STAR.

Astronomical physicists explore the interior of a star on the assumption that it is a volume of perfect gas whose molecules are in incessant motion, which constitutes its temperature, in which pressure, density and temperature conform strictly to a certain relation (Boyle's Law). It is further assumed that the gas has adjusted itself to mechanical equilibrium so that the heat at any point within the star supplies just enough pressure to support the weight of the gas above it and hence is deduced the density and temperature at any point within a star, its mass and radiative quality or luminosity. It is believed that annihilation of its matter is the source of a star's energy, and that as a star grows older its mass lessens. A relation between mass and luminosity found to hold in the case of certain stars for which these qualities are known is thought to hold generally, the more massive stars being the brighter, though a small class of stars of very high density known as "White Dwarfs," of which the best known is the companion to Sirius, do not conform.

Alternative hypotheses to that of the perfect gas have been proposed. In one the interior of a star is considered to be liquid, and radiation pressure plays a minor part.

#### STAR CLUSTERS AND NEBULÆ.

Among the apparently solitary stars there are found groups of stars gathered close together, some of which may be easily separable into individuals, others that can only be separated by the most powerful telescopes, and objects that appear as unresolvable patches of light; the latter are called nebulae, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No in New General Catalogue.	Messier's or Herschel's Number	R.A. 1900.	Declination 1900.	Constellation.	Appearance.
224	M 31	0 38 +40 50	Andromeda ...	Very brilliant oval nebula, visible to naked eye.	
508	M 33	1 29 +29 38	Andromeda ...	A large nebula.	
869 & 884	H VI. 33. 34	2 15 +26 45	Perseus ...	Fine double cluster, visible to naked eye.

There are nebulae called planetary that are small, regular in outline, and show a uniform disc. Analogous to these are some which are dark in the centre called annular or ring nebulae. Beyond this the spectroscopic divides the nebulae into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas. Later investigation showed that the spectra of some nebulae are continuous, such as might arise from a cluster of stars. These are called "white" nebulae, in distinction to those with bright line spectra, which are "green" or gaseous. Photography supplies means of studying the number and form of nebulae in detail, and it is found that a large proportion of them are of spiral form. They are the extra-galactic nebulae already spoken of, and of these about two millions are visible in the 200 inch telescope at Mount Wilson. The gaseous green nebulae are in a small minority, and are generally diffused and irregular in outline and lie mostly in the Milky Way. The smaller, the so-called planetary and stellar nebulae, do not markedly avoid it as do the spirals which lie in a zone of the sky, roughly at right angles to the Galaxy. Globular star clusters also lie outside the Milky Way, but irregular clusters are within its limits. There are also masses of dark nebulae in space which may be the earliest form of matter. Though it is not possible to measure their distances directly, several lines of argument lead to the conclusion that the spiral nebulae are very far away; that they are scattered fairly uniformly through space, and that their average distance apart is of the order of 5,000,000 light years. They have been much studied as to form and brightness, and with a certain system of classification the hypothesis is put forward that nebulae of the same class are approximately of the same size, and hence that their relative distances may be inferred. Distance of the order of 250,000 parsecs has been assigned to M 31 and M 32 (see Table) from observation of the Cepheid variables they comprise (see p. 144), and from this their actual size has been deduced. The diameter of M 31 (the Andromeda) is about 13,000 parsecs.

#### VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star  $\beta$  of the constellation Perseus, is the best known. In general this star is of about the second magnitude, but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude, taking rather more than  $4\frac{1}{2}$  hours to do so, and after a brief minimum regains its light in the same time. It is thought that this is due to partial eclipse by a dark companion that moves in an orbit round the bright star. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table on page 147. The position of Algol is given by R.A.  $2^h 4^m$ , Declination  $40^\circ 45' N$ .

There are variable stars of types other than those like Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. It has

been suggested that this may be due to a pulsation or periodic swelling and contraction of the star. A peculiarity of these stars has been mentioned (see page 144). Stars of the  $\beta$  Lyra type pass from minimum to minimum in about  $3\frac{1}{2}$  days, but are not of the same brightness at all minima, the alternate being equal. There are variable stars with periods ranging between 30 and 500 days whose difference of brightness during a light-cycle may be as great as 9 or 10 magnitudes. The spectra of most of these long-period variables show bright emission lines at time of maximum, and a periodic outflow of incandescent gases and vapours is suggested as the cause of the light variation. Mira Ceti (R.A.  $2^h 15^m$ , Declination  $5^\circ 38' S$ ) is the most famous of these. It will probably be at maximum in February this year, when it will be visible in the early evening. Its magnitude at maximum is between 2 and 5, and at minimum, 9 or 10.

There is a group of 8 or 9 stars of a remarkable type known as the U Geminorum which for most of the time are of uniform or nearly uniform magnitude, but undergo periodic outbursts that generally last a few days. The majority of this group are of 11th or 12th magnitude at maximum, though U Geminorum itself is of the 6th, and the mean range in magnitude is about  $4\frac{1}{2}$ . The outbursts may be said to happen every 20 or 30 days, but this period is frequently much exceeded. SS Cygni is included in this group, though its variation is very erratic. RS Ophiuchi, normally a faint star, has been known to increase in brightness by several magnitudes at long and irregular intervals, so that it has been classed as a Nova rather than a long-period variable. An outburst of this star happened in August, 1933. Also there are a few variable stars whose characteristic is the opposite of that of the class just mentioned; they are ordinarily bright, but sometimes become faint without warning and remain so for a year or more, varying very irregularly until they again attain their normal brightness. The star R. Coronae Borealis, normally of magnitude 6.0, which gives the name to this class, has been observed since the year 1843, and up to the year 1925 forty well-marked minima had been recorded, ranging between magnitudes 7 and 15 in brightness and from 2 months to 12 years in duration. A variable star with the remarkably short period of rather more than an hour and a half was discovered a year or two ago.

#### NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration, but on the other hand the juxta-position may be merely fortuitous and the phenomenon may be the sudden visibility of a mass of dark nebulous gas which by some means has become incandescent. The great brilliancy, which occurs very suddenly, is short-lived, for there follows a rapid fall, and in a few months the object emits, perhaps, 1 per cent. of its light, whilst in a decade it falls to 10th or 15th magnitude or fainter, and in some cases shows a decided variability. About thirty bright stars of this kind visible since the time of Hipparchus 134 B.C. are on record. A list of 23 that have been seen since 1845 will be found in previous issues of this Almanack,

## MINIMA OF ALGOL (β PERSEI) IN 1934.

28 1	28 14	29 6	26 22	27 17	28 6	28 18	27 11	28 0	29 13
30 22	...	...	29 19	30 13	31 2	...	30 7	30 20	...

These are approximate times of the middle of the period of diminished light.

together with an account of the changes in the spectrum that have been generally observed.

No convincing reason for these phenomena has yet been given. The speculation has been put forward recently that novæ are explosions of white dwarfs, and another that a faint star collects a covering of gaseous inter-stellar matter. That they occur as the result of collision of two stars has been argued.

## DOUBLE AND BINARY STARS.

The large majority of stars when looked at through a telescope appear as single points of light of different degrees of brightness and perhaps differing slightly in colour. Some, however, are seen to consist of two, or more, components, and the measurement of the relative position of these forms a branch of observational astronomy. This duplicity would happen if one star lay in space immediately behind the other; but there are more double stars than would accrue if this were the only reason, and it is evident that the greater number of double stars are formed by components actually near together, which, it is likely, have a gravitational connection. This idea of connection was not held in early days and Sir Wm. Herschel who, in 1779, was the first to begin their systematic observation, was careful to call these pairs Double Stars, not wishing to imply anything more than nearness, though by that date it had already been suggested that two stars seen near together were actually contiguous and formed a physical system. Twenty years later Herschel adopted this idea, and used the word Binary as the name for those known to have physical connection. It is clear that limits of distance must be set, and, in general, a separation between the components of less than about 30 seconds of arc defines a double star. As to the lower limit it is found possible with a large telescope to measure distances between two stars as small as a fifth of a second. There are in the sky 25,000 to 20,000 stars between these limits that have been measured and catalogued. The number is given vaguely for it is being added to continually.  $\gamma$  Ursa Majoris (Mizar), the middle star in the tail of the Great Bear, is said to be the first double star discovered (1660). Its components of 2nd and 4th magnitude are separated by 15 seconds. It has a companion, Alcor, of 5th magnitude 12 minutes distant that can be seen separately by the naked eye, but this does not come within the definition. Castor and  $\gamma$  Virginis are other bright stars that consist of two components of about the same brightness separated by a few seconds. Sirius and Procyon are very bright stars that each have a very faint star as com-

panion, and between these types there are many other and various combinations of magnitude. Observations of Mizar, extending over 150 years, do not show any change in the relative position of the components, but from similar measures of the other stars mentioned, it is deduced that the twin components are moving round one another in elliptic orbits. In the case of  $\gamma$  Virginis the orbit is completed in about 180 years. Other visual binaries have periods that range from 10 to 250 years, but a method (see below) other than direct visual observation reveals the existence of binary stars revolving in orbits in periods that may be a few days or only a few hours.

## SPECTROSCOPIC BINARIES.

As mentioned on p. 145, it is possible, from certain peculiarities in a star's spectrum, to deduce the speed with which any star is advancing towards, or receding from, the earth. As a result of their motion around one another, the two components of a binary star will, in general, be respectively advancing towards, and receding from, the earth at different rates, and when both components are bright enough for their spectra to be visible, the spectrum of a binary star shows two distinct sets of lines, which oscillate about their mean position in a period equal to the period of the star. There are many stars of this kind with components so close together that they cannot be seen as two visually, but whose orbit may be determined from observations of their spectrum. Such stars are called Spectroscopic Binaries. One discovered in 1922, known as Plaskett's star, N.D. 6°1309, has a period of 14.42 days, and is the most massive and brightest star (absolute magnitude) whose elements are known.

*Colours of Double Stars.*—The components of close double stars that differ little in brightness show little or no contrast in colour. The components of Castor are said to be both yellowish-green by one observer, and by another bright white and pale white. The components of  $\gamma$  Virginis are both pale yellow to one observer, silvery white and pale yellow to another. The components of  $\alpha^2$  Eridani of magnitude 9.2 and 10.2 are both blue. Following are some examples in the opposite sense. The stars named are all physically connected and have had their orbits computed—the magnitudes of their components are shown by the figures— $\eta$  Cassiope, 4.0, 7.6, yellow, purple;  $\epsilon$  Hydrae, 3.0, 6.0, yellow, blue;  $\gamma$  Ophiuchi, 4.5, 6.0, yellow, purple; Procyon, 1.2, yellow, green;  $\alpha$  Canum Ven, 5.0, 8.5, white, blue; Sirius, 1.20, white, yellow.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, in magnitude and constitution is not unlike the stars of the night sky. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets, and minor planets or asteroids, that may be counted by thousands, circulating round it at varying distances in oval-shaped orbits. A moving object discovered in the year 1890 is said to be a ninth major planet (see Pluto, p. 121). Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals may be considered to be members of the Solar system, since they move in elongated elliptical orbits of which the Sun is at a focus. It is likely that their light is reflected sunlight, since they become brighter as they approach the Sun, but also that they are partly visible by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (see p. 255) is used as a fundamental plane of reference. The other planets move in planes inclined but little to the plane of the Ecliptic, at varying distances from the Sun, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form (pp. 253, 254). The time of rotation about its axis, or the length of the day of the planet, is added when this is known. (See p. 212.)

#### THE SUN.

The surface of the Sun, seen in a telescope, presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice-grains or willow leaves. On this surface, or amid the material forming it, black spots appear sporadically, and around them are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. Bright and dark streaks unassociated with spots, generally called filoculi, can be seen in the central parts of the disc with a spectrohelioscope. There are also brilliant clouds of calcium vapour pervading the solar surface that are revealed by a device called a spectroheliograph, by which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. Modern views describe the spots as columnar vortices which have a deep-seated origin far below the photosphere, and assume that a sun-spot is a vast tornado in which electrified particles are rapidly whirled, as is proved by the presence of a magnetic field. The spots vary in size and number, and increase and decrease somewhat uniformly in both respects, passing

through a maximum about every eleven years. They increase at a rather more rapid rate than they decrease. From measures of their position on the disc and by help of the elements given on page 2 of each month the latitude and longitude (heliographic) of the spots can be computed. It is seldom that spots appear in latitudes greater than 30° from the solar equator, but about the time of spot minimum or rather earlier small spots appear in even more extreme latitudes, and during the succeeding eleven years the spot regions converge towards the solar equator (*Sporer's Law of Zones*), and at time of maximum the spots are largely in solar latitude 12° to 14° N. and S. The periodicity was first noted by Schwabe, of Dessau, in the year 1843 from a comparatively few years' observations, but records of earlier years and a continuous and complete record made subsequently prove the existence of a period of average length of 11½ years from maximum to maximum, though there are large variations from this mean as shown by the table below. The prominences (see p. 176) also show a fluctuation in their activity in a period of the same length, and the form of the solar corona changes with the Sun-spot cycle in a most marked way. Not only this, but there are some terrestrial occurrences that vary in like phase with these solar, which seems to show convincingly a connection, or at any rate a relation, between Sun and Earth (see page 196). The Sun rotates on its axis in about 25½ days, which is shown by the movement of the spots across the visible disc, but because the Earth has moved in its orbit in that time the period of rotation with respect to the Earth, the Synodic period, as it is called, is 27½ days, and a spot may therefore be on the visible disc for 13 or 14 days. These are approximate mean values, for the Sun does not rotate as a whole solid body, and the rate of rotation is not the same in all latitudes. A formula derived from the Greenwich record of spots during the period 1878-1923 gives for the time of sidereal rotation in different latitudes, either north or south:—

	<i>d. h.</i>		<i>d. h.</i>
Equator .....	25 1	Lat. 15° .....	25 8
Lat. 5° .....	25 2	„ 20° .....	25 14
„ 10° .....	25 5	„ 30° .....	26 6

These figures refer to both hemispheres of the Sun. The addition of 2 days gives approximately the period of rotation with respect to the Earth.

#### DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima.		Minima.	
1805 : 2	1870 : 6	1810 : 6	1876 : 9
1816 : 4	1881 : 3	1823 : 3	1889 : 6
1829 : 9	1894 : 1	1833 : 9	1901 : 6
1837 : 2	1906 : 4	1843 : 5	1913 : 1
1848 : 1	1917 : 7	1856 : 0	1923 : 6
1860 : 1	1927 : 5	1867 : 2	

A general decline in solar activity continued in 1923, and it seems that the sun-spot minimum may have been reached in the latter half of the year, but this is not yet to be definitely stated.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, appendages called prominences that are generally described as reddish coloured, but were white when viewed from aeroplanes on the occasion of the eclipse of 1907, June 29, are seen projecting from the Sun's

edge. These consist of masses of glowing hydrogen gas arising from the chromosphere, being sometimes of remarkable shape and extending to enormous heights, and are occasionally detached from the body of the Sun. It is possible to observe these at times other than when the Sun is eclipsed. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscopic. Another appendage of the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen; the upper is a beautiful mass of silvery white light, in form of feather-like plumes, with dark spaces between, sometimes as long as twice the Sun's diameter. The corona appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots, which was realised, perhaps for the first time, at the eclipse of 1878, July 29, when the corona was of the pronounced minimum type, with long streamers on either side called the "wind-vane." Solar eclipses are total only when seen from places on which the shadow of the Moon falls, and an eclipse is seen partial from localities not far from this path of totality, because the change in the observer's position places him out of the cone which envelops both Sun and Moon. There are more solar eclipses than lunar in the proportion of four to three taking the whole earth into account; for any given station the proportion is reversed. (See p. 152.)

#### MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the Sun, but is always at a short distance to the West or to the East of that body. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are known as Greatest Elongations, and their times and the distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as  $16^\circ$  or as large as  $28^\circ$ . Eastern elongations, when the planet is seen as an evening star, occur at intervals of about 116 days, as do Western, and the best opportunities of seeing the planet are before the Eastern elongations in the spring and after Western elongations in the autumn. This year Mercury is likely to be visible as an evening star in February and June, and in the morning in August and in the first part of December. Mercury shows phases to the Earth like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West. (See p. 152.)

#### VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, its distance from the central body being rather more than two-thirds that of the Earth, is almost exactly the same size as our globe. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbour,

the angles of Elongation exceed those of Mercury, and extend to  $47^\circ$ . Writing generally, it is believed that the planets rotate on axes as does the Earth, but this is not known to be the case for the interior planets Mercury and Venus, because of the difficulty in seeing any points on their surfaces that may be considered permanent, though a marking called the Anclises streak is said by some observers to persist. Attempts to discover the rotation period of Venus have shown that it may be about 23 or 24 hours, or 24 days, or 225 days which is the period in which it completes its orbit round the Sun. With this divergence it can scarcely be said that any period is proved. A scheme, practised in America, of photographing through screens of coloured glass (see Mars below) applied to this planet leads to the suggestion of an outer covering of cirrus cloud, and markings seen on the photographs taken in ultra-violet light appear to indicate a period of rotation of 30 days. This planet will be seen in the early evening sky at the beginning of this year and in the dawn from March to September.

#### MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance, size, and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth. It will not be in opposition this year, and will be seen principally in its latter half as a morning object. Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. Its disc departs from exact circular form, or is gibbous, only to the extent of one-eighth of its diameter. The other superior planets are too far away to show very appreciable phase, though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable its rotation period to be well ascertained. There are white spots at the poles of rotation that appear to be snow, or some material that melts, since they dwindle, or even disappear in the Martian summers. The remainder of the surface of the disc is made up of dark bluish-grey areas that were at one time thought to be water but are now regarded as regions covered with vegetation and extensive areas of ruddy or orange hue, largely in the northern hemisphere, that may be of the nature of sand or rock. These markings may be considered permanent, though they suffer small changes apparently due to cloud formation above them. Among these markings are some of such dimensions that they may be properly called "canals," but certain fine, straight markings seen by some observers, but not by others, have received this name, which is certainly unfortunate, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof. The possibility of communication with Mars, which in some minds has been strengthened by the advent of wireless telegraphy, is fantastic.

A method of investigating the surfaces of the planets was evolved a few years ago by photographing through "colour filters." The light before it reaches the plate, which is of suitable sensibility, passes through a screen that absorbs

some light rays so that one colour only affects the plate. The moon, planets and terrestrial landscapes have been photographed in this way, and comparison of the various results has suggested an interpretation. In the case of Mars the telescopic features as described above come out very strongly in red light, but fade away as the colours approach the violet end of the spectrum except that the white polar cap increases in strength, all of which is interpreted as showing that Mars has an atmosphere of considerable depth and obscuring power, sporadically cloud-bearing, and that the white polar spot is an atmospheric phenomenon. The question of an atmosphere on Mars has for long been a matter of discussion, and to this these experiments form a valuable contribution, though they may not supply a final answer. The two satellites of Mars, Phobos and Deimos, were discovered by Asaph Hall in 1877. The rotation period of Mars is approximately 24h. 37m.

#### THE MINOR PLANETS.

Moving in orbits, which in general lie between those of Mars and Jupiter, are a large number of small bodies called minor planets or asteroids. Every year a considerable number of additions are made to the list, more than two hundred having been discovered in 1932, and nearly that number in 1933. These large numbers show that as yet there is no prospect of exhaustion, and it is evident that the discoverers are finding planets of a smaller class. The orbits are determined as observations accrue, and a planet with an orbit is given a permanent number and perhaps a name; but until that is done it is known by letters according to a system. At present there are about 1,200 on the permanent list, and perhaps a thousand that are awaiting further investigation. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 128 miles; and Vesta, 243 miles in diameter. Some of these celestial bodies are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or  $4\frac{1}{2}$  years. Some of the orbits are very oval, and the inclinations of their planes to the Ecliptic have considerably different values. The inclination of Pallas is  $35^\circ$ , whilst that of Juno is only  $12^\circ$ . As has been said, the orbits in general lie between those of Mars and Jupiter, but there are some that pass those limits. One planet, Hidalgo, travels out as far as Saturn's orbit; another, Eros, comes within that of Mars, and may be in some circumstances within 12 or 14 million miles of the Earth. Discoveries of two such planets with abnormal orbits were made in 1932. One found by M. Delport of Uccle, and known now as Amor, has an orbit which, like that of Eros, lies partly within that of Mars, but at its least distance just over a million miles of the Earth's orbit. The other planet, 1933 HA, comes still nearer to the Earth, and was only 6½ million miles away when it was first observed. The perihelion point of its orbit is within 7½ million miles of the orbit of Venus, and there is an approach to the Earth's orbit at two points within about 3 million miles. The period of this planet is about 1.8 years, which is the shortest in the record. It was considered to be of magnitude 12.7 in May last. Its diameter is estimated to be about a mile, so that it is one of the smallest of the asteroids.

#### JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only  $\frac{1}{4}$ th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form is an oblate spheroid, believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree.

Jupiter has four principal satellites, which were the first celestial objects discovered by the telescope. Galileo, who observed them in January, 1610, is said to be the first, but Simon Marius has good claims to be considered an independent discoverer. It has also five much fainter satellites which are far beyond the powers of small telescopes. One of them was discovered with the 36 inch refractor at the Lick Observatory in 1892. The remaining four, which are extremely faint, were detected by means of photography and are regarded as among the most difficult to see of celestial objects. The inner two of the major satellites are each about as large as our Moon, the two outer about 50 per cent. larger.

The characteristic surface features of Jupiter are the bright zones separated by dark belts to both of which the names Equatorial, Tropical and Temperate apply in analogy with the zones on the Earth. Examination by telescope shows detail and markings which, in many cases, are largely permanent. Of them the best known is the Great Red Spot and its surroundings situated on the southern edge of the south Equatorial Belt. There are records of an observation of a spot by Hooke in 1664 which may have been an early appearance of this; the Rev. W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857, and in 1858 it came under general observation. A bay or hollow in which this spot is set was noted by Schwabe in 1831, and is still seen. A remarkable circulatory motion in the South Tropical Zone was detected in 1932-33 and remained in 1933. Observation of small spots showed a rapidly flowing current along the S. edge of the S. Equatorial Belt from the Red Spot Hollow to the marking known as the South Tropical Disturbance, where it crossed the S. Tropical Zone and travelled back along the N. edge of the S. Temperate Belt. A thin dark line the bisects the Equatorial Zone is known as the Equatorial Band, and corresponds in position with the terrestrial equator line. The South Equatorial Belt is similarly divided by a bright region into two components, the Southern of which is at times faint and not to be distinguished from the South Tropical Zone.

The rate of rotation of the planet is found by taking transits of spots or, in other words, by noting the exact times when markings are on the central meridian, and differences in the times given by different markings is a matter of interest. The surface of Jupiter, like the Sun, does not rotate as a whole, but individual zones of latitude appear to move at different rates. Two systems are in use for defining the positions of markings on Jupiter. In System I, which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as 9h. 50m. 30.2s. System II, applies to the Temperate Zones, and in this the time of rotation is 9h. 55m. 40.6s. The rotation period of the

Red Spot has been found by taking a mean over a long period to be *94. 55m. 37s.*

#### SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness in the same plane which is inclined  $26^\circ$  to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. Photographs of this planet, taken by ultra-violet light, show a wide dark belt near the equator which may or may not be an extension of the dusky ring. Saturn shows a bulging at equator, the ratio of the polar to the equatorial diameter being as  $13\frac{1}{2}$  to 15, an eccentricity of the ring with respect to the Ball has been suspected.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest satellite in the solar system, is about one and a half times the size of our moon, whilst Iapetus is nearly the same size as our satellite.

Titan was discovered by Huyghens in 1655, Tethys, Dione, Rheaus and Iapetus (see table p. 153) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell, in September 1848. The most distant, Phoebe, which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter, VIII. and IX. Themis, which is called the tenth satellite, though it appears not to be the farthest from Saturn, has been observed once only since its discovery in 1900, and its reality is doubtful.

Saturn's equator rotates in about  $10\frac{1}{2}$  hours. There is some reason for supposing that, as in the case of Jupiter, the period of rotation is different for different latitudes of the planet. (See p. 126.)

#### URANUS.

This planet, discovered by William Herschel at Bath in 1781, is only just visible to the naked eye. It will be in the evening sky in the early months of 1934 and at the end of the year, being in opposition on October 23. In a telescope Uranus is distinguished from the stars around by its disc, which is obvious though less than  $\frac{1}{4}$ " in diameter, and by the quality of its light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787; the two inner by Lassell in 1851. The Shakespearian origin of the names of the two outer, Titania and Oberon, is obvious; the names of the two inner, Ariel and Umbriel, were taken from Pope's "Rape of the Lock." A hundred years ago it was thought that Uranus had six satellites, neighbouring stars

having been mistaken for attendants. All four move in a plane which is inclined  $82^\circ$  to the plane of the ecliptic and in that plane they move retrograde, or in the opposite sense to the revolution of the planets round the Sun. If, however, the plane of their movement is regarded as inclined  $98^\circ$  to the plane of the ecliptic, their revolution may be considered direct. It is generally supposed that the plane in which the satellites move is that of the planet's Equator. A period of rotation has been determined both by spectroscopic observation, its value being  $10\frac{1}{2}$  hours, and the direction the same as that of the satellites.

#### NEPTUNE.

This planet is a telescopic object of about the 8th magnitude that was detected on September 23, 1846, by Prof. Galle of the Berlin Observatory, as the result of mathematical deduction from irregularities shown by the observed positions of Uranus, made by Adams of Cambridge and Le Verrier of Paris. Its single satellite, which was discovered by Lassell in October of the same year, moves in a plane inclined  $35^\circ$  to the plane of the Ecliptic in a retrograde direction like the satellites of Uranus. A period of axial rotation of the planet of  $7\frac{1}{2}$  hours has been inferred from variability of its light, and another of twice that length from spectroscopic observations, which is adopted. Triton has been suggested as the name of Neptune's satellite, but is not generally used.

#### PLUTO.

In the early months of 1930 a series of plates taken and examined at the Lowell Observatory showed a moving object that is considered by some to be a major planet, not far from the position which Percival Lowell had predicted for an extra-Neptunian body. There is little or no doubt that there is a body moving in an orbit consistent with that being its class, and the elements of such an orbit have been computed. The period is 248 years. The distance from the Sun at aphelion is nearly 50 astronomical units and at perihelion  $29\frac{1}{2}$  such units, so that it is at that point just within the orbit of Neptune. Its plane is inclined  $17^\circ$  to the plane of the ecliptic. The orbit is said to be so similar to that predicted by Lowell that the resemblance cannot be due to accident. Though reasons have been adduced to show that this body must be of the size and mass of Mars or the Earth, there is no proof that it is other than an abnormal minor planet (*q. v.*), and Pluto does not yet appear as a major planet in the British Nautical Almanac.

#### THE MOON.

Neither Mercury nor Venus, so far as is known, has a satellite; the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the earth, but every region of the Moon is presented to the Sun in turn, and neglecting hypotheses as to the possible existence of a lunar atmosphere and its effects, it seems likely that there are rather remarkable changes of temperature: in the lunar day of half a month it must be heated to an extreme degree, and in the other half subjected to cold equal to that

When the above numbers are less than 0° 500 the planet is *horned*, when greater than 0° 500 it is *gibbous* until unity is reached, when it is full.

of interstellar space. Her diameter is rather more than 2,160 miles. Her rate of motion through the firmament is  $13^{\circ} 10' 35''$  per day, which implies that she travels over a space slightly exceeding her own diameter in one hour. The average time from a New Moon to the next is *29d. 12h. 44m. 3s.*, but individual cases may range 6 hours and more on either side of this. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, rug-plains, and crater-pits. The question as to the origin of these formations, whether they may have been caused by volcanic action, or, on the other hand, by the impact of meteors, forms an interesting subject for discussion. It is believed that the Moon was at one time part of the Earth and became detached.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase of a lunar eclipse is seen the same from all places where the Moon is above the horizon at the time. Solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon. (See p. 149.)

The Full Moon which occurs near the Autumnal Equinox rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows this is called the Hunter's Moon.

## A FEW OF THE CHIEF LUNAR FORMATIONS.

*Wedge-shaped Valley of the Alps.*—Near the central line of disc, towards the north, a cleft 83 miles long and  $3\frac{1}{2}$ – $5\frac{1}{2}$  miles broad.

*Apennines.*—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles; highest summit (Huyghens) reaches 28,000 feet.

*Aristarchus.*—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

*Mare Crisium.*—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

*Mare Serenitatis.*—Lies S. of the Moon's centre, and extends over 425 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

*Clavius.*—One of the finest craters on the Moon, and about 144 miles in diameter. Situated on S. limb.

*Tycho.*—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine

crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

## THE AURORA BOREALIS.

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations. This is regarded as showing the outer limit of our atmosphere, and its height has been determined by means of simultaneous photographs taken from two or more stations 20 to 50 miles apart. It is found that very few auroræ are below 20 miles high, and above that level the number increases rapidly, the most frequent height being at about 62 and 66 miles. Above 66 miles the number gradually diminishes, but some have been measured as high as 400 miles. It is suggested that the aurora is due to electrical discharge caused by charged particles shot into the earth's atmosphere from the Sun. An auroral display generally happens about the time of the occurrence of a terrestrial magnetic storm (see p. 156). There is some evidence of a tendency for a display to be repeated after an interval of 27 days, which is the period of rotation of the Sun with respect to the earth, and they are more frequent at times of sun-spot maximum. A prominent line in the green in the spectrum of the aurora has given rise to much study and has lately been shown by laboratory experiment to be due to a mixture of oxygen and helium bombarded by high-speed electrified particles, but as this line has been found to be present in the light from the night-sky in non-polar regions when no aurora is visible it may be that this line is not directly connected with the phenomenon.

## THE ZODIACAL LIGHT.

This is an appearance whose cause is not completely understood, to be seen only from places distant from towns and cities where the air is free from smoke and the darkness of the sky is not affected by the glare from artificial lights. At such places in northern latitudes it shows, when the moon is absent, as a cone of faint light stretching up slantingly from the point of the horizon that is above the Sun in the direction of the ecliptic, and therefore is best seen before sunrise in the autumn months and after sunset in Spring because at those times that direction is inclined at a large angle to the horizon. From high elevations in the tropics it may be seen throughout the year. A distinction is sometimes made between this and the Zodiacal Band which is an even fainter phenomenon and a prolongation of the Zodiacal Light. This is said to extend entirely across the sky, forming a complete ring, and there is at the point exactly opposite to the

Sun a patch, a few degrees in diameter, of slightly brighter luminosity called the "Gegenschein" or "counter glow." The Zodiacal Light has been said to be a mere atmospheric effect, but this is inconsistent with some of the chief features of its appearance. It may be the manifestation of a widely scattered appendage of the Sun in the plane of the ecliptic, or, it has been suggested, it may be sunlight reflected from a vast concourse of meteoric systems. There is some slight evidence that it may be prominent at times of magnetic disturbance.

## METEORS.

Bodies of another kind that belong to the Solar system are the meteoric streams, which give rise to occasional showers of meteors, falling stars, or fireballs, and are all the same class of object, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to be quite spectacular. There is some reason to suppose that meteor swarms are the remains of disrupted comets, and that, for example, Tempel's comet is the parent of the Leonid meteors. Meteors were seen on Oct. 9, 1906, and a smaller shower on Oct. 9, 1907, from a radiant point in Draco at  $26^{\circ}$ ,  $+55^{\circ}$ , which appeared to have been derived from Giacobini's comet of 1900, that passed perihelion in December 1906. This comet was again observed last year (1933) when it returned to perihelion in July, and a very profuse display of meteors occurred on Oct. 9. A shower may be expected on the same date this year. The comet Pons-Winnecke, whose orbit resembles that of a meteor stream that has supplied a display (1916), at the end of June, was also observed at its return last year. The real paths of a great number of meteors have been computed, and the average heights are about 70 miles at the beginning and about 48 miles at the end, the speeds varying from 10 to 45 miles per second, but occasionally these limits are passed. Fireballs, or very bright meteors, form a very important branch of meteoric astronomy. These objects make their appearance at all times of the year unexpectedly, so that they are often imperfectly noted and computation of their flight is not practicable. On March 5, 1933, at 7.45 p.m., a very brilliant fireball was observed in the Orkneys and Shetlands. Its light was so intense that at

## APPARENT DIMENSIONS OF SATURN'S RING, 1933.

Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.
Jan. 10	34.90	+9.49	April 16	36.40	+7.20	July 21	42.05	+8.27
Feb. 11	34.50	+8.50	May 18	38.28	+7.10	Aug. 22	42.56	+9.15
Mar. 15	35.10	+7.70	June 19	40.38	+7.48	Sept. 23	41.67	+9.61
						Oct. 25	39.79	+9.41
						Nov. 26	37.70	+8.66
						Dec. 28	36.01	+7.63

This table gives the angular dimensions of the outer limit of Saturn's outer Ring as seen from the Earth. The + sign shows that the N. side of the Ring is presented to the Earth throughout the year.

Scalloway, near Lerwick, the sudden illumination startled people in brightly-lit rooms. The track of another seen at 9 p.m. on Feb 22, 1933, lay over the English Channel S. of Sussex, with heights of 60 miles to 37 miles and a length of 40 miles. The speed was 16 miles per second. Meteorites are large meteors which actually reach the surface of the earth, and are much rarer than either shooting stars or fireballs. One of these bodies fell in North Wales on April 14, 1933, the descent being accompanied by thunderous reports and earthquake-like rumbles. The meteorite broke up before reaching the earth, and a fragment weighing 5 oz was picked out from the hole it made in the ground, the rest of the pieces being probably lost in the sea.

On the previous page is given a list of the days when meteor showers may be expected, with the radiant points from which the meteors diverge. The dates given are those on which meteors may be expected in fair numbers; but in some cases the range of apparition extends considerably beyond; the Perseids, for example, have been seen from the beginning of July to the end of August. The radiant in these instances corresponds to the date of maximum.

Alternative names of stars (see pages 140, 142)—Polaris = a Ursa Minoris; Aldebaran = a Tauri; Rigel = β Orionis; Capella = a Aurigae; Betelgeuse = a Orionis; Sirius = a Canis Majoris; Castor = a Geminiorum; Procyon = a Canis Minoris; Pollux = β Geminiorum; Regulus = a Leonis; Spica = a Virginis; Arcturus = a Bootis; Antares = a Scorpis; Vega = a Lyrae; Fomalhaut = a Piscis Australis; Altair = a Aquilae; Markab = a Pegasi; Achernar = a Eridani; Canopus = a Argus; Mizar = γ Ursa Majoris.

## ASTRONOMICAL CONSTANTS.

Solar Parallax	8.80"	Solar Apex (Boss)	R.A. 270° Dec. 34° N.
Precession for the year 1934	50".264	Length of Year	Tropical 365.2422
Constant of Nutation	9".21	(In Mean Solar Days)	Sidereal 365.25636
Constant of Aberration	20".47		Anomalous 365.2564
Mean Obliquity of Ecliptic (1934)	23° 26' 55".33"		(Perihelion to Perihelion)
Moon's Eq. Hor. Parallax	57' 27".00"	Eclipse	345.6000
Earth's Orbital speed per sec.	18.496 miles.		
Velocity of Light in vacuo per sec.	186,325 miles.	Length of Month	New Moon to New 29 d. 4 h. 8
Solar motion per sec.	19.5 km. = 12.1 miles.	(Mean Values)	Sidereal 27 d. 7 h. 43 m.
Pole of Galactic Plane) R.A. 291° 1' (or 12h. 44 m.)			Anomalous 27 d. 13 h. 33 m.
(Newcomb)	Dec. 26° 8' N.		(Perigee to Perigee)

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900·0 miles and the diameter of the Equatorial circle 7,926·7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5·5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and both revolve round the centre of gravity but not precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of  $23\frac{1}{2}^{\circ}$ , and it is this tilt which causes the seasons. At some time of the year the Sun is high above the Equator in mid-latitudes both north and south, and not only does the high altitude make the days longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres, the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versa*. Since the axis of the Earth is inclined always in the same direction, the line of intersection of the Equator with the Ecliptic moves parallel to itself as the Earth travels round the Sun (approximately). The instants when this line passes through the Sun are called the Equinoxes. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is 18½ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time, which is the sidereal day. Because of the movement of the Earth in its orbit the length of the solar day is more than this by about four minutes (see pp. 137, 157). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a curve, roughly spiral, about the pole of figure as centre at a distance of a few feet from it.

#### THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a

series of periodic terms, and if these terms are each carried forward to some future date their recombination will give the predicted tide. Taking the mean sea-level as datum, writing generally, at any place high water occurs twice in every 24 hours, the interval between successive happenings being 12 hrs. 25 mins. High water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs  $1\frac{1}{2}$  days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes.

#### TERRESTRIAL MAGNETISM.

The best known manifestation of this phenomenon is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Lines of equal magnetic declination run across the British Isles in directions approximately parallel to that of a line from Land's End to Edinburgh. Along a line joining Cambridge to Littlehampton, the declination (West) is, approximately, the same as at Abinger. At Dover it is now rather more than a degree less; from Newcastle to Plymouth it is nearly  $1\frac{1}{2}^{\circ}$  greater, and along a slightly curved line from Killarney to the island of Lewis the west declination is  $5^{\circ}$  greater than at Abinger. There are two points on the globe to which the magnetic meridians and lines of equal declination converge, known as the Magnetic Poles. At these points a freely suspended magnetic needle would stand vertically. The position of the North Magnetic Pole adopted in Admiralty Charts is lat.  $70^{\circ} 50' N$ , long.  $96^{\circ} W$ , which differs nearly a degree in each element from the position found by Sir John Ross in 1831, and agrees more nearly with the position found by Amundsen in 1903-5. A new position may have been found by the observers lately engaged in polar regions. The position of the South Magnetic Pole found in 1840 was  $73^{\circ} 30' S$ ,  $147^{\circ} 30' E$ . The position

now adopted quite provisionally is  $72^{\circ}58'.255''$  E. The magnetic declination at any place changes gradually year by year. That the compass needle does not in general point true north and south, but that it is inclined a certain amount east or west, and that the amount varies with the locality, was recognised among western nations by the end of the 15th century. Columbus being credited with the discovery. The dip or inclination to the horizon was first noticed by Hartmann, of Nuremberg, in 1544, and was measured by Norman, of London, in 1576. That there is a continual change in the magnetic declination was discovered by Gellibrand in 1634.

#### Magnetic Declination at London.

Year.		
1580 .....	11	15 East.
1665 .....	1	30 West.
1765 .....	20	0 West.
1800 .....	24	0 West.

In 1829 the westerly declination at Greenwich was about  $24^{\circ} 25'$ , which was probably its maximum. The needle has been since moving slowly eastward at that place, and in the year 1905 the declination (mean) was observed to be  $13^{\circ} 10'$  west. The work of recording earth-magnetism was then transferred from the Royal Observatory, Greenwich, to Abinger near Dorking in Surrey. The values of the elements there found in successive years are given in the following table:—

Year	Dec	H.F.	V.F.	Dip
1905	13 25' W.	1860	45945	66 35'
1910	12 24' W.	18548	45964	66 38'
1911	12 13' W.	18544	45963	66 38'
1912	12 3' W.	1854	4594	66 39'
1913	11 58' W.	1853	4594	66 39'
1914	11 40' W.	...	...	...

The values for 1913 are to be taken as provisional, and the declination given for 1914 is inferred only. V.F. signifies vertical force.

The mean differences, Abinger minus Greenwich, for Dec. H.F. and Dip. were found to be—

1905	+ 12'8"	+ 00183	- 16'2"
1911	+ 13'7"	+ 00170	- 16'0"

The daily movement in declination of the needle at Abinger is 2 or 3 per cent. less in amount than that at Greenwich.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about  $12'$  in summer and  $7'$  in winter. The needle occupies its mean position in the morning about 10h., and again about 2h., throughout the year. It reaches its most westerly position about 12h., and its most easterly position during the night or early morning at a time which varies during the year. The inclination or dip also varies in a similar manner to the declination. Since these changes of the magnetic elements are greater during the hours of daylight than in the night, are much

greater in summer than in winter, and are evidently affected by the solar activity—for the daily range is larger at times of spot maximum than at minimum—it is to be concluded that they depend on the Sun.

#### MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and may be accompanied by spontaneous electric earth-currents, which, if violent, interfere with telegraph working, and is often synchronous with a manifestation of the Aurora Borealis. A suspected recurrence of magnetic storms after an interval of 27 days that would support the theory that they are caused by radial emanations from the Sun, which strike the Earth—the hose-pipe theory—has received some proof, and it has been found that the 27-day period is shown by magnetic calms as well as by magnetic disturbances. Investigation shows that this recurrence does not obtain in the case of the most intense storms, but that there is a tendency for a storm of minor degree to be followed by another of its kind after the period named, which is not easily explained. There is frequently, but not always, a large spot on the Sun contemporaneously with a large storm, leading to the hypothesis of active areas on the Sun that may or may not be marked by a spot.

#### SUMMER TIME ABROAD.

	Begin.	End.
Irish Free State	As in Great Britain	
France	Last Sat. in March at 23 hours. Or*	1st Sat. in Oct. at 24h.
Belgium	(1923)† May 23	October 2
Netherlands	(1923) April 2	October 1
Portugal	1st Sat. in April	1st Sun. in Oct.
Rumania		
Finland	June 20	Sept. 30
Greece	(No information as to dates)	
U.S.S.R.	A permanent advance of 1 hour.	
U.S.A. and Canada	Adopted in some, but not all, States by local regulation	
New York (1913)	April 23	Sept. 24
Brit. Honduras	October 1	Feb. 14
Argentina	September 1	March 31
Brazil	(1913) October 3	March 31
Chile	September 1	April 1
New Zealand	and Sun. in October (advance of ½ hour)	3rd Sun. in Mar.

\* In France and Belgium an alternative Saturday is chosen, if necessary, to ensure that Easter does not fall between the beginning of summer time in France and Great Britain. In 1923, for example, summer time began in France on April 2. This year summer time will begin on March 25.

† The entry (1923) indicates that the dates are those adopted in that year, but may be altered in others.

**Duration of Light and Darkness.**—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or the period of moonlight and sunlight during the twelve hours from 2h. to 6h. These small diagrams have four divisions, each representing three hours, and a division is left unblackened if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year

are  which reduce to  in the summer.

*Greenwich Mean Time.*

APART from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars because of the movement of the Earth round the Sun, which is not constant because of the ellipticity of the orbit. The length of the Solar day also varies because the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant, but that of the apparent, or the interval from one transit of the Sun across the meridian to the next, varies for the reasons above given, and it happens that the longest apparent solar day is about December 22, and the shortest about September 16.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun, is on some chosen meridian. The time is called the Local Mean Time of any place through which that meridian passes. Usually some standard meridian, such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time, arises (see Zone Standard Time, p. 156).

*Apparent Solar Time.*

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 5 for each month, with a precept for its use.

*The Astronomical Day.*

For purposes of Astronomy the day formerly began at noon, and the hours following noon were numbered successively from 0 to 23. A change was made in 1925, and the Astronomical Day now begins at midnight, the hours being numbered in this way as has been the practice in this Almanack since 1921. (See Note, p. 84.)

*Rhythmic Time Signals.*

For the purpose of comparing the time shown by a distant clock with that of the Greenwich standard, signals issuing primarily from Greenwich are broadcast from the Post Office Wireless Station at Rugby each day at 10<sup>h</sup>. and 12<sup>h</sup>. For accurate comparison a series of signals of the rhythmic, scientific, or Vernier type is sent. The zero signal is exactly synchronous with a beat of the standard clock, and those that follow are at intervals of 60/61 seconds. The comparison is made by noting the coincidence of a beat of the distant clock, beating seconds, with a signal. If a tick of the clock coincides with the zero signal, it is clear that the clocks differ by an integral number of seconds. If, however, coincidence does not come at the zero signal, but at the  $n$ th following, the difference of the clocks contains a fraction of a second involving  $n/61$ .

*Sidereal Time.*

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars and begins at any place when the First Point of Aries is on that meridian. In

observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation. The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian, and comparison of this with the known time of transit (star's R.A.) will give the error of the Sidereal clock, and from this the error of the Mean Solar clock can be found by comparison and computation as below.

The rule for finding the Mean Time of transit of any object from its Right Ascension, or, what is the same thing, of converting Sidereal into Mean Time may be stated thus:—*From the given Right Ascension or Sidereal Time subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of 10 secs. per hour, or by the Table on p. 137. If the R.A. should be smaller than the S.T. at noon, 24<sup>h</sup>. must be added. The final result will be the mean time reckoned from noon, to which 24<sup>h</sup>. must be added to convert into G.C.T. as now used.*

*Ex.*—At what time will Sirius cross the meridian on August 31?

R.A. of Sirius + 24 <sup>h</sup> .....	30 48 15
Sid. Time at Noon, Aug. 30 (subt.) ..	10 31 58
Interval of Sidereal T. from noon ..	20 16 17
Retardation from p. 137 (subt.) ...	3 18
Interval of Mean Time from noon ..	20 6 59
G.M.T. (U.T.) of Southing .....	8 6 59

For stars that transit after noon it would have been necessary to use the Sidereal Time at Noon for August 31.

Mean Time may be converted into Sidereal Time by reversing this process, or otherwise by taking out the G.M.T. of the zero of the Sidereal clock which precedes the Time to be converted, making use of col. 9 on page 5 of the month.

*Ex.*—To find the Sidereal Time corresponding to 8 h. 6 m. 59 s. G.M.T. on Aug. 31.

G.M.T. (U.T.) Aug. 31 .....	8 6 59
From col. 9, p. 111 .....	1 35 50
Interval of Mean T. from 0 <sup>h</sup> . Sid. ..	6 42 9
Acceleration from p. 137 (add) ...	1 6
Corresponding Sidereal Time .....	6 48 15

*Summer Time.*

In 1925 an Act dated May 17 ordained that during a defined period of that year the legal time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time. An Act of 1925 (July 20), specified that the period should begin at 1 o'clock G.M.T. in the morning of the day following the third Saturday in April, or if that day is Easter-Day, the day following the second Saturday, and should end at 1 o'clock G.M.T. in the morning of the day next following the third Saturday in September. The Act, renewed in 1924 and 1925, was made permanent (August 7, 1925) and modified by substituting the first Saturday in October for third Saturday in September. The Act applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. A list of the periods in each year during which Summer Time has been used since its adoption will be found in this Almanack for 1926.

A Summer Time scheme has been tried in other countries with varying success. A list of the countries where it is now used is given on the opposite page.

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian.\* Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now almost throughout the world a Standard Time which differs from that of Greenwich by an integral number of hours, either fast or slow, is used. In a few cases the difference includes a half hour.

The Standard Time adopted in various countries is given below. In the United States and Canada five standard times are used, these large territories being divided into zones approximately  $7\frac{1}{2}^{\circ}$  on either side of five central meridians. Brazil is divided into three zones in which the times 3, 4, and 5 hours slow on Greenwich are standard respectively. For the North coast of Siberia the hourly zones from 13 hours to 5 hours fast have been adopted.

#### East on Greenwich Time

- 12 hrs. F....Fiji, Gilbert and Ellice Is.  
 12½ " F....New Zealand, Chatham I.  
 12 " F....New Caledonia, New Hebrides, Caroline Is. (east), Santa Cruz, Marshall Is., Solomon Is., Nauru.  
 10 " F....Victoria, New South Wales, Queensland, Tasmania, New Guinea, Lord Howe Is., Caroline Is., west of  $150^{\circ}$  E., Mariana Is., Guam.  
 9½ " F....South Australia, Northern Territory of Australia, part of N.E.W.  
 9 " F....Japan, Korea, Yap (Caroline Is.).  
 8 " F....Port Arthur, East China, Hong Kong, Philippine Is., Formosa and Pescadores Is., British North Borneo and Labuan, Macao, Thunor, West Australia.  
 7½ " F....Sarawak.  
 7 " F....French Indo-China, Hainan I. and Pakhoi, Siam, Federated Malay States, Straits Settlements.  
 6½ " F....Burma, Andaman and Nicobar Is.  
 5½ " F....India (except Calcutta), Portuguese India, Ceylon, Laccadive Is.  
 5 " F....Chagos Archipelago.  
 4 " F....Mauritius, Seychelles, Réunion.  
 3 " F....French Somaliland, Madagascar, Italian Somaliland, Eritrea, Russia, Iraq, Tanganyika, Kenya, Zanzibar.

Corisca, St. Thomas and Principe Is., Fernando Po, Ivory Coast, Dahomey, Morocco, Gold Coast (Jan.-Aug.), Togoland.

#### Slow on Greenwich Time.

- 1 hr. S....Iceland, Madeira, French Guinea, Senegal, Portuguese Guinea, Liberia, Sierra Leone, Ascension Is., Canary Is., Mauritania, Gambia.  
 2 hrs. S....Azores, Cape Verde Is., Fernando and Trinidad Is. (Brazil).  
 3 " S....Eastern Brazil.  
 3½ " S....Uruguay.  
 4 " S....Canada East of  $66^{\circ}$  long., Nova Scotia, Prince Edward Is., Porto Rico, Trinidad, the Leeward Is., Grenada, Guadeloupe, Tobago, Martinique, St. Lucia, St. Vincent, St. Pierre, Barbados, Central Brazil, Argentina, French Guiana, Falkland Is.  
 4½ " S....Venezuela.  
 5 " S....Canada from  $66^{\circ}$  to  $90^{\circ}$  meridian.  
 Eastern. Eastern States of U.S.A., Jamaica, Bahamas Is., Cuba, Haiti, Peru, Panama, Western Brazil, Chile, Colombia, Dominican Republic.  
 6 " S....Central parts of Canada and U.S.A., Costa Rica, Salvador, Honduras, part of Mexico.  
 Central. " S....Canada west of the 103rd meridian.  
 7 Mountain. Mountain States of U.S.A., Mexico.  
 8 " S....British Columbia, California, Pacific. Nevada, Oregon, Washington.  
 9 " S....Sitka.  
 10 " S....Yukon, Alaska, Low Archipelago, Marquesas, Austral and Society Is.  
 10½ " S....Hawaiian or Sandwich Is.  
 11 " S....Aleutian Is., Samoa (Eastern and Western).

In the Tonga or Friendly Islands the time 12h. 19m. 22s. fast on Greenwich is used: the longitude is about  $174^{\circ}$  40m. W., but the Date line (see below) passes to the East of them. The time of Aden is 59m. 52s. fast on Greenwich standard in Aden and British Somaliland. The time of Calcutta is 5h. 57m. 20s. fast; Holland, 0h. 19m. 32s. fast; British Guiana, 3h. 45m. slow. The time 2 hours fast on Greenwich is called East-European, that 1 hour fast, Mid-European. The time 4 hours slow on Greenwich has been called Maritime, Inter-Colonial, or Atlantic Time. The names of the other zones of North America are as shown.

#### THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points:—

- (1) Lat.  $60^{\circ}$  S., long.  $180^{\circ}$ .
- (2) "  $51\frac{1}{2}^{\circ}$  S., long.  $180^{\circ}$ .
- (3) "  $43\frac{1}{2}^{\circ}$  S., long.  $172\frac{1}{2}^{\circ}$  W.
- (4) "  $15\frac{1}{2}^{\circ}$  S., long.  $172\frac{1}{2}^{\circ}$  W.
- (5) "  $5^{\circ}$  S., long.  $180^{\circ}$ .
- (6) "  $48^{\circ}$  N., long.  $180^{\circ}$ .
- (7) "  $52\frac{1}{2}^{\circ}$  N., long.  $170^{\circ}$  E.
- (8) "  $65^{\circ}$  N., long.  $160^{\circ}$  W.

Then through the centre of Bering Strait to a point lat.  $70^{\circ}$  N., long.  $180^{\circ}$ .

\* Summer Time is the "legal" time during the period in which its use is ordained. (See pp. 24, 25 and 26).

## THE AGE OF THE EARTH.

In the view of science, any date for the "Creation of the World," such as the year 4004 B.C., as adopted by Archbishop Usher from scriptural chronology, is quite untenable. From the assumption that its heat is sustained solely by contraction of its bulk, Lord Kelvin deduced 20,000,000 years as the time that the Sun has existed, but this is too short to be accepted by geologists whose researches require a considerably longer time for the formation of terrestrial strata. The age of the Earth has been deduced astronomically from the eccentricity of Mercury's orbit, and from the tidal theory of the origin of the Moon. Geologically by various methods, and, since the discovery of radio-activity, from the ratio of the quantities of lead and of radioactive elements in rocks in the Earth's surface, which are held to result from the transmutation of uranium. All the evidence is more or less consistent with the conclusion that the Earth has existed as a planet for a period between 1,500 and 3,000 million years.

## GEOLOGICAL PERIODS.

- I. **AZOIC** ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.
- II. **EOZOIC** ("Dawn of Life"), characterized by the first appearance of animal life.
- III. **PALÆOZOIC** ("Old Life") or **PRIMARY**, containing traces of extinct animal life :—
  - i. *Cambrian*, exemplified in Wales (Cambria), Cumberland, &c. — the earliest group which possesses a connected suite of fossils.
  - ii. *Ordovician*, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
  - iii. *Silurian*, named after the ancient British inhabitants (Silures) of S.E. Wales.
  - iv. *Devonian* or *Old Red Sandstone*, from the prevalence of the system as a marine formation in Devonshire.
  - v. *Carboniferous*, including *Coal Measures*, *Millstone Grit* and *Mountain Limestone*.
  - vi. *Permian*, from the Russian province of *Pern*, where these strata are widespread.
- IV. **MESOZOIC** ("Middle Life") or **SECONDARY**, with intermediate forms of animal life :—
  - i. *Triassic*, from the three (tri-) divisions of the type formation in Germany.
  - ii. *Jurassic*, typically displayed in the *Jura Mountains*.
  - iii. *Cretaceous*, from the chalky nature of its representatives where first studied.
- V. **CENOZOIC** ("New Life") or **TERTIARY**, containing forms of existing life :—
  - i. *Eocene*, the dawn or beginning of new forms of life, i.e., existing species.
  - ii. *Oligocene*, containing a few still existing species.
  - iii. *Miocene*, containing a minority of existing species—less than 50 per cent.
  - iv. *Pliocene*, the fossil remains show a majority of still existing species.
- VI. **QUATERNARY** ("Fourth in Order") or **POST-TERTIARY** :—
  - i. *Pleistocene* or *Glacial*, the greatest number of the remains are those of still existing species. Period of last Great Ice Age.
  - ii. *Recent* or *Post-Glacial*.

Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. i.). Traces of human life are first found in V. iv. (See also below.)

## THE ANTIQUITY OF MAN.

*Pithecanthropus erectus* (Erect Ape-man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pleistocene times (see Geological Period, col. i.), about midway between the Orangutan and Man in development.

*Sinanthropus pekinensis* (Peking Man).—A skull found at Choukoutien, 40 miles S.W. of Peking, China (Dec. 2, 1929), is ascribed to the same period as the Java type, but the brain development is greater than the Trinil skull and the brain case much thinner than that of the Piltdown skull.

*Australopithecus Africanus* (Erect Man-ape).—A skull was discovered in a limestone deposit at Taung's (Western Cape Colony), in 1925, by Professors Dart and Young of Witwatersrand University. In connexion with this discovery, Sir A. Keith, F.R.S., has declared that traces of human life may yet be discovered in *Miocene* times (see col. i. V. iii.).

*Homo Heidelbergensis* (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the Pleistocene Period.

*The Piltdown Skull* (Eo anthropos, or Primitive Man).—Discovered in 1922 at Piltdown, Sussex, and ascribed to primitive man of early Paleolithic times.

*Neanderthal Man*.—Remains of a skull and parts of a skeleton found in 1856 in the Neanderthal Ravine, near Düsseldorf, Rhenish Prussia, and others found at Spy, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era. In 1908 a similar skull was found near *Taughha*, Palestine.

*Homo Præinigenius*.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brux and Brunn, Moravia, and at Galley Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

## STAGES OF CIVILIZATION.

The terms employed by ethnologists refer to periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. Races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., while races in Oceania were still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages.

*The Stone Age*.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithic* (or Dawn of the Stone Age), and this

period may have extended to 600,000 years B.C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments, from the chipped, leaf-shape forms, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were found). The Mousterian period is held to have lasted until about 10,000 B.C., when *Neolithic* (or New Stone Age) weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging, the graves being only large enough to contain a body huddled together in a cramped position.

*Cultivation of the Soil.*—Cultivation is believed to have followed the interment of the dead about 10,000 B.C., and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western civilization at *Nippur* (and elsewhere in Iraq) no later than 6,000 B.C., and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Iraq and Egypt.

*The Bronze Age.*—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements and utensils of cast bronze superseded those of stone, wood, horn or bone. The designs and decorations suggest that this stage of culture was introduced into Europe from Asia, and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

*The Iron Age.*—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, Chaldaea, Assyria and Egypt about 4000 B.C.; in South-Eastern Europe about 2000 B.C., spreading over the rest of Europe from 1000 B.C. to 100 A.D., by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Paleolithic Age. With the Iron Age was re-introduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age.

## THE ROMAN CALENDAR.

Present Days of the Month	March, May, July, October have thirty-one days	January, August, December have thirty-one days	April, June, September, November have thirty days.	February has twenty-eight days, and in Leap Year twenty nine.

## EPOCHS AND CALENDARS.

## THE ROMAN CALENDAR.

*Roman.*—Roman historians adopted as an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C., and the ordinal number of the year in Roman reckoning is followed by the letters A.U.C. (*Anno Urbis Condite*). The Calendar that we know has developed from one established by Romulus, who is said to have used a year of 304 days divided into ten months beginning with March, to which Numa added January and February, making the year consist of 12 months of 30 and 29 days alternately, with an additional day so that the total was 355. It is also said that Numa ordered an intercalary month of 29 or 30 days in alternate years, making 90 days in eight years, to be inserted after February 23, but there is some doubt as to the origination and the details of the intercalation in the Roman Calendar, though it is certain that some scheme of this kind was inaugurated and not fully carried out, for in the year B.C. 46 Julius Caesar, who was then Pontifex Maximus, found that the Calendar had been allowed to fall into some confusion. He therefore asked the help of the Egyptian astronomer Sosigenes, which led to the construction and adoption (B.C. 45) of the Julian Calendar, and, by a slight alteration, to the Gregorian now in use. The year B.C. 46 was made to consist of 445 days, and is called the *Year of Confusion*. In the Roman (Julian) Calendar the days of the month were counted backwards from three fixed points, or days, and an intervening day was said to be so many days *before* the next coming point, the first and last being counted. These three points were (1) the Kalends; (2) the Nones, and (3) the Ides. Their positions in the months and the method of counting from them will be seen in the Table on p. 160.

## THE CHRISTIAN CALENDAR.

In the Christian chronological system the years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*), and A.D. (*Anno Domini*). The correlative dates of the epoch are the 4th year of the 104th Olympiad, the 753rd year from the Foundation of Rome, 3761 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. This was introduced into Italy in the sixth century, and though first used in France in the seventh it was not universally established there until about the eighth century. It has been said that the system was introduced into England by St. Augustine (A.D. 596), but was probably not generally used until some centuries later. It was ordered to be used by the Bishops at the Council of Chelsea, A.D. 826. The actual date of the birth of Christ is somewhat uncertain. December 25, B.C. 4, is supported by several lines of argument.

The *Day, Week and Month*.—Measurements of time are based on the times taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. From these, which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour

reckoning ignores A.M. and P.M., and the hours are numbered 0 to 23 from midnight to midnight.

For the *Astronomical Day*, see p. 157.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary.

The *Equinoctial* or *Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, 365.2422 mean solar days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *Leap Year* and consists of 366 days. The last year of a century is not leap year unless its number is divisible by 400 (e.g. the years 1200 and 1600 had only 366 days).

*Old and New Style*.—In the Julian Calendar all the centennial years were leap years, and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years; or, in other words, the equinox fell on March 11 of the Calendar, whereas at the time of the Council of Nice, A.D. 325, it had fallen on March 21. In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that every fourth end-century year only should be a leap year (see above). This change was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583; Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This *Gregorian Calendar* was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1927, by Yugoslavia and Rumania in 1929, and by Greece in February, 1923. The Russian, Greek, Serbian and Rumanian Churches did not abandon the Julian Calendar until May, 1923, when the Gregorian, slightly modified, was adopted. The *difference* between the Old and New Styles was 11 days after 1700, 12 days after 1800, and has been 13 days since 1900. It should be added that the word *style* actually connotes the date of the beginning of the year. It happened that a change of the latter from March 25 to January 1 was made in England in 1752, the year in which the change from Julian to Gregorian Calendar was made, and the words Old and New Style have been used in a sense which is not strictly correct, but nevertheless expressive.

*New Year's Day*.—In England in the seventh century, and as late as the thirteenth, the year was reckoned from Christmas Day, but in the twelfth century the Anglican Church began the year with the Feast of The Annunciation of the Blessed Virgin (Lady Day) on the 25th March, and this practice was adopted generally in the fourteenth century. The Civil or Legal year in the British Dominions (exclusive of Scotland), as opposed to the Historical, which already began on Jan. 1, began with "Lady Day" until 1752. But in and since 1752 the civil year has begun with Jan. 1. Dividends are, however, still paid by the Bank of England on the last day of Quarters according to a reckoning based on Old Style. The Income Tax year begins on April 6 in accordance

with Act of Parliament (39 Geo. III. 1798). New Year's Day in Scotland was changed from Mar. 25 to Jan. 1 in 1800. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1563, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1599, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1755, Tuscany 1751.

**Golden Number.**—In the year 432 B.C. Meton, an Athenian astronomer, found that 235 Lunations are very nearly, though not exactly, equal in duration to 19 Solar Years, and hence, considering the mean motion only, after 19 years the Phases of the Moon recur on the same days of the month. This discovery was held to be of so great importance that the dates of Full Moon in a cycle of nineteen years were inscribed in figures of gold on public monuments in Athens. The Cycle of nineteen years is called the *Metonic Lunar Cycle*, and the number showing the position of a year in the Cycle is called the *Golden Number* of that Year.

**Epact.**—The age of the calendar Moon on Jan. 1 in each year, formerly used in determining the date of Easter.

**Solar Cycle.**—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

**Julian Period.**—Proposed by Joseph Scaliger in 1582. The period is 7980 Julian years, and its first year coincides with the year 4713 B.C. 7980 is the product of the number of years in the Solar Cycle, the Metonic Cycle and the cycle of the

Roman Indiction ( $28 \times 29 \times 15$ ). The Julian Day, as used in astronomy, begins at noon.

**Roman Indiction.**—A period of fifteen years, instituted for fiscal purposes about A.D. 300.

**The Dominical Letter** is one of the letters A-G which are used to denote the Sundays (Lord's Day) in successive years. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1-Feb. 29, the second from March 1-Dec. 31.

**Easter-Day** is the first Sunday after the full moon which happens upon, or next after the first day of March; and if the full moon happens upon a Sunday, Easter-day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo. II., cap. 23), and explanation is given in the preamble to the Act that the day of Full Moon depends on certain tables that have been prepared. These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens, but a hypothetical Moon on whose "Full" the date of Easter depends, and the lunations of this "Calendar" Moon consist of twenty-nine and thirty days alternately with certain necessary modifications to make the date of its Full agree as nearly as possible with that of the real Moon. (*Paschal Full Moon*.)

By the above ordinance Easter falls on one of 35 days. A proposed reform that would limit it to one of 7 days has received Parliamentary support, but there is no prospect of its adoption.

## THE JEWISH CALENDAR.

"AND let them be for signs and for seasons, and for days and for years." (Genesis i. 14): "He appointed the moon for seasons" (Psalm civ. 19). There is therefore Divine authority for the use of the Sun and Moon as a basis for our record of the sequence of events, or in other words, the calendar. The story that the Flood began on the seventeenth day of the second month (Gen. vii. 11); that after the end of the hundred and fifty days the waters were abated, and that on the seventeenth day of the seventh month the ark rested on Ararat indicates a calendar of some kind, and that the writers recognised thirty days as the length of a lunation. There is other mention of months by their ordinal numbers, in the book of Genesis and in other of the early Scriptures, and in establishing the rite of the Passover, Moses speaks of Abib as the month when the Israelites came out from Egypt, which was to be the first month of the year (Exodus xiii. 4; xii. 2). In the book Kings I. three months are mentioned by name, Zif the second month, Ethanin the seventh, and Bul the eighth (Chaps. vi. 1, 37; viii. 2, vi. 38), but none of these are names now in use. After the captivity in Babylon the Hebrews apparently called the months by the names now in use; for Nisan which is called the first month, and therefore identical with Abib, and six others are mentioned in one or more of the books of Esther, Nehemiah, Zechariah and Maccabees. Five of these six are also distinguished by their ordinal number as well as by their modern names, but the remaining five months of the year are not referred to either in the Sacred books or in the Apocrypha.

The origin of these names is said by some to be Chaldean, but is more probably Syriac. The statement about certain officers of Solomon's household, twelve in number, each of whom acted for one month in a year (I. Kings iv. 7), show that the Jewish year consisted usually of twelve months, though others that refer to yearly harvests, and such events, imply that the year was solar as well as lunar. There is, however, no mention in the Bible of an intercalated month, or its equivalent.

The Passover was to begin on the fourteenth day of Abib, or the Abib as it is generally called, and other ceremonies were similarly ordained for certain days in other months; consequently it was necessary to determine the beginning of the month, or, the New Moon, which was done from the first, it is believed, by actual observation. There is no instruction in the Scriptures as to how this was to be done, but it is likely that the first day of the month was that on which the crescent became visible, which was proclaimed by the sound of silver trumpets (Numbers x. 10). There is good evidence that after the Captivity and in the later years of the Jewish kingdom much care was bestowed on the determination of the New Moon by observation. Men of good repute were chosen as watchers, who looked for the first appearance of the crescent from advantageous positions and reported to members of the Sanhedrin, who questioned them as to the shape of what they had seen, and thus determined a date of New Moon that was circulated by runners to places within a certain distance of Jerusalem. It is not known that any attempt was made by these elders to estimate the actual time of conjunction. It is possible, but there

is no evidence on the point, that they were charged with the duty of saying when a month should be intercalated.

The method of determining the days of New Moon above indicated was continued in Palestine, but after the Dispersion Jewish communities in other lands were left in some doubt as to the times of Fasts and Festivals, and this led to the formation of the Jewish Calendar as used today which, it is said by some, was done in A.D. 358 by Rabbi Hillel II., a descendant of Gamaliel—though some assert that it did not happen until much later. This calendar is luni-solar, and is based on the lengths of the lunation and of the tropical year as found by Hipparchus (Circ. 120 B.C.), which differ little from those adopted at the present day (see p. 164). The years are divided into cycles of 19 because 235 of such lunations are almost precisely equivalent in length to 19 tropical years. The normal calendar year, called a Common Regular year, consists of 12 months of 30 days and 29 days alternately. Since 12 months such as these comprise only 354 days in order that each of them shall not diverge greatly from an average place in the solar year, a thirteenth month is occasionally added after the fifth month of the Civil year, or as the penultimate month of the Ecclesiastical, the years when this happens being called Embolismic. Of the 19 years that form a cycle, 7 are embolismic; they occur at places in the cycle indicated by the numbers 3, 6, 8, 11, 14, 17, 19, these places being chosen so that the accumulated excesses of the solar years should be as small as possible. Tishri is the first month of the Civil year. The first of each month is called the day of New Moon, though it is not necessarily the day of astronomical New Moon, that being the day on which conjunction of Sun and Moon occurs, but there is generally a difference of a day or two, for reasons depending on circumstances such as those to be immediately stated. The dates in the Christian calendar of the first days of the months depend on that of the first of Tishri, which therefore controls the dates of fasts and festivals in the Jewish year. For certain ceremonial reasons connected with these, the first of Tishri must not fall on a Sunday, Wednesday or Friday, and if this should happen as the result of the computation it is postponed to the next day in the Christian calendar. Also, if the New Moon of Tishri falls on any day of the week at noon or later than noon, then the following day is to be taken for the celebration of that New Moon and is Tishri 1, provided that it is not one of the forbidden days, in which case there is a further postponement of a day. These rules and others have been considered in detail, and finally a calendar scheme has been drawn up in which a Jewish year is of one of the following six types:—

	Days
Common Deficient having .....	353
Common Regular having .....	354
Common Abundant having .....	355
Embolismic Deficient having .....	353
Embolismic Regular having .....	354
Embolismic Abundant having .....	355

In an Abundant year, whether Common or Embolismic, Marheshvan, the second month of the Civil year, has 30 days instead of 29; in Deficient years Kislew, the third month, has 29 instead of 30. The additional month in Embolismic years which is called Adar I., and precedes the

month called Adar in common years and Adar II., or Ve-Adar, in embolismic, always has 30 days, but neither this, nor the other variations mentioned, are allowed to change the number of days in the other months which still follow the alternation of the normal twelve.

These are the main features of the Jewish Calendar which must be considered permanent, because as a Jewish law it cannot be altered except by a great Synhedrion. Some minor but important points may be mentioned.

The time used is that of the meridian of Jerusalem, which is *2h. 22m.* in advance of Greenwich time.

The Jewish day begins at Sunset, but for computations of the Calendar it is assumed to begin at 6 p.m. by time of Jerusalem. When a Jewish day is said to "correspond" to the Christian day, reference is made to the last eighteen hours of the former and to the first eighteen hours of the latter. The first day of the Jewish week corresponds to the Christian Sunday, but it "coincides" with the 24 hours which elapse between 6 p.m. of Saturday and 6 p.m. of Sunday.

In a month that follows one of 30 days, the day preceding its first day is also observed as the day of New Moon. The reason for this is not certain, but a suggestion is that since a civil month of 29 days is about 24 hours shorter than a lunation, and one of 30 days about 24 hours longer, half the last day of the latter actually belongs to the month that follows it, and must be considered as the day of the Full Moon of the second month equally with the day that follows. Or, it is said that it may be in some way connected with the fact of early history that messengers could not reach distant places in a one day's journey, but this is somewhat obscure.

In tables that give Tishri 1 in dates of the Christian Calendar arranged in cycles, it is seen that dates in parallel years in the cycles are approximately the same, but there are differences of a day or two. The occurrence of leap year in the Gregorian calendar is obviously one of the causes of this variation.

The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B.C. or year 954 of the Julian Period, and the epoch or starting point of Jewish Chronology corresponds to October 7 B.C. 3761. Thus the year 1933 A.D. is *Annus Mundi 5693-94* in the Jewish Calendar:—

\* The previous day is also observed as the day of the New Moon

Note.—The day of the Jewish Calendar begins at sunset on the day previous to that of the dates.

#### THE MUHAMMADAN CALENDAR.

It appears to be certain that from very ancient times till shortly after the beginning of the fifth century of the Christian Era the pagan Arabians made use of a purely lunar year. The pilgrimage to Mecca which was a custom with them was always made in the twelfth month of the year, but inasmuch as the lunar year of twelve months is eleven days shorter than the solar year, the time of the pilgrimage ran through all the seasons, which was found to be inconvenient for reasons connected with the harvest, and to obviate the inconvenience the Arabians formed a luni-solar year by adding a thirteenth month from time to time. This scheme that they had learned from the Jews was adopted in A.D. 422, two hundred years before Islam, or when the Muslim religion was introduced by Muhammad.

Certain months were with the Arabians treated as sacred, and when the Prophet established his religion he pronounced that the luni-solar year which involved a transference of the sacred character from one month to another was an infidelity. Consequently return was made to the earlier practice, and the Muhammadan calendar was formed about A.D. 632, as it remains to-day, on a purely lunar basis and does not depend on the solar year. The year is made up of 12 months, alternately 30 and 29 days in

length, the first month of the year having 30 days. It was found necessary to increase the length of some of these years to ensure that the date of the first of the month, or the New Moon of the Muhammadan calendar, should agree, at least approximately with the date of the actual New Moon. This is done by adding a day to the last month, which therefore has 30 days, in each of 11 years. The years selected are those in the cycle numbered 2, 5, 7, 10, 13, 16, 18, 21, 24, 26, 29, and are called *Kabisah*.

The dates of New Moon thus determined approximate to, but do not always agree with those of the Jewish Calendar (see p. 164).

Some adherents of the Moslem faith still take the date of the evening of the first visibility of the crescent as that of the first of the month.

The Muhammadan Epoch is based on the Hégira or Flight of Muhammad from Mecca to Medina. The first day of the Era is not the actual day of the Flight but is 12th July, 622 A.D. The Muhammadan year begins earlier year by year, according to Gregorian dates: by 10, 11 or 12 days. The year 1934 is 1352-53 of the Hégira. Ramadan (the month of abstinence) is in progress when the year 1934 opens.

#### OTHER EPOCHS AND CALENDARS.

*Abyssinian.*—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, the numeration beginning again on the completion of a cycle. The first year began on 29th August, 284 A.D. (See also "Coptic," *post.*)

*Armenian.*—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

*Babylonian.*—In the eighth century B.C. the Babylonians began a chronology with the era of the accession of the founder of their Empire, Nabonassar, 26th February, 747 B.C.

*Byzantine.*—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1659) James Ussher, Archbishop of Armagh, published his *Annals Veteris Testamenti*, and Ussher's Notation was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

*Chinese.*—Until the year 1911 A.D. a Lunar Calendar was in force in China, but with the establishment of the Republic the Government

adopted the Gregorian Calendar, and the new and old systems were used simultaneously by the people for several years. Since 1911 the publication and use of the old Calendar have been banned by the Government, and an official Chinese Calendar, corresponding with the European or Western system, is compiled by the Academia Sinica at Nanking. It is believed, however, that the old Lunar Calendar is still in use to some extent.

*Coptic.*—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year, and in these years there are 6 complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar. The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic Calendar for the year 1935 and part of 1934 is appended:—

Year 1935.	A. D. 1934.	Year 1934.	A. D. 1934.
Tubah.....	Jan.	Báláh.....	Oct. 11
Amshir.....	Feb.	Háthur.....	Nov. 10
Barmahát.....	March 10	Kihak.....	Dec. 10
Barmúdáh.....	April		A. D. 1935.
Bashuns.....	May	Tubah.....	Jan. 9
Búnah.....	June	Amshir.....	Feb. 8
Abib.....	July	Barmahát.....	March 10
Maari.....	August 7	Barmúdáh.....	April 9

ary days.....	Sept. 6-10	Búnah.....	June 8
Year 1934.		Abib.....	July 8
Tút.....	Sept. 11	Maari.....	August 7

*Hindu.*—In addition to the Muhammadan reckoning there are six eras used in India. The first astronomical system was the *Kali-yuga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1933 A.D. is, therefore, the year 1990 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1933 A.D. is 1855 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhist* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

*Olympiads.*—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Coroebus, 776 B.C.

*Persian.*—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 16th June, 632 A.D. The year 1933 is, therefore, 1300 of the Parsees. The New Year begins on 21st March.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926½ English miles, and at the Poles 7,900 English miles. The *Equatorial Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by *Parallels of Latitude*, which proceed from zero (at the Equator) to 90° at the Poles.

## AREA AND POPULATION.

Continent.	Area in Square Miles	Estimated Population
Europe .....	3,750,000	475,000,000
Asia .....	17,000,000	1,013,000,000
Africa .....	11,500,000	143,000,000
North America ..	8,000,000	146,000,000
South America ..	6,800,000	64,000,000
Oceania .....	3,450,000	8,500,000
Polar Regions ...	5,000,000	...
	55,500,000	1,849,500,000

The British Dominions extend over the largest area (14,220,000 sq. miles); the Russian Union is second (9,250,000 sq. miles); France is third, with 4,336,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles; Brazil 3,220,000 sq. miles, and China 3,000,000 sq. miles.

## THE CONTINENTS.

Europe forms about one-fourteenth of the land surface of the globe. Its length from the North Cape, 71° 12' N., and Cape Matapan, in the south of Greece, 36° 13' N., is about 2,400 miles, and its breadth from Cape St. Vincent to the Ural is about 3,300 miles. The political boundary between Europe and Asia extends some distance beyond the Ural, to include the mining regions: in the south-east it follows the valley of the Manych, north of the Caucasus.

Asia extends over nearly one-third of the land surface of the globe. The distance between its extreme longitudes, the west coast of Asia Minor (36° E.) and the East Cape (170° W.), is 6,000 miles. The extreme latitudes, Cape Chelyuskin (78° 32' N.) and Cape Baru (90 miles north of the Equator), are 5,350 miles apart. Asia is bounded by the ocean on all sides except the west. The Isthmus of Suez connects it with Africa. The land boundary between Europe and Asia is formed on the west mainly by the Ural Mountains and the Ural River. In the south-west the valley of the Manych, which

• The Earth is a *Sphere*, with a Northern and Southern Hemisphere; the Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere*, of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physnography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Ornography*, of the Races of Mankind *Ethnology*, of their location *Ethnography* of extinct organic life *Paleontology*, and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 25 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901·8 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (984,000,000 miles in 365 days 6 hours, 9 minutes).

stretches from the Caspian Sea to the mouth of the Don, is now taken as the line between the two continents, although the Caucasus was formerly considered as belonging to Europe. The islands of the archipelago which lies in the south-east between the continents of Asia and Australia may be divided into two groups by a line passing east of Timor, Timor Laut, the Kei Islands and the Moluccas.

Africa is about three times the area of Europe. Its extreme longitudes are 17° W. at Cape Verde and 51° E. at Cape Guardafui. The extreme latitudes are Cape Blanco in 37° N. and Cape Agulhas in 35° S., at a distance of about 5,000 miles. It is surrounded by seas on all sides, except in the narrow isthmus through which is cut the Suez Canal, and may be considered as a great peninsula of the Eurasian continent.

North America, including Mexico, is a little less than twice the size of Europe. Its extreme longitudes extend from a little west of 170° W. to 51½° W. in the east of Newfoundland, and its extreme latitudes from about 80° N. lat. to 15° N. lat. in the south of Mexico. It is surrounded by seas on all sides except in the south, where it joins the Isthmian States of Central America, which have an area of about 200,000 square miles. The area of the West Indies is about 65,000 square miles, a little more than half that of the United Kingdom. They extend from about 27° N. latitude to 10° N. latitude.

South America is a little more than 1½ times the size of Europe. The extreme longitudes are Cape Branco 35° W. and Punta Parina 82° W. and the extreme latitudes, Punta Gallinas, 12½° N. and Cape Horn 56° S. South America is surrounded by the ocean, except where it is joined to Central America by the narrow isthmus through which is cut the Panama Canal.

## THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division	Area.	Estimated Number
Mongolian .....	Asia .....	680,000,000
Caucasian .....	Europe & Orient .....	725,000,000
Negro .....	Africa .....	210,000,000
Semitic .....	North Africa ...	100,000,000
Malayan .....	Oceania, &c. ...	104,500,000
Red Indian, &c.	America .....	39,000,000
		1,849,500,000

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2200, at the present rate of increase.

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Oceans.		
Name.	Area of Basin (sq miles)	Greatest Depth (feet).
Pacific .....	63,966,000	Off Mindanao, 32,089
Atlantic .....	31,530,000	Porto Rico Trench, 27,962
Indian .....	28,350,000	Sunda Trench, 22,968
Arctic .....	5,541,600	North Polar, 13,200
Malay .....	3,137,000	Kel Trench, 21,342
Central American .....	1,770,170	Caribbean, 20,568
Mediterranean .....	1,145,000	Pola Deep, 12,276
Behring .....	878,000	Buldir Trough, 13,422
Okhotsk .....	582,000	Kurile Trough, 10,554
East China .....	480,000	about 10,500
Hudson Bay .....	472,000	about 1,500
Japan .....	405,000	about 10,200
Andaman .....	305,000	about 11,000
North Sea .....	221,000	Skaggorak, 1,998
Red Sea .....	176,000	20° N., 7,254
Baltic .....	158,000	about 1,200

THE HIGHEST MOUNTAINS.

## TEMPERATURE AND RAINFALL RECORDS.

**GENERAL:** The maximum temperature on record of the air in shade is  $124^{\circ}$  Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The wettest station in the world is generally allowed to be Cherra Poonjee in Assam, where the official annual average is 424 inches. In Aug. 1841, 264 inches was measured, when 30 inches or more fell on each of five successive days, while on June 14, 1876, a fall of 40.8 inches was measured.

**BRITISH ISLANDS:** The maximum temperature of the air recorded in the shade at 4 feet above the ground is  $100^{\circ}$  Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The lowest temperature of the air recorded

in the shade at 4 feet above the ground is  $-25^{\circ}$  Fahr., or  $55^{\circ}$  below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The greatest rainfall in a day was at Bruton, Somerset, when 9.56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 95 tons of water per acre.

The total rainfall for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246.98 inches at Llyn Llydaw (Copper Mill), Carnarvon, and 247.30 inches at the Styx, Cumberland, in 1923, to 9.29 inches at Margate in 1921.

The maximum wind-velocity on record in the British Isles was recorded at Scilly on December 6, 1929, when a gust reached the rate of 111 miles per hour.

## The League of Nations.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920. Its Charter, containing 26 Articles, is known as the *Covenant*, which contains clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges). The right to resort to war was hitherto retained in case the League, or the arbitrators, failed to reach a unanimous decision, but even so, only after a delay of three months after such failure. And this right has been abandoned by all the 46 States who have signed the Kellogg Pact.

The Membership of the League comprises at present 45 nations, or three-quarters of the whole World, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation. Japan and Germany withdrew from the League in 1933, the other great countries which hold aloof are America and Russia; and they, particularly America, are co-operating with the League in a number of beneficent activities.

## ORGANISATION OF THE LEAGUE.

The Assembly meets annually at Geneva about September 20, and consists of 3 representatives from every Member State, each State having one vote.

The Council meets three times a year. Great Britain, France, and Italy are permanent members, and at present so other States are annually elected as temporary members. These are Poland, Czechoslovakia, Mexico, Spain, Panama, China, Denmark, Argentina, Australia and Portugal.

The Secretariat is the permanent Civil Service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary-General, J. Avenol (French).

Deputy Secretaries-General, M. A. Azcarate (Spanish), M. Pilotti (Italian).

Under Secretaries-General, F. Walters (British) (and a vacancies).

Information Section, Arthur Sweetzer (American), Acting Director.

The Technical Organisations and Commissions, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates, and the Reduction of Armaments. No week passes without these bodies discussing international questions of wide interest, or without some conference being held at Geneva and achieving or pointing the way to further constructive work in international co-operation.

The Permanent Court of International Justice, consisting of fifteen Judges and four Deputy Judges, chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes referred to it regarding International Law.

breaches of International obligations, and the interpretation of treaties. It has already dealt with 43 disputes, some of which might have led to an open breach between the States concerned. It has already won a great reputation both in the Foreign Offices and in the legal professions of the world. The Court now sits all the year round.

The International Labour Office is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The Governing body consists of twelve representatives of Governments, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world, six employers' and six workers' representatives. They are assisted by an International Secretariat, which collects and disseminates information and organises conferences. The conferences, to which Governments, Employers and Workers' Organisations send delegates, pass Conventions or Recommendations which Governments ratify if they so desire. 33 Conventions have been adopted; ratifications number nearly 200. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made, while losing no opportunity to raise even the best existing standards where practicable. The Director of the International Labour Office is H. B. Butler (British). There is a London Office at 22 Victoria Street, S.W.2.

Cost.—The cost of the League, 1933-4, will be about £1,385,000, of which Great Britain will contribute about £370,000.

## WHAT THE LEAGUE HAS DONE.

The work of the League is many-sided, and is constantly growing. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria, Hungary, and Northern Greece, the outlining of an important new policy of "freer" trade, improvements in international traffic and health, progress in real control of the traffic in drugs and in women, and child welfare. After many years' continuous study of the problem of the Reduction of Armaments the League has enabled the First World Disarmament Conference to meet. By Sept. it had agreed on certain ways of reducing armaments, but the details and figures have yet to be settled early in 1933. The League has been faced with a serious dispute between China and Japan. Up to date, only a measure of success has been reached in handling this first-class problem. A Report on the whole position in Manchuria will be considered by a special Assembly.

## LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 25, Grosvenor Crescent, S.W. 1.—President, Viscount Cecil of Chelwood, K.C.; Chairman of Executive Committee, Prof. Gilbert Murray, LL.D.; General Sec., J. C. Maxwell Garnett, C.B.E., Sc.D.

\* Any information about the League and its work can be obtained by application at this address.

Pescadores .....	85	63,000
Pacific Islands .....	800	50,000

## THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1930) at 10,000,000. The total European population (Jan., 1930) was 22,428.

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa which adjoin the Belgian Congo on the E. were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 sq. miles, with an estimated population of 2,000,000.

## NETHERLANDS COLONIES.

COLONY AND CAPITAL	Sq. Miles.	POPULATION.
Java and Madura (Batavia) .....	51,000	40,000,000
Sumatra (Padang) .....	162,000	6,500,000
Rionw - Lingga (Tanjong Pinang) .....	12,000	125,000
Banka and Billiton (Muntok) .....	6,350	160,000
West Borneo (Pontianak) .....	56,000	1,700,000
South and East Borneo (Banjermasin) .....	156,000	
Celebes (Macassar) .....	72,000	3,000,000
Moluccas (Ternate) .....	44,000	700,000
Amboyna (Amboyna) .....	20,000	300,000
Neth. Timor (Kupang) .....	21,000	1,000,000
Bali and Lombok (Singaraja) .....	5,000	600,000

*The House of Windsor* is in direct descent from (*inter alios*) Egbert, King of Wessex, Alfred the Great and William the Conqueror; also from the Emperor Charlemagne (b. 742, d. 814), Rodrigo the Old (b. 1030, d. 1099), the Emperor Barbarossa (b. 1123, d. 1190) and St. Louis, King of France (b. 1215, d. 1270).

**WELSH SOVEREIGNS AND PRINCES.**

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

### (6) The Prince John.

6. H.R.H. PRINCE JOHN, *born July 12, 1905, died Jan. 18, 1919.*

### ORDER OF SUCCESSION TO THE THRONE.

The sons of the Sovereign are in the order of succession to the throne, and after the youngest son the daughters, in the order of their own seniority. Thus after the Prince of Wales and the Duke of York would come the Princess Elizabeth and the Princess Margaret, daughters of the Duke of York, the Duke of Gloucester and the Prince George; then the Princess Royal and her children; then, as His Majesty has no brother, his sisters, with the children of the eldest in preference to the second sister; then the second daughter of the late Duke of Saxe-Coburg (his eldest daughter, Queen Marie of Rumania, having formally renounced on her marriage all possibility of claim to the British Throne). After traversing the Saxe-Coburg branch, we treat similarly those of Connaught and Albany. Having thus exhausted the families of all Queen Victoria's sons we turn to her daughters, beginning with the house of the late Empress Frederick; but as this line, with the ex-German Emperor at its head, is wholly out of practical bounds, it would be profitless to pursue the investigation any further.

### ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1920, reported on July 7, and made recommendations, which were adopted by the House of Commons. These recommendations, as modified by subsequent events, are also subject to the voluntary deductions announced by H.M. the King.

Their Majesties' Privy Purse .....	£110,000
Salaries of Household .....	125,800
Expenses of Household .....	123,000
Works .....	20,000
Royal Bounty .....	13,200

1901	Yatworth, Matthew Lewis Vaughan-Davies, b. 1840, 1st Baron, w.	(None)

## Peereesses in Their Own Right.

PEEREESSES IN OWN RIGHT.—Peereages are occasionally granted immediately to ladies of distinction or the widows of distinguished men; but frequently the instances falling under this heading are the result of regular inheritance in lines which are open to females in default of males. Thus it results that some of the Peereesses now upon the list have male heirs who will succeed them in the ensuing generation and take their seats by strict right in the House of Lords; while, on the other hand, several peerages now occupied by males will fall to the other sex, and thus for a time take leave of that House. A resolution to admit Peereesses in their own right to the House of Lords was defeated in that house in 1930. A Peereess in her own right retains her title after marriage, and if her husband's rank is the superior she is designated by the two titles jointly, the inferior one last; her hereditary claim still holds good in spite of any marriage whether higher or lower. No rank held by a woman can confer any title or even precedence upon her husband; but the rank of a Peereess in her own right is inherited by her eldest son (or perhaps daughter), to whomsoever she may have been married.

### DUCHESS IN HER OWN RIGHT.

Created.	Title, Name, &c.	Eldest Son or Heir.
1900	Fife, Alexandra, Duchess (H.R.H. Princess Arthur of Connaught), b. 1891, s. 1912, m.	Earl of Macduff, b. 1914

### COUNTESSES IN THEIR OWN RIGHT.—Style, The Countess of — Addressed as, My Lady.

Created.	Title, Name, &c.	Eldest Son or Heir.
1898	Cave, Anne Estella Sarah Penfold Cave, 1st Countess	(None)
1861	Cromartie, Sibell Lillian Blunt-Mackenzie, b. 1878, s. 1898, m.	Viscount Tarbat, b. 1904
1932	Londoun, Edith Maud Abney-Hastings, b. 1883, s. 1920, m.	Lord Mauchline, b. 1918
1688	S. Melfort, Lady Edith Drummond, b. 1854. Title of Countess not used	(Dormant)
1901	Roberts of Kandahar, Aileen Mary Roberts, D.B.E., b. 1870, s. 1914	Lady Edwina Lewin, b. 1875
1701	S. Seafield, Nina Caroline Studley-Herbert, b. 1906, s. 1915, m.	Lord Strathpey, see p. 210.

### VISCOUNTESSES IN THEIR OWN RIGHT.—Style, The Viscountess — Addressed as, My Lady.

Created	Title, Name, &c.	Eldest Son or Heir.
1918	Rhondda, Margaret Haig Mackworth, b. 1883, s. 1918	(None)
1883	Wolsley, Frances Garnet Wolsley, b. 1872, s. 1913	(None)

BARONESSSES IN THEIR OWN RIGHT.—Style, The Baroness —  
Addressed as, My Lady.

## Created.

## Title, Name, &amp;c.

- 1309 Beaumont, Mona Josephine T. Fitzalan-Howard, b. 1894, s. 1896, m.  
1421 Berkeley, Eva Mary Fitzhardinge Foley, M.B.E., b. 1875, s. 1899, m.  
1368 Botrevaux. (See "Loudoun," Countess of)  
1807 Burton, Nellie Lisa Melles, b. 1873, s. 1909, m.  
1608 Clifton, Elizabeth Adeline Mary Bligh, b. & s. 1900  
1864 De los, Mary Frances (Countess of Dartrey), b. 1854, s. 1907, m.  
1609 S. Dingwall. See "Lucas," Engl. Baroness (Scott. title the earlier)  
1895 Farnwall, Mary Frances Katherine Petre-Dent, b. 1900, s. 1913, m.  
1444 S. Gray, Ethel Evelyn Gray-Campbell, b. 1856, s. 1919, m.  
1444 S. Herries, Gwendolen (Duchess of Norfolk), b. 1877, s. 1908, m.  
1490 S. Kinloss, Mary Morgan-Grenville, C.I., b. 1854, s. 1889, m.  
1602 S. Lucas, Nan Ino Cooper, b. 1880, s. 1916, m.  
1663 Ravensdale, Mary Irene Curzon, b. 1896, s. 1915  
1911 Strange of Knokin, 1426 Hungerford and 1445 De Moleyns, Elizabeth (Viscountess St. Davids), b. 1884, title called out of abeyance 1911, m.  
1910 Wentworth, Judith Anne Dorothea Lytton, b. 1873, s. 1917  
1308 Zouche of Harringworth, Mary Cecil Frankland, b. 1875, s. 1917, m.

## Eldest Son or Heir.

- Hon. Miles F. F.-H., b.  
Two co-heiresses 1915  
See Loudoun, Countess of,  
Hon. George E. M. Baillie,  
M.C., b. 1894  
Earl of Darnley, q.v  
Three co-heiresses  
(None)  
Master of Gray, b. 1894  
Duke of Norfolk, q.v.  
Master of Kinloss, b. 1889  
Hon. Anne R. C., b. 1919  
Nicholas Mosley, b. 1913.

- See St. Davids, Viscount  
Hon. Noel Lytton-Mil  
bank, b. 1900  
Hon. Thos. W. A. F., b. 1901

# Courtesy Titles borne by Eldest Sons (in actual use in 1934).

Holders of Courtesy Titles are addressed in the manner shown for holders of substantive titles.

From this list it will be seen that the "Marquess of Blandford" is the heir to the Dukedom of Marlborough; that the "Earl of Altamont" is the eldest son of the Marquess of Sligo, while "Viscount Acheson" is heir to the Earldom of Gosford, and "Lord Aberdour" to the Earldom of Morton; \* the titles borne by second heirs are also given, e.g. "Earl of Burlington," eldest son of the "Marquess of Hartington," heir to the Dukedom of Devonshire; "Viscount Bayham," eldest son of the "Earl of Brecknock," heir to the Camden Marquessate; and "Viscount Savernake," eldest son of the "Earl of Cardigan," heir to the Marquessate of Allesbury.

NOTE.—In titles marked \* the "of" is not used.

In addition to the above Titles of Courtesy the eldest son of Scottish Viscounts and Barons is usually styled "The Master of ——" e.g. "The Master of Falkland," eldest son of Viscount Falkland; "The Master of Carnegie," eldest son of Lord Carnegie and grandson of the Earl of Southesk.

Contractions used in pages 193-212.

Contractions.—S. or J. appended to the date of creation denotes a Scottish or Irish title; the further addition of a \* implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as Engl., Brit., or U.K. When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to S. or J. implies that the Peer is an elected Representative to the House of Lords. For the mark \* see heading to Marquesses; b. signifies born; s., succeeded; m., married; w., widower or widow; M., minor.

## His Majesty's Most Honourable Privy Council.

Aberconway, Lord	1908	Cannanagh, H.R.H. Prince		Huntly, Marquess of	1881

and 57 Ireland (marked I).

## Baronets.

(Exclusive of such as are Peers.)

Scotland or Nova  
Scotia (S.S., marked S).

NOTE.—[Clause II. of the Royal Warrant of February 8, 1902, ordains as follows:—"That no person whose name is not entered upon the Official Roll shall be received as a Baronet, or shall be addressed or mentioned by that title in any Civil, or Military Commission, Letters Patent or other official document." In the cases of titles printed in *italics* the holder of the Baronetcy has died but no person has proved his succession to the Baronetcy. Baronets are addressed as "Sir" (with Christian name) and in writing as "Sir Robert A.—, Bt." Baronets' wives are addressed (formally) as "Your Ladyship" or "Lady A.—" without any Christian name unless a daughter of a Duke, Marquess or Earl, in which case "The Lady Mary A.—"; if daughter of a Viscount or Baron "The Hon. Lady A.—"]

### \* Precedency in Great Britain.

The Sovereign.  
The Prince of Wales.  
Younger Sons of the Sovereign.  
Grandsons of the Sovereign.  
Sovereign's Brothers.  
Sovereign's Uncles.  
Sovereign's Nephews.  
Ambassadors.  
Archbishop of Canterbury.  
Lord High Chancellor.  
Archbishop of York.  
Prime Minister.  
Lord President of the Council.  
Speaker of the House of Commons.  
Lord Privy Seal (if of Baronial rank).  
Five following State Officers if Dukes:  
(1) Lord Great Chamberlain (on duty).  
(2) Earl Marshal.  
(3) Lord Steward.  
(4) Lord Chamberlain.  
(5) The Master of the Horse.  
Dukes, according to their Patents of Creation:  
1. Of England; 2. Of Scotland; 3. Of Great Britain; 4. Of Ireland.  
5. Those created since the Union.  
Eldest sons of Dukes of Blood Royal.  
Five above State Officers if Marquesses.  
Marquesses, in same order as Dukes.  
Dukes' eldest Sons.  
Five above State Officers if Earls.  
Earls, in same order as Dukes.  
Younger sons of Dukes of Blood Royal.  
Marquesses' eldest Sons.  
Dukes' younger Sons.  
Five above State Officers if Viscounts.  
Viscounts, in same order as Dukes.  
Earls' eldest Sons.  
Marquesses' younger Sons.  
Bishops of London, Durham and Winchester.  
All other English Bishops, according to their seniority of Consecration.  
Five above State Officers if Barons.

Secretaries of State, if of the degree of a Baron.  
Barons, in same order as Dukes.  
Treasurer of H.M.'s Household.  
Comptroller of H.M.'s Household.  
Vice-Chamberlain of Household.  
Secretaries of State under the degree of Baron.  
High Commissioners (see p. 186).  
Viscounts' eldest Sons.  
Earls' younger Sons.  
Barons' eldest Sons.  
Knights of the Garter if Commoners.  
Privy Counsellors if of no higher rank.  
Chancellor of the Exchequer.  
Chancellor of the Duchy of Lancaster.  
Lord Chief Justice of England.  
Master of the Rolls.  
President of the Probate Court.  
The Lords Justices of Appeal.  
Judges of the High Court.  
Viscounts' younger Sons.  
Barons' younger Sons.  
Sons of Life Peers.  
Baronets of either Kingdom, according to date of Patents.  
Knights of Thistle and St. Patrick if Commoners.  
Knights Grand Cross of the Bath.  
C.B.E.; C.M.G.; G.C.B.; G.C.V.O.; C.B.E.  
Knights Commanders of the above Orders.  
Knights Bachelor.  
Judges of County Courts and Judges of the Mayor's and City of London Court.  
Serjeants at law.  
Masters in Lunacy.  
S.C.B.; C.B.E.; C.M.G.; C.B.E.; G.C.B.; G.C.V.O.; M.O. (S.B.); O.B.E.; I.S.O.  
Eldest Sons of younger Sons of Peers.  
Baronets' eldest Sons.

Eldest Sons of Knights in the same order as their Fathers.  
M.V.O. (S.B.); M.M.E.  
Younger Sons of the younger Sons of Peers.  
Baronets' younger Sons.  
Younger Sons of Knights in the same order as their Fathers.  
Naval, Military, and other Esquires by Office.  
Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.  
For Dames Grand Cross and Dames Commanders of the British Empire, see p. 240.  
LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations the Mayor stands first, after him the Aldermen, Sheriffs, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

\* For fuller tables (and for Scottish and Irish Precedency) see Introduction to "WHITAKER'S PARLIAMENTARY KNIGHTAGE AND COMPANIONAGE," a companion volume, price 2s. 6d.  
\* A complete list, in Alphabetical Order (the only list so published), of all holders of these decorations will be found in "WHITAKER'S FRERAGE."

O.M.O.I.V.

### THE ORDER OF MERIT (1902)—O.M. Ribbon, Blue and Crimson.

This Order confers no precedence. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

O.M.M.I.

MILITARY	CIVIL	
Admiral of the Fleet Rt. Hon. Earl Jellicoe, G.C.B., G.C.V.O.	Sir Edward Elgar, Bt., G.C.V.O., M.A., D.C.	Samuel Alexander, Litt.D., F.R.A., F.B.A.

The Order was divided into Military and Civil divisions in Dec., 1918.

K.B.E.

### THE KNIGHTS BACHELOR.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1245 and obtaining the uniform registration of every created Knight. In 1908 a design for a badge to be worn by Knights Bachelor was approved and adopted, a miniature reproduction being shown at the head of this paragraph. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—Principal, Trevor Dawson, Bt., M.P.; Hon. Registrar, Sir Park Goff, M.P.; Clerk, Hubert Wheelbourn; Registry and Library, at Old Buildings, Lincoln's Inn, W.C. 2.

ORDER OF THE COMPANIONS OF HONOUR (1817)—O.H.

Ribbon, Carmine, with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire, i.e., Kts. and Dames Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

**THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.***Ribbon, Red, with Blue Edges.*

Bestowed in recognition of special services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

**THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.***Ribbon, Crimson, with Blue Centre.*

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the Sovereign, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 200, of whom 250 may belong to the Home Services, 200 to the Indian and 250 to the services of Dominions, Colonies and Protectorates.

**OTHER PRINCIPAL DECORATIONS AND MEDALS (in order of Precedence).**

*A full list of all Orders, Decorations and Medals and Orders regarding the wearing of them will be found in WHITAKER'S ALMANAC.*

**The New Zealand Cross.**—1869.—N.Z.C.—For conspicuous bravery. Instituted March 20, 1869. The last holder—Benjamin Biddle, of N.Z.—died in 1933.

**The Royal Red Cross.**—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

**The Distinguished Service Cross.**—1914.—D.S.C.—In substitution for the Conspicuous Service Cross, 1905, is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander, and on Warrant Officers.

**The Military Cross.**—1915.—M.C.—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces.

**The Distinguished Flying Cross.**—1918.—D.F.C.—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

**The Air Force Cross.**—1918.—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

**The Indian Order of Merit.**—Instituted in 1837, as a reward for personal bravery, to Indian officers and men.

**The Kaisar-i-Hind Medal** (1st Class, gold; and Class, silver).—Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

**The Albert Medal.**—A.M.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on Land."

**The Medal for Distinguished Conduct in the Field.**—1924.—D.S.M.—Is designed for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A., and to all other persons holding corresponding positions in His Majesty's Service abroad, for distinguished conduct in war.

**The Conspicuous Gallantry Medal.**—C.G.M.—Is bestowed upon warrant officers and men of the R.N.

**The Distinguished Conduct Medal.**—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

**The Distinguished Flying Medal.**—1918.—D.F.M.—and the **Air Force Medal.**—A.F.M.—for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

**The Edward Medal.**—Established by King Edward VII. in 1907, is a recognition of heroic acts performed by miners and quarrymen, or of others who have endangered their lives in rescuing those so employed.

**The King's Police Medal.**—Instituted in 1909 as a reward "only for acts of exceptional courage and skill or conspicuous devotion to duty" to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India, and His Majesty's Dominions beyond the Seas. The number of medals awarded in any one year shall not exceed 250.

**The Medal of the Order of the British Empire, for Gallantry.**—Awarded in recognition of acts of gallantry. All ranks are eligible for the Medal of the Military Division; there is also a Medal of the Civil Division. N.B.—All the above Medals are worn before War Medals.

**The Meritorious Service Medal.**—M.S.M.—Since Sept. 1925, granted only to recipients of the Meritorious Service Annuity.

**The Volunteer Officers' Decoration.**—V.D.—Was an honour for rewarding the meritorious services of officers of the Force in question, who must have been in commission and have served twenty years. It is still awarded to the Royal Naval Volunteer Reserve and to Volunteer Forces Overseas.

**The Territorial Decoration.**—T.D.—Established in 1908, is restricted to commissioned officers of twenty years' good service in the Territorial Army. Similarly a Territorial Long Service Medal has been substituted for that formerly awarded to Volunteers.

**The Royal Naval Reserve Decoration.**—R.N.D.—and **Medal.**—Instituted in 1920 to reward good and long service by officers and men of this Service.

**The Imperial Service Medal.**—May be granted only to Members of Civil Services in the U.K., India, the Dominions, Colonies and Protectorates, in other than the administrative and clerical grades.

**The Medal of the Order of the British Empire, for Meritorious Service.**—Is restricted in the Military Division to ranks below that of Warrant Officer, and in the Civil Division to persons not eligible for appointment to the five (classes) of the Order.

**The Voluntary Medical Service Medal** (V.A.D. and M.R.I.)—Instituted 1923.

**The Badge of the Order of the League of Mercy.**—Both sexes; was established in 1899 in connexion with the League of Mercy, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

**Ancient Irish Titles.**

*The Fox (O'Sionnach), Major Brabazon Hubert Maine Fox, b. 1868, s. 1919.*

# THE GRAND PRIORY IN THE BRITISH REALM OF THE VENERABLE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM.

(INCORPORATED BY ROYAL CHARTER.)

THE Order was founded in Jerusalem in 1099 by the Blessed Gerard as an Order of Hospitaliers under the Augustinian rule. His successor, inspired by the example of the Templars, converted it into a Military Order. On the loss of Jerusalem it migrated to Acre and from thence to Rhodes and Malta, where it formed one of the most important bulwarks against the naval power of the Moslems in the Mediterranean. Since the loss of Malta in 1798 the Order, which is International, has devoted itself to works of charity and humanity. The objects and purposes of the Order are, amongst other things, the maintenance of the St. John Ophthalmic Hospital at Jerusalem, and the St. John Ambulance Association and Brigade at Home and Overseas, and the London Light and Electrical Clinic for poor people. The Order is conferred for services in the cause of humanity throughout the Empire, and is open to both men and women. There are 5 classes: Bailiffs and Dames Grand Cross; Knights and Dames of Justice and of Grace; Commanders of both sexes; Officers of both sexes; Serving Brothers and Sisters. These distinctions are notified in the *London Gazette*, but do not confer any rank or title. The ribbon of the decorations of the Order is black (watered). *Headquarters*: St. John's Gate, Clerkenwell, E.C.1.

Sovereign Head .....	HIS MAJESTY THE KING
Grand Prior .....	H. R. H. THE DUKE OF CONNAUGHT, K.G.
Sub-Prior .....	Maj.-Gen. The Earl of Scarbrough, K.G., G.B.E., K.C.B., T.D.
Prelate .....	The Archbishop of Canterbury.
Bailiff of Ely .....	Sir John Hewett, G.C.B.I., K.B.E., C.I.E.

## EXECUTIVE OFFICERS.

Chancellor—Lt.-Gen. Sir Aylmer Hunter-Weston, K.C.B., D.S.O., M.P.	Librarian—Col. Edwin J. King, C.M.G., F.R.A.
Secretary-General—Maj.-Gen. Sir Percival S. Wilkin-son, K.C.M.G., C.B.	Registrar—Edwin H. Freshfield, L.L.D.
Receiver-General—The Hon. Sir William Goschen, K.B.E.	Genealogist—Sir Gerald W. Wollaston, Kt. Bach., M.V.O.
Director of Ambulance—Maj.-Gen. Sir Percival S. Wilkinson, K.C.M.G.	Director of Ceremonies—Brig.-Gen. The Earl of Shaftesbury, K.P., G.C.V.O., C.B.E., F.R.C.
Hospitalier—Col. J. T. Woolrich Perowne, V.D., T.D.	Chief Commissioner, St. John Ambulance Brigade at Home, Maj.-Gen. Sir John Duncan, K.C.B., C.M.G., C.V.O., D.S.O.
Almoner—Capt. A. C. Seton-Christopher.	Do., Overseas, Col. James L. Sleeman, C.M.G., G.B.E., M.V.O.

## Dames Grand Cross and Dames Commanders of the Order of the British Empire.

**NOTE.**—Dames Grand Cross (G.B.E.) and Dames Commanders (D.B.E.) are addressed in a manner similar to that of Knights Grand Cross or Knights Commanders, e.g. "Miss Florence Smith," after receiving the honour of G. (or D.) B.E. would be addressed as "Dame Florence," and in writing, as "Dame Florence Smith, G. (or D.) B.E." Where such award is made to a lady already in enjoyment of a higher title the appropriate letters are appended to her name, e.g. "The Countess of —, G.B.E." Dames Grand Cross of the British Empire rank after wives of Barons and before wives of Knights Grand Cross. Dames Commanders rank after the wives of Knights Grand Cross and before the wives of Knights Commanders.

### DAMES GRAND CROSS AND DAMES COMMANDERS.

Aberdeen and Temair, The Marchioness of, G.B.E.	De Saumarez, Antile Elizabeth, Lady, G.B.E.	McCarthy, Dame Emma Maud, G.B.E., D.B.C.

# THE VICTORIA CROSS. V.C.

The ribbon is *Crimson* for all Services (until 1921 it was *Blue* for Royal Navy).

FOR CONSPICUOUS BRAVERY INSTITUTED *January 29th, 1856.*

The Victoria Cross was instituted in 1856, on the close of the Crimean War, and extended in 1911 and 1920. The decoration is worn before all others, on the left breast, and consists of a bronze Maltese Cross,  $\frac{1}{2}$  inches in diameter, with the Royal Crown surmounted by a lion in the centre, and beneath there is the inscription "For Valour." A special annuity of £10 a year is granted to every recipient below Commissioned Rank, with an additional £5 a year for every bar, such bar being added for additional acts of bravery which would have entitled the recipient to the Victoria Cross if he or she had not already received it. In the event of an annuitant being unable to obtain a livelihood on leaving the Service, the amount of the annuity may be increased to £50. In 1911, the right to receive the Cross was extended to Indian soldiers, and in 1920 a Royal Warrant extended the right to Matrons, Sisters and Nurses, and the Staff of the Nursing Services and other services pertaining to Hospitals and Nursing, and to Civilians of either sex regularly or temporarily under the orders, direction or supervision of the Naval, Military or Air Forces of the Empire.

## A LIST OF SURVIVING RECIPIENTS.

## 254 Parliamentary Summary, Lords and Commons, 1932-33.

**THE OTTAWA AGREEMENTS.**—Parliament adjourned on July 13, 1932, until Oct. 27, power being given for both Houses to be called together earlier in case of emergency, and the Session was resumed on Oct. 18, 1932, in order to pass the legislation necessitated by the Agreements reached at the Imperial Economic Conference at Ottawa. As a first step, Mr. J. H. Thomas announced that notice had been given to denounce the temporary commercial agreement with the Soviet at the end of six months. The first discussion took place on the financial resolutions, Sir Herbert Samuel, who had resigned from the Government, asking that all the Agreements should be terminable at so many months' notice instead of lasting for five years. Mr. MacDonald declared that the Agreements were in full accord with the Government's election pledges and denied that they were unconstitutional. If the Ottawa Conference had failed, he said, the World Economic Conference would have been impossible. Sir John Simon, who also claimed that the Agreements were constitutional, said that they admitted all Empire produce free, increased the duties by five per cent. upon about twenty foreign articles and maintained the existing ten per cent. duty upon about thirty-eight foreign articles. The resolutions were carried by huge majorities on Oct. 20; on the following day an amendment on the report stage to make the Agreements subject to the right of termination after six months' notice was defeated by 225 to 58; and on Oct. 24 the resolutions were agreed to on report and the Ottawa Agreements Bill was read a first time. Moving the second reading on Oct. 26, Mr. J. H. Thomas said that the Agreements must be judged as a long-, and not as a short-range policy. With regard to Russia he declared that the denouncing of the treaty would not interfere with normal trade, but would prevent any attempt to deprive Canada of the value of the new preferences. Ottawa, he claimed, marked a great Imperial achievement and an excellent example to the world. Mr. Runciman on the following day said that the Agreements did not limit our liberty in the future more than many other commercial treaties. So far from preventing foreign negotiations, we were already negotiating with some countries. A Labour amendment for rejection was defeated by 423 to 77 and the bill was read a second time. The committee stage occupied four days, and on Nov. 3 the third reading was agreed to by 416 to 68, Mr. Neville Chamberlain claiming that Ottawa had begun a new conception of Imperial unity and opened a new chapter in Imperial history. The House of Lords gave the bill a second reading by 139 to 34 on Nov. 10 and on Nov. 15 it was read a third time and received the Royal Assent.

**THE MEANS TEST.**—The only other matter of importance dealt with before the close of the Session was a modification of the Means Test in the Unemployment Insurance system. A Labour vote of censure on the subject was defeated by 464 to 55 on Oct. 25, and on Nov. 9 the House of Commons carried by 267 to 43 a resolution providing that, in deciding the circumstances of an applicant for transitional payments, disability pensions and compensation would be treated as if they were reduced by one-half, and in respect of money and investments regarded as capital assets, it would be disregarded if the aggregate did not exceed £25, and, if the value exceeded

that amount but not £300, it would be treated as equivalent to a weekly income of one shilling for every complete £25. It was estimated that the cost of the alteration would be about £1,000,000. The Minister of Labour, Sir Henry Betterton, said that the question of family income must wait for the larger reform of Unemployment Insurance which must be undertaken later. Moving the second reading of the bill on Nov. 14, Sir Henry said this was the first time that recognition had been given to the principle that pensions were not granted solely for maintenance. It was only a temporary bill, and if the fears that had been expressed concerning the position of ex-service men proved well-founded, that matter would be given full consideration in framing the new bill. A Labour motion demanding the abolition of the means test was rejected by 344 to 45, and the bill read a second time on the following day, when its further stages were secured. On Nov. 17 it received the Royal Assent and the Session was brought to an end.

### THE NEW SESSION.

**THE KING'S SPEECH.**—After only a week's interval, the new Session was opened by the King in State on Nov. 22, the Queen, the Prince of Wales, the Duke of York and the Duke of Gloucester attending the ceremony. The Royal Speech declared that it was still necessary to exercise careful supervision over public expenditure, both national and local, and claimed that the measures already taken to assist British industry in the home market, and to improve British markets overseas, had created a feeling of greater confidence. The Government, it was emphasised, would continue to do everything in their power to stimulate the recovery of trade. Further plans, it was stated, were necessary to enable agriculture to take its proper place in the economy of the nation. The Speech described unemployment as "undoubtedly the gravest of our social problems," and said that in framing proposals for dealing with the subject, the maintenance of morale and fitness to resume work when opportunities could be found would be borne in mind. "As time and opportunity offered" measures dealing with Rent Restriction, London Passenger Transport and other matters of importance would be introduced. In the House of Lords the Marquess of Dufferin and Ava moved and Lord Chesham seconded the Address in reply, which was agreed to, while in the other House the Address was moved by Mr. Roy Bird and seconded by Mr. Clement Davies. The Prime Minister during the opening debate said that the Government had formed itself into a "Council of War" with regard to unemployment, and would encourage every form of municipal and other enterprise, subject to the warning that rates and taxes could not be drawn upon extravagantly. The revival of agriculture, he said, was essential to their plans. The unused land and the partly used land must be absorbed steadily to place a much larger percentage of the people in direct contact with the land. Mr. Elliot, the Minister of Agriculture, announced on the following day that the Government had decided to appoint a Meat Reorganisation Commission to deal with the question of fat stock, and an export committee to watch the operation of the scheme for the restriction of

meat imports. The Address was agreed to on Nov. 28, after the defeat by 432 to 39 of a Labour amendment, moved by Major Atlee, declaring that the Government had failed to carry out their mandate to restore the economic position of the country, and expressing regret that the Government lacked the courage to adopt the alternative Socialist policy of attacking the fundamental causes of the poverty problem.

**THE BUDGET.**—Mr. Chamberlain's second Budget, "opened" on April 25, was marked by no important changes in taxation, but was a notable example of orthodox finance. He began by claiming that, although the year had closed with a deficit, the out turn might well afford more solid satisfaction than some of the surpluses in earlier and more prosperous times. The actual expenditure was £777,000,000 and the revenue, £745,000,000, leaving a deficit of £32,276,959, which, however, included the payment to the United States of £28,900,000, which would be met by borrowing. Coming to details, the Chancellor said that there was a deficit of nearly £12,000,000 in Customs and Excise, which would have been larger but for £2,500,000 received from the Irish Free State duties and £1,750,000 from the Ottawa duties. The revenue from beer gave the lowest yield for 13 years, £6,000,000 below his estimate, while the shortfall from the new tariff, allowing for the Ottawa duties, was £9,000,000. This he put down partly to fall in prices, but mainly to the fact that they had been much more successful than he had anticipated in checking foreign imports, and he took a certain satisfaction from the fact that the adverse balance of trade was checked. Inland revenue showed a drop of £15,500,000, his estimate for surtax proving too high by £5,000,000 and that for income-tax by £8,000,000. With regard to expenditure, no less than £18,000,000 in supplementary estimates had to be laid at the door of unemployment; but the whole of this was not required. Summarising the Budget deficit, he said they had a net shortage of revenue of £22,000,000, an increased expenditure of £11,000,000, and a payment to the United States of £29,000,000, making a total of £62,000,000. From that they could deduct savings in interest on Debt and reduction in the Sinking Fund amounting together to £29,000,000, leaving a net deficit of £33,000,000, or making allowance for the estimated Budget surplus of £800,000, a Budget deficit of £32,200,000. The Floating Debt, Mr. Chamberlain said, was now £810,000,000, which was nearly £200,000,000 above what it was a year earlier, but this increase was mainly due to the creation of the Exchange Equalisation Fund of £150,000,000, and the State had acquired assets corresponding to that sum. They had, moreover, laid the foundations for a very substantial decrease in the annual charge for the Debt, the total interest saving amounting to £52,000,000, owing to the conversion of the War Loan and other operations. The Chancellor thought the year was one of substantial achievement. The sacrifices that had been suffered had been borne with a patience which had excited general admiration, and the purchasing and saving power of the people had been maintained to a very remarkable degree. Turning to 1933, he announced that he proposed again to make no provision either for payments of the Debt to the

United States or for receipts of Reparations from other countries to ourselves. The grand total of ordinary expenditure apart from Sinking Fund he placed at £697,486,000, which was £88,000,000 less than two years earlier. In addition they had absorbed another £25,000,000 which would have meant increased expenditure. Of this real saving of £113,000,000 he attributed £52,000,000 to the saving on interest and £61,000,000 to economies in other directions. On the basis of existing taxation the Chancellor estimated a revenue of £712,730,000, despite a "depressingly low" allowance for surtax and a considerable fall for income-tax. After announcing a reduction from 1s to 10s. per cent. of the duty upon the raising of new capital and reductions in the rates of interest on arrears of death duties and excess profits duty, Mr. Chamberlain said that discussions were still proceeding on the question of the liability of the co-operative societies to income-tax, and they hoped to reach an agreement. The matter could not rest where it was, he said, and he had set down a provisional sum of revenue of £750,000 for the year without settling the method of obtaining it. After indicating small increases in the duties on matches and mechanical lighters, the application of the machinery of the Import Duties Act to the silk and artificial silk industry, the renewal of the hops duty, and an additional Excise duty on British sparkling wines, the Chancellor said that he would impose a duty of 1d. a gallon on heavy hydro-carbon oils, with an Excise duty on all stocks of over 10,000 gallons. There was, he next said, an unanswerable case for an increase of the duties upon the heavier class of road vehicles in the goods class, and he therefore imposed substantial increases from Jan. 1, 1934. From these he estimated a yield in a full year of £1,750,000, which would go to the Road Fund. All these changes raised the estimated revenue to £714,777,000, giving a surplus of £17,291,000, without making any allowance for the Sinking Fund. He announced that he was not proposing to make any provision for the redemption of debt, and that owing to the conversion of the War Loans he would only have to borrow about £7,500,000. Because of the drop in revenue from beer, he had come to the conclusion that there must be some reduction in the price and some improvement in the quality. The existing plan of taxation would be abandoned, and beer would from that day be charged at the rate of 24s. per bulk barrel up to and including a gravity of 1.037 degrees, with a rise of 2s. per degree over that gravity. The result would be that the retail price would be reduced by 1d. per pint and the quality would be improved. The brewers had promised to increase the proportion of home-grown barley used. Mr. Chamberlain put the loss of revenue on this account at £14,000,000, reducing his free balance to £3,291,000. He was not prepared to lower the income-tax, but had decided to revert to the old system of equal half-yearly payments. The postponement of revenue involved would be £12,000,000, and this would be largely met by transferring a sum of £10,000,000 from the depreciation fund attached to the Five per cent. War Loan which was no longer required. He was thus left with a final surplus of £1,291,000. Before reaching this point, Mr. Chamberlain had examined the suggestion that the psychological effect of a reduction of direct taxation

would stimulate business. But he asked what would happen if the reaction did not materialise? Looking round the world he saw that badly unbalanced Budgets were the rule rather than the exception. The one country that had stood the test of these difficult times with the greatest measure of success was the United Kingdom. We were free from the fear that things were going to get worse, and we were free largely because we had balanced our Budgets. As to the future, the Chancellor said that at home they had at least made a good beginning. The most hopeful prospect for any considerable advance towards prosperity lay in collaboration with other nations, and he voiced the prayer of the whole House that the Prime Minister's mission to President Roosevelt might prove fruitful in establishing a clearer perception among the nations of the possibilities of common action for the benefit of the world. The Chancellor was congratulated by Sir Herbert Samuel on the following day on resisting the appeals from once responsible quarters to have an unbalanced Budget. On May 4 a resolution was passed giving authority to increase the Exchange Equalisation Account, used to keep the pound stable, out of the Consolidated Fund from £150,000,000 to £350,000,000, and the Finance Bill was formally brought in. The second reading was secured on May 17 after the defeat of a motion for rejection by 368 to 48. Mr. Chamberlain's scheme for taxing co-operative societies was carried by 328 to 109 on May 22. He explained that the societies were being asked to pay only what the Raeburn Commission and the majority report of the Royal Commission on Income Tax had declared to be their proper share of the national taxation. Beyond the co-operative societies only the mutual insurance societies would be affected, and they would merely be brought upon the same basis of taxation as their competitors. As a result of the failure of the Government's efforts to obtain an agreed scheme, they had decided to tax all undistributed profits, the dividends being regarded as a trading expense. Mr. Hore-Belisha added that it was estimated that the proposals would raise about £2,050,000. During the committee stage on May 24, the Chancellor said that he was prepared to exempt coast-wise shipping from the operation of the duty on fuel oil. The co-operative societies clause was read a second time by 253 to 77, and added to the Bill on May 25, and on the following day the committee stage was concluded. The concession to coast-wise shipping was agreed to during the report stage on June 19, when another amendment was passed permitting holders of off-licences to sell spirits in half-pint bottles. The report stage came to an end on June 20, and three days later the third reading was carried after a Labour motion for rejection had been defeated by 290 to 42. The Bill received the Royal Assent on June 28, after a rapid progress through the House of Lords.

**THE HOUSING POLICY.**—The adjustment of the nation's housing policy to the changing conditions was sought by two measures—the Rent (Restriction Amendment) Bill and the Housing (Financial Provisions) Bill, both presented by the Minister of Health. The main object of the latter was to encourage the building of the smaller types of houses by private enterprise. The existing subsidies were abolished except in

respect of slum clearances, and building societies were helped to finance the building of houses for letting. Sir Edward Hilton Young, moving the second reading on Dec. 15, said the Government believed that capital could now be normally directed into the building of small houses of the type that could be let at 7s. 6d. a week, exclusive of rates. The abolition of the subsidy would be accompanied by precautions, such as the continued control for five years of the rent on pre-1919 small houses, and the payment of the subsidy for houses already applied for. A Labour motion for rejection was defeated by 238 to 42, and the second reading was agreed to. During the committee stage on Feb. 28, Sir Edward declined to change the date on which the Bill would come into operation, but moved an amendment, which was agreed to, accepting for subsidy houses contained in plans which had reached a reasonable degree of preparation before the introduction of the Bill. He declared on March 6, when the third reading was secured, after a motion for rejection had been negatived by 233 to 66, that the Government was determined to press the war against the slum evil, and he proposed to call on local authorities to prepare surveys of the slums in their areas and programmes which would distinguish between re-conditioning and clearance, with a time limit upon their completion. The Bill was read a second time in the House of Lords on March 23, and a third time on April 26, receiving the Royal Assent on May 18. Moving the second reading of the other Bill, the Health Minister said on Dec. 22 that the system of control was essentially temporary in spite of its long duration and was justified so long as there was a dearth of houses. Since 1920 circumstances had changed and now all the more expensive houses would be de-controlled. Regarding the houses built to let to the more poorly-paid wage-earners, he said one-sixth of this class had been de-controlled, with the result that rents had been increased on an average by 85 per cent. more than the rents of controlled houses in the same class. That meant that de-control of these houses must temporarily cease until the supply caught up with the demand. Control would not be re-imposed on any house already de-controlled. The Bill would give protection to the vast majority of small tenants for five years, and landlords would obtain easier possession of their property for their own legitimate use. The Bill was read a second time on the following day after the defeat by 326 to 111 of an amendment by Mr. Buchanan. When it came before the committee, on the Solicitor-General's motion it was agreed that the Bill should come into force on Sept. 29, 1933, in England and Wales and on Nov. 28 in Scotland. The committee stage was completed on April 11, and the third reading was obtained by 302 to 6 on May 15. The Lords made little change and the Bill received the Royal Assent on July 18, when it was stated that under its provisions some 500,000 houses passed out of control, while on a change of tenancy a further 1,850,000 houses would become de-controlled.

**AGRICULTURAL MARKETING.**—The Government's proposals to enable producers to organise effectively and to stop imports of agricultural produce were embodied in the Agricultural Marketing Bill, the second reading of which was moved by Mr. Elliot in the Commons on

**March 13.** Under the measure the Board of Trade were empowered to make orders regulating the importation of any specified agricultural product if a marketing scheme dealing with that branch of the industry were in force or being prepared. The Minister of Agriculture said that the Bill set out to hold and improve the position of British agriculture, to make the re-organisation of British agriculture a contribution to the cure of world-wide economic chaos, and to make agriculture give a lead to other industries by becoming the best instead of the least organised industry. They must try, he said, to establish an equilibrium of price levels and replacement of value as the criterion of what should be asked from the consumer for produce. Mr. Elliot mentioned that nine new marketing schemes had been prepared. A Labour amendment was rejected by 314 to 62 and the second reading secured on *March 20*, the Bill being referred to a standing committee. The third reading was carried on *May 30* after a motion for rejection had been defeated by 271 to 56. The Lords made certain amendments with which the Commons disagreed, but both Houses accepted a new clause permitting the validity of orders under the Bill to be challenged within 25 days. The Royal Assent was given on *July 18*.

**TRADE WITH RUSSIA.**—While negotiations for a new trade agreement between Great Britain and Russia were proceeding, they were stopped by the arrest of a number of British subjects in Moscow, and the Government at once secured the power to prohibit importations of all Russian goods. Moving the second reading of the enabling Bill on *April 5*, Sir John Simon explained that its passage was required to give the Government a free hand. They sincerely regretted the interruption of the negotiations, but as they could not secure a fair trial for the arrested Britons they could do nothing but ask to be equipped with the same powers to control Russian imports as the Soviet Government already possessed to control British imports. That might help to bring home to the Soviet Government the feeling of the British people in this matter and do something to help British subjects in peril. Sir Stafford Cripps moved the rejection of the Bill which he suggested was a victory for that anti-Russian bias which had seized the opportunity given it by factitious excitement. Sir Herbert Samuel declined to refuse the powers, but asked that the Bill should be connected only with the case of the British engineers, and as this assurance was not given, Sir Herbert's supporters abstained from the division. The amendment for rejection was negatived by 247 to 48 and the second reading was agreed to. On *April 6*, after Sir Austen Chamberlain had declared that the only issue was to secure justice for the arrested men, Mr. Runciman gave the promise and the Liberals then supported the Bill. An amendment that a proclamation under the Bill should only be valid for three months unless Parliament passed a resolution praying for its continuance was added, and the remaining stages were secured immediately. The Royal Assent was given on *April 14*. The convicted Britons having been released before the expiry of three months, no further proclamation was necessary, and negotiations for a new trade agreement were in progress when Parliament adjourned.

**REGULATING ROAD TRANSPORT.**—An attempt to place road transport under the same conditions as the railways was made in the Road and Rail Traffic Bill presented on *April 7*. Moving the second reading on *May 3*, Mr. Oliver Stanley, the new Minister of Transport, said that the Bill did not pretend to settle the whole transport problem. It was an attempt to give the user of transport a choice between systems, none of which possessed any undue advantage over any other such as a concealed subsidy. The Government's only desire was to give the country the best transport system of all kinds, and he warned the road and rail industries that if they did not organise some division of function by agreement between themselves, someone would have to organise it for them. The Bill, he claimed, approximated road transport to rail transport in the three points which at present made the competition of road transport unfair—regulation of services, regulations for safety and regularity of services. Three forms of licences were to be issued, and with regard to the removal of restrictions on the railways, Mr. Oliver declared that the Bill abolished all he could find which were not now required by the considerations for which they were originally framed. These considerations were that the railways must be safe and that they must not be able to exploit monopolistic powers. A Labour amendment was rejected by 302 to 38, and the Bill was read a second time and sent to a standing committee. The report stage was opened on *July 19*, and concluded on the following day, and on *July 21* an amendment for its rejection was defeated by 163 to 25 and the Bill read a third time. The House of Lords gave it a first reading on *July 25*, and the remaining stages were left over until after the recess.

**LONDON TRANSPORT.**—The whole system of public transport—trams, buses and trains—in the metropolitan area was centralised and placed under one authority by the London Passenger Transport Bill, which had been carried over from the previous Parliament by a special resolution after being considered by a joint committee of the two Houses. The measure was originally introduced by Mr. Herbert Morrison, the Labour Minister of Transport, and adopted by the National Government, and the former Conservative opposition was not entirely removed by amendments made by Mr. Pybus when the committee stage began on *Nov. 29*. One of these substituted trustees for the Minister as the agent to appoint members of the new Board to be set up to co-ordinate passenger traffic, while another made the Railway Rates Tribunal the arbiter for facilities and fares instead of the Minister. When the report stage was concluded on *Feb. 13*, a clause was added transferring to the Board the powers which the London County Council possessed to run passenger steamers, provided the Council favoured the proposal. The third reading was agreed to on the following day after the defeat by 222 to 46 of a Conservative amendment for rejection. Mr. Pybus said that the Bill provided the only practicable plan for the necessary co-ordination of London's passenger transport. The Government were satisfied that full efficiency and the requisite economies could not be achieved without unity of management, which required complete amalgamation and unified ownership, and they wanted without delay a

Board to deal with London passenger traffic as a whole. Before the second reading was carried in the House of Lords on *March 2*, a motion to refer the Bill to a Select Committee was negatived by 155 to 13. The London Passenger Transport Board was set up and came into operation on *July 1*, when the whole of the tramway, tube and omnibus systems of the Metropolis were transferred to the new authority, which also exercised functions over suburban railway systems.

**REFORMING LONDON'S POLICE.**—As a result of a report presented by Lord Trenchard, the Commissioner of Metropolitan Police, the Government introduced a bill to effect a number of reforms in the Force by broadening the basis of recruitment. The main proposals were the institution of a Police College, where university and public and secondary school recruits could be trained for the higher ranks, and the creation of a short-service branch, in which constables should retire after ten years' service. New conditions were set up in regard to the Police Federation and its powers. Sir John Gilmour, moving the second reading of the Bill on *May 23*, reminded the House that the Force had been in existence for over a century, but there had been little change in its organisation. The scheme

for recruitment to the higher ranks was neither new nor novel, and there was no intention to set up a privileged officer class. Mr. Lansbury's motion for rejection was defeated by 722 to 60, and the Bill was read a second time. The standing committee to which it was referred made little alteration, and on *June 26* the report stage and third reading were secured, a rejection motion being negatived by 220 to 52, an amendment to omit the part reconstituting the Police Federation by 245 to 53, and another to delete the short-service provisions by 180 to 62. Sir John Gilmour denied that there was any desire to abolish the Police Federation, and said that the rank and file would still be able to present their grievances to the authorities. The reforms, he claimed, were a means of improving the efficiency of the Force, which had failed at certain parts of its work, such as the detection of housebreakers. The Bill was passed by the Lords and received the Royal Assent on *July 18*.

#### ADJOURNMENT.

Parliament adjourned on *July 28* until *Nov. 7*, with the new customary provision that it should be summoned to meet earlier if it were in the public interest.

#### § OFFICERS OF THE HOUSE OF COMMONS.

<i>Speaker (re-elected Nov. 3, 1931),</i> Capt. The Rt. Hon. Edward A. FitzRoy, M.P. for Daventry	£5,000
<i>Secretary,</i> Lt.-Col. Sir Ralph Verney, C.I.E., C.V.O.	£700
<i>Chairman of Committees,</i> Rt. Hon. Sir D. H. Herbert, K.B.E., M.P.	£2,500
<i>Deputy Chairman,</i> Capt. R. C. Bourne, M.P.	£1,000
<i>Clerk of the House of Commons,</i> Sir Horace Christian Dawkins, K.C.B., M.B.E.	£3,000
<i>Clerk Asst.,</i> Gilbert F. Montrieu Campion, C.B.	£1,800
<i>Second do.,</i> F. W. Metcalfe	£1,200
<i>Principal Clerk Public Bill Office, and Clerk of the Fees,</i> Bryan Fell, C.B.	£1,000 to £1,200

## THE GENERAL ELECTION OF 1911.

THE result of the General Election of 1911 is shown in tabular form below. The Electorate numbered approximately 30,000,000, and if the voters in uncontested constituencies (1,325,000) are deducted the number of electors who recorded their votes amounted to seven-ninths of the remainder. In 1832 the electors numbered about 1,000,000, increased to 2,500,000 in 1867, 5,000,000 in 1884, 21,000,000 in 1911 (when women of 30 were enfranchised), and to 28,850,000 in 1919 (women having the vote on the same terms as men).

PARTY AND LEADER.	NUMBER OF CANDIDATES.			VOTES RECEIVED.	MEMBERS RETURNED.		
	Men.	Women	Total.		Unop.	Opposed.	Total.

"Right Honourable."—Members of His Majesty's Most Honourable Privy Council are entitled to be designated "The Right Honourable," but, in practice, this prefix is sometimes absorbed in other designations: for example, a Prince of the Blood admitted a Privy Counsellor remains "His Royal Highness"; a Duke remains "His Grace"; a Marquess is still styled "Most Honourable." In the case of Earls, Viscounts and Barons a question has lately been raised whether peers of these three degrees are entitled to be called "Right Honourable" if not Privy Counsellors. While not presuming to make a statement in settlement of the question, the Editor feels bound to direct attention to the recital of Modes of Address of Peers of these three degrees (on pages 195, 199 and 202 of present Edition). The Style appearing in these headings has been recited in this manner for more than sixty years in *WHITAKER*, and appears to be evidence of a long-standing custom; moreover, it is borne out in each instance, in *A Manual of Dignities*, by C. R. Dodd (Whitaker & Co., 1822), and in *The Book of the Court*, by W. J. Thoms, F.S.A., "Dedicated by Command to the Queen" (H. G. Bohn, 1844). Earlier evidence of the courtesy could no doubt be produced. Chief Magistrates entitled to the prefix are found on p. 205.

# Government and Public Offices.

## NOTE AS TO SALARIES.

THE salaries shown in the 1934 WHITAKER, in the case of H.M. Judges and of Government Departments, are subject to abatement in accordance with the decisions of His Majesty's Government. These abatements, which took effect from Oct. 1, 1931, are set out in Command Paper Number 3952, in various Treasury Circulars, and answers to Parliamentary questions, and may be summarised as follows:

### (a) Ministerial salaries—

£5,000 a year and over, 20%; £2,000 a year and over, but under £5,000, 15%; under £2,000 a year, 10%.

(The salaries of the Attorney-General and Solicitor-General have been reduced to £2,000 a year plus fees.)

### (b) Other salaries (£1,800 a year and over)—

£5,000 a year and over, an abatement of 20%; £2,000 a year and over, but less than £5,000, 10%, subject to the proviso that the remuneration of any officer in receipt of over £4,000 a year, but less than £5,000, shall be 10% less or such larger amount as will suffice to reduce his remuneration to £4,000.

Salaries of £1,800 a year and over, but less than £2,000; such abatement as will suffice to reduce remuneration to £1,800.

### THE COST OF LIVING BONUS.

In the year 1920 the Government introduced a *Cost of Living Bonus Scheme*, under which salaried Civil Servants and wage-earning Government employees received temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920.

The Government Scheme was adopted generally by Public Authorities, certain modifications being made in particular instances.

The standard cost of living in March, 1920, was 130 per cent. in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* on the basis of that figure was as follows:—

Where the ordinary rate of remuneration did not exceed 30s per week—130 per cent. increase.

Where the ordinary rate of remuneration exceeded 30s a week, but did not exceed £500 per annum—130 per cent. on the first 30s a week (£92 5s per annum) and 60 per cent. on the excess over £92 5s.

Where the ordinary rate of remuneration exceeded £500 per annum—130 per cent. on the first £92 5s, 60 per cent. on the next £500 10s, and 45 per cent. on the amount in excess of £900 up to £920.

The standard rate rose or fell a *twenty-sixth* in response to every *five points* rise or fall in the Index figure average of prices over a six months period.

In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases were subsequently introduced:—

20 per cent. on salaries from £500 to £700, 15 per cent. on salaries from £700 to £800; 20 per cent. on salaries from £800 to £900, and 40 on until 60 per cent was reached in the case of salaries of £1,500 a year.

No bonus was payable so as to bring total remuneration, inclusive of bonus, above £1,800.

From September, 1931, to August, 1932, bonus was related to an average cost of living figure of 50 per cent. above the 1914 level.

### STABILISATION.

Under an agreement reached in July 1932 there will be a period of stabilisation until April 1, 1934, during which total remuneration will continue to be assessed at the rates then in operation (i.e. 50) unless for six consecutive months during the period the official cost of living figure is either below 35 or above 60, in which event a review of the general standard of Civil Service remuneration will be undertaken in the light of all the relevant considerations.

The effect on Civil Service salaries below £1,800 a year shown in the succeeding pages (other than those shown as inclusive) at various salary points is set out in the table below.

Basic Salary.	Total Remuneration.
£100	£148
150	209
200	271
250	329
300	388
400	505
500	623
600	740
700	854
800	940
900	1,044
1,000	1,146
1,500	1,633
1,750	1,800

### Offices other than "Government Offices."

Where bonus is payable to County, Municipal and other Officers on a sliding scale the following rates will obtain from September, 1933, to March, 1934:—

Annual Salary.	Bonus Sept., 1933.	Weekly Wages.	Bonus Sept., 1933.
£	£ s. d.	s. d.	s. d.
90	45 0	14 0	7 0
150	59 4	15 0	7 6
200	70 14	17 0	8 6
250	79 8	18 0	9 0
300	88 0	20 0	10 0
400	105 7	30 0	15 0
500	122 13	40 0	18 8
600	146 0	50 0	20 12
700	133 13	60 0	23 3
800	139 13	70 0	25 7
900	143 18	80 0	27 8
1,000	146 9	90 0	29 5
1,750	50 0	100 0	31 2

**ADMIRALTY, H.M. (see pp. 258-9).****(MINISTRY OF AGRICULTURE AND FISHERIES.**

Whitehall Place, S.W. 1: 43 Parliament Street, S.W. 1; 7, Old Bailey, E.C. 4; 8 Buckingham Gate, S.W. 1.

THE MINISTRY OF AGRICULTURE AND FISHERIES was constituted pursuant to the Ministry of Agriculture and Fisheries Act, 1919 (9 and 10 Geo. V. ch. 91) which amended the Board of Agriculture and Fisheries Act, 1889 to 1909. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the destination of which was at the same time altered. The expression "agriculture" is defined to include "horticulture."

The administration of the *Orbance Survey* and of *New Gardens* is under the control of the Ministry.

Estimates, 1933. £s. 227,589.

*Minister of Agriculture and Fisheries*, The Rt. Hon. Walter R. Elliot, M.C., M.P. £5,000

*Private Secy.* H. Vandepier; A. W. Keeble; C. H. M. Wilcox.

*Parliamentary Secy.*, Lt.-Col. A. J. Muirhead, M.C., M.P., M.P. £2,000

*Senior Staff Officers*, W. P. Smart, M.C., M.P. £700 to £850; R. E. Stanley, M.C., M.P. £600 to £800; J. E. Bury, M.C., M.P.; J. L. Morgan, M.C., M.P.; W. E. Strudwicke, M.C. (acting), £550 to £700; H. Chambers, M.C., M.P.; R. S. Langford, M.C. (with allowance £500); H. C. Long, £550 to £650; J. L. Bryan, M.C., M.P. (with allowance £50); H. C. Cotsett, T. Edser; H. P. Foale; J. Forster; F. W. Gooneman; B. F. Gregory, M.C., M.P.; S. A. Pigott (acting); R. Ross, M.C., M.P. £500 to £600

*Staff Officers*, A. S. Allen (acting); S. S. Barnaby, M.C., M.P.; C. F. Colbeck; A. G. Cookman; C. J. D'Arcy; W. L. Davidson (acting); J. H. Dutton (acting); F. T. Foley; R. Genowar, M.C., M.P.; F. A. Hainworth; J. Heath; G. H. Higgs; E. C. Iker (with allowance £50); A. W. Kneebly (acting); H. H. Miller; R. D. Munciewhite; A. E. Sheppard, M.C., M.P. (acting); Capt. G. Simpson; H. H. Smart; S. A. Smith; G. W. Thomas; B. A. Tyson (acting); W. E. Walters; A. R. Whyte (acting); A. H. Worn £400 to £500

*Controller of Women Staff*, Miss S. M. Alleyne, M.C., M.P. £300 to £400

*Economic Investigator*, R. R. Enfield £700 to £800

*Chief Veterinary Officer*, P. J. L. Kelland, M.C., M.P. £1,000 to £1,200

*Deputy Chief Veterinary Officer*, D. A. E. Cabot, M.C., M.P. £800 to £1,000

*Dairy Commissioner*, J. F. Blackshaw, M.C., M.P. £700 to £800

*Poultry Officer*, P. A. Francis, M.C., M.P. £700 to £800

*Horticulture Commissioner*, H. V. Taylor, M.C., M.P. £700 to £800

*Chief Education Inspector*, J. G. Stewart, M.C., M.P., M.D. £700 to £800

*Deputy Chief Education Inspector*, J. L. Whytehead £600 to £700

*Senior Inspectors (Education)*, F. Glover, M.C., M.P.; W. S. Jones, M.C., M.P.; G. P. Haynes, Dip. Agric. (Camb.) £500 to £700

*General Inspectors (Education)*, Maj. C. H. Eden; C. H. Harper, Dip. Agric. (Camb.); E. Hatfield; A. H. House; J. Holmes, M.C., M.P.; D. G. Melver, M.C., M.P.; Miss E. H. Pratt, M.C., M.P.; A. G. Smith, Capt. I. A. Thompson, M.C. (with allowance £500); J. Turnbull; B. L. Wolf, M.C., M.P.; N. J. Wood, Dip. Agric. (Camb.); Capt. V. L. Yates, M.C., M.P. £500 to £700

*Aggricultural Machinery Officer*, C. G. F. Fryer, M.C., M.P. £400 to £500 (men), £300 to £400 (women)

*Director, Plant Pathological Laboratory*, G. C. F. Fryer, M.C., M.P. £800 to £1,000

*Asst. Director*, do, G. H. Pethbridge, Ph.D. £600 to £800

*Assistants*, do, A. S. Buckhurst, M.C., M.P.; C. T. Gillingham, M.C., M.P.; W. C. Moore, M.C., M.P.; A. Smith, M.C., M.P. £500 to £600

*Chief Drainage Engineer*, Capt. J. C. A. Roseware, M.C., M.P. £1,000 to £1,200

*Drainage Engineer*, G. V. Matheson, M.C., M.P. £500 to £700

*Superintending Marketing Officer*, Major E. R. Orme, M.C., M.P. £700 to £800

*Senior Marketing Officers*, A. V. Campbell; C. A. Platt; A. P. F. Grant, M.C., M.P.; Major A. McD. Livingston, M.C., M.P. (Agric.); G. C. Maltby; W. H. Myles, M.C. (Econ.); J. Stoddart; Major W. H. Warrman £500 to £700

*Marketing Officers*, G. S. Baker, M.C. (Agric.), M.D.; C. H. Bagnburn, M.C. (Agric.), M.D.; Capt. K. H. Bond, M.C., M.P.; J. P. Gorman; R. C. Hinton, M.C. (Econ.); F. J. Morgan Jones, M.C. (Econ.); H. McCrae, M.C. (Agric.), M.D.; G. Robinson, M.C.; R. H. Wynne, M.C. (Cornell), M.D. £400 to £500

*Superintending Inspector (Labour)*, W. Morgan Jones £500 to £700

*Divisional Inspectors (Labour)*, R. H. H. Park; H. P. Shute £400 to £500

*Live Stock Commissioner*, G. T. Dixon, M.C., M.P. £700 to £900

*Superintending Livestock Officers*, R. N. Jones; W. P. Middleton; P. A. Mylton £500 to £700

*Divisional Livestock Officers*, T. B. Schofield; A. C. Skinner; F. J. M. Thornycroft; M. D. Williams £400 to £500

*Director, National Stud*, Sir H. Greer, K.C.V.O. (incl. charge) £1,000 to £1,200

*Chief Land Commissioner*, H. V. Raftery, M.C., M.P. £1,000 to £1,200

*Land Commissioners*, E. L. Banham, M.C., M.P.; C. Barnard, M.C., M.P.; S. Fitch, M.C., M.P.; T. Giffith, M.C., M.P.; J. S. Hill, M.C., M.P.; W. T. Howes, M.C., M.P.; Lt.-Col. D. Quirk, M.C., M.P.; C. W. Rogell, M.C., M.P.; G. A. L. Way, M.C., M.P.; C. G. R. Weller, M.C., M.P. £600 to £800

**Superintending Architects.** E. Gunn, A.R.I.B.A., J. S. Lee, A.R.I.B.A., ..... (Inclusive) £647 10s  
**Directors of Farm Settlements.** V. Hailey, F.R.I., (Inclusive) £648 8s; C. Sandell (Inclusive) £693 12s  
**Principal Surveyor.** P. Eastman £400 to £500  
**Chief Superintending Inspector (Diseases of Animals).** Capt. W. G. Wragge, M.R.C.V.S. (with allowance) £600 to £800

**Superintending Inspectors (Diseases of Animals).** E. Brown, M.R.C.V.S.; A. B. Fewings, M.R.C.V.S.; J. L. Frood, M.R.C.V.S.; H. Gooch, M.R.C.V.S.; G. T. Matthews, M.R.C.V.S., J. O. Powley, M.R.C.V.S. £600 to £800

**Inspectional Inspectors (Diseases of Animals).** Capt. G. Atkinson, M.R.C.V.S.; T. Bannantine, M.R.C.V.S.; D. M. V. Boyle, M.R.C.V.S.; J. D. Hoome, M.R.C.V.S.; Capt. J. Fox, M.R.C.V.S.; C. F. Graham, T. D. Graham; D. G. Horne, F. C. Hopson; L. Hughes, M.R.C.V.S.; E. S. James, O.B.E., M.R.C.V.S.; J. M. Kay, M.R.C.V.S.; Major W. L. Lowcliff; E. C. Lloyd, M.R.C.V.S.; R. E. Lloyd, M.R.C.V.S.; C. Macpherson, M.R.C.V.S.; Capt. T. G. Millington, M.R.C.V.S.; D. H. R. E. Murrison, M.R.C.V.S.; J. M. L. Penhale, M.R.C.V.S.; Capt. W. S. Petrie, M.R.C.V.S.; P. G. Row, J. Richards, M.R.C.V.S.; W. L. Sheffield, M.R.C.V.S.; G. V. Smith, M.R.C.V.S.; Capt. F. T. Smith, M.R.C.V.S.; Capt. R. Stewart; E. M. Watson; Capt. W. Watt, M.R.C.V.S.; D. M. J. F. H. Wrightson, W. J. Young, M.R.C.V.S., D.V.M. (Vet.) £500 to £600

**Director (Veterinary Laboratory).** W. H. Andrews, D.V.M., M.R.C.V.S. £500 to £1,000

**Research Officers.** N. Dolson, B.Sc., M.R.C.V.S.; Capt. T. M. Doyle, M.R.C.V.S., D.V.M.; E. L. Taylor, B.Sc., M.R.C.V.S., D.V.M. £400 to £500  
**Rochester.** H. H. Green, D.V.M. (Inclusive) £600  
**Chief Inspector of Fisheries.** H. S. Moss Blundell, C.N.R. £750 to £850

**District Fishery Officers.** G. T. Atkinson; W. F. Bruce, D.O., M.C. Commander F. C. Collard, R.N. (Ret.); W. J. Gaud, Major F. H. Jarvis, D.S.O.; P. E. Preece-Tannatt; J. Thomson, R. A. Todd, Lt.-Commander A. L. Woods, M.C., R.N. £400 to £600  
**Director of Fishery Investigations.** K. S. Russell, O.B.E., M.A., D.Sc., F.R.S. £1,000  
**Director of Shellfish Services.** R. W. Hodgson, M.D., M.R.C.P., M.R.C.S. £1,000

**Principal Naturalist.** E. M. Davis, B.A. £650 to £950  
**Naturalists.** J. N. Carruthers, D.Sc., F.R.S. (G. M. Graham, M.A., F.R.S.; W. C. Hodgson, D.Sc.; R. E. Savage, A.R.S., D.Sc.; H. P. Sherwood, H. J. Buchanan-Wollaston. £450 to £600

#### Agricultural Wages Board.

**Chairman.** Rt. Hon. Viscount Ullswater, C.B.E.  
**Secretary.** E. C. Ives.

#### Royal Botanic Gardens, Kew.

Open daily, M., W., Th., Sat., Sun. and Good Friday. Tu. and Fri. (Students' days) 6d. Bank Holidays free. 10 to Sunset or 8 p.m. Houses 5 p.m. to 5 p.m. or sunset. Closed on Christmas Day.

**Director of Royal Botanic Gardens and Technical Adviser in Botany.** Sir A. W. Hill, K.C.M.G., F.R.S., D.Sc., F.R.S. £1,000 to £1,200

**Assistant Director.** J. S. L. Gilpin, M.A. £600 to £800  
**Economic Botanist.** H. C. Sampson, F.R.S., M.Sc. (Inclusive) £604 to £633

**Keeper, Herbarium & Library.** A. D. Cotton £600 to £800

**Deputy Keeper.** T. A. Sprague, D.Sc. £500 to £700

**Curator of Gardens.** J. Coutts £650 to £850

**Keeper of Museums.** W. Dallimore £500 to £700

**Assistant Keeper, Jostrell Laboratory.** C. R. Metcalfe, M.A., Ph.D. £600 to £800

**Botanists (Women).** F. Ballard, M.Sc.; J. H. Holland, F.R.S.; H. Howes, M.Sc.; J. Hutchinson, C.V.B. Marquand, M.A., V.S. Summerhayes, B.Sc.; W. B. Turill, D.Sc. £500 to £600

**Botanists (Women).** Miss M. L. Green, B.A.; Miss E. M. Wakefield, M.A. £500 to £650

#### Ordnance Survey Department, Southampton.

**Director-General & O.C. Survey Battalion.** R. K. Brigadier H. St. J. L. Winterbottom, C.M.G., D.S.O., A.D.C.

**Executive Officer.** Col. G. S. C. Cooke, D.S.O.

**Officers in Charge of Headquarters Divisions:**

**Publication.** Lt.-Col. A. B. Clough, O.B.E., M.C., R.F.C. Control Lt.-Col. P. K. Routledge, O.B.E., M.C., R.F.C.

**Assisting Control.** Lieut. L. F. de V. Carey, M.C.

**Small Scale Drawing and Map Sales and Issues.** Branch, Capt. J. G. Withycombe

**Adjutant, Survey Battalion, R.E. and Trigonometrical and Secretary Central Bureau, International Map.** Capt. J. C. T. Willis, M.C.

**Stores & Buildings Branch and Assisting Publication.** Capt. H. K. M. Newman, M.C.

**Levelling.** Capt. T. H. Lindsey, M.C.

**O.C. 10th (Field Survey) Company, R.E., Capt. F. O. Metford, M.C.**

**10th (Field Survey) Company, R.E., Lieut. H. B. Calvert, M.C.**

**Quartermaster, Capt. & Qr.-Mr. G. T. Northover, M.C.**

**Staff Officers:**

**Research Officer.** H. L. P. Jolly, M.C.

**Archaeology Officer.** G. S. Crawford, B.A., F.R.A.

**Chief Clerk and Finance Officer.** J. W. Harrison.

**Division Officers:**

**Edinburgh.**

**Research Officer.** Sir Robert Greig, M.C., L.D.S., D.Sc. £2,000

**Assistant Secretaries.** Charles Weatherill, C.N.R. £100

**Deputy Secretary with allowance of £200:** H. M. Coomber, J. M. Cate, M.A., B.I., M.Sc. (Agr.), J. J. W. Handford, O.B.E. £500 to £1,100

**Heads of Branches.** W. N. McWilliam; J. M. Ramsay, O.B.E., M.A.; B. A. Hyslop; J. McDonald, J. Morrison, R. L. Morris £500 to £800

**Establishment Officer.** T. C. Gilchrist £500 to £600

**Ass. Accountants.** I. D. Gummell; R. G. C. Nisbet; H. M. Ritchie £400 to £500

**Staff Officers.** J. R. B. Castle, M.C.; F. L. Darby; I. G. Davidson; R. G. Hattie; E. H. Lyon; R. Markington; G. Page, G. F. Porthouse; E. T. Smith, T. Thomson £400 to £500

**Inspectorate:**

**Chief Inspector.** A. Mann, M.A., M.Sc. (Agr.) £700 to £900

**Senior Inspector for Agricultural Education.** (vacant)

**Senior Inspectors.** J. R. McCallum, M.C., B.Sc. (Agr.), T. P. McIntosh, Ph.D., B.Sc. (Agr.), J. T. Steele, M.A., B.Sc. (Agr.) (with ult. £100), J. A. Symon, D.Sc., M.A., B.Sc. (Agr.) £500 to £800

**Director, Seed Testing and Plant Quarantine Station.** T. Anderson, M.A., M.Sc. (Agr.) £400 to £500

**Small Holdings, Land Settlement and Estates Staff.**

**Chief Technical Officer.** (vacant). £700 to £900

**Divisional Land Officers.** A. Carruth, O.B.E., F.R.I.; C. McDonald, D. Stewart £500 to £800

**Land Officers.** A. Campbell; J. W. Conill; R. Cunningham; A. T. Goulay; P. A. McWilliam; T. B. Mansel, Ph.D., B.Sc. (Agr.); J. Nicolson; A. Fulton, B.Sc. (Agr.); J. Rowe, M.C. (Agr.); G. Stewart; H. Stuart; A. F. Wilson £400 to £500

**Surveying Staff.**

**Chief Engineer and Surveyor.** A. G. Ingham, F.R.I., M.M.S.C.V., M.R.N.I. £500 to £800

**Assistant Chief Surveyor.** W. F. Lowrie £450 to £550

**Legal Staff.**

**Solicitor.** A. D. Cullander £500 to £800

**Assistant Solicitor.** D. Douglas £400 to £500

**Miscellaneous Appointments.**

**Advisory Officer on Farm Economics.** (vacant) £500 to £600

**Organizing Officer under Rats and Mice Destruction Act (1919).** T. M. Munro £400 to £500

**Plant Pathologist.** Mrs. N. L. L. Alcock £300 to £450

**Marketing Officer.** A. F. Smith £350 to £450

#### EXECUTIVE COUNCIL OF THE IMPERIAL AGRICULTURAL BUREAUX.

2 Queen Anne's Gate Buildings, S.W. 1.

This Inter-Imperial organization, composed of nominees of the Governments of the United Kingdom, the Dominions and India, and of the Colonial Office, was set up in 1909 to administer a number (8) of bureaux

organised to act as clearing houses of information on research in eight specialised fields of agricultural science, and financed from a common fund provided by the Governments of the Empire. The Annual Reports of the Council are submitted to each of the Governments through their several members on the Council. The bureaux are attached to appropriate research institutions, but are distinct from them.

*Chairman*, F. I. McDougall, C.M.G.

*Secretary*, Sir David Chudwick, C.B.I., C.I.E.

#### HERALDS

*Soil Science*, Rothamsted Experimental Station, Harpenden, Herts.—*Director*, Sir E. J. Russell, O.B.E., D.Sc., F.R.S.

*Animal Health*, Veterinary Research Laboratory, Weybridge, Surrey.—*Director*, W. Horner Andrews, D.Sc., M.R.C.V.S.

*Animal Nutrition*, Rowett Research Institute, Aberdeen.—*Director*, J. B. Orr, D.Sc., M.C., M.A., M.D., D.N.C., F.R.S.

*Animal Genetics*, Institute of Animal Genetics, Edinburgh University.—*Director*, F. A. E. Crew, M.D., D.Sc., Ph.D., F.R.S.

*Plant Genetics (for Crops other than Herbage)*, Plant Breeding Institute, Cambridge University.—*Director*, Sir R. H. Biffen, M.A., F.R.S.

*Plant Genetics (Herbage Plants)*, Welsh Plant Breeding Station, Aberystwyth.—*Director*, R. G. Stapledon, C.B.E., M.A.

*Fruit Production*, East Malling Research Station, Kent.—*Director*, R. G. Hutton, M.A., F.R.S.

*Agricultural Parasitology*, Institute of Agricultural Parasitology, St Albans.—*Director*, R. T. Loefer, M.D., D.Sc., F.R.S.

#### AGRICULTURAL MARKETING FACILITIES COMMITTEE FOR GREAT BRITAIN.

*Chairman*, Lt.-Col. Sir John R. Chancellor, C.M.G., C.I.O., D.N.O.

*Other Members*, W. H. Coates, Ph.D.; H. G. Howitt, D.O., M.C., F.C.A.; D. W. Innes; W. R. Smith, F.R.S.; Sir W. Norman Vernon, Bt.

*Secretary*, M. G. Kendall (Asst. Principal, Ministry of Agriculture and Fisheries, Whitehall Place, S.W. 1).

#### AIR MINISTRY (see p. 382).

#### COLLEGE OF ARMS or HERALDS' COLLEGE.

Queen Victoria Street, E. C. 4.

(Hours: 10 to 4.)

*Karl Marshal*, His Grace the Duke of Norfolk.

#### KING OF ARMS

*Garret*, Sir Gerald Woods Wollaston, M.V.O.

*Clarenceux*, Arthur William Mennart Cochrane, C.V.O. *Norroy (and Registrar)*, Alfred Henry Stafford Howard, M.C.

#### SIX HERALDS

*Lincolns* (and *Karl Marshal's Secretary*), Archibald George Blomfield Russell, M.V.O., F.R.S.

*Somersex*, George Rothe Bellew.

*Chester*, John Dunneane Heaton-Armstrong.

*Richmond*, Henry Robert Charles Martin, F.R.S.

*Windsor*, Alfred Trago Butler, M.C., F.R.S.

*York*, Aubrey John Toppin, F.R.S.

#### FOUR PURSUIVANTS

*Rouge Dragon*, Eric Neville Gellier, M.C., F.R.S.

*Rouge Croix*, Philip Walter Kerr, F.R.S.

*Portcullis*, Anthony Richard Wagner.

*Bluemantle*, Richard Preston Graham-Vivian, M.C.

#### COURT OF THE LORD LYON.

H.M. Register House, Edinburgh.

*Lord Lyon, King of Arms*, Francis James Grant, C.V.O., LL.D., W.S., F.R.S., Scot. £500

#### Three Heralds (£25 each).

*Marchmont*, John H. Stevenson, M.B.E., C.F.R.S., Scot.

*Albany*, Lt.-Col. Sir T. Wolsey Haig, C.B.I.E., C.B.I., C.M.G., C.B.E.

*Rothsay*, John Mackintosh Norman Macleod, C.A.

#### Three Pursuivants (£25 13s 4d each).

*Carriak*, Thomas Innes of Learney, F.R.S., Scot.

#### Advocate

*Falkland*, Lt.-Col. John William Balfour Paul, D.A.O.

*Unionist*, H. A. B. Lawson.

*Lyon Clerk and Keeper of Records*, Harold Andrew Balvaird Lawson. £250

*Prosecutor-Exactor*, John MacGregor, W.S.; Malcolm

Robertson MacGregor, W.S.

*Herald Painter*, A. G. Law Sanson

#### IRISH HERALDS' COLLEGE.

Office of Arms, The Castle, Dublin.

*Usher King of Arms*, Major Sir Neville R. Wilkinson, K.C.V.O., F.R.A.

#### Two Heralds.

*Dublin*, Major Guilanore O'Grady, M.A.

*Cork*, Capt. H. A. Le Keith.

#### Two Pursuivants.

*Athlone*, (vacant)

*Cork*, Major G. A. Burgoyne

*Registrar*, Thomas Ulrick Sadleir, M.A., M.B.I.A.

#### BRITISH BROADCASTING CORPORATION.

Broadcasting House, Portland Place, W. 1.

The B.B.C. was instituted in 1927 as successors to the British Broadcasting Company, whose licence expired Dec. 31, 1926, and operates under licence from the Postmaster-General. The Chairman, Vice-Chairman, and other Governors, are appointed by H.M. Government.

The following *Broadcasting Stations* were in operation in September, 1933:—Long-wave National Programme Transmitter 5XX; Midland Regional; London, Northern, Scottish and Western Dual-wave Regional; Belfast, Bournemouth, Newcastle, Plymouth, Aberdeen, Empire Short wave Transmitters.

In addition to the above the new long-wave National and medium-wave Midland Regional transmitters were under construction.

The number of *Licences* in force on June 30 of the last six years was (1927) 2,307,000; (1928) 2,530,000; (1929) 2,792,000; (1930) 3,159,000; (1931) 3,780,000; (1932) 4,737,000; (1933) 5,525,818, not including licences issued to the blind.

*Chairman*, The Rt. Hon. J. H. Whitley, D.C.I., LL.D.

*Vice-Chairman*, R. C. Norman. £3,000

*Other Governors*, Harold G. Brown. £1,000

*Chairman*, Mrs. M. A. Hamilton, each £700

*Director-General*, Sir J. C. W. Reith, LL.D.

#### CHARITY COMMISSION.

Ryder Street, St. James's, S.W. 1.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1879 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899.

*Chief Commissioner*, E. Macpherson. £1,500

*Second Commissioner*, H. D. S. Leake. £1,000 to £1,500

*Parliamentary Commissioner*, Sir William Edgewood, M.P.

*Secretary*, J. K. C. Adams. £1,000

*Assistant Commissioner and Principal Clerks*, W. F. Fox, G. B. Rooke; A. E. McLaren, O.B.E.; C. N. Hope-Wallace, M.A.; F. B. Jackson. £750 to £900

*1st Class Clerks*, R. E. Ford; S. E. Turner, LL.T.

*2nd Class Clerks*, J. C. G. Pownall; F. T. Carden, M.C.

*3rd Class Clerks*, G. G. Barnardo; G. E. L. Pardington, D.D.; M. J. Richards, M.C.; W. Cairns, C. J. Highton. £500 to £600

*Accountant, Official Trustees' Dept.*, F. Buckingham, F.R.S. £700 to £800

*Assistant do.*, A. V. Mashin. £500 to £600

*Heads of Divisions do.*, J. R. Smith; P. C. Gunner. £400 to £500

*Librarian and Clk. to Sec.*, W. W. Skippon. £400 to £500

*Officer in charge of Accounts of Charities*, A. Stewart. £400 to £500

*Assistant Draftsman*, J. H. K. Spensley. £400 to £500

*Officer in charge of Registration and Memorials*, R. Heath. £400 to £500

## THE GOVERNMENT CHEMIST

(Government Laboratory).

23 Clement's Inn Passage, Strand, W.C.2.

Establishment Expenses, 1932-1933, £66,266

Government Chemist, Sir Robert Robertson, B.Sc., F.R.S.

M.A., D.Sc., F.R.C.S., F.I.C., F.I.F., £5,000 to £15,000

Deputy Government Chemist, J. Fox, O.B.E., D.Sc., F.I.C., £500 to £1,000

Superintendent Chemists, A. More, A.R.C.S., F.I.C.; A. G. Francis, D.Sc., F.I.C.; F. S. Aumonier, B.Sc., F.I.C.; A. J. H. Gango, F.I.C.; F. G. H. Tate, F.I.C.; T. W. Harrison, B.Sc., F.I.C., £700 to £850

Senior Chemists, J. B. Nicholls, B.Sc., F.I.C.; J. E. Byles, B.Sc., F.I.C.; C. A. Adams, B.Sc., F.I.C.; F. R. Ennos, B.A., B.Sc., A.L.C.; A. T. Parsons, B.Sc., A.L.C.; G. F. Sheppard; A. H. Rheinlander, B.Sc., A.L.C.; E. H. Nurse, B.Sc., F.I.C.; B. A. Ellis, M.A., A.L.C.; A. F. Weiss, B.Sc., A.L.C.; R. Sutcliffe, M.A., A.L.C., £550 to £650

Chemists, Higher Grade, J. Kling, F.I.C.; J. A. Hould, M.C., B.Sc., F.I.C.; J. Stephenson, B.Sc., A.L.C., £450 to £550

Chemists, J. W. Pooley, B.Sc., A.L.C.; S. A. Ashmore, B.Sc., A.L.C.; C. E. Barton, B.Sc.; P. M. Mooney, B.Sc., F.I.C.; G. H. Croft, M.Sc., A.L.C.; L. C. Nickolls, B.Sc., D.I.C., A.R.C.S., A.L.C.; R. H. Sotillo, M.A., A.L.C.; E. H. Williams, B.Sc., A.L.C.; J. E. McGreggor, F.I.C.; B. E. Dixon, M.Sc., A.L.C.; J. F. Hirst, B.Sc., A.L.C.; J. R. Fraser, B.Sc., F.I.C.; E. H. Warren, M.A.; C. O. Harvey, B.Sc., A.R.C.S., A.L.C.; J. L. Buchanan, M.Sc., A.L.C.; J. W. A. Woodley, B.Sc., A.L.C.; E. S. Hiscock, B.Sc., A.L.C.; J. Longwell, M.Sc., A.L.C.; H. L. Bolton, A.L.C.; C. G. Daubney, B.Sc., A.L.C.; H. G. Smith, B.Sc., Ph.D.; A. P. Maitland, B.Sc., Ph.D.; P. J. Hardwick, M.Sc., A.L.C.; A. W. Russell, B.A., B.Sc.; J. G. N. Gaskin, B.Sc., F.I.C.; E. Q. Laws, B.Sc., A.L.C.; C. R. Hoskins, B.Sc., Ph.D.; H. K. Whalley, B.A., B.Sc., Ph.D.; H. C. Gull, M.Sc.; E. G. Kellett, B.A., B.Sc., Ph.D., A.L.C.; J. G. A. Griffiths, M.A., Ph.D., A.L.C.; W. G. Moffitt, B.Sc., Ph.D., A.L.C.; G. W. Macellan, M.A., B.Sc., Ph.D.; L. A. Warren, B.Sc., Ph.D., A.L.C., £300 to £450

Staff Officer, I. Wortman, £400 to £500

Senior Clerks, H. Blanks, G. P. Hobdell, £300 to £400

## CIVIL SERVICE COMMISSION,

Burlington Gardens, W.2.

1st Commissioner, Sir Roderick Melkelyohn, B.Sc., C.B. (personal) £2,200

Assistant Commissioners, G. G. Mennell (Secretary), L. Blauke (Director of Examinations), each £1,000 to £1,200

Asst. Sec., T. L. Hedley, £700 to £800

**Chief Clerk and Surveyor, H. W. Kirk**  
**Deputy Receiver, G. A. Couyard**  
**Sheriff (1933-34), Richard Vernon Favell**

#### THE DUCHY OF LANCASTER.

Leicester Place, Strand, W.C.

The County of Lancaster was erected into a Duchy or County Palatine Duchy by Edward I. for his son John of Gaunt in 1377, but in 1399 it became merged in the Crown through the accession of John of Gaunt's son as Henry IV.

The Revenue of the Duchy of Lancaster was £50,000 in 1847 and amounted to £124,000 in the year ended December 31, 1925. The contributory items are Rents and Profits of Courts, £68,477; Royalties and Dues, £57,400. Expenditure, £123,125. Outlay for the benefit of the Estate, £26,550, deducted under various Acts of Parliament, £4,902. Allowances, Donations, and Charities, £21,000. Net Salary of the Chancellor of the Duchy, £20,330. Expenses of Management. The sum of £58,000 was paid for His Majesty's use to the Keeper of His Majesty's Privy Purse.  
**Chancellor, Rt. Hon. J. C. Davidson, C.B., C.M.G.**  
**Private Sec., Norman R. C. Warwick, M.C., M.P., C.B.**  
**Vice-Chancellor, Sir Courthope Wilson, M.C.**

**Registrar, Preston District, J. M. Worthington**  
**Do., Manchester District, Harold Roberts**  
**Do., Liverpool Dist., R. W. Lowden**  
**Constable of Lancaster Castle, J. Travis Travis-Clegg.**

#### THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities, and, entitled, king of Northumbria, and Alfred the Great appear to have granted the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that they were acquired in the reign of the Conqueror, and they were extended by the Bishops until resumed by the Crown in 1236. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their royal liege. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.  
**Chancellor, Sir Arthur Colefax, M.C., M.P., C.B.**  
**Attorney-General, Herbert F. Maunty, M.C.**  
**Solicitor-General, J. W. Jarling, M.C.**  
**Registrar of Chancery Court, A. J. Smith**  
**Steward & Clerk of Halmotes, E. J. Davies**  
**Deputy do., W. T. Channell**  
**Registrar, G. M. Shadlow**  
**Mining Surveyor, Sir A. N. Lindsay Wood, Bt.**  
**Receivers, Smith, Cole & Co**

**BOARD OF EDUCATION.**

Whitehall, London, S.W. 1.

The Government Department of Education was, until

the establishment of a separate office, a Committee of

the Privy Council appointed in 1839 to supervise the dis-

tribution of certain grants which had been made by

Parliament since 1834. The Act of 1899 established the

Board of Education, with a President and Parliamentary

Secretary, and created a Consultative Committee. The

cost of administration was estimated at £325,146 in

the Financial Year 1933 with £323,989 for inspection

and Examination.

except upon an address from the Two Houses of Parliament. In his capacity of Comptroller General of the Receipt and Issue of the Exchequer he authorises all issues from the Exchequer after satisfying himself that Parliament has given authority for them. He examines the Exchequer accounts and makes an annual report on them to Parliament. In his capacity of Auditor General of Public Accounts he is charged with the duty of examining on behalf of the House of Commons the accounts of expenditure out of monies provided by Parliament, the accounts of the receipt of revenue, and generally all other public accounts, including the accounts of Government stores and of trading services conducted by Government Departments. The results of his examination of these accounts are reported to the House of Commons.

#### § FOREIGN OFFICE, Downing Street, S.W. 1.

The Secretaryship of State for Foreign Affairs was created in 1702, superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), one Deputy Under-Secretary, and five Assistant Under-Secretaries, Legal Advisers, a Press Officer, twelve Counsellors, a Librarian, and a staff of Clerks. The chief function, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £900,000 in 1933.

**Registration Examiners**, J. Ross; J. J. Blyth, D. B. Gardner; J. Tupman; J. C. Loring

### HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1924, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the nature of the Offices, the former retaining Irish and Colonial business, and until 1924 War business also. In 1902 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

**Principal Secretary of State for Home Affairs**, Lt.-Col. Rt. Hon. Sir J. Glynne, Bt., D.S.O., M.P. £5,000

**Private Sec.**, S. Hutchinson.

**Asst. Private Sec.**, A. Johnston

### POLITICAL HONOURS SCRUTINY COMMITTEE.

The Royal Commission on Honours, 1922, recommended that a Committee should be appointed to consider, before they are submitted to the King, the names and particulars of persons recommended for appointment to any dignity or honour on account of political services, and after such inquiry as they think fit to report to the Prime Minister whether, so far as they believe, such persons in the whole circumstances are fit and proper persons to be recommended.

*Secretary, Sir James Rae, c.n.e. (Treasury, S.W. 2)*

### IMPERIAL COMMUNICATIONS ADVISORY COMMITTEE.

Electra House, Victoria Embankment, W.C. 2.

This Committee was constituted in July, 1920, in accordance with the recommendations of the Imperial Wireless and Cable Conference, 1920, to act in an advisory capacity in regard to telegraphic communications. The Committee is charged with certain responsibilities relating to the activities of Imperial and International Communications Limited—the company formed, in accordance with the recommendations of the Imperial Wireless and Cable Conference, for the purpose of co-ordinating the telegraphic services (both cables and wireless) connecting the various parts of the British Empire.

The Committee consists of one Member appointed by each of the Governments of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, the Irish Free State, India, and of the Colonies, Dependencies and Protectorates respectively. The Government of any part of His Majesty's dominions now or hereafter possessing responsible government may also nominate one representative, who is entitled to be summoned to any meeting at which questions affecting the interests of that part of His Majesty's dominions are to be considered.

*Chairman, Sir Campbell Stuart, c.n.e.*  
*Deputy Chairman, Clive L. Bullen, c.n.e.*  
*Secretary, E. St. J. Bamford.*

### IMPERIAL ECONOMIC COMMITTEE.

2 Queen Anne's Gate Buildings, S.W. x.

This Committee was established in 1925, following proposals of the Imperial Economic Conference, 1923, and its terms of reference were successively widened by the Imperial Conferences of 1926 and 1929. Following the adoption by the Governments of the Empire of the report made in 1933 by a reviewing Committee—the Imperial Committee on Economic Consultation and Co-operation, which was convened in accordance with a resolution of the Imperial Economic Conference of 1929, and which examined *inter alia* the Imperial

Economic Committee, the latter's terms of reference have been further extended and are now as follows:—

- (1) To complete a series of investigations into the possibility of improving the methods of preparing for market and marketing within the United Kingdom the food products of the overseas parts of the Empire with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests both of producers and consumers.
- (2) To undertake enquiries into the production for export and the marketing in various parts of the world of raw materials of the Empire.
- (3) To prepare, on obtaining the approval of the Governments of the Commonwealth, surveys of any branch of Empire trade and marketing.
- (4) To carry out certain investigations directed by the Imperial Conference, 1929.
- (5) To facilitate conferences among those engaged in particular industries in various parts of the Commonwealth.
- (6) To undertake the following services transferred from the Empire Marketing Board:—
  - (a) periodical market intelligence notes, and
  - (b) world surveys of production and trade (including those embraced by the "Commodity Series" issued by the Empire Marketing Board).
- (7) To make proposals to Governments in regard to other economic services and enquiries which, in its view, should be conducted on a co-operative basis, if being understood that this does not give to the Committee any power to initiate proposals regarding consultation in respect of economic policy.

The nineteen members of the Imperial Economic Committee are nominated by their respective Governments, and the Committee, whose expenses are met by contributions from all the Governments of the Commonwealth, reports to those Governments.

The results of previous enquiries are embodied in a series of reports, of which six had been published by September 1933. In addition, the section of the Empire Marketing Board which was transferred to the Committee in October 1933, had in the past published weekly intelligence notes on dairy products, fresh fruit, cereals, and dried fruit, and a series of world surveys of commodities. These are being continued under the I.E.C. *Chairman, Sir Horace J. Wilson, c.n.e., c.n.s., c.n.e. Secretary, Sir David Chadwick, c.s.i., c.i.e.*

### IMPERIAL SHIPPING COMMITTEE.

Great George Street, S.W. x.

Set up in 1920: (1) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade or questions of a similar nature referred to them by any of the nominating authorities, and to report their conclusions to the Governments concerned. (2) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works and similar matters, and in so doing to take into account facilities for air transport on the routes in question. Like the Imperial Economic Committee, it derives authority from and reports to all the Governments represented at the Imperial Conference. *Chairman, Rt. Hon. Sir Halford Mackinder Secretary, R. C. Bryant.*

## INDUSTRIAL ASSURANCE COMMISSIONERS

(see Friendly Societies Registry).

## BOARD OF INLAND REVENUE.

Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1864 and of Commissioners of Taxes from 1719. By 4 and 5 Will IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 12 and 13 Vict. c. 2 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 2 Edw. VII. c. 16 the administration of Excise was transferred to the Board of Customs. The present sources

of "Inland Revenue" consist of Death Duties, Stamps and Taxes. Salaries and Expenses of the Board for 1933 are estimated at £7,104,985.

## The Board.

**Chairman**, Sir James Grigg, K.C.B. £3,000

Secretary, W. H. Reynolds, M.P. .... £750 to £850

### H.M. LAND REGISTRY,

Lincoln's Inn Fields, W.C. 2; and 28 Portugal Street, W.C. 2.

H.M. Land Registry was established in pursuance of a recommendation of a Royal Commission by the Land Registry Act 1888. The aim of the Act was to render dealings with land more simple and economical by establishing a State register of landowners who voluntarily submitted the titles to their land for examination and approval by the Registrar on behalf of the State. The Registry was reformed by the Land Transfer Act 1897, which, while making many changes in the system, continued its voluntary basis. In 1927 the Land Transfer Act introduced the principle of compulsory registration, and four Orders in Council under that Act between 1898 and 1926 made the system compulsory on sale in the administrative county of London by a further Order made in 1926. Registration was made compulsory on sale in Eastbourne, and under an order made in 1926

in *Hearings*. The Land Registration Act, 1925 consolidated the previous Acts, and made such changes in the system as the experience of a generation had shown to be necessary. The keynote of the system is that the machinery for the purchase and sale of land is assimilated to that for Stocks and Shares. Absolute titles granted by the Land Registry are guaranteed by the State. Simple forms, analogous to those used on transfers of Stocks and Shares, are provided. The cost of buying, selling or mortgaging registered land is much less than the cost in the case of unregistered land. It is open to any County Council or Council of a County Borough to apply to the Privy Council for an order making registration of title compulsory in its area. The Land Registry is administered under the Lord Chancellor by the Chief Land Registrar, who also controls the Middlesex Deeds Registry and the Land Charges Department under the Land Charges Act 1925.

**Office Hours** :—Registration, 11 to 3; Searching and other business, 10 to 4. Saturdays closed at 2.

#### Registration of Title.

**Chief Land Registrar**, Sir John Stewart Stewart-Wallace, C.B. £1,750  
**Registrars**, C. A. Lewis; S. Lowenthal; C. W. Yonagoe ..... £1,500  
**Assistant Registrars**, J. P. Pinnoo; G. H. Timperley; C. C. Deakin; R. M. Lowe; W. J. L. Ambrose ..... £750 to £900

**Legal Assistants**, G. W. Falkner; H. W. Wilson; N. Sutcliffe; E. L. Follett; J. S. R. D. Rawcliffe; A. R. Clarke-Williams ..... £450 to £700  
**Junior Legal Assistants**, E. H. Collins; T. H. Roberts; G. R. Curtis; H. H. Nichols; A. H. Flint, £250 to £500; Miss E. M. Price ..... £420 to £400  
**Examiners**, W. E. Mendav, £650; S. W. Dowden, M.B.E. £500 to £600  
**Junior Examiners**, W. L. Robinson, E. O. Byers, M.B.E.; W. Simmonds, F. C. J. Howard £450 to £500  
**Superintendent, Mortgages Deeds and Land Charges Dept.**, E. W. Mount, M.B.E. £400 to £550  
**Chief Superintendent (Mapping Branch)**, A. G. Heath, M.B.E. £550 to £650  
**Deputy Chief Superintendent**, E. A. Malby, F.R.I. £450 to £550

**Senior Surveyors**, W. King; S. G. N. Mann ..... £370 to £450  
**Chief Assistant (Endowments)**, D'Arcy White, O.B.E. £500 to £700  
**Clerk of Accounts**, A. H. Coates, M.B.E. £600

#### LAW OFFICERS' DEPARTMENT.

**Royal Courts of Justice, W.C.2.**  
**Attorney-General**, Rt. Hon. Sir Thomas Inskip, C.B., M.C., M.P. (and fees) £17,570 in 1929-30 £2,000  
**Solicitor-General**, Sir Donald Bradbury Summervell, O.B.E., K.C., M.P. (and fees) £6,575 in 1929-30 £2,000  
**Legal Secretary**, Robert A. Bann, O.B.E. £850 to £1,000

#### LORD ADVOCATES' DEPARTMENT.

**Edinburgh.**  
**Lord Advocate**, Rt. Hon. W. G. Normand, K.C., M.P. £5,000  
**Legal Secretary**, M. Millar Craig, Adv. £1,000 to £1,200  
**Solicitor-General**, Douglas Jamieson, K.C., M.P. £2,000

#### LEE CONSERVANCY BOARD.

**Surrey House, Victoria Embankment, W.C.2.**  
**And Knifield Lock, Middlesex.**

The authority responsible for the control of the River Lee and its tributaries, its functions including the management of the Lee and Stort Navigation and the prevention of pollution of the water. The River Lee and its tributaries extend over an area of about 600 sq. miles, and the total length of navigable waterway is about 50 miles. The Board consists of 23 members, of whom 14 are elected by local authorities and one by the barge owners on the river.

#### Lee Conservancy Catchment Board.

The Lee Conservancy Catchment Board, established by the *Land Drainage Act 1930*, consists of the members for the time being of the Lee Conservancy Board together with 8 additional members, 2 appointed by the Minister of Agriculture and Fisheries, and 5 by County Councils in the catchment area.

**Chairman**, Maj. Sir W. Prescott, C.B.E., D.L., M.Inst.C.E.

**Clerk of the Board and General Manager**, S. R. Hobday (Barrister-at-Law)  
**Engineer**, B. Howorth, A.M.Inst.C.E.

#### LONDON PASSENGER TRANSPORT BOARD.

55 Broadway, Westminster, S.W. 1.

Telephone—Victoria 6800.

On and after July 1, 1933, the following undertakings were transferred to the Board, constituted under the London Passenger Transport Act, 1933 :—

**Railways**—Metropolitan District, London Electric, City and South London, Central London, Metropolitan, Tuppess—L.C. Haring, Bexley, Croydon, Dartford, Foss Ham, Erith, Ilford, Leyton, Walthamstow, West Ham, London United, Metropolitan Electric, South Metropolitan Electric.

**Tramways and Coaches**—London General, London General Country Services, Overground, Tilings and British Automobile Traction, Green Line Coaches.

**Chairman**, Lord Ashfield £12,500  
**Full Time Member**, Frank Pick £10,000  
**Other Members**, John Cliff; Patrick Ashley Cooper, Sir John W. Gilbert, K.B.E.; Sir Edward J. Holland; Sir Henry P. Maybury, O.B.E.; K.C.M.G.; M.C. each £750  
**Secretary and Treasurer**, J. S. Anderson  
**Controller and Accountant**, C. M. Leitch  
**General Manager (Railways)**, J. P. Thomas  
**Chief Mechanical Engineer (Railways)**, W. A. Agnew  
**Operating Manager (Railways)**, G. Hally  
**Operating Manager (Tramways, Central Area)**, A. C. Richardson

**Engineer (Tramways, Central Area)**, A. A. M. Durrant  
**General Manager (Tramways, Country Area and Coaches)**, A. H. Hawkins  
**General Manager (Tramways)**, C. J. Spencer (N and W), T. E. Thomas (Cen, S. and E.)  
**Chief Engineer**, R. Cooper  
**Commercial Manager**, A. L. Barber  
**Publicity Manager**, G. W. Duncan  
**Chief Stores Superintendent**, R. H. Pitts  
**Chief Staff Officer**, J. L. H. Landay (acting)  
**Electric Engineer**, J. H. Millen

#### LORD GREAT CHAMBERLAIN'S OFFICE.

Royal Court, House of Lords, S.W. 1.

The Lord Great Chamberlain is the Sixth Great Officer of State, the office being hereditary since the grant of Henry I to the family of De Vere, Earls of Oxford.

**Secretary**, Brig.-Gen. Lord Esmé Gordon-Lennox, C.M.G., O.B.E., M.C. £800  
**Clerk**, Capt. G. J. W. Townsend, M.B.E. £150  
**Resident Supd. House of Lords**, Capt. E. L. H. Elliott £350

#### LORD PRIVY SEAL.

Treasury Chambers, Whitehall, S.W. 1.

**Lord Privy Seal**, Rt. Hon. Stanley Baldwin, M.P.  
**Private Sec.** (for Lord President of the Council)

#### MEDICAL RESEARCH COUNCIL.

**Central Office** :—38 Old Queen Street, Westminster, S.W. 1.

Telephone : Whitehall 5027.

Telegrams "Medresco, Parl-London."

The Council were formerly the Medical Research Committee, established in 1913 under the National Health Insurance Act, but were incorporated under their present title by Royal Charter on the 1st April, 1920. They are now under the administrative direction of a Committee of the Privy Council, consisting of the Lord President, the Minister of Health (England and Wales), and the Secretaries of State for Scotland, for Dominion Affairs, for the Colonies, and for Home Affairs; the Secretary of the Medical Research Council is *ex officio* Secretary to this Committee.

The Council apply moneys voted by Parliament or received from private sources for the furtherance of medical research. Their reports, published by H.M. Stationery Office, are obtainable through any bookseller.

**Members**. Rt. Hon. Viscount D'Abernon, O.B.E., M.C., M.P. (Chairman); Rt. Hon. Lord Midway (Treasurer); W. S. Morrison, M.C., M.P.; J. A. Wright, M.D., F.R.S.; Sir Charles S. Sherrington, O.B.E., M.C., F.R.S.; The Lord Dawson of Penn,

G.O.V.O., R.C.B., M.D.; Prof. E. D. Adrian, M.D., F.R.S.; Prof. A. E. Boycott, M.D., F.R.S.; Sir T. Lewis, M.D., F.R.S.; Prof. D. P. D. Wilkie, Ch.M., F.R.C.S. Secretary, Edward Mellanby, M.D., M.C.D., F.R.S. Assistant Secretary, A. Landsborough Thomson, C.B., O.B.E., M.C. Assistant Secretary (Publications), E. Schuster, D.Sc. Assistant, F. H. K. Green, M.D., M.R.C.P. Accountant, J. H. Morton.

#### National Institute for Medical Research.

Mount Vernon, Hampstead, N.W. 3.

Telephone: Hampstead 2232.

Telegrams: "Medresco, Haver-London."

Director, Sir Henry H. Dale, C.B., M.D., F.R.S.

Deputy Director, Capt. R. D. Douglas, F.R.S.

#### National Collection of Type Cultures.

Lister Institute, Chelsea Gardens, S.W. 2.

Telephone: Sloane 2181.

Curator, R. St. John-Brooks, M.D.

#### Standards Laboratory.

Institute of Pathology, University of Oxford.

Telephone: Oxford 2273.

Curator: A. D. Gardner, M.D., F.R.C.S.

#### Industrial Health Research Board.

Office: 38 Old Queen Street, Westminster, S.W. 1.

Telephone: Whitehall 5027.

Secretary Air Vice-Marshal Sir David Munro, K.C.B., M.B.

#### MERSEY DOCKS AND HARBOUR BOARD.

Liverpool.

Nominee Members (appointed by the Minister of Transport), Robert S. Johnson, O.B.E.; Charles McVey; Sir Max Munro, Bt., T. Stone.

Elective Members (elected by Dock Masters), Richard D. Holt (Chairman); J. G. B. Beazley, M.C., T.D.; A. H. Ribby, D.S.O.; Charles Booth; Sir Thomas A. L. Brocklebank, Bt.; E. G. Brownbill, Lt.-Col. Albert Buckley, D.S.O.; William M. Clarke; Krust Cook; John C. D.; Edward C. Gannet; Walter Harding; Robert L. Holt; Charles Livingston; A. C. Morrell, O.B.E.; Edward B. Orme; William Park; Hugh R. Rathbone, M.D.; Leslie Roberts; Thomas Rome; Hugh L. Roxburgh; J. A. Shone; John H. Tilmann; H. Sutton Timmins. General Manager and Secretary, L. A. F. Warner, C.B.E.

#### THE METEOROLOGICAL OFFICE.

The control is vested in a Director and Committee appointed by the Air Council. The *Gazette* Committee of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes—The collection and discussion of meteorological observations from oceans and land areas all over the world, the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of this country, the Mediterranean and the Near East, for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the *British Rainfall Organisation* was transferred to the Meteorological Office in July, 1929.

Chairman of Meteorological Committee, The Under Secretary of State for Air.

Director of Meteorological Office, G. C. Simpson, C.B., D.S.O., F.R.S.

Assistant Directors, R. C. K. Lempert, C.B.E., M.A., F.R.S.; Lt.-Col. E. Gold, D.S.O., F.R.S.; F. J. W. Whipple, M.A., D.S.O., F.R.S.

Superintendents, H. G. Bilham, M.C., A.R.C.S., D.L.C. (British Climatology and British Rainfall Organization); Capt. L. A. Brooke Smith, M.D., M.C., M.A. (Marine); C. E. P. Brooks, D.Sc. (General Climatology); D. Brunt, M.A., M.C. (Atmos.); R. Carson, O.B.E., M.A. (Forecast); J. S. Dines, M.A. (Instrumental); Capt. F. Entwistle, M.C. (Aviation); Com. L. G. Garbett, M.A. (Atmos.); Maj. A. H. R. Goldie, M.A., F.R.S. (Scotland); Chief Clerk, H. L. B. Tarrant, M.B.E.

#### Superintendents of Observatories.

Central (Kew), F. J. W. Whipple, M.A., D.S.O., F.R.S.

Magnetic (Kew), F. J. W. Whipple, M.A., D.S.O., F.R.S.

Magnetic (Kew), F. J. W. Whipple, M.A., D.S.O., F.R.S.

Western (Valencia, Co. Kerry), M. T. Spence, M.B.E.

#### METROPOLITAN WATER BOARD.

173 Rosebery Avenue, E.C. 1.

The Board serves an area of 573 sq. miles. The charges are levied on net annual value at such rate, not exceeding 24 per cent., as the Board may fix. The net water rental for 1928-29 was £4,943,597. The Capital Debt on March 31, 1929, amounted to £53,205,579. The interest paid being £1,725,878. The estimated population supplied was 7,212,378, the number of services being 1,329,763. The annual supply was 202,251,030,000 gallons (representing 461,000,000 tons), a daily average of 224 million gallons. One of the sources of supply is the *New River Company's* undertaking, inaugurated in the reign of James I. (1605) by Sir Hugh Myddelton, to bring water from Amwell and Chadwell, Hertford, to London.

Chairman of the Metropolitan Water Board, Sir W.

Prescott, C.B.E., D.L. (unp.)

Vice-Chairman, R. W. James, J.P., A.M.I.C.E. (unp.)

Secretary of the Board and Parliamentary Officer, F. Stringer, Barrister-at-Law. £2,000

Chief Engineer, Lt.-Col. J. R. Davidson. £5,000

Accountant & Registrar of Met Water (d) and Debentures, G. M. Jennings, F.I.C.T.A. £2,000

Director of Water Examination (vacant) £2,500

Solicitor, H. A. D. Collins. £1,500

Surveyor, Harold Oxley, F.R.S. £2,500

#### THE ROYAL MINT, Tower Hill, E.C. 3.

Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri.

The Royal Mint, as now constituted, may be said to date from 1877, and the buildings from 1880, the latter being completed in that year at the cost of over £200,000. The first known Master (or Warden) of the Mint dates from Henry I. and the last Master being Professor Thomas Graham, who died in 1869. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The estimated administrative expenses amount to £3,440,000 for 1928-1929. Appropriations in aid, £3,990,000, leaving a net cost of £150,000.

Master and Warden, The Chancellor of the Exchequer.

Deputy Master and Comptroller, and Engineer of H.M. Mints, Col. Sir Robert A. Johnson, K.B.E., £5,000

Chief Clerk, W. Perry, M.P.E. £2,500 to £3,000

Superintendent, Operative Department, H. W. L. Evans, O.B.E. £2,000 to £2,500

Deputy do., F. W. Burton. £2,000 to £2,500

Chief Assayer, S. W. Smith, K.E., M.C. £700 to £800

Curator and Librarian, C. F. Barrett. £400 to £500

#### Branches of the Royal Mint.

Melbourne, Victoria

Deputy Master, H. D. McCay. £2,500

Perth, Western Australia

Deputy Master, H. A. Corbett. £1,500

Pretoria, South Africa

Deputy Master, R. G. J. Pearson. £1,500

Superintendent, J. T. Becklake. £2,000 to £2,500

#### THE BRITISH MUSEUM.

Bloomsbury, W.C. 2.

Open free daily 10 a.m. to 6 p.m.; Sundays 2 p.m. to 6 p.m. Lecture-tours on weekdays at 2 p.m. and 3 p.m. Reading-rooms open daily to readers, from 9 a.m. to 6 p.m., and Newspaper Room (at Colindale), from 2 a.m. to 5 p.m., throughout the year, except Good Friday and Christmas Day, and Sundays. Closed for cleaning first six week-days in May. Tickets of admission, for purposes of research and reference which cannot be carried on elsewhere, are granted on written application beforehand to the

**Director.** The applicant must state abode, business or profession and full particulars of purpose, and must send a recommendation from a person of recognised position.

The British Museum may be said to date from 1753, when Parliament granted the sum of £50,000 to purchase the collection of books &c. of Sir Hans Sloane, the building (Montagu House) being opened in 1756. The present buildings were erected between 1823 and 1924, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Act. Fine collections of ancient sculpture, &c. Exhibition of specimens of early printed books, bindings, manuscripts, autograph letters, and prints and drawings, of Egyptian, Assyrian, Greek, Roman, Etruscan, Cyprian, British and medieval and other antiquities, coins, gold ornaments, gems, china, glass, ethnographical objects, monuments of Indian religions, &c. The administrative expenses of the British Museum were estimated at £168,500 in 1923-24, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Estimates.

#### STANDING COMMITTEE.

**The Three Principal Trustees.** The Archbishop of Canterbury; The Lord High Chancellor; The Speaker of the House of Commons—*ex-officio*; **Appointed by the Sovereign.** The Earl of Harewood, B.G., D.S.O., L.D.S.; **Other Trustees.** H. R.H. the Prince of Wales, K.G., K.T.; Earl of Crawford and Balcarres, B.T.; Earl of Haver, O.B.E.; Lord Rothschild, F.R.S.; Lord Hanworth, K.B.E.; Rt. Hon. H. A. L. Fisher, M.P.; Lt.-Col. Sir D. Prain, C.M.G., C.I.E., F.R.S.; Sir Henry A. Miles, B.Sc., L.D., F.R.S.; Sir Frederick G. Hopkins, F.R.S.; Sir C. R. Peers, C.B.E., F.R.S., F.R.A.; Prof. G. M. Trevelyan, O.M., C.B.E., M.A., D.C.L.; F. Cavendish Bentinck; Prof. G. A. Murray, D.Litt., F.R.S.; M. R. James, O.M., Litt.D., F.R.S.; J. Stanley Gardiner, F.R.S.

#### OFFICERS.

**Director and Principal Librarian,** Sir G. F. Hill, C.B.E., Litt.D., F.R.S., F.F.S.A. .... £1,500

**Assistant Keeper, Second Class,** J. Walker, M.A. .... £350 to £440  
**Clerk, Second Division,** H. C. Gregory .... £300 to £400  
**Director of Laboratory,** A. Scott, F.R.S. .... £500  
**Assistant Keeper, First Class,** H. J. Plenderleith, M.C. .... £475 to £800  
**Solicitors,** Messrs Warrens, 5 Bedford Square.

#### THE LONDON MUSEUM.

Lancaster House, St. James's, S.W. 1.

Admission on Tuesdays, 12: Wednesday and Thursdays, 6d.; other days free; closed for cleaning on Friday till 2 p.m. Hours: April: till Oct. 31, 10 a.m. till 6 p.m. (Sundays 10 to 6 p.m.); Nov. 1 to March 31, 10 a.m. to 4 p.m. (Sundays 10 to 4 p.m.).

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of antiquities and other objects associated with the history of London. The Collection was originally housed in Kennington Palace, and was reopened in 1914 at Lancaster House.

**Keeper, Secretary and Accounting Officer,** Dr R. E. McIntiner Wheeler, M.A., F.R.S. .... £500  
**Asst. Keeper and Librarian,** Hon. Maurice Brett, M.C. .... £430  
**Assistant, Miss M. T. Cruso** .... £300

#### THE BRITISH MUSEUM (NATURAL HISTORY).

Cromwell Road, S.W. 7.

Open free on week-days (except Good Friday and Christmas Day) 10 to 6, and on Sundays from 2.30 to 6.

An Official Guide-lecturer conducts visitors round some portion of the collections at 2.30 a.m. and at 3 p.m. daily (except Sundays) free of charge, and her services are available at other times for special parties (also free of charge) by arrangement with the Director. Students are admitted daily for the special study of the collections, and to make drawings and take photographs of specimens, under special regulations to be obtained from the Director. The Museum issues a large variety of publications,

comprising scientific monographs and catalogues, the "Natural History Magazine" (quarterly), popular guide-books and manuals, instructions for collectors, economic pamphlets, and picture post-cards, both monochrome and in colour.

The Natural History Collections in the British Museum were removed to South Kensington and rearranged there in 1855-56, the new museum being opened to the public in 1858. The collections comprise all branches of natural history: a morphological series in the central hall; a collection of domesticated animals; a series of insects illustrating economic zoology; galleries of mammals, including whales; birds and their nests; fishes; reptiles, insects; shells; corals; sponges, &c.; galleries of fossils of all kinds; a botanical gallery; and an extensive gallery of minerals, rocks and meteorites with series of specimens forming introductions to their study. The administrative expenses were estimated at £98,504 in 1933-34.

Director, C. Tate Regan, M.A., D.Sc., F.R.S.

£1,000 to £1,500  
Secretary, G. F. Herbert Smith, M.A., D.Sc. .... £500  
Accountant, T. Woodhouse ..... £500  
Clerks, Higher Grade, C. C. Milan; C. A. Way (Index Museum); R. J. Drummond ..... £300 to £400  
Assistant Keeper (Library), A. C. Townsend, M.A. .... £500 to £440

Guide-Lecturer, Miss M. R. J. Edwards, M.Sc. .... £400 to £300

Keeper of Zoology, W. T. Calman, M.Sc., F.R.S. .... £1,000  
Deputy Keepers, M. A. C. Hinton; G. C. Robson, M.A. .... £900

Assistant Keepers (First Class), J. G. Dollman, M.A.; P. R. Lowe, O.B.E., M.R.; N. B. Kinnear; H. A. Baylis, D.Sc.; A. K. Totton, M.C.; J. R. Norman; C. C. A. Monro, M.A.; H. W. Parker, M.A.; M. Burton, M.Sc. .... £475 to £800  
Assistant Keepers (Second Class), Miss A. B. Hastings, Ph.D.; Miss S. Finnegan, Ph.D.; Miss I. Gordon, D.Sc., Ph.D. .... £350 to £390  
Technical Asst., Higher Grade, H. W. England ..... £300 to £400

Keeper of Entomology, N. D. Riley ..... £1,000  
Deputy Keepers, G. J. Arrowood, M.A.; J. Blain, M.Sc.; F. W. Edwards, D.Sc.; F. Lalug, M.A., D.Sc.; W. H. T. Tams; W. R. China, M.A.; H. Scott, M.C. .... £475 to £800  
Assistant Keepers (Second Class), R. B. Bennon, M.A.; A. W. McKenny Hughes, D.Sc. .... £550 to £440; Miss D. Auberlin, M.Sc. .... £350 to £390  
Technical Assistants (Higher Grade), H. Stirling; R. J. West ..... £350 to £400  
Keeper of Geology, W. D. Laing, M.C., F.R.S. .... £1,000  
Deputy Keeper, W. N. Edwards, M.A. .... £900  
Assistant Keepers (First Class), L. R. Cox, M.A.; A. T. Hopwood, D.Sc.; W. E. Swinton, M.Sc., Ph.D.; T. H. Withers ..... £475 to £800  
Assistant Keepers (Second Class), E. I. White, Ph.D.; H. D. Thomas, Ph.D.; J. Bairdson, M.A. .... £350 to £440  
Technical Assistant (Higher Grade), F. O. Barlow ..... £300 to £400

Keeper of Mineralogy, L. J. Spencer, M.C., F.R.S. .... £1,000  
Deputy Keeper, W. Campbell Smith, M.C., D.M. .... £900  
Assistant Keepers (Second Class), F. A. Bannister, M.A.; M. H. Hoy, M.A.; J. Raunobottom, M.A., M.Sc. .... £475 to £800  
Deputy Keeper, A. J. Wilinott, M.A. .... £500  
Assistant Keeper (First Class), G. Tandy, M.A. .... £475 to £800

Assistant Keepers (Second Class), A. W. Exell, M.A.; J. E. Dandy, M.A.; G. Taylor, B.Sc.; A. H. G. Alston, B.A. .... £350 to £440

#### THE SCIENCE MUSEUM.

South Kensington, S.W. 7.

Open daily, except Good Friday and Christmas Day, 10 to 6; Sunday, 2.30 to 6. Admission free. Science Museum Library, Imperial Institute Road, S.W. 7. Attached to the Science Museum: The National Library especially devoted to pure and applied Science, 231,000 volumes, 11,800 periodicals, a set of British patent specifications. Subject-matter index to articles in periodicals, 5,000,000 cards. Biblio-

graphies supplied.—Open on weekdays, 10 to 4.30 (except Bank Holidays). Admission free. Books lent to Government Departments, Universities and approved Research Institutions.

The Science Museum was instituted in 1853 under the Science and Art Department as a part of the South Kensington Museum, and opened in 1857; to it was added in 1883 the Collections of the Patent Museum. In 1900 the administration of the Science Collections was separated from that of the Art Collections, which were transferred to the Victoria and Albert Museum. The Collections in the Science Museum illustrate the application of science to industry and the development of scientific and industrial instruments, apparatus and machinery.

The divisions are: (a) Industrial Engineering; (b) Mechanical Engineering, Land Transport and Construction; (c) Water Transport and Air Transport; (d) Science and Scientific Instruments.

Director and Secretary, Brigadier E. E. B. Mackintosh, D.S.O. .... £1,000  
Museum Superintendent, S. T. Kelly ..... £500 to £600

#### Industrial Machinery Division.

Deputy Keeper, A. J. Spooner, M.I.Mech.E. .... £900  
Assistant Keeper (First Class), F. St. A. Hartley, A.C.S.I. (Secretary to Advisory Council) £400 to £600  
Assistant Keepers (Second Class), T. C. Crawhall, M.Sc.; W. T. O'Dea, B.Sc. .... £500 to £400

#### Engineering Division.

Deputy Keeper, E. A. Forward, A.C.S.I., M.I.Mech.E. .... £900  
Assistant Keepers (First Class), G. F. Westcott, M.A.; F. G. Skinner, B.Sc. .... £400 to £600  
Assistant Keeper (Second Class), A. Stowers, B.Sc., A.M.I.Mech.E. .... £500 to £400

#### Water and Air Transport Division.

Keeper, G. L. Overton, A.C.S.I. .... £1,000  
Assistant Keepers (First Class), M. J. B. Davy, A.C.S.I.; G. S. Laird Clowes, M.A. .... £400 to £600

#### Science Division I.

(Astronomy, Optical Instruments, Mathematics, Chemistry, &c.)

Deputy Keeper, D. Baxandall, A.C.S.I. .... £900  
Assistant Keeper (First Class), A. Barclay, A.C.S.I., A.I.C. .... £400 to £600  
Assistant Keeper (Second Class), W. E. Pretty, Ph.D. .... £500 to £400

#### Science Division II.

(Physics and Geophysics).

Deputy Keeper, H. Shaw, D.Sc. .... £600 to £700  
Assistant Keepers (Second Class), W. G. Plummer, Ph.D.; F. A. B. Ward, Ph.D. .... £550 to £400

#### Library.

Keeper, S. C. Bradford, D.Sc. .... £1,000  
Assistant Keeper (First Class), E. Lancaster-Jones, M.A. .... £400 to £600  
Assistant Keepers (Second Class), H. T. Pledge, M.A.; H. F. Spratt, B.Sc. .... £550 to £400

#### THE VICTORIA AND ALBERT MUSEUM.

South Kensington, S.W. 7.

Open on weekdays from 10 a.m. to 6 p.m. except Good Friday and Christmas Day. Admission free. Persons desiring the use of the Library must apply for a ticket. The Indian Section, containing collections illustrating the arts and industries of the Indian Empire, is situated in the Imperial Institute Road; open free every day, same hours as above. On Sundays the Indian Section and all other Departments of the Museum, with the exception of the Library and the Circulation Department, are open from 2.30 p.m. till 6 p.m. Casts of various objects in the Museum, and also from Sculptures in the British Museum, can be obtained to order on application to the Department for the Supply of Casts.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1852

Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1837, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The Museum contains nine departments, viz.:—Architecture and Sculpture; Ceramics; Engraving, Illustration and Design, Metalwork, Paintings, Woodwork, Textiles, Library (books on art) and Book Production, and the Department of Circulation. The older parts of the building were erected between 1800 and 1884; the new buildings were completed in 1900. The administrative expenses were estimated at £509,093 in 1933-34, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1933-34, £5,948) was opened in 1879. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

**Director and Secretary,** Sir Eric Maclagan, C.B.E., F.R.S. . . . . £1,200 to £1,500

#### NON-RETARIAT.

**Museum Superintendent,** J. P. Willcock . . . £500 to £600  
**Staff Clerk,** C. K. Fish . . . . . £400 to £500

#### DEPARTMENT OF ARCHITECTURE AND SCULPTURE.

**Deputy Keeper,** R. T. Bedford, F.R.S. . . . £500  
**Assistant Keeper (First Class),** Miss M. H. Longhurst, F.R.S., £350 to £390; H. D. Moleworth, . . . £250 to £440

#### DEPARTMENT OF CERAMICS.

**Keeper,** R. Rackham, F.R.S. . . . . £1,000  
**Asst. Keepers (First Class),** A. L. B. Ashton; W. B. Honey . . . . . £475 to £800

#### DEPARTMENTS OF ENGRAVING, ILLUSTRATION, AND DESIGN, AND OF PAINTINGS.

**Keeper,** M. Hardie, R.L., R.E. . . . . £1,000  
**Deputy Keeper,** B. S. Long . . . . . £500  
**Asst. Keeper (First Class),** J. Laver . . . £475 to £800  
**Assistant Keepers (Second Class),** F. W. Stokes; C. Wuter . . . . . £250 to £440

#### LIBRARY.

**Keeper,** A. Van de Put . . . . . £1,000  
**Asst. Keeper (First Class),** H. C. Andrews . £475 to £800  
**Assistant Keepers (Second Class),** A. W. Wheen, P. B. James (Secretary to Advisory Council), J. Wardrop; C. H. Gibbs-Smith . . . £250 to £440

#### DEPARTMENT OF METALWORK.

**Deputy Keeper,** A. J. Koop . . . . . £900  
**Assistant Keeper (First Class),** Maj. C. T. P. Bailey . . . £475 to £800  
**Asst. Keeper (Second Class),** C. C. Oman . £250 to £440

#### DEPARTMENT OF TEXTILES.

**Deputy Keeper,** A. J. B. Wagg, F.R.S. . . . £900  
**Assistant Keeper (Second Class),** G. B. C. Tattersall and J. L. Nevillson, £250 to £440, Miss M. Clayton . . . £250 to £390

#### DEPARTMENT OF WOODWORK.

**Keeper,** O. Bruckett . . . . . £1,000  
**Assistant Keeper (First Class),** H. Clifford-Smith, F.R.S. . £475 to £800  
**Assistant Keeper (Second Class),** H. C. R. Edwards . . . £250 to £440

#### INDIAN SECTION.

**Deputy Keeper,** A. J. D. Campbell . . . . £900  
**Assistant Keeper (First Class),** K. de B. Codrington . . £475 to £800  
**Assistant Keeper (Second Class),** A. D. H. Smith . . . £250 to £440

#### DEPARTMENT OF CIRCULATION.

**Keeper,** H. A. Kennedy . . . . . £1,000  
**Assistant Keepers (Second Class),** C. M. Wockley, W. A. Thorpe . . . . . £250 to £440

#### BETHNAL GREEN MUSEUM.

Bethnal Green Cambridge Road, E. 2.—Branch of Victoria and Albert Museum. Collections of pictures, furniture, pottery, textiles, British birds. Section for objects of special interest to children. Free daily (closed Good Friday and Christmas Day): Mon., Th., 10 a.m. to 5 p.m.; Tu., Wed., Fri., Sat., 10 a.m. to 6 p.m. Sundays, from 2.30 to 6 p.m.

**Assistant Keeper (First Class),** A. K. Sabin . . . £475 to £800

#### IMPERIAL WAR MUSEUM.

Imperial Institute Road, S. Kensington, S.W. 7. Open free daily (except Good Friday and Christmas Day), 10 a.m. to 6 p.m.; Sundays 2.30 p.m. to 6 p.m.

The formation of a collection connected with the War, was approved by the War Cabinet on March 5, 1917. The Imperial War Museum Act received the Royal Assent on July 2, 1920, and a Board of Trustees was appointed. The Museum was opened by H. M. the King on June 9, 1920, at the Crystal Palace. The tenancy of the Crystal Palace having expired on March 31, 1924, the Museum was removed to the galleries known as the Western Galleries in the Imperial Institute Road. The aeronautical collection was transferred to the Science Museum on loan, but will be returned to the Museum after its proposed removal to Lambeth Road in 1935. The Museum was re-opened to the public on Nov. 21, 1924. The collections, to which additions are constantly being made, include Naval and Military trophies and relics, ordnance, small arms and ammunition, ship and other models, paintings, drawings, sculpture and commemorative medals, maps, war currency and stamps; photographs (comprising over 250,000 subjects), prints of which may be purchased; air photographs, lantern slides and cinematograph films. There is a reference library containing 60,000 books and pamphlets available for study to the public. The reference sections are not open on Saturday afternoon or Sunday. All the attendants are men who served during the Great War.

**Curator and Sec. L. R. Bradley, M.B.E.**

#### NATIONAL GALLERY, Trafalgar Square, W.C. 2.

Open 10-4, 5 or 6, according to season. Paying days (6d.), Thursday and Friday. Open free other days; Sunday, from 2 to 4, 5 or 6. Closed on Good Friday, Christmas Eve, and Christmas Day.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1868, 1876, 1887, 1914, 1928 and 1930. The cost of administration of the National Gallery (Trafalgar Square and Millbank) in 1933-34 was estimated at £38,600.

**Director,** Kenneth M. Clark . . . . . £1,100  
**Keeper and Secretary,** Edwin Glasgow . . . £1,044  
**Assistants,** H. I. Kay; M. Davies . . . . £250 to £600  
**Higher Clerical Officer,** F. G. Thompkins . £250 to £400

#### NATIONAL GALLERY, MILLBANK.

(The Tate Gallery), Millbank, S.W. 1.

Students' days, Tuesday and Wednesday, 6d.; other days free. For hours and Sundays see National Gallery.

The National Gallery, Millbank, better known as "The Tate Gallery," was opened in 1857 on the site of Millbank Gaol, the cost of erection (£20,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, Bart., was opened to the public in 1920. The Gallery now includes a gallery for Modern Foreign Art and a gallery for Sargent's works, opened in 1926, the gift of Sir Joseph Duveen.

**Director,** James B. Manson . . . . . £1,000  
**Assistants,** H. S. Ede, D. C. Fincham . . . £250 to £600

#### NATIONAL PORTRAIT GALLERY.

St. Martin's Place, Charing Cross, W.C. 2.

Open free on Monday, Tuesday, Wednesday and Saturday from 10 to 4, 5, or 6, according to season; free on Sunday, 2.30 to 5.30 (2 to 4 in winter); Thursday and Friday (Students' days) admission 6d. from 10 to 4 or 5.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £30,000 being contributed to its cost by Mr. W. H. Alexander; an extension erected at the expense of Lord Duveen was opened in 1933. The amount for

salaries and expenses, including a grant of £400 for purchase of portraits, was estimated at £8,649 in 1933-34.  
*Director, Keeper, and Secretary, H. M. Hake, c.n.s. £500*  
*Assistant to Director, C. K. Adam, . . . £50 to £600*  
*Assistant and Lecturer, J. Steegmann, . . . £50 to £600*

#### § WALLACE COLLECTION,

Hertford House, Manchester Square, W. 1.

Admission 6d. on Tuesdays and Fridays; other days free. Open on weekdays 10 a.m. to 5 p.m.; Sundays 2 p.m. to 5 p.m. Official lectures daily (Wed. excepted) at 3 p.m., and Saturday at 12 noon. Closed on Good Friday, Christmas Eve and Christmas Day.

The Wallace Collection was bequeathed to the nation by the widow of Sir Rd Wallace, Bt., M.C.B., M.P., in 1897, and Hertford House was subsequently acquired by the Government. The collection includes pictures, drawings and miniatures, French furniture, bronzes, porcelain, armour, and miscellaneous objects d'art. The expenses were estimated at £11,966 in 1932.

*Keeper & Secretary, S. J. Camp, F.S.A. . . . £900*  
*Assistants to Keeper, W. P. Gibson, M.A.; Trenchard Cox, M.A. . . . £50 to £600*

#### NATIONAL LIBRARY OF WALES.

Aberystwyth.

Open free on weekdays, 10 a.m. to 5 p.m.; closed on Sundays.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. Contains over 220,000 printed books, together with valuable MSS. and rare printed books in Welsh and other Celtic languages. One of the six libraries entitled to certain privileges under Copyright Act.

*Librarian, W. Ll. Davies, M.A.*

#### NATIONAL MUSEUM OF WALES, Cardiff.

Amgueddfa Genedlaethol Cymru.

Open free on weekdays, 10 a.m. to 5 p.m. (Apr.-Sept., 8 p.m.); Sundays (admission 3d.) 2.30 to 5 p.m.

Founded by Royal Charter, 1907, and maintained by Annual Grant from the Government and Museum sale from the Cardiff City Council. The collections consist of—(Geology), Relief Maps of Wales, "David Davies" collection of fossil plants, "Griffith J. Williams" collection of minerals, and extensive collections relating to geology in Wales. (Botany), the Welsh National Herbarium illustrating especially the flora of Wales, and collections illustrating general, agricultural and forest botany. (Zoology), Collections of skins, British mammals and birds, eggs of British birds, extensive entomological collections, British molluscs, spirit collections, all of special Welsh interest. (Archaeology), Welsh prehistoric, Roman and other antiquities, casts of pre-Norman monuments of Wales, Welsh Folk collection, Welsh Folk Industries. (Art), Swansea and Nantgarw porcelain, the De Winton collection of Continental porcelain. The works of Richard Wilson, M.A. and of Frank Brangwyn, M.A. are well represented. Pyke-Thompson collection of water-colour drawings and a general collection of paintings in oil; sculpture, silver, &c.

*President, Rt. Hon. the Earl of Plymouth*  
*Vice-President, Rt. Hon. W. G. A. Ormsby-Gore, M.P.*  
*Treasurer, W. Reardon Smith.*

*Director, Dr. Cyril Fox, F.R.S. . . . £4*  
*Secretary, A. H. Lee, M.C.*  
*Keepers, (Geology) Dr. F. J. North, F.R.S.; (Botany) H. A. Hyde, M.A.; (Zoology) Colin Matheson, M.A.; (Archaeology) V. E. Nash-Williams, M.A., F.S.A.; (Art) Isaac J. Williams.*

#### NATIONAL GALLERY OF SCOTLAND,

Mound, Edinburgh.

Open free Sun. 2 p.m. to 5 p.m. (4 in winter); Mon., Tu., Wed., Sat., 10 a.m. to 5 p.m. (4 in winter). Admission 6d. Thurs. and Fri., 10 a.m. to 5 p.m. (4 in winter).

*Director, Stanley Currier, O.B.E., A.R.S.A., R.S.W.*  
*Keeper, A. E. Haswell Miller, R.S.W.*  
*Secretary, Robert Moncrieff.*

#### SCOTTISH NATIONAL PORTRAIT GALLERY,

Queen Street, Edinburgh.

Open free on weekdays, 10 a.m. to 5 p.m. (4 in winter). Not open on Sundays.

*Director, Stanley Currier, O.B.E., A.R.S.A., R.S.W.*  
*Keeper, A. E. Haswell Miller, R.S.W.*  
*Secretary, Robert Moncrieff.*

#### NATIONAL MUSEUM OF ANTIQUITIES OF SCOTLAND,

Queen Street, Edinburgh.

Open free on weekdays, 10 a.m. to 5 p.m. (4 in winter). Not open on Sundays.

*Director, J. Graham Calder, M.A.*  
*Assistant Keeper, Arthur J. H. Edwards.*

#### NATIONAL LIBRARY OF SCOTLAND,

Parliament House, Edinburgh.

Open free on weekdays 10 a.m. to 5 p.m.; Saturdays, 10 to 1. Not open on Sundays.

Under the National Library of Scotland Act, 1926, the Advocates' Library, Edinburgh, became the National Library of Scotland.

*Chairman of the Trustees, Principal Sir Robert Rait, C.B.E., LL.D.*  
*Librarian of the National Library, Henry William Melkie, D.Litt.*

#### OTHER LIBRARIES, MUSEUMS, &c.

ASHMOLEAN MUSEUM, Oxford.—Art and Archaeological collections of the University. Randolph and Egyptian Sculpture galleries; Medieval room; Arundel vestibule; Dept. of Antiquities (with Cretan Collection); Dept. of Fine Art (with Raphael and Michelangelo drawings, &c.). Open daily 10 to 4, admission 6d.; free after 2 p.m.; Sundays, 2 to 4, free (Term time only).

*Keeper of the Ashmolean and Dept of Antiquities, F. T. Lewis, M.A.*  
*Keeper of Dept of Fine Art, (vacant)*

BEDFORD LIBRARY (Theological), 36 Eccleston Square, London, S.W. 1.

BIRMINGHAM ART GALLERY AND MUSEUM.—Open free daily 10 to 5; Wednesdays to 8; Sundays 2 to 5.

BODLEIAN LIBRARY AND PICTURE GALLERY, Oxford (one of the 6 Copyright Libraries).—Open daily from 9 to 7; admission (for visitors) 3d. Reading room at RADCLIFFE CAMERA (open 10 a.m. to 10 p.m.), view from roof; admission (for visitors) 2d. *Departmental Libraries*—Radcliffe Library (Science); Rhodes House (History of British Empire and of U.S.A.); Indian Institute; and Law Library.

*Bodleian Librarian, H. H. E. Foster, D.Litt*

**Exhibition Galleries,** H. Spooner (Curator).

#### (PATENT OFFICER

(and Industrial Property Department, Board of Trade), 25 Southampton Buildings, W.C. 2

The prerogative of the Crown to grant monopolies was limited by the Statute in 1534 to the grant of Letters Patent for new inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Viet. c. 57. The duties of the Department, which deal mainly with the granting of patents, the registration of designs and trade marks, and with questions relating to literary and artistic copyright, are performed by a Comptroller General with staff of officials. For the year 1929 the expenditure was £497,157, and the revenue from fees, &c. was £573,280.

**Comptroller-General,** M. F. Linsley ..... £1,500

#### (PAYMASTER GENERAL'S OFFICE.

Whitehall, S.W. 1.

The Paymaster General's Office was formed by the consolidation in 1823 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Other offices were incorporated in 1848. Its function is that of paying agent for the different Government Departments, other than the Revenue Departments. The majority of its payments are made through banks to whose accounts the necessary transfers are made at the Bank of England, but cash

Sir Francis Agar, Lord Rochester, c.m.g.; (L.C.C.)  
Sir Alfred Baker, J.P., W. Devenay, J.P., Adrian C.  
Moreing, M.P., Adm. A. G. Hotham, c.m., c.m.g.,  
(Trinity House) Captain Owen Jones, c.m., c.m.g.

#### Elected Members.

Seventeen members are elected by payers of dues,  
wharfingers and owners of river craft, and one by wharf-  
ingers.

Hon. Thomas Wiles, r.n.; L. W. Wrightson.

#### Officers.

General Manager, Sir David J. Owen.  
Solicitor and Secretary, J. D. Ritchie, m.c.

#### POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 4.

A House of Commons report in 1844 states: "It is  
uncertain at what precise period the Crown undertook  
to be the regular carrier of letters for its subjects." The  
first "Master of the Posts" was appointed in 1546, but  
the duty was not then undertaken as a remunerative  
department of the Government. The Post Office is now  
one of the three great revenue collecting departments,  
and while efficiently discharging its multifarious duties,  
shows a large annual profit. It also receives large sums  
for duties and taxes on behalf of the Inland Revenue  
Department, for certain licences for the Customs and  
Excise Department and the County Councils, and for  
National Insurance on behalf of the National Health  
Insurance Commission and the Board of Trade. The  
Post Office also pays Widows', Orphans' and Old Age  
Pensions, and Naval, Military and Air Force Pensions  
and Allowances. The Penny Post was inaugurated in  
1840, the Book Post in 1846, the Post Office Savings Bank  
in 1854, the Post Office Telegraphs in 1870, the Money  
Order Office in 1890, Postal Orders in 1881, the Parcel  
Post in 1883, and the Telephone Service in 1893. The  
expenses of the Post Office (Salaries, Wages, etc., only)  
were estimated at £35,056,000 in 1933-34.

Postmaster-General, Rt. Hon. Sir Kingsley Wood, m.p.

### Surveyors' Department (United Kingdom).

**Surveyors, E. J. Gaves; R. Bell; C. H. C. Baillie; T. P. Hobbins, C.B.E.; A. O. Spafford, O.B.E.; C. A. Jackson; R. J. R. Measham, O.B.E.; T. T. Foxell; E. F. Nunne; J. W. Day; H. J. Barry; W. R. Storr, £360 to £500; P. W. McIntyre, £200 to £300**  
**Asst. Surveyors, Lt. Col. D. K. Hopkyns; T. W. McConnell; L. Hido, M.B.E.; S. E. Sifton; T. B. Braund; A. S. Langlands; Lt.-Col. W. R. Roberts; S. H. Hunt; C. J. Milos, M.B.E.; E. R. Davies, M.C.; D. Spottiswoode; A. E. Stocker; G. P. Hall, W. H. Conits, G. T. Cairncross; J. Sweney; H. V. Halloran; I. W. Nicholson; H. P. Bullock, M.C.; S. W. Campbell, P. W. Urben; J. Hale-Smith, M.B.E.; Lt.-Col. H. H. Neveas, D.S.O. M.C.; D. Mackenzie, £350 to £500; H. L. Sealey, H. D. Wooster; F. N. Gossling, M.C. £600 to £750**  
**Asst. Surveyors, and Class, J. Caldwell-Johnson; G. Muir, O.B.E.; J. Hale-Smith, O.B.E.; J. Evans; A. H. Wilson; A. Angles; C. R. Millen, M.C.; W. Langford; A. J. Ryan, W. H. Bloomfield; R. Hutchinson, C. A. Blackmore; F. E. Price; R. H. Locke, J. R. E. Altkon; W. H. Macnaughton; S. H. Bates, W. H. Penny, S. H. Hend; L. J. Taylor; H. Hewitt; G. D. Frazer; W. K. Mackenzie, John Evans; L. M. Smith; A. Criswell; H. N. Pickering; J. S. Blake, R. A. Weir; W. A. Wolvenson; S. Scott; F. W. Lister; D. C. H. Abbott; E. G. Hucker, £400 to £450; G. R. Parsons, H. F. Rodgers £400 to £475**  
**Staff Officers, H. A. Harrop; A. F. Clarke, E. J. Atwood; A. Ackroyd, N. G. Stanbury; S. P. Gahagan; I. W. S. Essex; R. G. Gilbert; F. T. Holden; C. Chapman, £360 to £450, L. H. Westaway £400 to £500**

### Postmaster Surveyors.

**Birmingham, Col. A. A. Jayne, D.S.O., O.B.E., M.C.; Bristol, Col. S. H. G. Dainton, O.B.E.; Leeds, V. R. Kenny; Liverpool, Lt.-Col. F. H. Kempe, M.C.; Manchester, J. G. Muddan, C.B.E.; Newcastle-on-Tyne, F. Ferguson; Sheffield, T. J. Hubbard; Glasgow, Lt.-Col. F. N. Westbury, O.B.E.; Belfast, A. J. Ardern.**

### General Post Office,

Waterloo Place, Edinburgh.

**Secretary, F. G. Milne £1,500 to £1,800**  
**Principal Clerks, A. J. Turner; J. Robertson £550 to £650**  
**Staff Officers, J. Kinloch, J. F. Calder, W. G. Bruce; J. Service, J. M. Harper, W. M. Smith £400 to £500, £380 to £475**  
**Solicitor, J. Richardson, W.S. £700 to £800**  
**Accountant, W. Yule £600 to £700**  
**Examiner, W. Hyalop £500 to £600**  
**Book-keeper, A. Whitton £400 to £500**  
**Staff Officers, W. W. Higgins, D. Thomson, J. Douglas; E. C. Johnston; W. M. McIntosh; T. H. Shepley W. Galloway £400 to £500**

**Controller (Postal and Telegraph District), J. Munnoch £700 to £800**  
**Deputy do., A. C. S. Inglis £400 to £500**  
**Asst. Controller (Postal), J. M. Mitchell £480 to £540**  
**Asst. Controller (Telegraph), J. G. E. Hogg £480 to £540**

### POST OFFICE ADVISORY COUNCIL.

Set up by the Postmaster-General in January, 1933, to act in a consultative capacity on matters of general Post Office policy, and to serve as a further connecting link between the Post Office and the public.

**The Council.**—Maj. Hon. J. J. Astor, M.P.; Sir Charles C. Barrie, K.B.E., M.P.; Herbert E. G. Beale; John Cliff; Sir George L. Courtchoppe, Bt., M.P.; Ald. M. T. Davern; Sir Francis Gouthrough, C.B.E.; Sir Enoch Hill; Ald. John H. Inskip; Ald. Sir Maurice Jenks, Bt., J.C.; Miss Megan Lloyd George, M.P.; Lord Luke; Miss Isabel MacDonald; Sir Stanley Machin; Frederick J. Marquis; R. M. Holland Martin, C.B., J.C.; Hon. Dorothy Pickford; John W. Sutton.

### PRIVY COUNCIL OFFICE, Whitehall, S.W. 2.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, King, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1569. At present it consists of certain eminent persons whose names are given on p. 226. Members of the Council must be Privy Counsellors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

**Lord President of the Council, Rt. Hon. Stanley Baldwin, M.P. £600 to £750**

**Private Sec., Sir Geoffrey Fry, Bt., C.B., C.V.O., M.P. £2,000**

**Parliamentary Sec., Viscountess Hinchinbrooke.**

**Clerk of the Council, Secretary of the Cabinet and Secretary of the Committee of Imperial Defence, Col. Sir Maurice Hankey, C.B., C.M.G. £3,000**

**Deputy Clerk of the Council & Chief Clerk, Collin Smith, M.P., C.B.E. £800 to £1,000**

**Senior Clerk, E. C. F. Leadbitter £500 to £600**

**Staff Clerk, C. W. Lumley, I.S.O. £400 to £500**

### Cabinet Office.

#### a Whitehall Gardens, S.W. 2.

**Secretary, Col. Sir Maurice Hankey, C.B., C.M.G., C.V.O.**

**Private Sec., L. F. Burgis, C.M.G., M.P.**

**Deputy Secretary, Sir R. B. Howarth, C.B., C.M.G., C.V.O.**

**Principal, W. D. Wilkinson, D.S.O., M.C. (seconded from the Treasury).**

#### Committee of Imperial Defence.

#### a Whitehall Gardens, S.W. 2.

**Secretary, Col. Sir Maurice Hankey, C.B., C.M.G., C.V.O.**

**Assistant Secs., C. Longhurst, C.V.O.; Wing-Com. E. J. Hertsell; Lt.-Col. N. C. Hind, M.C.; Com. C. C. Allen, M.C.; Lt.-Col. H. R. Pownall, D.S.O., M.C.**

**Confidential Clerk, Maj. W. H. M. Ives, O.B.E.**

#### Economic Advisory Council.

#### a Whitehall Gardens, S.W. 2.

**Joint Secretaries, Hubert D. Henderson; A. F. Hemming, C.B.E.**

**Confidential Clerk, Capt. F. W. Rawlins, M.B.E.**

**Historical Section.**

**Secretary, Lt.-Col. E. Y. Daniel, C.B.E.**

### THE PUBLIC RECORD OFFICE

#### Chancery Lane, W.C. 2.

National Records since the Norman Conquest brought together from various repositories. Search rooms open daily, with certain exceptions, from 9 a.m. to 4.30 p.m. Saturdays.

**Higher Executive Officers, F. E. Willott; R. E. Darby; F. W. Eatherley; S. B. Wood; A. Fraser; C. Needell; S. C. Grimes; W. E. Tickner.**

### RAILWAY ASSESSMENT AUTHORITY

AND

### ANGLO-SCOTTISH RAILWAYS ASSESSMENT AUTHORITY.

32 Queen Anne's Gate, London, S.W. 1.

The Railways (Valuation for Rating) Act, 1920, applies the principle of valuation in *commiso* to the valuation for rating of the undertaking of the four amalgamated railway companies, so far as they are situated in England and Wales, and of the Metropolitan Railway Company (now included in the London Passenger Transport Board); the Act may be applied (by Scheme) to the undertaking of any other Railway Company. The valuation of railway hereditaments for local rates in England and Wales will in future be determined by the Railway Assessment Authority set up under the Act, and not by the local Rating Authorities and Assessment Committees. The Act also provides for the setting up of an Anglo-Scottish Railway Assessment Authority (called the "Joint Authority") whose function is to apportion the greater part of the receipts of the two amalgamated railway companies operating in England and in Scotland (viz. L.M.S. and L.N.E.R.) between these two countries.

**Chairman of the Railway Assessment Authority and of the Joint Authority, Joshua Scholesfield, K.C.**  
**Clerk of the Railway Assessment Authority and of the Joint Authority, A. E. Joll.**

### DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH.

25 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1922, amended by an Order in Council dated February 6, 1928, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money granted by Parliament for the organisation and development of Scientific and Industrial Research. The Committee consists of the holders for the time being of certain Ministerial offices. The Order in Council also appointed an Advisory Council to advise the Committee on all matters stand referred. By Charter dated November 23, 1926, amended by a supplemental Charter dated April 27, 1928, the members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 19, 1926, a separate Department, having its own Parliamentary Vote, was created for the service of the Committee.

The aggregate net estimate for the Department in 1923-24 amounts to £27,261, an increase of £41,000 on the same estimate for 1922-23. The gross estimate amounts to £266,970. Headquarters administration, £27,049; Grants for Research, £24,000; Research Work and Research Establishments (except Geological Survey and Museum), £509,208; Geological Survey of Great Britain and Museum of Practical Geology, £67,213.

**President of the Committee of the Privy Council, The Lord President of the Council.**

**Advisory Council, Lord Rutherford of Nelson, O.M., D.S.C., LL.D., F.R.S. (Chairman); Sir Arthur Holford, Bt., K.C.B.; Sir William H. Bragg, O.M., K.B.E., D.S.C., F.R.S.; E. J. Butler, C.M.G., F.R.S., D.S.C., M.A., F.R.S.; A. C. G. Egerton, F.R.S.; Professor A. Fowler, D.S.C., F.R.S.; Sir Clement D. M. Hindley, K.C.I.F., M.Inst.C.E., M.Inst.P., M.I.R. (Ind.); Kenneth Lee, LL.D.; Lord Rayleigh, K.C.B., F.R.S.; T. Franks, LL.D., D.S.C., F.R.S.; J. H. D. Smeaton, O.M., F.R.S., Secretary to the Council; Sir Frank E. Smith, K.C.B., C.B.E., D.S.C., LL.D., Sec.R.S.**

#### Headquarters Staff.

**Secretary, Sir Frank E. Smith, K.C.B., C.B.E., D.S.C., LL.D., Sec.R.S.** ..... £2,200

**Private Secretary, G. R. D. Hogg.**

**Assistant Secy, L. S. Lloyd, C.B., LL.D., F.R.S.** ..... £1,300; A. L. Hetherington, ..... £1,000 to £1,200

**Principals, L. C. Brouley; O. E. Brown; W. A. M. Murray; R. O. Oakley; P. J. Whiston, D.S.C.**

**(Establishment Officer) ..... £700 to £800**

**Administrative Officers, I. G. Evans; G. R. D. Hogg** ..... £650 to £750

**Records Officer, C. A. Spencer** ..... £500 to £600  
**Asst. Records Officer, H. J. Dowden** ..... £300 to £400  
**Senior Staff Officer, C. D. James** ..... £500 to £600  
**Staff Officers, W. F. Law, £400 to £500; Miss M. Robb** ..... £300 to £400  
**Higher Grade Clerks, W. H. Bowis; L. W. Crawford; W. A. Macdonald; F. W. Smith; J. Williamson** ..... £300 to £400

#### Building Research.

**Chairman of Board, Sir Raymond Unwin, a.rech., F.R.I.B.A.**

#### Building Research Station.

Bucknalls, Garston, near Watford.

**Director of Research, R. E. Stradling, M.C., D.Sc., Ph.D., M.Inst.C.E.** ..... £1,200 to £1,500  
**Assistant Director, R. H. Willdon** ..... £800 to £1,000  
**Assistant to the Director, A. Zohnan** ..... £550 to £675  
**Senior Scientific Officers, R. Bakewell; A. F. Duffon; W. H. Glanville, D.Sc.** ..... £500 to £600  
**Scientific Officers, H. E. Beckett; D. G. R. Bonnell, Ph.D.; F. L. Brady; A. D. Cowper; N. Duvay; R. Fitzmaurice; F. M. Lea; R. J. Schaffer; F. L. Shipman; C. M. Watkins, Ph.D.** ..... £300 to £450  
**G. E. Bosley; J. F. Cowling; F. E. Jones, H. M. Llewellyn; A. J. Newport** ..... £250 to £350  
**Assistant J. F. J. McConnell** ..... £300 to £400  
**Accountant, Miss E. A. Leighton** ..... £300 to £400

#### Chemical Research.

**Chairman of Board, N. V. Sidgwick, O.M., D.S.C., F.R.S.**

#### Chemical Research Laboratory.

Teddington, Middlesex.

**Director of Research, Prof. G. T. Morgan, O.M., D.S.C., F.R.S.** ..... £1,800  
**Principal Scientific Officer, G. D. Brough, D.Sc.** ..... £1,200  
**Senior Scientific Officers, D. D. Pratt, Ph.D.; R. Taylor; A. C. Thayer, Ph.D.** ..... £600 to £700  
**Scientific Officers, W. H. J. Vernon, D.Sc., Ph.D.** ..... £350 to £500; H. J. Bunker; K. R. Bullin; H. Ingleson, Ph.D.; R. N. Johnson; J. G. Mitchell, Ph.D. ..... £300 to £450; F. H. Burnall; R. A. Gossion, Ph.D.; G. R. Davies, D.Sc., Ph.D.; J. N. Hardy, Ph.D.; A. R. Lee, Ph.D.; N. J. L. McGowan; A. E. J. Peeter; E. Walton, Ph.D. ..... £250 to £350; Miss J. Stewart, Ph.D. .... £225 to £275  
**Assistant I. H. Tongue** ..... £300 to £400  
**Higher Grade Clerk, F. H. Bell** ..... £300 to £400

#### Food Investigation.

**Chairman of Board, Sir Joseph G. Brodthick, J.P.**

#### Director of Food Investigation, Sir William B. Hardy,

D.S.C., LL.D., F.R.S.

**Assistant Director, F. Barnard, D.Sc.** ..... £700 to £900

#### Low Temperature Research Station.

Downing Street, Cambridge

**Superintendent, Sir William B. Hardy, D.Sc., LL.D., F.R.S.** ..... £1,300 (inclusive)  
**Principal Scientific Officer, F. Kidd, D.Sc.** ..... £650 to £750  
**Senior Scientific Officers, E. H. Calfow, Ph.D.; T. Moran, D.Sc., Ph.D.; T. N. Morris; J. J. Plons, A. J. Smith, Ph.D.** ..... £500 to £600  
**Scientific Officers, J. Barker, Ph.D.; J. Brooks, Ph.D.; J. M. Bryan; E. C. Smith, Ph.D.** ..... £350 to £450; R. Gane, Ph.D.; R. R. Haines, Ph.D.; C. H. Lea, Ph.D.; R. G. Tomkins, Ph.D. .... £350 to £350

#### Torry Research Station.

Aberdeen.

**Superintendent, A. Lumley** ..... £600 to £800  
**Scientific Officers, G. A. Ruxy, Ph.D.** ..... £350 to £450; J. A. Lovern, Ph.D. .... £300 to £350; Miss M. Stewart, Ph.D. .... £225 to £275

#### Dutton Laboratory.

East Malling, near Maidstone, Kent.

**Principal Scientific Officer, C. West, D.Sc.** ..... £650 to £750  
**Scientific Officer, J. K. Hardy** ..... £350 to £450

#### Forest Products Research.

**Chairman of Board, Principal Sir James C. Irvine, C.B.E., D.S.C., LL.D., F.R.S.**

#### Forest Products Research Laboratory.

Pinsons Ribworth, Bucks.

**Director of Research, W. A. Robertson** ..... £1,000 to £1,200

**Assistant Director, F. M. Oliphant** ..... £500 to £750  
**Administration Officer, A. R. H. Cox** ..... £500 to £600  
**Timber Mechanics Officer, C. J. Chaplin**

**Timber Utilization Officer, Major J. R. Cragrove**,  
 D.S.O., M.C. .... (inclusive) £900 to £990  
**Principal Scientific Officer, S. T. C. Stillewell**

..... £500 to £750  
**Senior Scientific Officer, K. St. G. Cartwright**

..... £500 to £600  
**Scientific Officers, W. W. Barkas, J. Bryan, W. G. Campbell, R. C. Fisher, R. D. P. Harris, B. J. Rendle, £350 to £450; Miss M. H. O'Dwyer, rh. p., £275 to £350; F. R. Armstrong, R. G. Bateson, F. R. Cann, S. H. Clarke, W. P. K. Findlay, R. A. G. Knight, J. Latham, E. A. Parkin, K. D. van Rost, H. A. Richardson, £350 to £350; Miss C. B. Pettifor** ..... £250 to £275  
**Assistant I, H. E. Kinna** ..... £300 to £400  
**Temporary Assistant, A. N. David**

**Higher Grade Clerk, L. Forbes** ..... £300 to £400

### Fuel Research.

**Chairman of Board, Sir Harold Hartley, C.B.E., M.C., F.R.S.**  
**Director of Research, F. S. Sinnott, M.B.E., D.Sc.** £1,500  
**Assistant to the Director, Maj. E. O. Haurici**

..... £700 to £900

### Fuel Research Station.

**Blackwall Lane, East Greenwich, S.E. 10.**  
**Chief Engineer, Eng. Capt. J. Finsor Shaw, M.C.** £1,500  
**Chief Chemist, J. G. King, rh. p.** ..... £250 to £750  
**Senior Scientific Officers, A. T. Barber, A. Blackie, T. F. Hurley, D. McDougal, A. B. Manning, rh. p.** ..... £500 to £600

**Scientific Officers, W. E. Baker, D. T. Davies, rh. p.; I. Horton, rh. p.; R. A. A. Taylor, F. A. Williams, rh. p., £350 to £450; H. Bardgett, J. G. Carille, R. Cook, R. Dickinson, A. C. Marles, H. E. Newall, J. Rogers, A. H. Taylor, M.B.E., W. J. Walker, rh. p.; E. T. Wilkins, £350 to £350. Miss F. M. E. Shepherd** ..... £250 to £275  
**Assistant I, C. W. G. Ockelford** ..... £300 to £400  
**Staff Officer, C. B. Fitzgerald** ..... £400 to £500

**Physical and Chemical Survey of National Coal Resources.**

**Senior Scientific Officers, L. Slater, rh. p. (Sheffield); W. J. Skilling (Ilkley), £500 to £600**  
**Scientific Officers, A. Dawe (Nottingham), D. Hicks (Trainee), J. H. Jones, rh. p. (Newcastle); A. M. Wandless (Leeds), £350 to £450; H. Berry (Newcastle); J. R. Campbell, rh. p. (Ilkley); J. O'N. Millott (Stoke-on-Trent); F. Scarr (Birmingham)** ..... £350 to £350

### Radio Research.

**Chairman of Board, Lt.-Col. A. G. Lee, O.B.E., M.C., M.I.E.E.**

### Radio Research Station

**Slough, Bucks.**  
**(Staff included under National Physical Laboratory Radio Department)**

### Road Research.

**Chairman of Board, Major F. C. Cook, D.S.O., M.C., M.I.N.T.E.**  
**Director of Research, R. E. Stradling, M.C., D.Sc., rh. p., M.I.N.T.E.**

### Road Research Laboratory

**Harmondsworth, West Drayton, Middlesex.**  
**Principal Scientific Officer, R. G. C. Bateson**

..... £500 to £750  
**Senior Scientific Officer, A. G. Tarrant** ..... £500 to £600  
**Scientific Officers, G. Bird, T. J. Lonsdale, rh. p.; R. Preston; F. W. Sparkes** ..... £350 to £350

### Water Pollution Research.

**Chairman of Board, Sir R. Robertson, M.B.E., D.Sc., LL.D., F.R.S.**  
**Director of Research, H. T. Calvert, M.B.E., rh. p., F.I.C. (part time)**

**Assistant Director, A. Parker, D.Sc.** ..... £800 to £900

**Geological Survey of Great Britain and Museum of Practical Geology.**

**Head Offices: Jernyn Street, London, S.W. 1, and Southpark, 19, Grange Terrace, Edinburgh (Branch Offices at Manchester, Newcastle-on-Tyne, and York)**

The Geological Survey and Museum was commenced in 1835; it was under the Science and Art Department from 1835 till 1900, when that Department became merged in the Board of Education. On Nov. 1, 1909, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world, and especially Great Britain

**Chairman of Geological Survey Board, T. Franklin Sibly, D.Sc., LL.D.**

**Director of Survey and Museum, Sir John S. Flett, M.B., D.Sc., LL.D., F.R.S.** ..... £1,500 to £1,500

**Assistants to Director, B. Smith, sc.d., F.R.S. (England); M. Macgregor, D.Sc. (Scotland)** ..... £800 to £900

**District Geologists, C. E. N. Bromhead, R. G. Carruthers, H. Dewey, C. H. Dinham, T. Eastwood; F. L. Kitchin, sc.d., rh. p., F.R.S. (Palaeontologist); J. E. Richey, M.C.; H. D. Thomas, sc.d., F.R.S. (Petrographer); G. V. Wilson; W. B. Wright, sc.d.** ..... £750

**Senior Geologists, G. A. Burnett, C. P. Chatwin; H. G. Dines, E. E. L. Dixon, A. Fowler, D. Haldane; J. Phenister, D.Sc.; R. W. Pocock, D.Sc.; J. Pringle, D.Sc.; T. Robertson, rh. p.; R. L. Sherlock, D.Sc.; J. B. Simpson, D.Sc.; F. M. Trotter, D.Sc.; J. H. Whitehead, D. A. W. rh. p., £450 to £550**  
**Geologists, J. K. Allan, W. Anderson, S. Bouchier, R. Crookall, D.Sc.; F. H. Edmunds; W. N. Edwards; V. A. Eyles; S. E. Hollingworth, D.Sc.; R. C. B. Jones, M.C.; W. Q. Kennedy, D.Sc.; J. Knox; W. Lloyd, A. G. Macgregor, M.C.; G. H. Mitchell, rh. p.; W. C. C. Rose; J. V. Stephens; G. J. Stubblefield, rh. p.; L. H. Tonks; F. B. A. Welch, rh. p.** ..... £300 to £450  
**Higher Grade Clerk, P. A. Friaby** ..... £300 to £400  
**Superintendents of Maps, A. E. N. Haynes; G. G. Torkington** ..... £500 to £350

### Museum of Practical Geology,

Jernyn Street, London, S.W. 1.

**Curator and Librarian, W. F. P. McLintock, D.Sc.**

**Asst. Curator, A. F. Halliwell, sc.d.** ..... £450 to £750  
**Asst. Librarian, (vacant).** ..... £450 to £650

### The National Physical Laboratory, founded,

Teddington, Middlesex

The National Physical Laboratory was founded in the year 1900 as a public institution for standardizing and verifying instruments, for testing materials, and for the determination of physical constants. The Laboratory comprises eight main sections:—(1) Physics; (2) Electricity; (3) Radio; (4) Metrology; (5) Engineering; (6) Aerodynamics; (7) Metallurgy and Metallurgical Chemistry; (8) The William Fronde Laboratory

**Chairman of the General Board and Executive Committee, The President of the Royal Society.**

**Vice-Chairman of General Board and Executive Committee, Lord Rayleigh, D.Sc., F.R.S.**

**Director, Sir Joseph Petavel, M.B.E., D.Sc., F.R.S.**

(and free residence) ..... £1,500

**Secretary, W. F. Higgins** ..... £850

**Assistant to the Secretary, J. W. Christelow** ..... £500 to £500

**Accountant, G. E. Bailey** ..... £700

**Staff Officer, W. J. Gower** ..... £400 to £400

**Higher Grade Clerks, F. H. Durham; A. May; H. Shepherd** ..... £300 to £400

### Physics Department.

**Superintendent, G. W. Kaye, M.B.E., D.Sc.** ..... £800 to £1,000

**Principal Scientific Officers, A. H. Davis, D.Sc.; E. Griffiths, D.Sc., F.R.S.; T. Smith, F.R.S.**

..... £650 to £750

**Senior Scientific Officers, J. S. Anderson, D.Sc.; J. Guild; F. H. Schofield, D.Sc.; G. Shearer, D.Sc.**

..... £500 to £600

**Scientific Officers, J. H. Aubrey; J. Backhurst; N. Fleming; J. A. Hall; D. S. Perfect, £350 to £450; G. H. Aston; G. E. Bell; W. Hinks; R. Donaldson; E. J. Evans; A. E. Knowler; W. E. T. Perry; R. W. Powell; M. de Selincourt; J. Thewlis; C. Wainwright; W. A. Wood** ..... £350 to £350

Assistant I, A. G. Williams, m.a., £300 to £450  
Principal Observers, G. Baddeley; A. C. Cooper  
£305 to £350

**Electricity Department.**

Superintendent, F. H. Rayner, s.e.n. £500 to £1,000  
Principal Scientific Officer, J. W. T. Walsh, n.a.

Senior Scientific Officers, H. Buckley; L. H. Hartshorn,  
p.n.c. I, R. S. J. Spillbury, £500 to £600  
Scientific Officers, H. C. Booth; I. J. Collier; R. Davis;  
T. H. Harrison; P. J. Higgins; T. J. Jones; J. E. P. I.  
Vigoureux; C. K. Webb, £350 to £450; A. H. M.  
Arnold; G. W. Bowdler; H. H. Crawford; A. Felton;  
C. J. W. Greveson; J. S. Preston; E. Rushton;  
W. G. Standing; W. S. Stiles; W. H. Ward  
£450 to £550

Assistants I, W. Barna; W. H. Eastland  
£300 to £400  
Principal Observer, W. H. H. Brookes, £305 to £350

**Radio Department.**

Superintendent, R. A. Watson Watt, £500 to £600  
Senior Scientific Officers, J. F. Hird; R. L. Smith  
Rose, p.n.c., r.h.d., £500 to £600  
Scientific Officers, R. H. Barfield, £350 to £450; F. H.  
Bainbridge Bell; F. M. Colebrook; H. A. Thomas,  
£350 to £450; S. R. Chapman; J. S. McPetrie, £450  
to £550; Miss M. Taylor, r.h.d., £25 to £275

**Metrology Department.**

Superintendent, J. E. Sears, c.n.e., £1,200  
Principal Scientific Officer, S. W. Attwell, m.n.e.  
£500 to £750  
Senior Scientific Officers, F. A. Gould; F. H. Holt,  
m.n.e.; V. Skott; G. Tomlinson, n.e., £500 to £600  
Scientific Officers, H. P. Bloxam; J. S. Clark, £350 to  
£500; H. Barrell; W. H. Johnson; W. G. Ridge,  
£350 to £450; P. H. Bigg; D. Clayton; J. C.  
Evans, r.h.d., £450 to £550  
Assistant I, H. A. Dear, £300 to £400  
Higher Grade Clerk, E. C. Cook, £300 to £400

**Engineering Department.**

Superintendent, H. J. Gough, m.n.e., d.s.c., p.h.d., f.r.s.e.,  
£500 to £600  
Principal Scientific Officers, A. Balloy; C. Jakeman  
£500 to £750  
Senior Scientific Officers, R. W. Fenning, m.n.e.;  
G. A. Hankins, d.s.c., £500 to £600  
Scientific Officers, H. J. Tapwell, £350 to £450; J.  
Bradley; H. E. Smith, £350 to £450; H. Aughtie;  
W. D. Brown; W. F. Cope; H. L. Cox; E. Houghton;  
C. E. Phillips; D. G. Sopwith; S. A. Wood  
£450 to £550

**Aerodynamics Department.**

Superintendent, E. F. Relf, £500 to £7,000  
Principal Scientific Officers, A. Fage; J. L. Naylor  
£500 to £750  
Senior Scientific Officers, L. W. Bryant; W. L. Cowley;  
R. A. Frazer; H. B. Irving; R. Jones, d.s.c.; G.  
Lavender; I. F. G. Simmonds, £500 to £600  
Scientific Officers, A. S. Batson; C. N. H. Lock;  
E. Ower, £350 to £500; H. Bateman; W. J. Duncan;  
H. C. Townsend; D. H. Williams, £350 to £450;  
V. M. Fulkner; A. S. Halliday, r.h.d.; H. Warden  
£450 to £550  
Assistant I, T. H. Fowster, £350 to £400

**Department of Metallurgy and Metallurgical  
Chemistry.**

Superintendent, C. H. Desch, d.s.c., f.r.s., £1,500  
Principal Scientific Officers, S. L. Archbutt; J. L.  
Haughton, d.s.c., £500 to £750  
Senior Scientific Officers, G. Barr, d.s.c.; C. H. M.  
Jenkins, d.s.c.; W. H. Withey, £500 to £600  
Scientific Officers, F. Adecock, m.n.e.; L. L. Bircum-  
shaw; Miss M. L. V. Gayley, d.s.c.; J. D. Grogan;  
T. E. Rooper; V. H. Skott; P. G. Ward, £350 to  
£500; Miss L. H. Hadfield; G. D. Preston; W. E.  
Fytherch; H. A. Sloman; N. P. Tucker; D. Turner,  
£350 to £450; M. L. Becker; C. A. Bristow; G. A.  
Mellor; W. P. Rees; T. H. Schofield, £450 to £550

**The William Fraude Laboratory.**

Superintendent, G. S. Baker, o.n.e., m.n.e., n.a., £1,500  
Principal Scientific Officer, J. L. P. Kent, m.n.e., n.a.,  
£500 to £600  
Scientific Officers, W. C. S. Wigley, £350 to £450; G. H.  
Bottomley; J. F. C. Conn; G. Hughes; F. H. Todd  
£450 to £550

**ROYAL COMMISSION FOR THE EXHIBITION  
OF 1881.**

Office, 1, Lowther Gardens, Exhibition Rd., S.W. 7.

[Incorporated by Supplemental Charter as a permanent Commission after winding up the affairs of the Great Exhibition of 1881. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.]

President of the Royal Commission, H.R.H. the Prince of Wales, r.s.

Chairman, Board of Management, The Lord Macmillan, l.l.n.

Chairman, Science Scholarships Committee, Sir Richard Glasbrook, r.s., f.r.s.

Secretary to Commissioners, Evelyn Shaw, c.v.o.

**THE NATIONAL SAVINGS COMMITTEE.**

Sanctuary Buildings, Westminster, S.W. 2.

The National Savings Movement is directed in England and Wales by the National Savings Committee. H.R.H. the Prince of Wales is Patron of the Movement, and in Scotland by the Scottish Savings Committee. The members of the National Savings Committee are appointed by the Lord Commissioners of His Majesty's Treasury, and include twelve representatives elected annually by the voluntary workers in the National Savings Movement and also representatives of such State Departments and other institutions as have a special interest in the promotion of popular thrift. In its origin, the National Savings Committee goes back to the National War Savings Committee set up in 1915 to help in the financing of the Great War.

An important part of the organization of the National Savings Movement is the Savings Association—a voluntary conducted savings club for the purchase of National Savings Certificates by instalments. At the end of September, 1933, there were 32,990 of these Associations at work. Savings Associations in the various areas of the country are usually attached to the Local Savings Committees of the areas, these committees being the links between Savings Associations and the National Savings Committee.

The total number of Savings Certificates sold from their first issue in February, 1926, to August 31, 1933, was 1,129,457 (excluding Certificates of the Conversion Issue), their cash value being £533,199,753. The amount, including accrued interest, remaining to the credit of investors in Savings Certificates on that date was approximately £540,000,000. On April 1, 1932, the price of the Savings Certificate was raised from 10s. 6d. to 10s., the maturity value remaining 10s. On October 1, 1932, the maturity value was reduced to 9s.

The sale of Savings Certificates was suspended from the night of June 30, 1932, on the announcement of the proposals of the Conversion of Five per Cent. War Loan. A new issue was put on sale on August 1, 1932, at a purchase price of 10s., attaining a value of 9s. in 12 years. A further change was made on June 1, 1933, the purchase price remaining 10s., but the value of 9s. being reached in 12 years.

President, Sir Robert M. Kindersley, o.n.e.  
Chairman, Maj.-Gen. Rt. Hon. Lord Mottistone, c.n., c.m.g., d.s.o., t.p.  
Vice-Chairmen, Sir T. G. Chambers, r.s.; T. Lennox Gilmour.

Sec., Evan Hughes, c.n.e., £1,000 to £1,500  
Chief Commissioners, R. D. Kingham, o.n.e., £500 to £600; Miss E. N. Macrae, n.a., £500 to £750  
Senior Clerk (Accountant), G. W. Large, £500 to £750  
Commissioners, L. H. Beesley; H. J. Clare; G. G. L. Cruickshank; P. J. E. Dalnaby; Miss D. Deane; D. T. Evans, m.c.; P. F. Hone, d.s.o., m.c.; E. C. H. Jones; W. F. MacDonald; E. W. Stanger, o.n.e.; J. F. Woolley, f.r.s., £500 to £750  
Publicity Officer, J. O. Francis, £500 to £750  
Executive Officers (Higher Grade), W. E. Bayton; H. C. Birch; S. D. Charles, m.o.; H. C. Hawkins; H. C. E. G. D. Looker, £400 to £500

**SCOTTISH SAVINGS COMMITTEE.**

122 George Street, Edinburgh.

President, The Duke of Atholl, k.t., c.v.o., c.s., d.s.o.  
Chairman, (vacant)  
Secretary, J. L. Wells, o.n.e., £500 to £750

W. R. Griffiths; F. W. S. Hattam; C. W. Brown

Technical Adviser.—Cinematography, E. Foxen-  
Cooper (unestablished) £600 to £800

**THAMES CONSERVANCY.**

2 Norfolk Street, Strand, W.C. 2.

The Conservancy of the River Thames was granted to  
the Lord Mayor of London in 1462, and the first  
Conservators in 1467, the powers being reconstituted in  
1504. The Port of London Act, 1908, took over as from  
March 31, 1909, all rights, powers, and duties of the  
Conservators in respect of the river below Reading. In  
1924 the various Acts relating to the Conservators  
were repealed and a consolidating Act (The Thames  
Conservancy Act, 1924) was passed. The Conservators  
are also the Drainage Board of the Thames (Attachment  
Area).

Chairman, Rt. Hon. Lord Desborough, K.G., G.C.V.O.

Vice-Chairman, Charles G. Field, J.P.

Secretary, F. W. Geary.

**BOARD OF TRADE.**

Great George Street, S.W. 1.

Headquarters, Great George Street, S.W. 1; Bank-  
ruptcy Dept., 20, Great Smith Street, S.W. 1;  
General Register and Record Office of Shipping and  
Seamen, Tower Hill, E.C. 3; Gas Administration and  
Standards Dept., 6 & 7, Old Palace Yard, S.W. 1;  
Census of Production Office, 60, Pall Mall, S.W. 1.  
(See also Dept. of Overseas Trade, and Patent Office.)

A Council for Trade and Plantations was instituted by  
King Charles II. in 1660. This paid Council was abolished  
in 1782, and in 1786 a Committee of the Council on Trade  
(which, unlike the other Council Committees, had a  
President of its own) was appointed. The President of the  
Board of Trade, as at present constituted, controls the  
Department principally responsible for matters  
relating to trade and industry. The Board is concerned  
with international, commercial, and industrial policy  
and administers certain statutes including those re-  
lating to merchant shipping and seamen, bankruptcy,  
joint stock companies, gas, key industries, mer-  
chandise marks, cinematograph films, weights and  
measures, patents, designs, trade marks and copy-  
right, and mines and quarries. It administers the  
Coastguard, and also exercises control over the  
principal lighthouse authorities of the country, and  
over the construction of works on tidal lands. It  
collects and publishes statistics of the trade and  
industry, shipping and navigation of this country,  
its Dominions and Protectorates, and foreign coun-  
tries, as well as particulars of customs tariffs,  
regulations &c., and publishes a weekly journal of

\* Acting.

commercial information. The Food Council is attached to this department. The Department arranges the provision of all sea transport required for the conveyance of personnel and stores by the fighting services and other Government Departments. The Clearing Office for Enemy Debts, a temporary Department, is under the charge of the Board of Trade. Jointly with the Foreign Office the Board of Trade controls the Overseas Trade Department.

*President, Rt. Hon. Walter Raudman, M.P.* £5,500

**Registrar, T. J. D. Atkinson, o.s.e.** £500 to £500

**Secretary, S. J. Page, m.c., L.L.B.** £500 to £500

**Asst. to Sec., I. G. Jackson, £500 to £500**

### TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1828. The Commissioners of the Treasury of the United Kingdom consist of the First Lord, who is usually Prime Minister, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House. These plans being accepted, modified, or rejected by the House.

**PRIME MINISTER AND FIRST LORD OF THE TREASURY—The Rt. Hon. James Ramsay MacDonald, m.p.** £5,000

**Private Sec., J. A. N. Barlow, c.s.e., c.s.e. (Principal Secretary); H. G. Vincent, c.s.e. (Second Principal Secretary); N. M. Butler, c.s.e., m.s.e., m.s.e. (Watson, c.s.e. (Private Secretary)); H. B. Usher, Miss R. Rosenberg, c.s.e. (Personal Private Secretary).**

 Sec. to Committee, F. W. Lascelles, m.c., House of Lords, S.W. 1.

## TRINITY HOUSE, Tower Hill, E.C. 3.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1534, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until the Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland, the Channel

Ireland and Gibraltar, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

#### ELDER BRETHREN

**Master**, Field-Marshal H. R. H. the Duke of Connaught and Strathern, K.G.; **Deputy Master**, Vice-Adm. Sir Robert Mansell, K.C.V.O., C.B.E.; **Elder Brethren**, H. M. ## APPELLATE TRIBUNALS.

THE JUDICIAL COMMITTEE OF THE  
PRIVY COUNCIL.

Office, Downing Street, Whitehall, S.W. 1.

THE Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India, and every British Dominion. The Judicial Committee of the Privy Council consists of the Lord Chancellor, Lord President, ex-Lord President, the Lords of Appeal in Ordinary (see col. 2), and such other members of the Privy Council as shall from time to time hold or have held "high judicial office" within the meaning of the Appellate Jurisdiction Act, 1856 and 1857. Among the last are included Viscount Hailsham, Viscount Buckmaster, Lord Warrington of Glyffe and Lord Salvesen. Sir John Wallis is a member by virtue of section 30 of the Judicial Committee Act, 1833; Sir George Rivers Lowndes and Sir Dinah F. Mulla (Appellate Jurisdiction Act, 1857); and the following judges from the Dominions beyond the Seas (various Acts, 1855-1858):—Sir Charles Fitzpatrick (Canada); Sir James Rose-Innes (S. Africa); Chief Justice Lyman Poore Duff (Canada); Sir Isaac Alfred Isaacs (Australia); Chief Justice Sir William Mulock (Ontario); Sir Lancelot Sanderson (Bengal); Chief Justice Sir Michael Myers (N.Z.); Chief Justice Sir Frank Gavan Duffy (Australia); and Chief Justice Sir Johannes Wilhelmus Wessels (South Africa).

Registrar of the Privy Council (and Registrar of Ecclesiastical Causes), Sir Charles Neish, K.B.E., C.B., Barrister-at-Law ..... £1,500  
Chief Clerk (Judicial), W. Reeve Wallace, C.B.E. .... £800  
Second Clerk, D. G. Lys ..... £450

## THE HOUSE OF LORDS.

THE Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords, which is the ultimate Court of Appeal from all the Courts in Great Britain and Northern Ireland. It is constituted as under:—

In Scotland the principal local court is the Sheriff Court. The Judge Ordinary is the Sheriff-Substitute, and the Sheriff is an Appeal Judge. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of practically all serious crime except murder, treason and rape, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

Prosecutions are conducted by Crown officials at the public expense; the Lord Advocate and his deputies prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

The Address of the *Secretary of the Sheriffs-Substitute Assoc.* is County Buildings, Glasgow.

## ADOPTION OF CHILDREN.

In *England and Wales* the adoption of children is regulated by the Adoption of Children Act, 1926. An Order of Court is necessary to legalize the adoption, and the Act provides a number of safeguards. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; but does not alter the child's rights in property of his real parents (e.g., on intestacy) nor give the child rights in respect of the adopter's property. The Act provides for a register of adopted children. Applications are made to the High Court (Chancery), County Court, or Magisterial Bench. Orders will not usually be made for a man to be sole adopter of a girl, and applicant must be twenty-five years of age, or older.

*Scotland*.—The Adoption of Children (Scotland) Act, 1930, makes similar regulations for Scotland as from Oct. 1, 1930, and directs the Registrar-General for Scotland to establish and maintain an Adopted Children Register. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application.

## AFFIDAVITS.

*Affidavits* are written declarations on oath used (principally in Court proceedings) for supplying evidence in writing instead of by oral testimony in open Court. The person making the Affidavit is termed the Deponent. Statements of facts in an Affidavit must be within the Deponent's own knowledge. Any document or writing, e.g., a deed, letter, &c., referred to in an Affidavit and annexed to it, is termed an Exhibit. Affidavits may be sworn in England before a Commissioner for Oaths and certain Court officers so authorised. (Commissioner's fee, 2/-.)

Instead of the more solemn Oath or Affidavit, a *Statutory Declaration* is sometimes used. The form begins:—"I ..... do solemnly and sincerely declare," and ends:—"I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the Statutory Declaration Acts 1835." Examples of its use are:—To prove possession and ownership of land. To prove handwriting. As to pedigree. To explain loss of a document, e.g., Share Certificate, Pawn Ticket, &c. They may be made before any Justice of the Peace (without fee) or other officer authorised to administer oaths. (Commissioner's fee, 2/-; Stamp Duty, 2s. 6d.)

It is *Perjury* knowingly to make a false statement on oath, e.g., in an Affidavit. It is a *Misdemeanour* to make a false Statutory Declaration (Perjury Act 1911, Sec. 1 & Sec. 5).

In *Scotland* offences are punishable under the False Oaths (Scotland) Act, 1933.

## BIRTHS (REGISTRATION).

(For Certificates, see p. 343.)

WHEN a birth takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—  
1 The father or mother of the child. If they fail, 2 The occupier of the house in which the birth happened; 3 A person present at the birth; or, 4 The person having charge of the child. The duty of attending to the registration

therefore rests firstly on the parents. The registration must be made within 42 days of the birth. Failure to do this without reasonable cause, involves liability to a penalty of forty shillings. If at the end of 42 days the birth is not registered, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days), unless the Registrar is requested to attend at a residence or at the house where the child was born, when he may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months no birth can be registered without the Registrar-General's consent, and on payment of further fees, amounting to ten shillings. In *Scotland*, after the lapse of three months, it can only be registered on the authority of the County Sheriff. The regulation that no birth in *England and Wales* could be registered after seven years was revoked in 1922, but late registration cannot be allowed unless satisfactory evidence is supplied to the Registrar-General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts under the Notification of Births Act, 1907 (as extended by an Act of 1915), notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered, accompanied by either a certificate of doctor or midwife, or a declaration that no doctor or midwife was present at the birth, and that the child was not born alive.

The re-registration of the birth of a person under the *Legitimacy Act, 1926*, is provided for in that Act (see p. 347).

*Birth at Sea* The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

*Birth Abroad* Consular Officers are authorised to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

## BRITISH NATIONALITY.

The law as to British Nationality is mainly to be found in the *British Nationality and Status of Aliens Act, 1914*, as amended by certain Acts passed in 1928 and 1932. It is important to notice that the Act of 1914—which defines a natural-born British Subject—does not affect the status of any person born before Jan. 1, 1915.

The following are deemed to be British Subjects, namely:

1. Any person born within His Majesty's dominions and allegiance.
2. Any person born out of His Majesty's Dominions, before Jan. 1, 1915, whose father's father was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

3. Any person to whom a Certificate of Naturalization has been granted, or who has acquired British nationality by reason of annexation of territory, or by special Act of Parliament.

4. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

5. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions:—

(a) in the case of a child born before January 1st, 1915,

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

(b) in the case of a child born after January 1, 1915,

(i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

6. Any person born out of His Majesty's dominions whose father was at the date of the birth a British subject, and who fulfils any of the following conditions—*e.g.*, if either

(i) his father was born within His Majesty's allegiance; or

(ii) his father had a certificate of Naturalization; or

(iii) his father had become a British subject by reason of any annexation of territory; or

(iv) his father was, at the date of the birth, in the service of the Crown; or

(v) his birth was registered at the British Consulate within one year or, in special cases, two years or, in the case of a person born on or after January 1, 1915 who would have been a British Subject if born before that date, within 12 months after August 1, 1922.

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty, &c., His Majesty exercises jurisdiction over British subjects.

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21, and abandons any other nationality he may have acquired.

7. A person born on a British ship

Loss of BRITISH NATIONALITY.—A British subject loses his British nationality:—

(a) if by any voluntary or formal act he becomes naturalized in a foreign country;

(b) if, in certain cases, he makes a declaration of allegiance. These cases are:—

(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship

and is also by birth or becomes during minority a subject of any foreign State,

(ii) where a person is a British subject, but was born out of His Majesty's Dominions, and

(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that state who has been naturalized as a British subject may divest himself of that Status;

(c) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality;

(d) in the case of a woman, if she marries an alien;

(N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)

(e) in the case of a person to whom a Certificate of Naturalization has been granted if the Secretary of State revokes the Certificate;

(f) if the territory of which he is an inhabitant is severed from the Crown; *cf.*, *e.g.*, the cases of the inhabitants of Hanover and Heligoland.

ACQUISITION OF BRITISH NATIONALITY.—An alien may acquire British nationality:—

(a) by special Act of Parliament;

(b) by the conquest, annexation, or cession of the territory of which he is an inhabitant;

(c) in the case of a woman, by marriage with a British subject, and

(d) by naturalization.

Naturalization.—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after January 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

(a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;

(b) be of good character and have an adequate knowledge of the English language; and

(c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application for a certificate which may be obtained (price 6d.) from H.M. Stationery Office.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £10, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application is not returnable, whether or not a Certificate is granted.

*N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.*

**STATUS OF ALIENS.**—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate lingue*, but are triable in the same manner as if they were natural-born subjects.

**ADMISSION, SUPERVISION AND DEPORTATION OF ALIENS.**—Under the Aliens Order, 1920, any alien coming from outside the United Kingdom must obtain the leave of an Immigration Officer to land in the United Kingdom and such leave is refused in many cases, e.g., where the alien is without means, or (if he is seeking employment) is unable to produce a Permit issued by the Minister of Labour. Provision is also made (Article 6 of the Order) for the registration of resident aliens and (Article 12) for the deportation of aliens by order of the Secretary of State, which can be made on various grounds. The Aliens Order, 1920, was made under the Aliens Restriction Act, 1914, as amended and extended by the Aliens Restriction (Amendment) Act, 1929.

#### BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp. 424-425 of the 1921 "WHITAKER." The Office of the Registrar of Business Names is at Somerset House, W.C. 2.

#### CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS.

*England and Wales.*—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3s. 7d., viz., 1s. for search, 2s. 6d. for the certificate, and 1d. for the stamp affixed thereto. (When application is made by post the charges are 5s. 1d.) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1896, Birth or Death, 1s. ;

Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6d.; Savings Banks Act, 1887, Birth, Death, or Marriage, 1s.; National Insurance Act, 1911 and 1913, Birth, 6d., Marriage, 1s.; Industrial Assurance Companies Act, 1896, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 1s., but only from the local Registrar.

*English Registers.*—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the Society of Genealogists at Chaucer House, Malet Place, London, W.C. 1.

*Scottish Registers of Births, Marriages, and Deaths.*—Parish registers were instituted for these in 1552, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 2s. 1d. for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1920 are now in his possession. There is a general index to the registers which may be searched on payment of 2s. A search of the index of a particular parish is 1s. A fee of 20s. is payable for a search of all the Scottish registers, and 1s. is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 2s. 1d. The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

#### COPYRIGHT.

The law of copyright is contained in the Copyright Act, 1911, under which copyright subsists automatically, without registration, in every original literary, dramatic, musical and artistic work. The provisions of the Act were explained on pp. 425-426 of the 1921 "WHITAKER." The Copyright (Home Convention) Order, 1923, extends the Copyright Act 1911 to works by citizens of foreign countries in the Copyright Union on conditions set out in the Order.

*Voluntary Registration at Stationers' Hall.*—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 5s. for a Book, and 2s. 6d. for Fine Art; certified copies 2s. In either case (Office open on Wednesdays only, 11 a.m. to 12 noon, and 2 to 4 p.m.) Such entries are of value in proving the existence of a work on a given date in the case of infringement.

#### DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have three days of grace allowed; thus, a bill dated 1 Jan. at two months' date is not due until March 4. If a bill or note is payable by instalments to be paid "punctually," this does not exclude the days of grace (*Schaverien v. Morris*, 37 T.L.R. 366). Bills drawn at sight, or on demand, must be paid on presentation without days of grace. In the

United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

#### DEATHS.

(For Certificates, see p. 343.)

*In England and Wales.*—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons.—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. It is important that every death should be registered and a certificate obtained before the funeral and delivered to the clergyman or other person who performs the funeral or religious service. If at the end of fourteen days the death is not registered, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless the Registrar is requested to attend at a residence, when a fee of one shilling is payable. After twelve months no death can be registered without the Registrar-General's consent and on payment of fees amounting to ten shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered the death, or (2) until the Coroner has made a disposal order. (*Births and Deaths Registration Act, 1926, ss. 1, 2.*)

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (*See under Births (Registration), p. 341.*)

*Death at Sea.*—The master of a British ship must record any death on board and send particulars to the Registrar-General of Shipping.

*Death Abroad.*—Consular Officers are authorised to register deaths of British subjects occurring abroad. Certificates are procurable at Registrar-General's Office, London.

*In Scotland,* the rules of registration are similar, but (1) the death must be registered within 8 days; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1864, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered.

This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

*CORONERS' INQUESTS.*—Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Coroners do not intrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. With a view to avoiding duplication of proceedings it is now provided that if some person has been charged before examining Justices with murder, manslaughter or infanticide, the Coroner shall adjourn his inquest until after conclusion of the criminal proceedings (Act of 1926, s. 20). On application by the Attorney-General the High Court may order a new inquest if the interests of justice so require. A jury is only essential in the five cases specified in the Coroners (Amendment) Act, 1926, but may be summoned in any other case if the Coroner thinks fit. The jury is to be composed of not more than 11 nor less than 7 "good and lawful men" (sex disqualification now removed). If the minority is not more than two the Coroner may accept the verdict of the majority of the jury. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a witness is bound to attend. The fine for defaulting jurymen or witnesses is any sum not exceeding £5. (*See, generally, the Coroners Act, 1887, and the Coroners (Amendment) Act, 1926.*)

*In Scotland* there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see p. 340*). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public inquiry is held before the Sheriff and a jury.

#### BURIALS.

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will, or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should be immediately taken to ascertain the deceased's wishes from the above sources. If *Cremation* is desired it is advisable for deceased to leave instructions in writing to that effect. Cremation may not take place if deceased has prohibited that form of burial. Under the Cremation Act, 1902, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards. A person may legally leave directions

for the anatomical examination of his body. As to place of burial—unless closed by order in Council—the parish churchyard is the normal burying-place for parishioners, or any person dying in the Parish, but this will only nowadays apply in villages and the smaller towns. In the more populous districts cemeteries have long been established either by the local council, or a private company, and burials will take place there in accordance with the Cemetery Regulations. For an exclusive right to a burial space in the churchyard a facility is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by a County Council or County Borough Council; and as to place of burial, &c., see Poor Law Act, 1920, ss. 75 to 78. A person being found drowned on the sea shore is to be buried by the Overseers of the Parish. As to the necessity for registration of a death before burial see Notes under *Deaths*, p. 344.

### DIVORCE.

*Preliminary.*—Matrimonial suits may be conveniently divided into three classes, viz (1) those in which a declaration against marriage is sought; (2) those in which the marriage is sought to be upheld; and (3) those in which, the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, if one of the parties was insane, or if one of the parties was under the age of consent, i.e. 16—Age of Marriage Act, 1929. Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion; and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce.*—The third class of suit includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful, dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

*Divorce.*—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under

ecclesiastical law, e.g., cruelty, adultery, and unnatural offences; (2) those which are offences by statute, e.g., incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. In the case of a wife it was formerly not sufficient that she prove mere adultery; but now, by an Act which came into force on July 28, 1923, she may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, or rape or certain other criminal offences, or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce *a mensa et thoro*, or of adultery coupled with desertion. "Cruelty" is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty wilfully and recklessly to communicate a venereal disease; and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Powell v. Powell* (1922) para. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights, but now desertion without cause may enable the deserted spouse to obtain a decree of judicial separation, and if coupled with adultery, a divorce.

*When the decree will be refused.*—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the intimation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation, i.e., complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation. (*Crocker v. Crocker* (1921), P. 25.) There are also certain discretionary bars, as, e.g., where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

*Intervention by King's Proctor.*—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *nisi* is made absolute, the King's Proctor may intervene to show cause against making a decree absolute.

*Decree Absolute.*—Every decree of dissolution or nullity is in the first instance a decree *nisi*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again, but a man

may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

**Children.**—When a suit has been commenced, the children should not be removed from the person in whose custody they are at the time. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

**Alimony.**—A wife may in any cause file a petition for alimony (i.e., means of support) pending suit, provided evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one-fifth of the joint incomes is generally allowed. An order for permanent alimony may be obtained by a wife who has obtained a final decree of judicial separation.

**Protection Orders.**—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

**Costs.**—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date, and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

#### SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced, unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

#### SUMMARY JURISDICTION.

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction.

By an Act which came into force on Sept. 30, 1925, the following grounds for an application were added to those already existing: (a) cruelty to her children, (b) that her husband insists on having marital relations while suffering from a venereal disease, (c) that he has compelled her to submit herself to prostitution. A husband may apply on the ground that the wife has been cruel to his children. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £2. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an inebriate home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation; and if, having obtained an order, she commits adultery, the order may be discharged, but not if the court is of opinion that the husband condoned the adultery by failing to make payment of the separation allowances. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

#### DOMESTIC SERVANTS.

"Domestic Servant" signifies, in law, a person employed in and about a residence, e.g., cook, butler, gardener, &c.; but does not include, e.g., a governess or tutor. By general custom, one calendar month's notice, given at any time on either side, is required to terminate the contract of domestic service, but the Courts have recognized a custom for termination at the end of the first month if notice is given at the end of the first fortnight.

Dismissal without notice is justified in the event of wilful disobedience to a reasonable order, gross misconduct, dishonesty, incompetence, or permanent incapacity. A "character," however unfavourable, is a privileged statement, so long as given without malicious intent.

The Workmen's Compensation Acts impose serious liabilities upon an employer in the event of death or disablement of a servant from an accident in the course of employment, and prudent employers will protect themselves by a Policy, which can be obtained through the leading Insurance Companies for a small annual premium.

#### THE FRANCHISE.

The Representation of the People (Equal Franchise) Act, 1928, considerably amended both the qualifications for the franchise and the mode of registration of electors, and assimilated the franchises for men and women both for Parliamentary and Local Government elections.

#### PARLIAMENTARY.

The qualifications for the franchise are now the same for men and women. A person is entitled to be registered as a Parliamentary elector who is 21 years of age, and not subject to any legal incapacity; and

(a) Has the requisite residence qualification; or (b) has the requisite business premises qualification; or (c) is the husband or wife of a person having a business premises qualification.

**Residence** is the actual inhabitancy of premises, i.e., where a person's home is and where he sleeps. The residence must have been during the whole of the qualifying period, i.e., three months, in the constituency or in another constituency in the same Parliamentary borough or Parliamentary county. If not it is essential that the residence should have been successive from a Parliamentary borough or Parliamentary county contiguous to that borough or county. The Administrative County of London is treated as a Parliamentary borough.

**Business premises** means land or other premises of at least £10 yearly value. The business premises must be occupied for the purpose of the business, profession, or trade of the person to be registered.

**Universities.**—A person of full age, and not subject to any legal incapacity, who has received a degree, is entitled to be registered as a Parliamentary elector for a University constituency; also a woman who has passed the final examination and fulfilled the conditions required of women by a University which did not at the time the examination was passed admit women to degrees.

#### LOCAL GOVERNMENT.

The qualifications for the Local Government franchise are now the same for men and women. A person is entitled to be registered as a Local Government elector who is 21 years of age, and not subject to any legal incapacity; and (a) is on the last day of the qualifying period occupying as *owner* or *tenant* land or premises in the electoral area; and (b) has during the whole of the qualifying period occupied as *owner* or *tenant* any land or premises in that area; if that area is not an administrative County or a County borough, then in any administrative County or County borough in which the area is situate; or (c) is the husband or wife of a person who is entitled to be registered in respect of premises in which the person entitled, and the husband or wife reside. There is also a *service qualification* for the Local Government franchise. A person (man or woman) who inhabits any dwelling-house by virtue of any office, service or employment is deemed to occupy the dwelling house as *tenant* and so obtains the Local Government franchise provided the dwelling house is not inhabited by the employer.

#### REGISTRATION.

Each parliamentary borough and Parliamentary county is an electoral registration area, and for each registration area there is a Registration Officer. Normally, the Town Clerk is the Registration Officer for the Parliamentary Borough and the Clerk to the County Council for the Parliamentary County. It is the duty of the Registration Officer to compile the register of all persons entitled to vote as parliamentary electors or local government electors in his area. It is also his duty to comply with any directions given by the Secretary of State as to the arrangements to be made by the Registration Officer in carrying out the registration.

The electoral lists when prepared are published by the Registration Officer. A copy can always be inspected at his office, and generally at the chief post offices and other convenient places in the area, including Church Porches, Public Libraries, and Local Council Offices. The lists should be examined to see if the entries have

been correctly made. If not, claims and objections may be made as by notice directed.

The Index letters showing the nature of the qualifications of an elector are:—

#### FOR MEN.

R = Residence qualification.  
B = Business premises qualification.  
O = Occupation qualification.  
D = Qualification through wife's occupation.  
NM = Naval or military voter.

#### FOR WOMEN.

Rw = Residence qualification.  
Bw = Business premises qualification.  
Ow = Occupation qualification.  
Dw = Qualific. through husband's occupation.

#### RIGHT TO VOTE.

Every person registered as a parliamentary elector is entitled to vote at an election of a member to serve in Parliament. But at a *General Election* a person shall not vote for more than one constituency for which he or she is registered by virtue of a residence qualification, or for more than one constituency for which he or she is registered by virtue of other qualifications of any kind; which means that a person (man or woman) may, if qualified, lawfully vote twice at a General Election, but one vote must be in respect of a residence qualification, and each vote must be recorded in a different constituency.

The *Blind Voters Act, 1933*, enables a blind voter to be assisted in voting by a relative or friend.

#### ILLEGITIMACY AND LEGITIMATION. ENGLAND AND WALES.

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding *sos.* a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. An unmarried domestic servant found to be *enconcinate* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enconcinate* renders the employer liable to an action.

**LEGITIMATION.**—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry or have married whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever ever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply information for re-registration of the birth of a legitimated child.

**How to Secure Legitimacy.**—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High

Court under the *Legitimacy Declaration Act, 1898*, or the County Court for the necessary declaration.

*Rights of Legitimated Persons to take Interest in Property.*—A legitimated person may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g. a will) coming into operation after such date, as if he had been legitimate.

*Rights and Duties of Legitimated Person.*—He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

*Persons Legitimated by Extraneous Law.*—Broadly speaking, the Act provides that persons properly legitimated abroad shall be recognized as legitimated in England and Wales.

#### SCOTLAND.

*Illegitimate Children (Scotland) Act, 1930.*—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually in the Sheriff Court. Where in any action of affiliation and aliment the Court finds that the defender is the father of the child, the Court shall in awarding any sum in name of onlying expenses, or in name of aliment, have regard to the means of the pursuer and the defender, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

#### JURY SERVICE.

*Preliminary.*—The juries with which the public are most concerned are the grand juries; juries summoned to try causes in the High Court, at assizes and county courts; and those summoned to try criminal cases at assizes, the Old Bailey, and courts of Quarter Sessions, and coroners' juries.

*Qualifications.*—All natural-born subjects of the King and aliens domiciled for ten years or

more, being men or women between 21 and 60, are liable to serve as jurors.

The sex disqualification was removed in 1919, and women are now liable to serve, but a judge may order that the jury shall be composed of men only or of women only, or may, on an application made by a woman, grant her exemption in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100; a resident in a county or borough owning £10 a year in real estate or rent charge, or £25 in leaseholds; or a householder in a county or borough occupying property whose net annual value is assessed at not less than £30 a year in Middlesex and the County of London, or £20 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

*Exemptions and Disqualifications.*—Aliens (subject as above), felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries, while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of Protestant dissenters and Jews, whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs' officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaols, superintendents, &c., of lunatic asylums, doctors and pharmaceutical chemists (if actually practising), dentists, officers and men in Navy, Army, Air and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

*Special exemption.*—A judge, and, by virtue of S. 3 of the Juries Act, 1922, the sheriff, may for good reason excuse attendance on any particular jury.

*Jury Lists.*—Lists of juries are now prepared in accordance with the Juries Act, 1922, the names of persons apparently qualified as jurors being so marked on the Electors Lists (exhibited at Town Halls, Public Libraries, in church porches, &c.). Persons who deem themselves to be entitled to be exempted should communicate with the registration officer, for all whose names appear on the Jury List as *finally settled* are liable to serve.

*Grand Juries.*—Grand juries were abolished by the Administration of Justice Act 1923, except in the case of indictments for offences under certain Acts of Parliament (6 only) before grand juries of London and Middlesex.

*Juries in Criminal and Civil cases.*—An accused person indicted for an offence is tried by a "jury sworn." A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halbury's Laws of England*, Vol. 18, p. 246). In a criminal case the prisoner has a right of challenge which is of two kinds—a challenge to the array—i.e., the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, i.e., to individual

jurors, which may be peremptory or for cause. Peremptory challenge, or challenge without cause, exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. "Challenge for cause" sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, e.g., for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous, except that in civil cases the parties may agree to take a majority verdict.

**Special Juries**—Special Jurors are selected from persons having larger property qualifications, e.g., the occupier of dwelling house in a large town rated at not less than £100. Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

**Payment of Jurors**.—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 1s. on each cause tried in the High Court or a County Court, and on Circuit, 8d. In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners, the jurors are entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action be against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £50, while non-appearance at a county court may involve a fine of £5.

**Coroners' Juries**.—(See Deaths—Coroner's Inquests, page 344.)

## LEGAL AID FOR THE POOR.

### Civil Cases.

A system now exists for giving legal aid to poor persons in civil proceedings—including divorce—administered by the Law Society, Chancery Lane, W.C.2, and through various Provincial Law Societies. Under this system committees are now established throughout England and Wales. Anyone desiring this form of aid may apply to the nearest "Poor Persons Committee" for a Poor Persons Certificate, and if this is granted a Solicitor and Counsel will be allotted to act without remuneration. The Certificate can be given if the poor person is not worth £50 (excluding wearing apparel and trade tools) and the usual income does not exceed £2 a week. In special circumstances above figures may be £100, and £4 a week. The Committee may require the poor person to deposit a sum not exceeding £5 (in the first instance) to cover out-of-pocket expenses of the conducting solicitor.

Divorce proceedings under the Poor Persons system may be commenced at the Divorce Registry in London or in one of the numerous District Registries in the Provinces now authorised for the purpose, and the trial or hearing

may be in London or at the Assizes at one of the many towns at which Divorce business may now be taken under the Rules of the Supreme Court.

### Criminal Cases.

The Poor Prisoners Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an *Indictable offence* the person charged may have free legal aid, if Justices or Judge of trial commit a *Defence Certificate*. If the person's means are insufficient, such Certificate may be granted in cases where desirable, and must be given for a murder charge. In Courts of Summary Jurisdiction, assuming insufficient means, a Defence Certificate may be granted to a person if considered desirable to do so owing to gravity of charge or exceptional circumstances.

**Scotland**—In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poores' Roll" is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poores' Roll are not fixed, and each application depends on its own circumstances. The Poores' Roll was established in 1424.

## MARRIAGES.

### BY BANNS OR LICENCE.

**BANNS OF MARRIAGE**.—The Marriage Act, 1833, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. Under the Marriage Measure, 1930, banns may be published and marriage solemnized in the parish church *which is the usual place of worship* of the persons to be married or either of them although neither of such persons dwells in such parish; but this publication of banns is *in addition to* any other publication required by law. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the place in England in which the party resides, and according to the custom in Scotland in the place where the other party reside. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," post). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. Where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Mudgeley v. Wood*, 30 L.J. (P.M.A.) 57), but if a wrong and fraudulent name is given by one party, and the other party

is innocent, the validity of the marriage is not affected.

After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Marriage Act 1836, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the Ecclesiastical parish of the church in which the marriage is to take place.

MARRIAGE LICENCES are of two kinds—(1) a Common or Ordinary Licence dispensing with the necessity for Banns granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages, (2) a Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see below). It is a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By virtue of the Marriage Act, 1886, the hours for marriage are now from 8 a.m. to 3 p.m.

GENERAL NOTES.—The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service.

A MARRIAGE CERTIFICATE is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches in the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. MARRIAGE FEES are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

INFANTS cannot be lawfully married without the consent of certain persons (*vide* Guardianship of Infants Act, 1925. Sec. 9 and Schedule). Where both parents are living both must consent; where one is dead, the survivor; or if there is a guardian appointed by the deceased, the guardian and the survivor. The Age of Marriage Act, 1929, prohibits any marriage where either party is under 16 years of age.

#### MARRIAGE LICENCES FOR ESTABLISHED CHURCH.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office (23 Knight-riders St., Doctors' Commons, E.C.4), at the Vicar-General's Office (1 The Sanctuary, Westminster;

S.W.1), and at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for London and all England and Wales; those procured at the Vicar-General's Office (hours in both offices 10 to 4; Saturdays 10 to 2) are available for London and all England, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10s. 0d. No previous notice is required, and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15s. to £2 12s. 6d. By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district in the church of which the marriage is to be solemnized. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some Dioceses it is necessary for the Surrogate to procure the licence from the Bishop's registry.)

A Licence continues in force for three months from its date.

SPECIAL LICENCES are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knight-riders Street, Doctors' Commons, E.C.4 (*tel.* 6834 Central). Fees for licence stamp, &c., £25.

#### BEFORE A REGISTRAR AND IN NON-CONFORMIST BUILDINGS.

Marriages can take place in a District Registrar Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

#### NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

#### NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

#### ISSUE OF CERTIFICATE (WITHOUT LICENCE)

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

#### ISSUE OF CERTIFICATE AND LICENCE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

#### DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

##### (a) *Marriage by Certificate* :—

- a. If both parties live in the same district :—The certificate of the Superintendent Registrar of that district.
- b. If they live in different districts :—A certificate from the Superintendent Registrar of each district.

##### (a) *Marriage by Licence*.—The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

#### PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given; and if there is not within the district of residence of either party a registered building within which

marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, it may take place in a registered building of the required denomination in the nearest district.

#### MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows :—  
“I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.”; and each of the parties must say to the other, “I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband].” A wedding-ring may be, and is generally, used at a marriage at a register office.

#### MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an “authorised person” (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar’s attendance must be obtained.

The parties must at some time during the ceremony make the following declarations :—

“I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.”

Also each of the parties must say to the other :—

“I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]”; or, in lieu thereof :—

“I, A. B., do take thee, C. D., to be my wedded wife [or husband].”

#### FEES OF SUPERINTENDENT REGISTRARS.

For entering notice of a marriage by certificate in the marriage notice-book	s. d.
For entering notice of a marriage by licence in the marriage notice-book	1 0
For a certificate for marriage without licence	1 0
For a certificate for marriage by licence	1 0
For a licence for marriage	30 0
Stamp duty on a licence for marriage	10 0
For a marriage by certificate in the presence of a Registrar	5 0
For a marriage by licence in the presence of a Registrar	10 0
Exclusive of the fee for a certificate of the marriage (“marriage licence”), the total fees for a marriage by certificate, when the parties live in the same district, amount to 7s.; if they live in different districts, to 9s.	
For a marriage by licence the total fees are	£2 2s. 6d.

#### NAVAL MARRIAGES ACT, 1908.

Any officer, seaman, or marine borne on the books of one of His Majesty’s ships at sea

who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place by ceremony of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

#### MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

*Naval, Military and Air Force Chapels.*—The use of such Chapels for solemnization of marriages, either according to the rites of the Church of England, or otherwise, and for the publication of Banns, &c., is now regulated by the *Marriage (Naval, Military and Air Force Chapels) Act, 1932*.

*In Wales,* and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the *Marriages and Registration Act, 1837*.

*Jewish Marriages.*—If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member.

*Friends.*—If both parties are members of the Society of Friends (*Quakers*), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated.

The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

#### MISCELLANEOUS NOTES.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decrees must be produced.

Relaxations have been made by *Marriage (Prohibited Degrees of Relationship) Acts, 1907 to 1931*, which successively permitted the following marriages, *i.e.*

With a deceased wife's sister.	Act—1907.
„ deceased brother's widow.	Act—1921.
„ deceased wife's brother's daughter.	Act—1931.

With a deceased wife's sister's daughter.

„ father's deceased brother's widow.	Act—1931.
„ mother's deceased brother's widow.	do.
„ deceased wife's father's sister.	do.
„ deceased wife's mother's sister.	do.
„ brother's deceased son's widow.	do.
„ sister's deceased son's widow.	do.

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

*During the lifetime of a person upon whose deceased a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for such a marriage to be contracted.*

#### MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

#### MARRIAGES OF BRITISH SUBJECTS ABROAD.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the *Foreign Marriages Act 1892*. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

- (a) That both parties are British subjects; or,
- (b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,
- (c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,
- (d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

- (a) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,

(b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or,

(c) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the Act.

It is necessary for one of the parties to the intended marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given, he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make an oath

(a) That he or she believes that there is no impediment;

(b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district, two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are payable to His Majesty's Government:—

For receiving notice of an intended marriage.....	£ s. d.
For receiving notice of a caveat.....	10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him.....	10 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place.....	5 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same.....	10 0

Marriages may be solemnized 8 a.m. to 3 p.m. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid v. Braid*, 1899, 25 T.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

#### MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF 1906. — Under the *Marriage with Foreigners Act, 1906*, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repite which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Green Noyes v. Pitkin*, 1909, 25 T.L.R. 222).

#### MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 16 years of age and a female over 16 (*Age of Marriage Act, 1929*). Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s. 6d. A certificate of proclamation of banns is only valid for three months.

Under the *Marriage Notices (Scotland) Act, 1878*, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate: fee, 2s. 6d. Such certificate of publication is only valid for three months. Under the *Naval Marriages Act, 1908*, banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to

contract a marriage in Scotland. A declaration under the *Marriage Notices (Scotland) Act* already referred to may also be filled up and the officer commanding the ship may grant a certificate.

*Irregular Marriages* are survivals of modes of marriage which were general throughout Europe in mediæval times, Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de presenti*); (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, *subsequente copula*); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*), i.e., the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 96. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5s. 1d. The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

#### MOTOR LAW.

The modern Charter of Motor Law is the Road Traffic Act 1930 and Regulations made thereunder by the Minister of Transport. This Act not only consolidated the law by repealing some thirty earlier Acts, but made numerous amendments and new provisions to keep abreast with the rapid development and modern universal use of motor vehicles. The following provisions of the law have been selected for special reference in these notes.

*Age of Drivers.*—The minimum ages are:—for motor cycle or three-wheel combination, 16 years; for private car, 17 years, for vehicle weighing 1½ tons unladen (or over), 21 years.

*Driving Licence.*—As to fee, &c., see p. 603. No person to drive without a licence, nor employ a person to drive who is not licensed. To be produced to police constable on demand; but no conviction if licence produced at a police station within five days. On application for licence declaration must be made as to any physical disability, &c., certain disabilities will involve revocation of licence.

*Speed Limits.*—The Act prescribes Speed Limits for various Classes of Motor Vehicles, but for ordinary passenger motor cars (adapted

to carry not more than seven, excluding driver) there is now no speed limit. But heavy penalties may be incurred for driving recklessly or at a speed or in manner dangerous to the public having regard to all the circumstances, nature and condition of road, amount of traffic at the time, &c.

**Pillion Riding.**—Only one person (pillionaire) on a motor-cycle in addition to driver, and then only on proper seat securely fixed behind the driver.

**Third Party Insurance.**—No person may use, or permit to be used, a motor vehicle unless covered by a Policy of Insurance in respect of third-party risk. There is to be a "Certificate" of such insurance, and this certificate of insurance must be produced by a driver to a constable on demand. Under the Regulations of Transport Ministry an applicant for a car licence under the Finance Act must with his application produce to the Licensing Authority his Certificate of Insurance.

**Highway Code.**—The Minister of Transport has compiled a Highway Code as authorised by the Act. It is issued with driving licence, and copies may be obtained from H.M. Stationery Office or booksellers, price 1s. The code is intended as a guide to persons using the road, and may be revised from time to time. Failure to observe any provision of the code is not an offence of itself, but it may be relied on as tending to establish or negative the liability of a party in any proceedings—whether civil or criminal.

**Accidents.**—In the case of an accident causing damage to any person, vehicle or animal, the driver of the motor vehicle must stop, and on request of any person having reasonable grounds for so requiring, give his name and address and identification of his vehicle. If this is not done on the spot then the accident must be reported at a police station or to a constable as soon as possible, and in any case within 24 hours.

**Reflecting Mirrors.**—Every motor vehicle, but not motor-cycle, must now be fitted with a reflecting mirror.

**Motoring Organizations.**—A.A. (Automobile Association), Fanum House, New Coventry Street, London, W.1; R.A.C. (Royal Automobile Club), Pall Mall, London, S.W.1; R.S.A.C. (Royal Scottish Automobile Club), 163 West George Street, Glasgow; R.I.A.C. (Royal Irish Automobile Club), 32-34 Dawson Street, Dublin, I.F.M.

### PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and enclosed in a cover addressed to "The Passport Office, Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W.1," or to "The Branch Passport Office, 36 Dale Street, Liverpool." The charge for a Passport is 15s. Passports are issued in London between the hours of 10 and 4 (Saturdays, 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays, 9.30 to 1). The Passport Offices are closed on Sundays and Public Holidays (except in London between the hours of 10 a.m. and noon for cases of special emergency only). Passports may be obtained through the post if a Postal Order for 15s., which should be crossed, made payable to the Passport Office, is forwarded with the application. Cheques, Treasury notes or postage stamps should not be sent in payment. Application should, if possible, reach the

Passport Office not less than four days before that on which the Passport is required.

Foreign Office Passports are granted (1) to natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

The wife of an alien is deemed to be an alien.

Passports are granted (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, Notary Public or Chartered Accountant*, resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers; (2) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Passport Office; (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned. Persons naturalised or ordinarily resident in any of the Crown Colonies may be required to obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a British subject by naturalisation, the Certificate of Naturalisation must be forwarded to the Passport Office with the Declaration or letter of recommendation. British subjects by naturalisation will be described as such in their Passports, which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

Passports endorsed as valid for the British Empire are also available for travelling to territory under British protection or mandate, not, however, including Palestine, for which a special endorsement must be obtained.

Foreign Office Passports are available for five years from the date of issue, unless otherwise stated. On the expiration of their period of validity they may be renewed for further consecutive periods of one to five years. In no circumstances are they available beyond ten years from the date of issue. Thereafter, or if at any time the Passport contains no further space for visas, application must be made for the issue of a new Passport.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Empire, to the nearest Passport issuing authority.

Persons resident in the Irish Free State should make application for their Passports to the

Passport Department, Ministry of External Affairs, Dublin.

#### CERTIFICATION OF PHOTOGRAPHS.

*Note.*—It is essential that one of the two photographs of the applicant (and wife, if to be included on the Passport) should be certified on the back as shown on the Application Form

#### Safe Custody of Passports.

Passports, when not in use, should be kept in a secure place. At the expiration of the period of validity a Passport should be returned to the Passport Office

#### PAWNBROKERS' REGULATIONS.

For the TICKET—

On goods pledged for 10s. or less. . . . . 1d.

On goods pledged for more than 10s. . . . . 1d.

*Note.*—In addition to the above, an additional charge of 1/2d for each 5s or part of 5s. lent is authorized (*Pawnbrokers' Act, 1925*).

For INTEREST—

On pledges not exceeding 40s., for every

2s. or part of 2s., per month . . . . . 1/2d.

On pledges exceeding 40s., for every half-

crown or part of half a crown per month 1/2d.

And after the first month any time not exceeding

14 days to be charged as half a month.

**FORFEITURE.**—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10s., if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—i.e., the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one halfpenny; when the loan is above 5s., one penny.

**SPECIAL CONTRACTS.**—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s., provided that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a

month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as in the case of ordinary pledges for more than 10s.

#### POOR LAW.

The Poor Law in England and Wales is now administered through *Public Assistance Committees*, constituted for Counties and County Boroughs, which take the place of the old Boards of Guardians. The law is consolidated in the Poor Law Act, 1930.

#### RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

#### VACCINATION.

In England and Wales vaccination is compulsory within six months from birth, the obligation to comply with the law being imposed on the parent or other person having custody of the child. The local Public Vaccinator (a doctor appointed by the local authority) will vaccinate free of charge. Penalties are incurred for non-compliance with the law.

Exemption may be obtained if a parent, within four months from the birth, makes a declaration that he conscientiously believes that vaccination would be prejudicial to the health of the child.

#### WARD OF COURT.

By appropriate legal process an Infant may be made what is termed a Ward of Court in the Chancery Division of the High Court. In this way judicial control of the Infant may be secured, the court assuming and exercising wide powers in respect both of the person and property of Wards of Court. Legal advice will obviously be necessary as to the circumstances in which an order might be made in any particular case.

#### WILLS.

**REASONS FOR MAKING A WILL.**—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—i.e., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. Assuming a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, but one demanding the most serious attention. It is only after a person is dead, and

cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be often repeated. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, signed by the testator in presence of two witnesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and verily legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

**TESTATOR OR TESTATRIX.**—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

**ESTATE.**—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like.

**RESIDUARY LEGATEES.**—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

**TO BEGIN A WILL.**—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

**TO END A WILL.**—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said — sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this — day of —, 19—."

**EXECUTION OF A WILL AND WITNESSES.**—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and

charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator (or testatrix, as the case may be), in the presence of us, both present at the same time who in his (or her) presence and in the presence of each other have hereunto set our names as witnesses.  
 THOMAS SMITH  
 [Signature of Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence." &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

**CODICIL.**—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

**EXECUTORS.**—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

**APPOINTMENT OF TRUSTEES.**—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed

executor or trustee of a will. See PUBLIC TRUSTEE, *post*.

**TRUSTS OF THE WILL.**—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry, of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life (or during her widowhood), and after her death (or second marriage, which first happens) upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

**TESTAMENTARY CAPACITY.**—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (2)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

**REVOCATION.**—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1906, it is expressed to have been made in contemplation of marriage (Law of Property Act, 1905, s. 177); so that after marriage the old will should be re-acknowledged, or a new one made.

**LAPSED LEGACIES.**—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the case of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residus is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

**TO ONE PERSON ABSOLUTELY.**—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

**TO CHILDREN UNDER AGE.**—When estates are left wholly or in part to children under the age of

21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

**ALL PROPERTY TO BE INVESTED.**—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

**DUTIES OF EXECUTORS.**—After the death of the testator, the duties of the executor are briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. (For scale of duty see Index, "Estate Duty.") Under the Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Principal Probate Registry, Somerset House, or to the local District Probate Registry, or to a solicitor, and prove the will. Collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. All the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, prolate and letters of administration may be obtained through an Inland Revenue Office.

**ADMINISTRATORS.**—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

#### WHERE TO FIND A PROVED WILL.

To find a will proved before Jan. 1, 1898, the date on which the Court of Probate Act, 1897 (so & 41 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1898 were all distributed among the district registries when these institutions came into

existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which can be produced and read in any court of law. The 29 District Probate Registries established by the Act of 1857 are at:—Bangor, Birmingham, Blandford, Bodmin, Bristol, Carlisle, Carmarthen, Chester, Durham, Exeter, Gloucester, Ipswich, Lancaster, Leicester, Lewes, Lincoln, Liverpool, Llandaff, Manchester, Newcastle-upon-Tyne, Norwich, Nottingham, Oxford, Peterborough, Shrewsbury, Taunton, Wakefield, Winchester, York.

#### SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited personally, or through the Registrar of a District Registry, who will transmit the will to London in a registered letter. The fee is 1s., with an additional 5s. if forwarded by a District Probate Registrar. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies. Any will appointing the Public Trustee as Executor may be deposited with him for safe custody. (*See PUBLIC TRUSTEE, post.*)

#### PROBATE OF WILLS.

##### OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must be obtained to enter into a bond for the faithful administration of the estate, unless the whole

personal estate does not exceed £50, when one surety only will be required. They need not attend upon the first visit.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Application may be made at a District Probate Registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £500, the widows, or children, if residing at more than three miles from any Probate Registry, may apply to the Registrar of the County Court.

*Scotland.*—"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

#### SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling). A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; (2) *testated*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

### TRUST FUNDS AND INVESTMENTS.

By the *Trustee Act, 1925* (which came into force on Jan. 1, 1926), a trustee may invest trust funds in (a) any parliamentary stocks or Government securities of the United Kingdom; (b) on real or heritable securities of the United Kingdom; (c) in stock of the Bank of England or Ireland; (d) in India 7, 5½, 4½, 3½, 3 and 2½ per cent. stock or other stock issued by the Secretary of State for India charged on Indian revenue; (e) in securities the interest of which is guaranteed by Parliament; (f) in Consolidated Stock of the Metropolitan Board of Works, or of the London County Council, or Debenture Stock of the Receiver of Police, or Metropolitan Water Stock; (g) in Debenture, Guaranteed or Preference Stock of any railway in the United Kingdom incorporated by special Act, and having paid a dividend of not less than 3 per cent. on its Ordinary Stock for 10 years; (h) in United Kingdom Railway Stock when the railway is leased in perpetuity to any railway such as that mentioned in (g) *supra*; (i) in Debenture Stock in Indian Railways; (j) in "B" annuities of the Eastern Bengal East Indian, the Scinde, Punjab and Delhi, Great Indian Peninsula and Madras Railways, and in Deferred Annuities in the register of holders of Class D Annuities comprised in the register "Class C" of the East Indian Railway Company; (k) in the stock of any Indian railway upon which a fixed or minimum dividend is guaranteed by the Indian Government, or upon the capital of which the interest is so guaranteed; (l) in the Debenture or Preference Stock of any Water Company supplying water for profit, and incorporated by special Act or Royal Charter, which has paid a dividend of not less than 5 per cent. on Ordinary Stock for 10 years; (m) in the nominal or Inscribed Stock of any Municipal Borough in the United Kingdom having a population of more than 50,000, or of any County Council; (n) in the Nominal or Inscribed Stock of any commission supplying water by statute, and having power to levy rates over an area embracing not fewer than 50,000 persons, provided the rates for 10 years have not exceeded 80 per cent. of the amount authorised to be levied; (o) in Stocks authorised under the Colonial Stock Act, 1900; (p) in local bonds issued under the Housing (Additional Powers) Act, 1919; (q) in any Stock or Securities issued in respect of any Government loan in Northern Ireland; (r) in Stocks, &c., authorised for the investment of cash under the control of the Court. All such investments may be varied. As regards railway investments, the L. & N.E. Ry., the S. Ry., the L.M. & S. Ry., and the G.W. Ry., are to be treated as if they were a company which had in each of the ten years before amalgamation paid a dividend of not less than 3 per cent. on its Ordinary Stock. All the Stocks above mentioned may be purchased, although they are redeemable, and the price exceeds the redemption value; but as to those mentioned in paragraphs (g), (i), (k), (l), (m), (o), (p) and (q), *supra*, if any of them is liable to be redeemed at par or at some other fixed rate a trustee may not purchase (a) at a price exceeding 15 per cent. above par or such other fixed rate; nor (b) if the stock is liable to be so redeemed as aforesaid within 15 years of the date of purchase at a price exceeding its redemption value. §§ 3 to 11 of the same Act contain various important provisions as to the rights of trustees in the matter of investing trust monies.

As to the investments permitted by *The Rules of the Supreme Court, 1883*, see "WHITAKER" for 1927, p. 254, where *The Trusts Amendment Act, 1884* (Scotland only), *The Colonial Stock Act, 1900*, and *The Housing (Additional Powers) Act, 1919*, are also noted.

### THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1933, was £341,284,960.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of investment.

As regards investments, the Public Trustee, like a private trustee, is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts or under the general law. See *Trust Funds and Investments*. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to defray the expenses of the Department and no more. A profit is not intended.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C.2 (tel., Holborn 4,300), or at any Post Office.

There is a branch office in Arkwright House, Parsonage Gardens, Manchester 3.

### WIRELESS RECEIVING LICENCES.

HEAVY penalties are prescribed by the *Wireless Telegraphy Act, 1904*, on conviction of the offence of establishing a wireless station, or installing or working wireless apparatus without the Postmaster General's licence. Licences for receiving broadcasting programmes and messages sent for general reception can be obtained at any post office on payment of the fee of 10s.

The succession to the property of a person dying Intestate on or after January 1, 1926, is regulated by The Administration of Estates Act, 1925, which repealed the old law and established one new Code applicable both to Real Estate (land, &c.) and Personal Estate (leaseholds, chattels, investments, &c.). The Act abolished the rule of Primogeniture (inheritance by eldest son), the rights of dower (widow's third) and of curtesy (husband's life interest), and all special customs (e.g. gavelkind and Borough English). As to Personal Estate: Parents were placed on an equal footing; a mother regained her ancient preference over an intestate child's brothers and sisters; relatives of the whole blood obtained priority over those of the half blood; and relatives more remote than first cousins were excluded from the distribution. "The widow's £500" under the Intestates' Estates Act, 1890, was increased to £1,000, whether there be issue or no issue, and given also to a husband; whilst the widow or husband now also takes all the "personal chattels."

## TABLE OF EXAMPLES.

**Important.**—NOTE.—By Section 46 of the Administration of Estates Act, 1925, a surviving husband or wife takes absolutely (i) the "personal chattels"; and (ii) £1,000 free of death duties and expenses. The "residue" is then distributed as indicated in the Table.

"Personal chattels" are—Articles of household use or ornament, &c. (not used for business purposes).

In each instance it is supposed there are no nearer relations than those named.

*If the Intestate leaves.*

*The Estate is distributed as follows—*

1. Widow (or husband), and children ... ..	{ One half to widow (or husband) for life, and then to children equally. Other half to children equally at once.
2. Widow (or husband), and father and mother	{ Widow (or husband) for life, and then to father and mother equally.
3. Widow (or husband), and either father or mother, not both .....	{ Widow (or husband) for life, and then to father or mother absolutely.
4. Widow (or husband), and brothers or sisters of whole blood .....	{ Widow (or husband) for life, and then to brothers and sisters equally.
5. Widow (or husband), and brothers or sisters of half blood .....	{ Widow (or husband) for life, and then to brothers and sisters equally.
6. Widow (or husband), and nephews or nieces	{ Widow (or husband) for life, and then to nephews and nieces <i>per stirpes</i> .
7. Widow (or husband), and grandparents ... ..	{ Widow (or husband) for life, and then to grandparents equally.
8. Widow (or husband), and uncles or aunts ...	{ Widow (or husband) for life, and then to uncles and aunts equally.
9. Widow (or husband) but none of above relations or descendants .....	{ All to widow (or husband).
10. Children, and grandchildren (issue of deceased child) .....	{ Amongst children in equal shares, the grandchildren taking equally their deceased parent's share.
11. Father and mother .....	{ Father and mother equally.
12. Father or mother, not both .....	{ Father or mother.
13. Brothers or sisters of whole blood, and of half blood .....	{ Brothers and sisters of whole blood equally.
14. Brothers or sisters, and nephews or nieces (children of deceased brother or sister)	{ Amongst brothers and sisters in equal shares, the children of deceased brother or sister taking equally their deceased parent's share.
15. Brothers or sisters, and grandparent .....	{ Brothers and sisters equally.
16. Grandparents, paternal or maternal .....	{ Grandparents equally.
17. Grandparent, and uncles or aunts .....	{ Grandparent.
18. Uncles or aunts of whole blood, and of half blood .....	{ Uncles and aunts of whole blood equally.
19. Uncles or aunts, and deceased uncle's or aunt's children .....	{ Amongst uncles and aunts in equal shares, the children of deceased uncle or aunt taking equally their deceased parent's share.
20. Uncles or aunts, and nephews or nieces ...	{ Nephews and nieces <i>per stirpes</i> .
21. Cousins, i.e. deceased uncle's or aunt's children or grandchildren .....	{ Cousins <i>per stirpes</i> .
22. Any other relation than those named in preceding examples (e.g. Great grandparents), and no widow or husband .....	{ The "Crown."

**NOTES.**—The life interest of a husband or wife may be redeemed by payment of a lump sum. In ascertaining the persons entitled, regard must be had to the rule that the relative must have attained or attain the age of 21 or have married or marry under that age.

Taking *per stirpes* is taking by descent or representation. Thus, in Example 6, nephews and nieces take amongst them the share which their deceased parent would have taken if he or she had survived the Intestate.

Since January 1, 1927, in certain circumstances the mother of an illegitimate child, and an illegitimate child, may succeed to real or personal property on the intestacy of the other. (Legitimacy Act, 1926, s. 9.)

## Intestates' Estates, Scotland.

## I.—MOVABLES.

In each instance it is supposed there are no nearer relations than those named.

By the Intestate Husband's Estate (Scotland) Act, 1911, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value; if over that amount she takes £500 out of the heritable and movable estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving.

His representatives take in the proportions following:—

Widow only .....	Half to widow, half to next of kin, or if none, then to the Crown.
Husband only .....	Half to husband, half to wife's next of kin.
Widow or husband, and child or children by one or more marriages .....	One-third to widow or husband; one-third to children surviving deceased <i>equally</i> ; one-third to surviving children <i>per capita</i> * and issue of predeceased children <i>per stirpes</i> .*
Widow and father .....	Half to widow, half to father.
Widow and mother, no father .....	Half to widow, one-half to mother.
Widow, brothers or sisters .....	Half to widow, half equally amongst brothers and sisters whether of the whole or half blood consanguinean. If a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share.
Widow, mother, nephews or nieces .....	Half to widow, one-half to mother.
Father and mother .....	Whole to father
Father, mother, brothers and sisters .....	Half to father; half to brothers and sisters equally.
Father and mother and their grandchildren .....	Half to father; half to grandchildren <i>equally per stirpes</i> .*
Father, brothers and sisters .....	One-half to father, one-half equally amongst brothers and sisters.
Mother, brothers and sisters .....	Mother one-half, brothers and sisters one-half equally.
Mother, but no other kin .....	Whole to mother.
Child, children or grandchildren by deceased children .....	Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share.
Brothers or sisters and nephews or nieces .....	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share.
Brother or sister and grandfather .....	All to brother or sister.
Brother or sister and uncles or aunts .....	All to brother or sister.
Grandfather, no nearer relation .....	All to grandfather.
Father's father and mother's mother .....	All to father's father.
Grandmother, uncles and aunts .....	All to uncle and aunts, if paternal.
Great-grandfather, uncles and aunts .....	All to uncles and aunts, if paternal; if not, then to paternal great-grandfather.
Uncles and aunts .....	All equally.
Uncle and deceased uncle's child .....	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child .....	Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle.
Aunts, nephew and niece .....	Nephew and niece.
Cousins .....	<i>Equally per capita</i> .*
Nephew by brother, and nephew by half-sister .....	All to nephew by brother.

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, i.e., share it with the other next-of-kin and thus get an equal share of the mixed estate.

\* *Per capita* means by the head; *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived.

## II.—HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors."

In each instance it is supposed there are no nearer relations than those named.

<i>If Intestate die leaving</i>	<i>Heritage would descend to:—</i>
(1) Wife only ; no blood relations.	One-third to wife for life ; rest to Crown as <i>ultimus hæres</i> .
(2) Wife and child or children, and children of a deceased child...	One-third to wife for life. Fee to eldest son or his heir male. If no son then to daughters equally. The eldest son of a deceased daughter taking his mother's place.
(3) Wife and father .....	One-third to wife for life, rest to father.
(4) Wife and mother .....	One-third to wife for life. Fee to nearest heir male.
(5) Wife, brother, or sister, and children of a deceased brother or sister .....	One-third to wife for life. Fee to immediate younger brother and his heir male ; if none, then to immediate elder brother.
(6) Wife, mother, nephews and nieces .....	One-third to wife for life ; rest to nephew (eldest) or nieces equally if brother left no son. See No. 2.
(7) Wife, mother, brother, sisters and nieces (children of deceased brothers and sisters)...	One-third to wife for life ; rest to younger brother and his heirs. If the only heirs are nieces they will take equally. If no younger brother then to immediate elder brother and his heirs in the same way. If sisters but no brothers the sisters take equally, and if the sisters have predeceased leaving only daughters they succeed equally.
(8) No wife or child or issue of a deceased child .....	To brother as in (5) whom failing to lineal ancestor paternal and his heirs.
(9) Children by one or more wives and the issue of deceased children .....	All to eldest son or his issue. If no male issue then to female issue as in (2)
(10) Husband and child or children .....	Liferent of whole to husband. Fee to eldest son.
(11) Mother, but no wife, child or issue of a child, father, brother, sister, nephew or niece or more distant descendants of father .....	Nearest paternal collateral (uncle or his heirs). If none, then to grandfather and his heirs.
(12) Mother and brothers and sisters .....	All to younger brother whom failing to immediate elder brother.
(13) Mother and sisters .....	All to sisters equally.
(14) Father and brothers and sisters .....	Fee as in (5)
(15) Child and grandchild by deceased child .....	(See No. 2.) "Rest to eldest son or his issue," under head, "Wife and child," &c.
(16) Brother and grandfather .....	All to brother.
(17) Brother's grandson, and brother or sister's daughter .....	All to great-nephew, if grandson of brother (conforming to Nos. 2 and 7). All to brother's daughter, if child of eldest brother.
(18) Brother and two aunts .....	Brother, all.
(19) Brother and wife .....	One-third to wife for life ; rest to brother.
(20) Grandfather (no nearer) .....	All to grandfather.
(21) Father's father and mother's mother .....	All to father's father.
(22) Grandmother and uncle, or aunt on father's side (no nearer) .....	All to uncle or aunt.
(23) Uncle and deceased uncle's child .....	If deceased uncle was younger brother, then to child. If both brothers older than intestate, then to the younger of them or his heir male.
(24) Uncle by mother's side, and deceased uncle's or aunt's child .....	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
(25) Two aunts, nephew and niece, children of deceased brother .....	Nephew.
(26) Uncle or aunt's children, and brother's grandchildren through a son .....	Brother's grandson, or if granddaughters between, then equally (conforming to Nos. 2 and 7).
(27) Nephew by brother, and nephew by half-sister.	Nephew by brother.
(28) Nephew by deceased brother, and nephews and nieces by deceased sister .....	All to eldest nephew, son of deceased brother.

NOTE.—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations. Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

**\*SOLICITORS' CHARGES.**

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder, but the Act allows an option to a solicitor of declining to adopt it. It chiefly relates to sales, purchases and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. (In purchase or mortgage money exceeding £300 and not exceeding £5,000, the Scale charge for each party's solicitor is  $\frac{1}{2}\%$  per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. Charges are now subject to an increase of  $33\frac{1}{3}$  per cent.

**Scotland.**—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory." When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

**MEDICAL FEES.**

The following are the charges usually made by General Practitioners:—

GENERAL PRACTITIONERS.	RENTAL (OF PATIENT'S HOUSE)				
	£10 to £25	£25 to £50	£50 to £100	£100 to £200	£200 to £500
Ordinary Visit	5s to 7s 6d	5s to 10s 6d	7s 6d to 15s		
Night Visit		Double an ordinary visit			
Mileage beyond two miles from Home	5s 6d	5s to 7s 6d	5s to 10s 6d	7s 6d to 15s	
Detention per hour	5s to 7s 6d	5s to 10s 6d	7s 6d to 15s		
Letters of Advice	Same charges as for an ordinary visit				
Attendance on servants	5s	5s	5s	5s to 7s 6d	
Midwifery	2s 6d	2s to 4s 6d	4s to 7s 6d		
Administering Chloroform	25s	2s 6d	3s 6d		
<b>CONSULTANTS.</b>					
Advice or Visit alone	3s 6d	3s 6d	3s 6d		
Advice or Visit with another Practitioner	2s 6d	2s to 3s 6d	2s to 3s 6d		
Mileage beyond two miles from Home	25s	25s	25s		

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

\* It is anticipated that the increase of  $33\frac{1}{3}$  per cent. will be reduced by voluntary action by the profession, in accordance with suggestions made by the Lord Chancellor (Viscount Sankey) in May, 1928. The Lord Chancellor considered that there was a difference between non-contentious work and litigation, and he suggested, as his personal opinion, that the  $33\frac{1}{3}$  per cent. on litigation costs might be reduced to 25 per cent., and the 33 per cent. in respect of non-contentious work, including scale charges, might be reduced to 20 per cent. The Lord Chancellor was most anxious that the movement for a reduction should be a voluntary one coming from the solicitors themselves.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation, he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well; but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

**STOCKBROKERS' CHARGES.**

The Rules and Regulations drawn up by the London Stock Exchange "Committee for General Purposes" are very voluminous and technical. The customary scale of brokerage is 5s. per £100 on British (with some exceptions) or Foreign Government or American dollar stocks, and 10s. per £100 on British Railway registered stocks. On shares not exceeding 15s. the brokerage is  $\frac{1}{2}$ d. per share; not exceeding 30s., 3d. per share; not exceeding 40s.,  $\frac{1}{2}$ d.; not exceeding 60s., 6d. per share, and so on. There are minimum charges of 10s. on less than £100 and £1 on over £100.

**ACCOUNTANTS' CHARGES.**

The following scale of fees is generally applicable, but for special work fees are usually a matter of negotiation:—

**Company Audits.**—Fee fixed by Shareholders in General Meeting.

**Preparing Balance Sheets, Investigating Accounts, &c.**—Principals' time, per day of seven hours, 5 to 10 Gs. Managing Clerks (if Chartered or Incorporated Accountants), 3 to 5 Gs.; (not Chartered or Incorporated Accountants),  $\frac{1}{2}$  to 2½ Gs.; other Clerks, 1 G. and upwards. If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

**Receivers, Liquidators and Trustees in Bankruptcy.**—Usually by percentage on realisation of assets and dividends paid.

**Voluntary Liquidators.**—Usually fixed by the Company in General Meeting.

**ARCHITECTS.**

**Fees on New Works.**—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(a) If the contract or order exceeds £2,000, the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £2,000, the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

**Alterations and Additions.**—A percentage not exceeding twice the amount due for new works of the same cost.

**Fittings, Decorations, &c.**—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

**Omitted Works.**—In addition to the percentage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

**Partial Service.**—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows:—

(a) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such works.

(b) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works.

**Installments.**—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

**Work Executed with Old Materials, &c.**—In all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

**Services Not Included in Percentage.**—The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved:—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to, the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the

works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire, flood, or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

**Housing Schemes and Laying Out Estates.**—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

**Approval of Lessee's Plans.**—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease when required, the charge is as follows:—

For each £100 or part of £100 of the total cost up to £500,  $\frac{1}{2}$  per cent. (minimum fee, £3 3s.).

For each £100 or part of £100 from £500 to £5,000,  $\frac{1}{4}$  per cent.

For each £100 or part of £100 above £5,000, 1 guinea per cent.

**Litigation and Arbitration.**—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

**Land Surveying and Levelling.**—For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause 21.

**Sanitary Surveys.**—For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause 21, the minimum fee being £3 3s., in addition to the cost of assistance and appliances.

**Expenses.**—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

#### QUANTITY SURVEYORS.

##### 1.—ARCHITECTURAL WORK.

**Note.**—In cases where any of the materials used in construction are supplied by the building owner the percentage charge is based upon the estimated or actual value thereof.

##### Lump Sum Contracts.

(a) Taking out and preparing Bills of Quantities:— $\frac{1}{2}$  per cent. upon the estimated cost of the work up to £5,000; 1 per cent. above £5,000.

(b) Pricing out estimates:— $\frac{1}{2}$  per cent.

(c) Measuring and making up account of varia-

tions upon contracts including pricing:— $\frac{1}{4}$  per cent. upon the amount of the gross additions, and  $\frac{1}{4}$  per cent. upon the amount of the gross omissions.

(d) Preparing approximate estimates:— $\frac{1}{2}$  per cent. upon the estimated cost.

(e) Surveying work in progress, taking particulars, and reporting for Interim Certificates:— $\frac{1}{2}$  per cent. upon the amount of the valuation.

(f) Taking particulars on site and writing specifications for works of alterations or repair, including supervision if required:— $\frac{7}{2}$  per cent. on the amount expended or alternatively a charge based upon the time involved.

#### Schedule Contracts.

(a) Preparing, pricing and agreeing a schedule of prices:— $\frac{1}{2}$  per cent. upon the cost of the work.

(b) Measuring, bringing to account and valuing work done:— $\frac{3}{2}$  per cent. upon the gross amount of the account.

### II.—ENGINEERING WORK.

#### Lump Sum and Schedule Contracts.

Percentage charges half those for architectural work but the same scale in respect of charges based upon time.

### III.—LITIGATION AND ARBITRATION.

For qualifying to give evidence, settling proofs, conferences with solicitors and counsel, attendance in courts or before arbitrators or other tribunals, and for other services in connexion, the charge is based upon the time involved, with a minimum of 5 guineas per day.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

### CONSULTING ENGINEERS.

On *Constructional Work* the payment is usually a commission upon the estimated or actual cost of works covered by the Engineers' Specifications and (or) Drawings, or alternatively an agreed fee. The total commission is normally 5 per cent. unless such cost be less than £10,000, when remuneration is at a higher rate or by an agreed fee. Additional fees (usually 3 per cent. increase) are payable for Reinforced Concrete work.

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is  $\frac{1}{2}$  to  $\frac{3}{2}$  per cent. or an agreed fee.

A copy of Professional Rules and Practice and Scale of Fees may be obtained (price 2s.) from the Hon. Sec. of the Association, 11, Victoria Street, Westminster, S.W. 1.

### AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

#### 1. Sales by Auction.

*Freehold, Leasehold, and Copyhold Properties*, including the preparation of particulars, and advising as to reserves:—On the first £300, 5 per cent.; on the next £4,700,  $\frac{3}{2}$  per cent.; on the residue,  $\frac{1}{2}$  per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and  $\frac{1}{2}$  per cent. on residue, to include inventory and valuation.

Where the division of an Estate into a number of lots involves substantial additional work, increased remuneration as arranged between the Vendor and Auctioneer.

#### Sale before Auction.

After issue of advertisements, the same scale as by auction.

#### Non-Sale.

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

#### Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

*Furniture, Trade Stocks, and Chattels*, on the *Vendor's Premises*.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

*Plant and Machinery*.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

*Live and Dead Farming Stock (except Horses, Pedigree Live-Stock, and Milk-Recorded Cattle)*.— $\frac{3}{2}$  per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

*Horses, Pedigree Live-Stock and Milk-Recorded Cattle*.—5 per cent. on the amount realised.

On *Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor*.

—One half the commission on sale, calculated on the amount of reserve or buying-in price.

#### 2. Private Treaty Sales.

*Freehold and Copyhold Estates and Houses, and Ground Leases*.—On the first £300, 5 per cent.; on the next £4,700,  $\frac{3}{2}$  per cent.; on the residue,  $\frac{1}{2}$  per cent.; and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, of 5 per cent. up to £500, and  $\frac{1}{2}$  per cent. on the residue, to include inventory and valuation.

NOTE.—In *Sales by Auction and Private Treaty Sales*.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

#### 3. Purchases.

*Freehold and Copyhold Estates and Houses, and Ground Leases*.—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5s.

#### 4. Lettings.

*Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise*.—If the annual value be £100 or less 5 per cent. on one year's rent, where the term is for one year or less, and  $\frac{7}{2}$  per cent. on one year's rent where the term is for more than one year. If the annual value be over £100 the above scale shall apply to the first £100 and on the excess rental over that amount, where the term is for three years or less, 5 per cent. on one year's rent; where the term is for more than three years,  $\frac{7}{2}$  per cent. on one year's rent; in the case of *leases requiring the lessee to repair the demised premises* the commission is 10 per cent. on one year's rent, whatever the term. Upon the premium or consideration (in all cases), 5 per cent. up to £1,000, and  $\frac{1}{2}$  per cent. on the residue; and the commission on any

sum obtained for fixtures, furniture, or effects of any kind, of 5 per cent. up to £500, and  $\frac{1}{2}$  per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell, is let by him with an option to purchase, and the tenant afterwards exercises his option, the commission for selling, less the commission already paid on the letting, will then become payable.

*For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.*—Half the commission payable for a letting.

*On Letting Furnished Houses or Flats in Town or Country, or Shooting, including Collection of Rent.*—5 per cent. on the first year's rental, and  $\frac{1}{2}$  per cent. for the remainder of the term.

*For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.*—Half the commission payable for a letting.

*For Making or Checking Inventories of Furniture and Effects.*—A minimum fee of two guineas per day, exclusive of expenses.

*On Letting Land on Building Lease.*—(a) On Ground Rents up to £50, one year's ground rent; (b) on Ground Rents exceeding £50 and not exceeding £100, as in (a) on first £50, plus 75 per cent. on the residue; (c) on Ground Rents exceeding £100 and not exceeding £1,000, as in (b) on first £100, plus 50 per cent. on the residue; (d) on Ground Rents exceeding £1,000, as in (c) on first £1,000, plus 25 per cent. on the residue, together with 5 per cent. on the first £1,000 of the premium and  $\frac{1}{2}$  per cent. on the residue.

*On Assigning Building Agreements at a Premium.*—One-half of the scale for Letting Land on Building Lease, together with 5 per cent. on the first £1,000 of the premium and  $\frac{1}{2}$  per cent. on the residue.

#### 5. Collections or Receiverships.

10 per cent. upon gross rental of weekly property; 5 per cent. upon gross rental of other property or tithes;  $\frac{7}{8}$  per cent. upon the gross rental for the management and collection of rents on agricultural estates;  $\frac{1}{2}$  to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

#### 6. Laying Out or Development of Estates.

*For Road Construction,* 5 per cent. upon the outlay, exclusive of expenses.

#### 7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent. on the first £1,000; half a guinea per cent. on the next £9,000; and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers.*—(a) For qualifying to give evidence the charge is on Ryde's Scale; (b) to the valuer preparing the case (including negotiation for a settlement, where required) one-third additional to Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3. *Valuing for Annual Rental.*—(a) *Agricultural Property*— $\frac{7}{8}$  guineas per cent. up to £250, 5 guineas per cent. on the next £250, and  $\frac{1}{2}$  guineas per cent. beyond. (b) *Business and Residential Property*—5 guineas per cent. up to £300, and  $\frac{1}{2}$  guineas per cent. beyond. Minimum fee 5 guineas.

4. *Valuation of Furniture, Pictures, Trade Stocks, and Effects.*—5 guineas per cent. up to £500, and  $\frac{1}{2}$  guineas per cent. on the residue.

5. *Valuation of Plant, Machinery, and Trade Stocks*— $\frac{1}{2}$  guineas per cent. on first £500,  $\frac{1}{2}$  guineas per cent. on the next £4,500; on the next £5,000, 1 guinea per cent.; over £10,000, by arrangement. Valuation to include inventory. Minimum fee, 5 guineas.

6. *Valuation of Live and Dead Farming Stock*—5 guineas per cent. on first £100, and  $\frac{1}{2}$  guineas per cent. on the residue. *Valuation of Tenant Right.*—5 guineas per cent. on first £100,  $\frac{1}{2}$  guineas per cent. on next £900 and  $\frac{1}{2}$  guineas per cent. on residue. *For Settling Dilapidations.*—5 guineas per cent. on the amount of the settlement.

7. *Valuation of Hotel and Public House Fixtures, Fittings, and Contents.*—5 guineas per cent. on the amount of the valuation as settled.

8. *Valuation for Probate and Estate Duty Purposes.*—(a) *Freehold, Copyhold, and Leasehold Property.*—One guinea per cent. on the first £1,000, half a guinea per cent. on the next £4,000, and one quarter-guinea per cent. on the remainder. Minimum fee, £5 5s; (b) *Of Furniture and Effects.*—5 guineas per cent. on the first £100, and  $\frac{1}{2}$  guineas per cent. on the next £400, and  $\frac{1}{2}$  guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9. *Valuations for Rating purposes and Assessment Appeal.*—This scale applies to single Properties which have to be valued for Ratepayers, Rating Authorities, Assessment Committees or County Valuation Committees, but does not apply to the preparation of new Valuation Lists or the assessment of Special Properties or all Licensed Premises in a Rating Area. Where the net annual value does not exceed £1,000, 2 guineas per cent., plus 5 guineas; not exceeding £5,000, 2 guineas per cent., with minimum fee of 25 guineas; not exceeding £10,000, 2 guineas on first £5,000 and  $\frac{1}{2}$  guineas on residue; not exceeding £20,000, 2 guineas on first £5,000,  $\frac{1}{2}$  guineas on next £5,000, and  $\frac{1}{2}$  guineas on residue; exceeding £20,000, 2 guineas on first £5,000,  $\frac{1}{2}$  guineas on next £5,000,  $\frac{1}{2}$  guineas on next £10,000, and 1 guinea on the residue.

In addition to the foregoing, for attending before *Assessment Committees*, 5 guineas per day; and before *Quarter Sessions*, 10 guineas per day, together with travelling expenses.

10. *Preparing Specification of Dilapidations, and settling the amount if required.*—5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. *Marking, Valuation and Sale of Timber and Underwood.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £500, and  $\frac{1}{2}$  guineas per cent. on the residue.

Where one Valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

#### SHIPBROKERS' CHARGES.

A scale of Minimum Agency Charges became operative for Members of the Institute of Chartered Shipbrokers (Office, 57 St. Mary Axe, London, E.C. 3) from 1920, and has been revised from time to time. Copies may be obtained from the Secretary.

# The Royal Navy.

**Electrical Engineering Department.**

*Director*, W. McClelland, C.B., O.B.E., M.I.E.E. £1,500  
*Assistant Director and Deputy*, A. D. Constable, O.B.E., M.I.E.E. £1,000 to £1,500  
*Asst. Directors*, J. McCaffery, O.B.E., M.I.E.E.; E. T. Williams, O.B.E., M.I.E.E. £600 to £1,200  
*Superintending Electrical Engineers, Grade I*, F. Purser Fletcher, O.B.E., A.M.I.E.E.; R. Wightman, A.M.I.E.E. (with house allowance £105) £800 to £900  
*Superintending Electrical Engineer, Grade II*, E. E. Benham, M.I.E.E. (with house allowance £105) £650 to £800

**Naval Ordnance Department.**

*Director*, Capt. B. A. Fraser, O.B.F., R.N.  
*Deputy Director*, Capt. E. R. Bent, D.S.O., R.N.  
*Asst. Director*, Capt. G. W. T. Robertson, R.N.  
*Civil Asst.* W. F. Daniels, M.B.E. £500 to £600  
*Chief Inspector*, Capt. F. R. Willis, R.N. (ret.) £1,355 to £1,395

**Armaments Supply Department.**

*Chief Superintendent*, Capt. H. J. B. Hall, O.B.F., R.N. (ret.) £1,200 to £1,500  
*Deputy Chief Superintendent*, Lt. W. Wharlist, O.B.E. £50 to £1,000 (with £100 additional)  
*Sept.* T. W. Midner, O.B.E., M.A. £750 to £1,200

**Torpedoes and Mining Department.**

*Director*, Capt. H. R. Sawbridge, O.B.E., R.N.  
*Deputy do.*, Capt. J. F. B. Curlake, R.N.

**Naval Equipment Department.**

*Director*, Rear-Adm. C. P. Talbot, D.S.O. £1,953  
*Asst. Director*, Capt. S. S. Bonham-Carter, D.S.O., R.N.

**Compass Department.**

*Director*, Capt. H. L. Hitchins, R.N. (ret.) £850 to £1,000

**Dockyards Department.**

*Director*, Adm. Sir A. Percy Addison, K.B.F., C.B., C.V.O. (ret.) £1,500  
*Deputy Director*, C. R. Goodby, O.B.E., £1,200  
*Assistant Directors*, Eng. Rear-Adm. G. W. Phillips, J. S. Pringle, O.B.E.  
*Civil Asst.*, J. A. Fago, M.B.E. £550 to £700  
*Chief Constructor*, C. W. Kerridge (with house allowance £105) £700 to £850

**Signal Department.**

*Director*, Capt. A. J. L. Murray, D.S.O., O.B.E., R.N.  
**Dockyard Expense Accounts Department.**  
*Director*, O. Lance, O.B.F. £1,000 to £1,200  
*Asst. do.*, J. H. Jeffery £850 to £1,000

**Naval Store Department.**

*Director*, J. W. L. Oliver, C.B., C.B.F. £1,200 to £1,500  
*Deputy Director*, W. J. Glek, C.B.E. £1,000 to £1,200  
*Assistant Directors*, O. S. Griffiths, A. A. Pitcher, F. Weston, O.B.E. £850 to £1,000

**Victualling Department.**

*Director*, G. F. Cotton, M.A.O., O.B.E. £1,000 to £1,200  
*Assistant Director*, C. E. B. Lane £850 to £1,000

**Civil Engineer-in-Chief's Department.**

*Civil Engineer-in-Chief*, T. B. Hunter, C.B., O.B.F., M.I.C.E. £1,600  
*Deputy Civil Engineer-in-Chief*, A. L. Anderson, M.I.C.E., H. J. Young, M.I.C.E. £1,200  
*Superintending Civil Engineers*, F. G. Brighton, M.I.C.E., H. D. Donnor, M.I.C.E., F. E. Whittle, M.I.C.E. (with house allowance £105) £65 to £750  
*Chief Surveyor*, G. D. Callow, M.I.C.E. £800 to £1,000  
*Chief Surveyor of Lands*, H. F. Graham, F.S.I. £700 to £900

\* In addition to Naval Retired Pay.

**Contract and Purchase Department.**

*Director of Contracts*, W. St. D. Jenkins, C.B., C.B.E. £1,200 to £1,500  
*Deputy Director*, G. B. Cobb £1,000 to £1,200  
*Assistant Directors*, P. Dale Russell, O.B.E., P. F. Fisher, O.B.E., E. C. Jubb, O.B.E. £850 to £1,000

**Technical Costs Section**

*Principal Technical Costs Officer*, W. A. James, M.B.E., M.I.Mech.E. £600 to £800  
**Accountancy Division**  
*Principal Accountant*, W. L. Karamelli, A.A.A.A. £700 to £800

**Scientific Research and Experiment Department.**

*Director*, C. V. Drysdale, C.B., O.B.F., D.S.O., M.I.E.E. £1,200 to £1,500  
*Asst. Director*, J. Buckingham, M.A. £800 to £1,000  
*Superintendent, Admiralty Research Laboratory*, C. R. Wright, O.B.E., M.A. £800 to £1,000  
*War Office Representative*, Maj. D. S. C. Evans, M.A.

**Reserves Office.**

Queen Anne's Chambers, Tothill Street, S.W. 1.  
*Admiral Commanding Reserves*, Vice-Adm. G. K. Chetwode, C.B., C.B.E.  
*Naval Member, R.N.F.R. Committee*, Capt. H. B. Maltby, R.N.  
 Note—Except where otherwise shown, Naval and Marine Officers at the Admiralty are in receipt of Naval Pay and Allowances.

**Judge Advocate of the Fleet.**

c.o. Royal Naval College, Greenwich, S.E. 10.  
*Judge Advocate of the Fleet*, J. G. Trapnell, M.C.

 Destroyer Flotillas, Rear-Adm. A. B. Cunningham, D.S.O. (Courageous) Dec. 30, 1933  
 S.N.O., Malta, Rear-Adm. W. F. French, C.B., C.M.S. (St. Angelo) Jan. 22, 1934  
 S.N.O., Gibraltar, Rear-Adm. F. M. Austin, C.B. (Cormorant) May 2, 1933

## THE ROYAL NAVAL RESERVE.

The R.N.R. was formed in 1893, and its affairs are governed, under the Board of Admiralty, by the R.N.R. Advisory Committee, which meets as necessary.

## R.N.R. ADVISORY COMMITTEE.

Queen Anne's Chambers, Tothill Street, S.W. 1.

President, Vice-Adm. G. K. Chetwode, C.B., C.M.S. Secretary, Paym.-Lt. Com. J. H. Benwell-Leggett, R.N.

## Commanders for R.N.R. and M.M. Duties

Liverpool (30, Canning Place), Com. E. W. H. Blake, R.N.

London (P. L. A. Buildings, Trinity Square, E.C. 3), Com. M. J. Palmer, R.N.

Southampton (Prudential Buildings, Above Bar), Com. N. M. F. Corbett, R.N.

## China.

(H.M.S. Kent, Berwick, Cumberland, Cornwall, Caradoc, Suffolk; 8th Destroyer Flotilla, Aircraft Carrier Eagle; 14 Submarines; Gunboats and Sloops.) C-in-C., Vice-Adm. Sir F. C. Dreyer, K.C.B., C.B. (Kent) March 11, 1933  
 Hong Kong, Commodore F. Elliott, O.B.E. (Tamar) June 3, 1933  
 S.N.O., Yangtze, Rear-Adm. F. G. G. Chilton, C.B. (Bea) Oct. 23, 1933  
 S.N.O., West River, Capt. W. G. Benn (Taranaut) Sept. 16, 1932  
 Singapore, Capt. M. R. J. Maxwell-Scott, D.S.O., R.N. (Tamar III) Nov. 19, 1932

## America and West Indies.

(H.M.S. Norfolk, Dragon, Danae; 2 Sloops.) C-in-C., Vice-Adm. Hon. R. A. R. Plunkett-Erle-Drax, C.B., D.S.O. (Norfolk) May 11, 1932

South American Division (H.M.S. York and Exeter). Commodore A. E. Evans, O.B.E. (Freder) Nov. 1, 1933

## East Indies.

(H.M.S. Hawkins, Enterprise, Colombo; 2 Sloops.) C-in-C., Vice-Adm. M. E. Dunbar-Nashtill, V.C., C.B. (Hawkins) June 14, 1932  
 S.N.O., Persian Gulf, Capt. J. V. Creagh, D.S.O. (Shorcham) March 17, 1933

## Africa.

(H.M.S. Dorsetshire and Carlisle; 4 Sloops.) C-in-C., Vice-Adm. E. R. G. R. Evans, C.B., D.S.O. (Dorsetshire) March 9, 1933

Simonstown, Capt. J. H. Young (Afrikaner) May 25, 1933

## IMPERIAL NAVIES.

## India.

(4 Sloops; 5 other vessels.) Director, Royal Indian Marine and Principal Naval Transport Officer, East Indies (Bombay), Rear-Adm. Sir H. T. Walwyn, K.C.B., C.B., D.S.O. Oct. 5, 1928  
 Deputy Director, Capt. H. Morland, R.N., C.B. Dec. 13, 1925

## Australia.

(H.M.A.S. Australia and Canberra; 2 Cruisers and 6 Destroyers.) C-in-C., Rear-Adm. R. C. Dalglish (Canberra) April 7, 1932  
 Sydney, Capt. H. J. Peakes, R.N. (Penguin) Aug. 7, 1931

## Canada.

(4 Destroyers; 5 other vessels.) Director of Naval Service, Commodore W. H. H. C.B., R.C.N. (Guelph) July 1, 1920

## New Zealand.

(H.M.N.Z.S. Diomedes and Dunedin; 2 Sloops.) C-in-C., Rear-Adm. F. H. Watson, D.S.O. (Dunedin) April 17, 1932

## South Africa.

(4 vessels.) See African Station.

## THE ROYAL NAVAL VOLUNTEER RESERVE.

The R.N.V.R. was formed in 1902, and its affairs are governed, under the Board of Admiralty, by the R.N.V.R. Committee.

## R.N.V.R. COMMITTEE.

Queen Anne's Chambers, Tothill Street, S.W. 1. President, Vice-Adm. G. K. Chetwode, C.B., C.M.S.

## Commanding Officers of Divisions.

London (H.M.S. President, Victoria Embankment, E.C. 4), Capt. J. R. Hemsted.

Sussex, Capt. Rt. Hon. Earl Howe, C.B.E., V.D.

Tyne, Capt. E. W. Swan, O.B.E., V.D.

Mersey, Capt. E. Elgood, V.D.

Clyde, Capt. J. McKellar Robertson, V.D., A.D.C.

Scorn, Capt. E. G. C. Chevalier

East Scotland, Capt. W. F. Keay, V.D.

Ulster, Capt. Earl of Kilmorey

1914	Comus .....	3,895	4 × 6 in.

naissance) are replacing the Flycatcher (1923) type for sea work.

## U.S.A.

The "Prosperity Naval Construction Programme" of 1933 included 2 Aircraft Carriers (20,000 tons), 4 Cruisers (10,000 tons, 6½ in. guns), 4 Submarines, 2 Destroyers (1,500-1,800 tons), 2 Gunboats.

## FRENCH NAVY.

Programme designed to bring tonnage to total of 670,000 towards desired total of 722,000 tons: Capital ships, 175,000; Aircraft carriers, 60,000; Cruisers and destroyers, 390,000; Submarines, 65,000. The 26,500 ton battle cruiser *Dunkerque*, laid down in 1932, will have 8 × 13½ guns in quadruple turrets. Included in current programme are 4 cruisers (7,600 tons), in addition to the *Jean de Vienne* and *La Galissonnière* (7,600 tons) and *Emil Bertin* (5,900 tons) in course of construction. The *Chateaufort* (building at St. Nazaire) has been renamed *Georges Leygues*.

## ITALIAN NAVY.

The last (*Bolzano*) of the series of seven 10,000 Cruisers under the Washington Agreement was launched in August, 1932, and the programmes for 1932-33 include 4 cruisers of 7,000 tons.

## GERMANY'S "POCKET BATTLESHIPS."

Germany is building 5 "Pocket Battleships" of 10,000 tons displacement, heavily armoured, 50,000 h.p., with 6 11-in. guns (670 lb. projectile), 8 6-in. guns, and 4 3½-in. guns, with 6 torpedo tubes. "A" (*Deutschland*) was laid down at Kiel early in 1930 and was put into commission April 1, 1933; "B" was launched the same day, and "C" has been laid down.

### NAVAL CASUALTIES IN THE WAR.

Casualties to all ranks of Royal Navy and Royal Naval Reserve, including Mercantile Marine Reserve while serving in H.M. ships and merchant ships, but excluding casualties of the Royal Naval Division and British Mercantile Marine losses:—

	Officers.	Men.
Killed in action or died of wounds	2,074	20,735
Died	400	11,433
Wounded in action	549	3,961
